2011 Seventh ACM/IEEE Symposium on Architectures for Networking and Communications Systems

(ANCS 2011)

Brooklyn, New York, USA
3 – 4 October 2011
2011 Seventh ACM/IEEE
Symposium on Architectures
for Networking
and Communications Systems
ANCS 2011

Table of Contents

Message from the General Chair............................................................................................................................ix
Message from the Technical Program Chairs ........................................................................................................x
Symposium Organization ..........................................................................................................................................xi
External Reviewers ..................................................................................................................................................xiii
Sponsors ....................................................................................................................................................................xiv
Keynote Speakers .....................................................................................................................................................xv

Session 1 - Packet Inspection
Ally: OS-Transparent Packet Inspection Using Sequestered Cores .................................................................1
   Jen-Cheng Huang, Matteo Monchiero, Yoshio Turner, and Hsien-Hsin S. Lee

400 Gb/s Programmable Packet Parsing on a Single FPGA ...............................................................................12
   Michael Attig and Gordon Brebner

Chain-Based DFA Deflation for Fast and Scalable Regular Expression Matching Using TCAM ................24
   Kunyang Peng, Siyuan Tang, Min Chen, and Qunfeng Dong

AC-Suffix-Tree: Buffer Free String Matching on Out-of-Sequence Packets .................................................36
   Xinming Chen, Kailin Ge, Zhen Chen, and Jun Li

Session 2 - Energy
   Jilong Kuang, Laxmi Bhuyan, Haiyong Xie, and Danhua Guo

Predictive Model-Based Thermal Management for Network Applications ....................................................57
   Jilong Kuang and Laxmi Bhuyan

 Jesús Camacho and José Flich

Poster Session 1

Accelerating Sketch-Based Computations with GPU: A Case Study for Network Traffic Change Detection

Theophilus Wellem, Yu-Kuen Lai, Chun-Chieh Lee, and Kuei-Sheng Yang

Efficient Implementation of Dynamic Protocol Stacks

Ariane Keller, Daniel Borkmann, and Wolfgang Mühlbauer

Fast and Compact Regular Expression Matching Using Character Substitution

Xingkui Liu, Xinchun Liu, and Ninghui Sun

Fast Content Distribution on Datacenter Networks

Shakir James and Patrick Crowley

Fast Path Performance of Packet Cache Router Using Multi-core Network Processor

Shu Yamamoto and Akihiro Nakao

Inferring Packet Processing Behavior Using Input/Output Monitors

Danai Chasaki, Qiang Wu, and Tilman Wolf

Modeling Filtering Predicates Composition with Finite State Automata

Marco Leogrande, Luigi Ciminiera, and Fulvio Risso

Netbench: Framework for Evaluation of Packet Processing Algorithms

Viktor Puš, Jiří Tobola, Vlastimil Košař, Jan Kaštil, and Jan Kořenek

Routing Optimization for Ensemble Routing

Wenfei Wu, Yoshio Turner, and Mike Schlansker

Session 3 - Networking and Queuing

COPSS: An Efficient Content Oriented Publish/Subscribe System

Jiachen Chen, Mayutan Arumaiturai, Lei Jiao, Xiaoming Fu, and K.K. Ramakrishnan

A Scalability Study of Enterprise Network Architectures

Brent Stephens, Alan L. Cox, Scott Rixner, and T.S. Eugene Ng

FIFO Service with Differentiated Queueing

Martin Karsten
**Session 4 - Routers**

A Canonical Multicore Architecture for Network Routers .......................................................... 134
  Sabina Grover, Abhishek Dhanotia, and Gregory T. Byrd

ReClick - A Modular Dataplane Design Framework for FPGA-Based Network Virtualization .......................................................... 145
  Deepak Unnikrishnan, Justin Lu, Lixin Gao, and Russell Tessier

**Session 5 - Hashing**

Non-crypto Hardware Hash Functions for High Performance Networking ASICs .......................................................... 156
  Nan Hua, Eric Norige, Sailesh Kumar, and Bill Lynch

A Multi-dimensional Progressive Perfect Hashing for High-Speed String Matching .......................................................... 167
  Yang Xu, Lei Ma, Zhaobo Liu, and H. Jonathan Chao

**Session 6 - Classification**

SMILER: Towards Practical Online Traffic Classification .......................................................... 178
  Baohua Yang, Guangdong Hou, Lingyun Ruan, Yibo Xue, and Jun Li

Experiences in Co-designing a Packet Classification Algorithm and a Flexible Hardware Platform .......................................................... 189
  Nilay Vaish, Thawan Kooburat, Lorenzo De Carli, Karthikeyan Sankaralingam, and Cristian Estan

Split: Optimizing Space, Power, and Throughput for TCAM-Based Classification .......................................................... 200
  Chad R. Meiners, Alex X. Liu, Eric Torng, and Jignesh Patel

**Poster Session 2**

A Dynamically Adapting Network Programming Framework .......................................................... 211
  Ben Wun, Mike Wilson, and Patrick Crowley

Encrypted Packet Forwarding in Virtualized Networks .......................................................... 213
  Sriram Natarajan and Tilman Wolf

File-Aware P2P Traffic Classification and Management .......................................................... 215
  Zhou Zhou and Tian Song

Hacking NetCOPE to Run on NetFPGA-10G .......................................................... 217
  Pavol Korcek, Vlastimil Kosar, Martin Zadnik, Karel Koranda, and Petr Kastovsky

Hardware Precomputation of Entropy for Anomaly Detection .......................................................... 219
  Václav Bartoš and Martin Žádník
On High QoS Constraints over Shared Resource Networks ..........................................................221
Josu Bilbao, Aitor Calvo, Igor Armendariz, and Pedro Crespo

Performance Measurement of Name-Centric Content Distribution Methods ................................223
Haowei Yuan and Patrick Crowley

Virtual Network Mapping with Traffic Matrices ...........................................................................225
Cong Wang and Tilman Wolf

Session 7 - Monitoring and Measurement

Streaming Solutions for Fine-Grained Network Traffic Measurements and Analysis ..........................................................227
Faisal Khan, Nicholas Hosein, Chen-Nee Chuah, and Soheil Ghiasi

A Passive Network Appliance for Real-Time Network Monitoring ..................................................239
Michael J. Schultz, Ben Wun, and Patrick Crowley

LEISURE: A Framework for Load-Balanced Network-Wide Traffic Measurement ..........................250
Chia-Wei Chang, Guanyao Huang, Bill Lin, and Chen-Nee Chuah

Author Index ........................................................................................................................................261
