2011 Atlanta Conference on Science and Innovation Policy

Atlanta, Georgia, USA
15-17 September 2011
# TABLE OF CONTENTS

The Impact of Institution Quality, Cluster Strength and TLO Licensing Capacity on the Rate of Academic Staff Spin-offs ................................................................. 1  
*Gil Avnimelech, Maryann Feldman*

Impact of Research Funding on Nanobiotechnology Scientific Production: Does Concentration in a Few Universities Make Sense? .............................................................. 29  
*Catherine Beaudry, Sedki Allaoui*

Investigating the Role of Policies, Strategies, and Governance in China's Emergence as a Global Nanotech Player ................................................................. 57  
*Sujit Bhattacharya, Madhulika Bhati, Avinash Prasad Kshitij*

Governance of Universities and Scientific Innovation ............................................. 71  
* Dietmar Braun*

Multidimensional Evaluation of a Program for Early-Career Researcher in Brazil – The Young Investigator in Emerging Centers Program ......................................................... 108  
* Fernando AB Colugnati, Ana Maria Carneiro, Sergio Salles Filho*

Effects of Innovation on Employment in Latin America ......................................... 116  
* Gustavo Crespi, Ezequiel Tacstir*

Organization Theory and New Ways of Working in Science ................................... 127  
* Jonathon Cummings, Sara Kiesler*

A Complex Network Perspective on the World Science System ................................ 132  
* Scott W. Cunningham, Jan H. Kwakkel*

Science and Technology Policy in Brazil: an Analysis of the Recent Period ............ 149  
* Rafael Dias, Milena Serafim*

How to Break the Vicious Cycle of Technology and Economy in the Backward Regions—- Based on Comparative Study of China and the United States ..................................... 158  
* Xiao Guangling*

Systemic Data Infrastructure for Innovation Policy ............................................... 173  
* Diana Hicks*

Convergence in Science: Growth and Structure of Worldwide Scientific Output, 1993-2008 .................................................................................. 181  
* Edwin Horlings, Peter Van Den Besselaar*

Emerging Industry-University Trends, Challenges, and Interventions for Latin America ........................................................................................................ 199  
* Juan Pablo Isaza, Howard Rush*

An Analysis of the Achievements of JST Operations through Scientific Patenting: Linkage Between Patents and Scientific Papers ........................................ 214  
* Mari Jibu*

Co-evolution of Policies and Firm Level Technological Capabilities in the Indian Automobile Industry .......................................................... 221  
* Dinar Kale*

S&T Policy Evolution: A Comparison Between the United States and China (1950-present) ..................................................................................... 245  
* Yun Liu, Yibin Duan, Guangling Xiao, Li Tang*

The Foundations: How Education Major Influences Basic Science Knowledge and Pseudoscience Beliefs .............................................................................. 262  
* Susan Carol Losh, Brandon Nzekwe*

Biomedical Engineering Education and Practice Challenges and Opportunities in Improving Health in Developing Countries ............................................. 278  
* Daniel R. Lustick, Muhammad H. Zaman*

Few Projects Are Islands: Issues with the Project Form in Publicly-funded R&D ....... 283  
* Jonathan E. Mote, Jerald Hage, Aleia Clark*

North-South and South-South Research Collaboration: What Differences Does It Make For Developing Countries? – The Case of Colombia ........................ 289  
* Gonzalo Ordóñez-Matamoros, Susan E. Cozzens, Margarita García-Luque*

Science Leadership: Is it What You Know, Who You Know or Who You Are? ........ 299  
* Marla A. Parker, Eric W. Welch*

The Need to Look Elsewhere: The Push and Pull of Underrepresented Minority Faculty Professional Networks ................................................................. 313  
* Diogo Lemieszek Pinheiro, Julia E. Melkers*

Research and Development: Bibliometric Analysis of Knowledge Flows of Brazilian Research 2005-2009 ......................................................................................... 328  
* Branco Ponomariov, Hannes Toivanen*
Leveraging Public Funded Research for India’s Economic Emergence: The Role of IPR ........................................ 341
Amit Shovon Ray, Sabyasachi Saha

Working in Open Innovation: How to Determine Networks and Their Relationship Using Techmining ..........358
Rosa Rio, Ernesto Cilleruelo, Gaizka Garechana, Javier Gavilanes, Fernando Palop

Pharmacogenetics: Mismatches Between Policy and Practice ................................................................. 362
Graciela Sainz De La Fuente

An Explorative Study on International Collaboration and Its Role in Research Trajectory: Evidence from U.S.-China Collaboration in Nanotechnology ................................................................. 373
Li Tang

International Collaboration and Research Quality: Evidence from the Us-China Collaboration in Nano-technology ........................................................................................................................................ 387
Li Tang

Are Asian Immigrant Engineers the Same? Earning Differences Among Asian Immigrant Engineers
In the U.S. By Nationality ............................................................................................................................ 408
Yu Tao

What does International Co-authorship Measure? .................................................................................. 413
Dhanaraj Thakur, Jian Wang, Susan Cozzens

Technologies for Social Inclusion in Latin America. Analysing Opportunities and Constraints;
Problems and Solutions in Argentina and Brazil ...................................................................................... 420
Hernán Thomas, Mariano Fressoli

Research Teams as Complex Systems and Implications for Research Governance .................................. 437
Eleftheria Vasleiadou

Unseen Science: Representation of BRICs in Global Science .................................................................. 446
Caroline S. Wagner, Shing K. Wong

A Missing Policy: Capacity Building for Sharing Scientific Knowledge .................................................. 453
Walter Warnick, David Wojick

Global Obstacles to Disruptive Innovation In Sustainable Agriculture and Energy ............................... 458
Charles Weiss, William B. Bonvillian

Policy and Concentration of Activities: The Case of Dutch Nanotechnology ...................................... 467
Claudia Werker, Scott Cunningham

InnoScape: A Creative Artificial Ecosystem Model of Boundary Processes in Open Science .................. 494
Guangyu Zou, Levent Yilmaz
