26th Annual Technical Conference of the American Society for Composites 2011

The 2nd Joint US-Canada Conference on Composites

Montreal, Quebec, Canada
26-28 September 2011

Volume 1 of 3

Editors:

Michael Hyer  Ozden Ochoa
Suong Hoa  Mehdi Hojjati

ISBN: 978-1-61839-196-4
# TABLE OF CONTENTS

## VOLUME 1

### APPLICATIONS

- **Advanced Carbon Fiber Composite (CFC) Materials for Antenna Applications**
  - A. Mehdipour, I. D. Rosca, A.-R. Sebak, C. W. Trueman, S. V. Hoa
  - Page 1

- **Reinforced Continuous Carbon Fiber (RCCF) Composite Materials for Microwave Applications**
  - A. Mehdipour, I. D. Rosca, A.-R. Sebak, C. W. Trueman, S. V. Hoa
  - Page 17

- **On The Application of a Hybrid Spectral Approach in the Image-Based Measurement of Displacements at Micro-Scale in Composites**
  - F. Mortazavi, M. Lévesque, I. Villemure
  - Page 25

### BIO-INSPIRED COMPOSITES

- **A Novel Nitrate-Free Sol-gel Process for Production of Bioglass® 45S5**
  - E. Rezabeigi, P. M. Proa-Flores, R. A. L. Drew, P. Wood-Adams
  - Page 34

- **Rigid Biofoam Composites from Functionalized Soy Oil Based Biopolyurethane and Microcrystalline Cellulose (MCC) for Automotive Applications**
  - X. Luo, A. Mohanty, M. Misra, M. Kazemizadeh
  - Page 43

- **Influence of Mineral Content and Nanostructure on Mechanical Properties of Porous Hydroxyapatite/Collagen Scaffolds Created Using a Biomimetic Mineralization Process**
  - D. E. Rodriguez, L. B. Gower
  - Page 53

- **Indentation Properties of NC Dragonfly Wing By Nanoindentation**
  - R. Talucdher, Y. Sergey, S. Lingaiah, K. Shivakumar
  - Page 67

- **Toughness Amplification in Natural Composites**
  - R. Rabiei, S. Bekah, F. Barthelat
  - Page 82

- **Ductility in Composites: Influence of Ply-Cuts on the Flexural Behavior of Carbon Fibre Reinforced Polymer (CFRP)**
  - R. Malkin, M. Yasaee, I. P. Bond, R. S. Trask
  - Page 99

- **A Biomimetic Composite Duplicating the Structure and Micromechanics of Nacre**
  - D. Zhu, F. Barthelat
  - Page 118

- **Deformation and Fracture Mode Transition in Nacre and Bone-like Composite Materials**
  - R. Rabiei, S. Bekah, F. Barthelat
  - Page 125

### DAMAGE

- **In-Situ Damage Sensing of UHMWPE/Epoxy Woven Composites Under Biaxial Load**
  - Page 136

- **Microstructure Level Simulation of Foreign Object Damage in Woven Ceramic Matrix Composites with Material Point Method and Finite Element Analysis**
  - Page 146

- **Monitoring Damage Growth in Adhesively Bonded Repairs**
  - Page 165

- **Resistance of Thermally Cycled Composites to Lunar Dust Abrasion**
  - F. Martin, M.-J. Potvin
  - Page 185

### DYNAMIC EFFECTS ON COMPOSITES

- **Dynamic Effects on Composites**
  - D. Liu
  - Page 200

- **A Multi-Parameter Approach to Impact Performance Characterization**
  - P. Feraboli, K. T. Kedward
  - Page 202

- **Fracture in Glass/Epoxy Multilayers from Low-Velocity Impact**
  - H. Chai, G. Ravichandran
  - Page 217
A Study of Impact Response of Electrified Organic Matrix Composites ......................................................... 224
R. L. Sierakowski, I. Y. Telichev, O. I. Zhupanska

Numerical Simulation of the Impact Resistance Improvement of CFRP Laminates Due to Through-the-Thickness Stitching ........................................................................................................ 244
A. Yoshimura, T. Nakao, N. Takeda

Analytical and Experimental Investigations of the Impact Response of Grid Stiffened E-Glass/Polypropylene (PP) Composite Panels .......................................................... 255
P. Jadhav, P. R. Mantena, R. F. Gibson

Modeling Nano-Particle Colloid/Fabric Composites ............................................................................. 269
Z. Dong, C. Sun

Impact, Damage and Penetration Modeling of Thick-Section Composites Using LS-Dyna MAT162 281
B. A. Gama, T. A. Bogetti, J. W. Gillespie Jr.

Energy Loss Due to Transverse Plastic Deformation of Fibers in Textile Fabric Impact Processes 301
Y. Miao, J. Yu, Y. Wang, C.-F. Yen, D. Swenson, B. Cheeseeman

Compression Response of 3D Woven Composites Subjected to High Loading Rates 320
M. Pankow, A. M. Waas, C.-F. Yen, S. Ghiorse

Interfiber Failure Criteria for Composite Materials Under Static and Dynamic Loading 339

Effect of Explosions on Sandwich Structures 350
S. Abrate

Response of Composite Materials to High Pressure Waves 365
D. Liu, G. Li, B. Raju

Dynamic Crush Response of RTM vs. Roll Wrapped Crash Boxes 375
A. L. Browne, N. J. Johnson, M. E. Botkin

Crush Behavior of Thin Composite Plates 395
S. T. Mane, G. Reyes, P. K. Mallick

Dynamic of Bistable Unsymmetric Fiber-Reinforced Composite Laminates 410
G. A. Vogl, M. W. Hyer

Vibration and Dynamic Response of Hybrid Wind Turbine Blades 427
N. Nanami, O. O. Ochoa

ENERGY STORAGE

Self-Activated Carbon Fiber Reinforced Shape Memory Polymer Composites 442
C. Ayranci, H. Yang, F. Ko, M. Taya

Ultra-Violet Assisted Direct-Write Technique for the Fabrication of Nanocomposite Mechanical Energy Storage Devices 451
M. Becker, D. Therriault

Assessment of Manufacturing Limits and Process-Ability for Composite Structures with Embedded Energy Devices 460
F. Gasco, P. Feraboli

ENVIRONMENTAL EFFECTS

Coatings for Retardation of Thermo-Oxidative Degradation in High Temperature Polymer Matrix Composites 470
N. An, G. P. Tandon, K. Pochiraju

Degradation of Perforated E-Glass/Epoxy Plates Submerged in Water and Acidic Media under Elevated Temperature 486
S. Eslami, F. Taheri

Influence of Moisture Absorption on Properties of Fiber Reinforced Polyamide 6 Composites 500
R. T. D. Prabhakaran, T. L. Andersen, A. Lystrup

Effects of Liquid Environment on the Mechanical Performance of Carbon Fiber Reinforced Thermoplastic Stiffened Structures Made Using Automated Fiber Placement 511
Z. August, C. Quinn, X. Cai, S. V. Hoa
FAILURE

Modeling the Effects of Kinking and Delamination on the Compression Strength of Fiber Reinforced Laminated Composites ................................................................. 528
P. Prabhakar, A. M. Waas

Analysis and Control of Smart Composite Laminates Using Piezoelectric Materials ................................................................. 530
Z. Hasan, A. Multana

A Non-Local Approach to Simulation of Damage in Laminated Composites ................................................................................................. 547
A. Forghani, N. Zobeiri, R. Vaziri, A. Poursartip, F. Ellyin

Testing and Analysis of the End-Notched Flexure Specimen for Composites Under Mode-II Fracture ................................................................. 563
V. Ranatunga, S. Clay

Delamination Onset Detection by AE Monitoring in CFRP Composites Under Quasi-Static and Cyclic Loading ................................................................. 573
I. Silversides, A. Maslouhi, M. Azzi, G. Laplante

Reliability-Based Progressive Failure Analysis Method for Advanced Composite Structures ................................................................. 593
W. Ji, A. M. Waas, R. Raveendra

FAILURE/FATIGUE

Progressive Failure Assessment of Balsawood Sandwich Composites ................................................................. 606
S. Akhlaque-E-Rasul, M. Hailat, A. Phadatare, G. Newaz

Effect of Data Reduction and Fiber-Bridging on Mode I Delamination Characterization of Unidirectional Composites ................................................................................................. 623
G. B. Murri

FATIGUE

Fatigue Life Analysis of Composite Joints Using a Wearout Model ................................................................. 643
G. Li, G. Renaud, N. Bhatt

Fatigue Performance of Tapered Laminates with Internal Ply Drop-Offs: Experiments and Numerical Predictions ................................................................................................. 660
S. Giannis, C. Jeenjitkaew

Progressive Fatigue Damage Modeling in CFRP Laminates Using an Abaqus UMAT Approach ................................................................................................. 680
A. R. Conway, X. Xiao

FIBERS/INTERPHASES/SURFACES

The Elastic-Plastic Local Contact Response of Composite Constitutive Fibers ................................................................. 692
Q. P. Mcallister, J. W. Gillespie Jr., M. R. Vannlandingham, G. Stan

Improvement in Toughness of CFRP by Creating Flexible Interphase ................................................................................................. 710
A. Nakai, N. Yoshikawa, A. Ohtani, M. Mori

Moving from Hydrophilic to Super Hydrophobic Surfaces ................................................................................................. 719
A. F. Ávila, J. De Ávila Jr., D. J. De Souza, M. Tripllet

HYER SYMPOSIUM

Recent Advances in the Research of Carbon Nanotube-Based Fibers ................................................................................................. 732

Probabilistic Dynamic Buckling of Smart Composite Shells ................................................................................................. 733
G. H. Abuamier, C. C. Chamis

Computer Simulation of Carbon Nanotubes Under Combined Loading Using Molecular Dynamics Method ................................................................. 750

Co-Cured Biomimetic Composite T-Joints ................................................................................................. 763
V. K. Thummalapalli, S. L. Donaldson

Processing Characteristics and Mechanical Properties of Glass Fabric Reinforcements Coated with Graphite Nanoparticles ................................................................................................. 775
R. Umer, E. M. Waggy, A. C. Loos

</table>
**INFRASTRUCTURE APPLICATIONS**

Large-Scale Pre-Insulated Fiber Reinforced Aluminum Building Envelope System......................................................... 1095

B. Y. B. Chan, M. M. S. Cheung, P. Wang

Performance of FRP Composite Deck System in Long Span Cable-Stayed Bridge ....................................................... 1106

M.M. Cheung, B. Y. B. Chan, C. Wang

Analysis and Design of Full-Scale GFRP Composites Poles ............................................................................................. 1117

S. Metiche, R. Masmoudi

Experimental Investigation of Bond Behavior of Embedded Through-Section FRP Bar Shear-Strengthening Method ......................................................................................................................... 1137

A. Godat, A. L’Hady, A. Mofidi, O. Chaallal

A Novel Landslide Warning Solution Using Single Mode Telecom Fiber Embedded In Geo-Textile ................................................................................................................................. 1145

P. Kung, L. Wang, M. I. Comanici

Tests and Design Equations for RC Beams Strengthened in Shear with FRP Composites Using Embedded Through-Section Method ......................................................................................................................... 1155

A. Mofidi, O. Chaallal, B. Bennokrane, K. Neale

**MANUFACTURING**

Impact and Compression Behaviour of AFP Manufactured Carbon/Epoxy Composites Containing Gaps and Overlaps ......................................................................................................................................... 1163

P. Legay, R. Boukhili, M. Hojjati, J. Chen

A Study of the Influence of Gaps/Overlaps on the Strength of Composite Panels Made by Automated Fiber Placement ......................................................................................................................................... 1180

K. Fayazbaksh, S. Prabhakar, D. Pasini, L. Lessard

A Model for Wrinkle Compaction In Thermoset Prepreg Processing ....................................................................................... 1193

J. J. Gangloff Jr., P. Simacek, S. Sinha, S. G. Advani

Lamborghini “Forged Composite” Technology .................................................................................................................... 1203

P. Feraboli, F. Gasco, B. Wade, S. Maier, R. Kwan, A. Masini, L. Deoto, M. Reggiani

Effects of High Frequency Vibrations on the Compressibility of Dry Fibrous Reinforcements ........................................ 1216

J. Gutiérrez, E. Ruiz, F. Trochu

Modeling of Cutting Forces for Multilayered CFRP Laminates ............................................................................................ 1224

I. Zaghibani, J-F. Chatelain, V. Songmene, S. Berube, A. Atarsia

Void Morphology, Void Evolution and Gas Transport in Out-Of-Autoclave Prepregs .......................................................... 1234

L. Farhang, G. Fernlund

Gas Transport and Water Evaporation in Out-Of-Autoclave Prepregs .................................................................................. 1247

K. Hsiao, J. Kay, G. Fernlund

Air Permeability of Out-of-Autoclave Honeycomb Structures During Processing ...................................................................... 1264

J. Kratz, T. Centea, P. Hubert

The Effect of Material and Process Parameters on Tow Impregnation and Micro-Void Formation in Out-of-Autoclave Prepregs ............................................................................................................. 1279

T. Centeu, P. Hubert

A Laser-Ultrasonic Inspection System for Large Structures Fabricated by Automatic Fiber Placement ......................................................................................................................... 1299

A. Blouin, C. Padieau, C. Néron, J-P. Monchalin, M. Hojjati, M. Choquet

Determination of the Optimal Manufacturing Parameters for Manufacturing Thermoplastic Composite Rings by Automated Fiber Placement ........................................................................ 1309

F. Shadmehri, X. Cai, M. Hojjati, J. Chen, S. V. Hoa

Thermal Control System Design for Automated Fiber Placement Process ...................................................................................... 1319

S. Khan, W. F. Xie, S. V. Hoa

Pultrusion System for Continuous Fiber Reinforced Thermoplastic Composite with Braiding Technique .................................................................................................................................................. 1331

D. Hatano, M. Takagi, A. Ohtani, A. Nakai

Fabrication of Curved Parts by Flexible Injection: Influence of Processing Conditions on Composite Quality and Analysis of Distortion ......................................................................................................... 1340

P. Causse, E. Ruiz, F. Trochu

Effect of Autoclave Process Parameters on Quality and Performance of PEEK/Carbon Composite Panels ......................................................................................................................... 1352

L. Khoun, C. Penet, C. Demaria, D. Trudel-Boucher, P. Hubert
Incorporating Fiber Bed Properties in Solid Micromechanics for Curing Composites ......................................................... 1368
S. Malekmohammadi, R. Thorpe, A. Poursartip

Monitoring Prepreg Out-Time with Glass Transition Temperature ................................................................. 1384
L. K. Grunenfelder, S. Natt

Chemical Shrinkage and Thermomechanical Characterization of an Epoxy Resin During Cure by a Novel In Situ Measurement Method ................................................................. 1392
C. Billotie, F. M. Bernard, E. Ruiz, F. Cara, H. Baurier

MATERIAL DESIGN

Surrogate-Based Multi-Objective Optimization of a Composite Flat Panel with Variable Stiffness ......................... 1401
M. A. Nik, K. Fayazbakhsh, D. Pasini, L. Lessard

Circumferential Stiffness Tailoring of Circular Cylinders for Maximum Buckling Load Under Bending ................................................................................................. 1415
A. Khani, M. M. Abdalla, Z. Gürdal

Configuration of QT and NaCMC Determined by Microscopy, Spectroscopy and Molecular Simulation: Oriented to Surface Modification ................................................................. 1427
S. Vásquez, G. Barriga, N. Flores, L. García

MECHANICAL BEHAVIOR

A Fully Automated Tool for a Comprehensive Validation of Analytical Homogenization Models ......................... 1438
E. Ghossein, M. Lévesque

Effective Property Estimates for Composites Containing Multiple Nanoheterogeneities ............................................. 1448

Analyzing the Damage Behaviour of Composites Using Full-Field Displacement Measurement .......................... 1467
N. Zobeiry, A. Forghani, R. Vaziri, A. Poursartip

Application of the Cohesive Zone Model for Characterization Composite/Metallic Bonded Joints Under Static and Cyclic Thermal Loading Conditions ............................................. 1477
M. Mohamed, F. Taheri

NANOTECHNOLOGY

Comparing Finite Element and Analytical Micromechanical Modeling of Randomly Oriented Single Walled Carbon Nanotubes Reinforced Nanocomposites .................................................. 1478
H. Moussaddy, M. Lévesque, D. Therriault

A Concurrently Coupled Multi-Scale Model for Predicting Properties of Thermoplastic Nanocomposites ......................... 1488
S. Roy, A. Nair

Coarse Grain Simulation of Single-Walled Carbon Nanotube–PMMA Nanocomposites ................................................. 1503
M. Rahmat, H. Ghiasi, P. Hubert

Electrical Percolation Threshold of Conductive Composites Filled with Distributed Size Circular Nano-Disks ......................... 1520
A. B. Oskouyi, P. Merinny

Multiscale Modeling of Polymer-Clay Nanocomposites: Interphase and Homogenization Methods ......................... 1528
M. P. Pour, P. Hubert, M. Lévesque

Mixing Strategy Effects on Physical Properties of Nanoclay Nanocomposites ................................................................. 1536
H. Dalir, R. D. Farahani, Y. Nhim, B. Samson, M. Lévesque, D. Therriault

Morphology Characteristics, Thermal Properties and Dielectric Breakdown of LLDPE/Clay Nanocomposites ................................. 1543
B. Zazoum, A. D. Ngo, É. David, C. Daneau, M. Fréchette

Study of Fracture Behavior of NanoclayFilled Epoxy/Basalt Fiber-Reinforced Nanocomposites ................................. 1551
M. T. Bashar, U. Sundararaj, P. Merinny

Electrical Conductivity Enhancement and Toughening of Epoxy with SWCNT: A Comparison between Bulk Resins and Laminated Composites .................................................. 1563
B. Ashrafi, Y. Martinez-Rubi, B. Simard, A. Johnston

Network Structure and Electron Conduction in Carbon Nanotube Modified Polymers ................................................. 1574
C. Cattin, M. Meguid, P. Hubert

E. Haddad, K. Tagziria, R. Kruzelecky, J. Zou, B. Wong, W. Jamroz, S. Riendeau, E. Charbonneau

On the Development of Integrated Strain Sensors for Polymers and Composite Materials
J. L. Abot, A. Song, M. J. Schulz, V. N. Shanov, K. Belay, Y. Abere, B. Place, C. Weatherford

Wireless Strain Gage for Testing and Health Monitoring of Carbon Fiber Composites
F. Gasco, P. Feraboli, J. Braun, J. R. Smith, P. Stickler, L. Deoto

Comparison of Ultrasonic Testing and Infrared Thermography for the Detection of Machining Defects in Composite Materials
L.-A. Généreux, M. Viens, G. Lebrun

In-Situ Health Monitoring of Adhesively Bonded Aluminum Joints Using Carbon Nanotubes
R. Mactabi, I. D. Rosca, S. V. Hoa

Experimental Studies of Lamb Wave Propagation and Damage Detection in Honeycomb Core Sandwich Panel
N. Chakraborty, V. T. Rathod, D. R. Mahapatra, S. Gopalakrishnan

OFFICE OF NAVAL RESEARCH SYMPOSIUM

Characterization and Constitutive Modeling of Polymeric Foams Under Static and Dynamic Loading
I. M. Daniel, J.-M. Cho, B. T. Werner

Dynamic Fracture of Sandwich Core Foams
A. Kidane, G. Ravichandran

Response of Compliant Composite Hull Panels to Slamming Loads
M. A. Battley, T. D. Allen

Quantitative Pressure Measurements on a Convergent Composite Structure During Shock Impact
C. Wang, V. Eliasson

Effect of Panel Curvature and Pre-Stress on the Low Velocity and Ballistic Impact Response of Navy Relevant Composites
U. K. Vaidya, B. Thattaipartha, B. Anderson, S. Pillay

Suppressing Motion of Sandwich Structures Using Antiresonance Frequencies
J. Chen, C. Sun

Dynamic Response of Foam-Core Composite Sandwich Panels Under Pressure Pulse Loading
M. S. H. Fatt, P. Chapagain
Computational Simulation and Experimental Characterization of Sandwich Composite Panels Subjected to Blast Loads .................................................................................................................. 2077
T. Tadepalli, P. R. Mantena

Damage Sensing in Carbon Nanotube/Fiber Composites Under Dynamic Compression Loading ................................................................. 2092
A. S. Wu, T.-W. Chou, E. T. Thostenson

Mitigation of Edge Delamination in Polymeric Composites by Polymer Nanofabric Interleaving—Static Tensile Test .................................................................................................................. 2100
E. Adams, K. Shivakumar

PENETRATION

Development and Validation of a User’s Meso-Scale Based Ballistic Fabric Model with Application to the Fan Blade Containment Problem .................................................................................. 2111
A. Gakwaya, J.-C. Saint-Marc, D. Nandlall, A. Bouamoul, M.-L. Dano

Application of a Meso-Scale Based Ballistic Fabric Model to the Development of Advanced Lightweight Engine Fan Blade-Out Containment Structure .................................................................................. 2132
A. Gakwaya, J.-C. Saint-Marc, D. Nandlall, A. Bouamoul, M.-L. Dano

Dynamic Characterization and Modeling of 3D Woven Composite Ballistic Behavior .................................................................................. 2151
C.-F. Yen, B. Boesl, A. Quabili, J. Yu, S. Ghiorse

Finite Element Simulation of the Quasi-Static Penetration and Perforation in GLARE and CFRP Panels .................................................................................. 2163

PROPERTIES

A Study on Phase Transformation and Particle Distribution During Machining Titanium Metal Matrix Composites .......................................................................................... 2183
M. Aramesh, M. Balazinski, H. Attia, H. Kishawy, R. Bejjani

Segmentation and Shear Localization when Turning TiMMC (Titanium Metal Matrix Composites) .................................................................................. 2196
R. Bejjani, M. Balazinski, H. Attia, M. Aramesh, H. Kishawy

Finite-Element Implementation of Schapery-Type Constitutive Theories Based on an Internal Variable Approach .................................................................................. 2212
T. Crochon, C. Li, M. Lévesque

Estimating Compressive Strength of Unidirectional CFRP Using Apparent Shear Modulus .................................................................................. 2225
M. Ueda, M. Ishii, T. Nishimura

Elastic Properties Identification of Planar Composite Materials Based on Finite Element Model Updating and a Hybrid Optimization Algorithm .................................................................................. 2236
B. Rahmani, I. Villemure, M. Lévesque

Characterization of Cold Sprayed Copper Coating for Carbon Fibre/Epoxy Composite Moulds .................................................................................. 2243
S. B. Gosselin, F. Robitaille, B. Jodoin, M. Yandouzi

STRUCTURES

Improved Efficiency in the Buckling Analysis of Composite Laminated Rectangular Plates .................................................................................. 2259
A. R. Khaziev, C. D. Boshers

Buckling Effects on the Fluid-Structure Interaction of a Viscoelastic, Composite Panel in a Subsonic Flow .................................................................................. 2278
C. G. Merrett, H. H. Hilton

Pumping Potential of Flexible-Matrix-Composite Shell-of-Revolution Structures .................................................................................. 2293
H. Ghoneim

Composite Skin Snap-Through Buckling under Transient Dynamic Pressure Loads .................................................................................. 2304
S. Caulfield

Stress Analysis for Composite I- Beams by a Non-Conventional Method .................................................................................. 2319
J. C. Parambil, W. S. Chan, K. L. Lawrence, V. M. Sanghavi

Extension-Twist Coupling Potential in Modified Star-Beams Composed of Optimized Stacking Sequences .................................................................................. 2335
S. Muder, R. Haynes, E. Armanios

Vibration Modeling of Doubly Delaminated Layered Beams .................................................................................. 2347
N. Erdelyi, S. M. Hashemi
Extension-Twist Coupled Hygrothermally-Stable Quasi-Closed Star-Beams for Rotor Blade Tip Applications
S. Mahadev, D. S. Dancila
.......................................................... 2363
A Simulation Procedure for the Design of Composite Tubes with Large Deformability
B. Derisi, S. V. Hoa, D. Xu, M. Hojati
.......................................................... 2373
Bending Analysis of Corrugated Sandwich Plates with Soft Core Using Three-Dimensional Finite Element Method
.......................................................... 2393
Stress and Temperature Distribution in Composite Structure of Functionally Graded Brake Disk
P. H. Tehrani, M. Talebi
.......................................................... 2407
Buckling of Generally Anisotropic Sandwich Shells
M. R. Morovvati, A. Sadough-Vanini, S. N. Sadeghi
.......................................................... 2415
Nonlinear Solution of Circular Composite Plates with Piezoelectric Layers Utilizing Third-Order Shear Deformation Theory
A. S. Vanini, M. M. A. Moshizi, H. S. S. Pour, S. A. Moshizi
.......................................................... 2427
Theoretical and Experimental Investigation of a Shape Memory Alloy/Elastomer Composite Actuator
A. S. Vanini, A. Kami
.......................................................... 2442

STRUCTURAL APPLICATIONS OF BIO COMPOSITES

Influence of the Choice of Additives in High Melting Polyesters Reinforced with Natural Fibers in View of Structural Applications
F. Erciiqui, A. S. F. Talla, J. S. Y. D. Pagé
.......................................................... 2450
Thermoset-Natural Fiber Composites Using Nanocomposites for Mass Transit Applications
T.-D. Ngo, D. Trudel-Boucher, M.-T. Ton-That, S. Labouc
.......................................................... 2463
Nature Fibre Composites for Mass Transportation Industry
Z.-C. Yu, M. Townsley, S. Mckay
.......................................................... 2473
Innovation Approaches to Enhance the Fire Resistance of Cellulosic Fibre/Epoxy Composites
T.-D. Ngo, W. Hu, M.-T. Ton-That, H. Nasery, J. Denault
.......................................................... 2485

TEXTILES

Mechanical Properties of Hybrid 3D Woven Composites
M. Pankow, A. M. Waas, C.-F. Yen, S. Ghiorse
.......................................................... 2492
A Sub-Cell Approach For Modeling Triaxially Braided Composites
X. Xiao, C. Cater
.......................................................... 2493
Modeling of the Progressive Damage and Failure in Textile Composites
C. Heinrich, A. M. Waas
.......................................................... 2506
Mode II Interlaminar Fracture Toughness of Woven Carbon/Epoxy Laminates Fabricated Using VARTM
M. Hart, M. C. Altan, M. C. Saha
.......................................................... 2507
Damage Mechanisms in Interlock 3X Woven Composites Under Low Velocity Soft Impact Loading
F. Dau, Y. Duplessis-Kergomard
.......................................................... 2518
Characterization of the Mechanical Properties and Fatigue Behaviour of a Three-Dimensional Braided Carbon-Fiber/Polyimide Composite
J. Montesano, Z. Fawaz, C. Poon, K. Behdinan
.......................................................... 2536

TIME-DEPENDENT RESPONSE

Effects of Barely Visible Impact Damage on Bend-Twist Coupling
R. Haynes, X. Tan, E. Armanios
.......................................................... 2551
Impact and Compression After Impact Tests of a Carbon/Epoxy Composite
Y. Zhang, M. Genest, D. Backman, A. Johnston, A. Komus, M. Singh
.......................................................... 2560
Damage Identification of Thin Textile-Reinforced Composite Plates Using Vibration Based Testing Methods
A. Saboktakin, P. Dolez, T. Vu-Khanh
.......................................................... 2576
Damage of Composite Materials by Use of Laser Driven Shock Waves
R. Ecault, M. Boustie, F. Touchard, L. Berthe, L. Chocinski-Arnault, B. Ehrhart, C. Bockenheimer
.......................................................... 2583
Analysis of Shock Response of Sandwich Composites
A. Goodarzi, H. Taylor .................................................. 2597

Dynamic Response of Thickness- and Width-Tapered Laminated Composite Beam-Columns
V. K. Badagi, R. Ganesan .................................................. 2610

Experimental Investigation of Effects of Crystallinity on Viscoelastic Properties of Glass Fibre
K. Gordnian, A. S. Milani, A. Poursartip .................................................. 2638

Analyzing Thermo-Electro-Mechanical Response of Active Composites
C.-H. Lin, A. Muliana .................................................. 2650

Stress Relaxation Behavior of Polyurethane Foams in Tension and Shear
B. Barua, M. C. Saha .................................................. 2662

Modeling of the Linearly Viscoelastic Behavior of a Braided Composite
A. El Mourid, R. Ganesan, M. Lévesque .................................................. 2672

Experimental and Numerical Crashworthiness Investigation into the Energy Absorption Mechanisms of Axially Loaded CFRP Tubes

Exploring Self-Healing of CFRP Laminates Exposed to Hypervelocity Small Pellets Simulating Space Debris

Novel Compartmentalisation of Low Velocity Impact Damage
M. Yasaee, I. P. Bond, R. S. Trask .................................................. 2720

Investigation of Strain Rate and Temperature Effects on the Mechanical Behavior of Functionally Graded Steels
A. S. Vanini, Y. Alizadeh, M. Abolghasemzadeh, A. Ghanbarzadeh .................................................. 2730
