## Keynotes

10 Years Model-Driven — What Did We Achieve?

*Bernhard Schätz*

Developing Mobile Applications for Multiple Platforms

*Hassan Charaf*

## ECBS Infrastructure

A Contribution to Techniques for Building Dependable Software Systems

*Matej Košík and Jiří Šafařík*

Distributed File System with Online Multi-master Replicas

*Luboš Matějka, Jiří Šafařík, and Ladislav Pešička*

Replacing Object-Oriented Design Patterns with Intrinsic Aspect-Oriented Design Patterns

*Pavol Bača and Valentino Vrančić*

Transformation of Relational Databases to Transaction-Time Temporal Databases

*Ján Máté and Jiří Šafařík*
Embedded Systems
Smart Audio/Video Playback Control Based on Presence Detection and User Localization in Home Environment ................................................................. 44
   Bojan Mrazovac, Milan Z. Bjelica, Istvan Papp, and Nikola Teslic
A Generic Embedded Robot Platform for Real Time Navigation and Telepresence Abilities ....................................................................................................................... 54
   Saša A. Vukosavljev, Dragan Kukolj, Istvan Papp, and Vladimir Kovačević
One Step Ahead MPC for an Automotive Control Application ................................................................................................................................. 61
   Andreea Balau and Corneliu Lazar
OSEK Based Embedded Networked Controller Handling Communication Delays ................................................................................................................................. 71
   Florin Catalin Braescu, Constantin Florin Caruntu, Lavinia Ferariu, and Corneliu Lazar
An Integrated Audio and Video Communication System for Digital Television Sets ..................................................................................................................................... 78
   Ivan Kastelan, Mihajlo Katona, Istvan Papp, Mile Davidovic, and Ivan Resetar
Embedded System Architecture for Real-Time Rule-Based Reasoning ....................................................................................................................................... 85
   Mária Pohronská and Tibor Krajčovič
Analyzing Content Life Cycle in Mobile Content Sharing Environment ................................................................................................................................ 92
   Kristóf Csorba, Péter Ekler, and Imre Kelényi

Testing & Verification
faultInjector: A Tool for Injection of Faults in Synchronous WS-BPEL Processes ............................................................................................................................................. 99
   Denitsa Manova, Ilina Manova, Sylvia Ilieva, and Dessislava Petrova-Antonova

Modeling & Simulation
Fitting a Model to Noisy Data Using Low-Order Implicit Curves and Surfaces ................................................................................................................................................. 106
   Levente Hunyadi and István Vajk
Model Predictive Control for Real-Time Simulation of a Network-Controlled Vehicle Drivetrain .............................................................................................................................. 115
   Constantin Florin Caruntu, Doina Onu, Florin Catalin Braescu, and Corneliu Lazar
Education & Training

Design of the Simulator for Teaching Computer Architecture and Organization ................................................................. 124

Zaharije Radivojević, Miloš Cvetanović, and Jovan Đorđević

Industrial Reports

Designing a Knowledge Modeler Framework ................................................................. 131

Ferenc Kovács, Zoltán Dávid, and Renáta Iváncsy

Identifying and Utilizing Routines of Human Movement ........................................ 135

Marcell Fehér and Bertalan Forstner

Region-of-Interest Real-Time Tracking and Projection System ..................................... 139

Milos Pilipovic, Ivan Kastelan, and Miko Leporis

An Approach to Parallelization of Sequential C Code ............................................. 143

Nikola Vranic, Vladimir Marinkovic, Miodrag Djukic, and Miroslav Popovic

Poster Abstracts

High-Performance Networked SCADA Architecture for Safety-Critical Systems ....................... 147

Branislav Atlagic, Dejan Milinkov, Mihaly Sagi, and Bojan Bogovac

Vision Based Area Discovery with Swarm Robots .................................................. 149

László Blázovics, Csaba Varga, Kristóf Csorba, Marcell Fehér, Bertalan Forstner, and Hassan Charaf

Utilization of a Genetic Algorithm in Division of Road Traffic Network for Distributed Simulation ................................................................. 151

Tomas Potuzak

State of the Art in Distributed File Systems: Increasing Performance ......................... 153

Pavel Bžoch and Jiří Šafařík

Digital Logic Simulator .................................................................................................... 155

Vladimir Pavlović, Žarko Stanisavljević, Boško Nikolić, and Jovan Đorđević

Is Automotive SPICE Suitable to Assess Product Lines-Based Software Process? .................. 157

Giuseppe Lami, Fabrizio Fabbrini, and Mario Fusani

Processor Functional Test Generation - Some Results with Using of Genetic Algorithms ................................................................. 159

Ján Hudec

Establishing a Service Tree-Based Approach of Complex Systems ............................. 161

Dávid Zakál and László Lengyel

Design Smell Detection with Similarity Scoring and Fingerprinting: Preliminary Study ............................................................................. 163

Peter Liška and Ivan Polášek
Designing Tests for Adaptive Formative E-Assessment in Project Management
Constanta-Nicoleta Bodea and Maria-Iuliana Dascalu

Design of a Component-Based Simulation Framework for Component Testing Using SpringDM
Tomas Potuzak, Richard Lipka, Jaroslav Snajberk, Premek Brada, and Pavel Herout

Author Index
