2011 IEEE 13th Conference on Commerce and Enterprise Computing

(CEC 2011)

Luxembourg-Kirchberg, Luxembourg
5-7 September 2011
# Table of Contents

**Welcome Message from the General and Co-Chairs**.............................................................................................................x

**Organizing Committee**....................................................................................................................................................................xi

**Program Committee**.....................................................................................................................................................................xii

**Introduction to the C4E Workshop**....................................................................................................................................................xiv

**Welcome Message from the CBA, BPA, EA, and SOA Workshop Chairs**..................................................................................xvi

**Welcome Message from the SES Workshop Chairs** ......................................................................................................................xvii

**Welcome Message from the GreEnCom Workshop Chairs** ...........................................................................................................xviii

---

**Main Conference**

**Extracting Investor Sentiment from Weblog Texts: A Knowledge-based Approach** ..........................................................1

*Achim Klein, Olena Altuntas, Tobias Häusser, and Wiltrud Kessler*

**A Framework to Manage Knowledge from Defect Resolution Process** .............................................................................10

*Grégory Claude, Marc Boyer, Gaël Durand, and Florence Sèdes*

**Reasoning on Business Processes to Support Change Reuse** .................................................................................................18

*Mirjam Minor, Ralph Bergmann, Sebastian Görg, and Kirstin Walter*

**Will I Like It? Providing Product Overviews Based on Opinion Excerpts** ..............................................................................26

*Silviu Homoceanu, Michael Loster, Christoph Lofi, and Wolf-Tilo Balke*

**Evaluating Design Alternatives for Feature Recommendations in Configuration Systems** .......................................................34

*Monika Mandl, Alexander Felfernig, and Juha Tiihonen*

**Turning Experience Products into Search Products: Making User Feedback Count** .............................................................42

*Joachim Selke and Wolf-Tilo Balke*

**RF-Rec: Fast and Accurate Computation of Recommendations Based on Rating Frequencies** ...........................................50

*Fatih Gedikli, Faruk Bagdat, Mouzhi Ge, and Dietmar Jannach*

**Cost and Market-based Pricing in the Courier Express and Parcel Service Industry** .................................................................58

*Marcel Kunkel and Michael Schwind*

**Co-Constructing IS Evolutions with Initiatives** .........................................................................................................................66

*Wanda Opprecht and Michel Léonard*

Dmitry Kudryavtsev and Lev Grigoriev

Actionable Business Architecture
Ray Harishankar and S. Kevin Daley

Defining the Business Architecture Profession
Harry H.M. Hendrickx, S. Kevin Daley, Mieke Mahakena, and Mark von Rosing

SES Workshop

Issue-Grouping Approach for Multiple Interdependent Issues Negotiation with Exaggerator Agents
Katsuhide Fujita, Mark Klein, and Takayuki Ito

Effective Distributed Genetic Algorithms for Optimizing Social Utility
Nobuyasu Mizutani, Katsuhide Fujita, and Takayuki Ito

Risk-Aware Business Process Modeling and Simulation Using XML Nets
Stefanie Betz, Susan Hickl, and Andreas Oberweis

Implementation of Web-based Consensus Support System for Campus Greening Project: Preliminary Results
Takayuki Ito, Yuya Takahashi, Eizo Hideshima, and Takanori Ito

Using Social Networks for Exchanging Valuable Real Time Public Transport Information among Travellers
António A. Nunes, Teresa Galvão, João Falcão e Cunha, and Jeremy V. Pitt

A Proposal for a Life Cycle Model for Electronic Service Markets
Sebastian Hudert, Stefan König, and Torsten Eymann

A Qualitative Decision Support System for Sustainable City Planning
Tokuro Matsuo, Yuji Hashiura, and Takayuki Ito
Visual Display of the Environment Load on the Construction Planning Tool .................................................. 386
   Takanori Terashima and Tokuro Matsuho

Toward Combinatorial Auction-based Better Electric Power Allocation on Sustainable Electric Power Systems ................................................................. 392
   Naoki Fukuta and Takayuki Ito

On Supporting Creative Interaction in Collaborative Systems: A Content Oriented Approach .................................................................................................. 400
   Marius Ioan Podean, Dan Benta, and Razvan Aurelian Costin

Evolving Enterprise Information System in Small and Medium Enterprise: An Opportunistic Approach and a Case Study .................................................. 407
   Lerina Aversano, Carmine Grasso, and Maria Tortorella

GreEnCom Workshop

An Idea for Modelling Exogenous Shocks on Supply Networks Using Petri Nets .................................................. 415
   Gilbert Fridgen, Christian Stepanek, and Thomas Wolf

A Bibliometric Analysis on Green Supply Chain Management: A Preliminary Result .................................................. 418
   Jason J. Jung

The Greening of IT: How Discourse Informs IT Sustainability Innovation .................................................. 421
