2011 International Conference on Internet Computing and Information Services

(ICICIS 2011)

Hong Kong
17 - 18 September 2011
# 2011 International Conference on Internet Computing and Information Services

**ICICIS 2011**

## Table of Contents

- Message from the ICICIS 2011 Chair ........................................................................................................... xv
- Conference Organization .................................................................................................................................... xvi
- Reviewers ............................................................................................................................................................. xvii

## Session 1: Internet Computing and Application

1. Mining Frequent Embedded Subtree from Tree-Like Databases ................................................................. 3  
   - Lizhi Liu and Jun Liu
2. Application on Integration Technology of Visualized Hierarchical Information ........................................... 8  
   - Weibo Li and Yang He
3. Motion States Recognition System Based on Ultrasound for Automatic Door Management .......................... 11  
   - Chenglin Liu, Liya Kong, Yan Cao, and Qinghua Huang
4. Case-based Reasoning Enabling Database Mining for Cryo-Preserving Algae Applications ........................... 16  
   - Jun Wang and Huiqin Ren
5. Decision Support System for Technical Management of Food Processing Industries .................................... 20  
   - S.A. Ali and A.H. Bahnasawy
6. Application of Server Virtualization Technology in Enterprise Information .................................................. 25  
   - Xianmin Wei
7. Adopting an E-business Orientation .................................................................................................................. 29  
   - Guo Guangming
8. Analytic Solutions of an Iterative Functional Differential Equation Near Resonance .................................... 33  
   - Lingxia Liu
9. Degree Dominance Set-valued Relation-based RSM in Intuitionistic Fuzzy Decision Tables .......................... 37  
   - Bing Huang, Hua-xiong Li, and Da-kuan Wei
10. A Small Bank Intermediary Business System for Social Insurance Based on Tuxedo ................................. 41  
    - Guodong Sun and Daxing Zhao
11. Vibration Measurement and Excitation Analysis for the WZ12-1 Offshore Platform ..................................... 45  
    - Jinshan Lin
Hybrid Image Segmentation Using RPCCL Clustering and Region Merging ...........................................................49
Xinhui Li, Runping Shen, and Renxi Chen

Fill in Occlusion Regions on Remotely Sensed Images Using Texture Synthesis Technique ................................................54
Renxi Chen and Xinhui Li

Grid Technology and e-government .....................................................................................................................58
Jin Zhang

Some Conclusions about alpha-times Integrated C Semigroups ...........................................................................61
Chunjing Liu, Xiaoqiu Song, and Tao Wang

Method of Laplacian Eigenmap-Based Pattern Recognition and Diagnosis for Incipient Fault of Pipelines ..................................................................................................................................................................................................................66
Zhigang Lou and Hongzhao Liu

System Analysis Environmental Resources Legislation in China ...........................................................................70
Lu Yali

A Quadrupedal Locomotion Central Pattern Generator Based on Oscillatory Building Block Networks .................................................................74
Zhijun Yang and Qingbao Zhu

Data Consistence for Distributed Vision-based Traffic Surveillance Systems ............................................................................78
Xiaoming Yao, Wencai Du, Taijun Li, Longjuan Wang, Honglei Li, Hanwei Wu, and Zequn Wang

Enhancing Classroom Education with Instant Messaging Tools ...........................................................................82
Xiaoming Yao

Dai Xue-zhen, Xing Lei, and Zhang Bo

Semantic Text Deep Mining Based on Knowledge Element ....................................................................................90
Youkui Wen and Hao Wen

Use Case-Based Service-Oriented Analysis and Modeling .................................................................................94
Wenjun Liu, Meitao Fu, and Sanqiang Luo

Performance Study for Java Virtual Machine in Embedded Systems ........................................................................97
Liu Wenjun

A Study on Influence of Design Pattern in Shared Memory Multiprocessor Application ......................................................100
Liu Wenjun

Optimization Design of Closed-loop Supply Chain Based on MILP Model ............................................................103
Zhang Peilin, Yang Long, and Yin Ling

Dynamic Directional Convolution Vector Field for Active Contour Models ........................................................................107
Gang Wang, Jianming Liang, and Yang Wang

The Genetic Algorithm in the Minimum Bit Error Rate Multi-User Detection Assisted Space Division Multiple Access System ........................................................................................................111
Jean-Baptiste Yamindi and Wu Mu-qing

Overlay-based Service Distribution Network: A Novel Approach to Convey Service through Overlay Routing ..................................................................................................................115
Nianzu Liu and Xiao Chen
Improving Star Join Queries Performance: A Maximal Frequent Pattern Based Approach for Automatic Selection of Indexes in Relational Data Warehouses ..................................................119

B. Ziani and Y. Ouistien

A Novel Piezoelectric Micro-gripper’s Control Study .................................................................123

Xiangjin Zeng and Xinhan Huang

Theoretical Derivations of Min-Max Information Clustering Algorithm ........................................128

Chi Zhang, Xu-Lei Yang, Guanzhou Zhao, and Jie Wan

Support Vector Machine Based Classification for Hyperspectral Remote Sensing Images after Minimum Noise Fraction Rotation Transformation .................................................................132

Zhang Denghui and Yu Le

The Quasi-Randomized Approach to Uncertain Convex Programs ..................................................136

Feng Xiao, Jie Zhou, and Xiaqin Shan

Support Vector Machine Method for Multivariate Density Estimation Based on Copulas ..................140

Xiaqin Shan, Jie Zhou, and Feng Xiao

Weighted Pseudo Almost Automorphic Solution to a Class of Integrodifferential Equations .................144

Chou-li Lu, Xiao-giu Song, and Li-li Zhou

Real Time Optimization of the Gasoline Blending Process with Unscented Kalman Filter ..................148

Hui Cheng, Weimin Zhong, and Feng Qian

A Thinning-based Liver Vessel Skeletonization Method ......................................................................152

Yufei Chen, Klaus Drechsler, Weidong Zhao, and Cristina Oyarzun Laura

An Adaptive FCM Probabilistic Neural Networks with Confidence Criteria .......................................156

Gao Zhihua, Ben Kerong, and Zhang Linke

Impedance Control for Vehicle Driving with Human Operation Under Unstructured Environment ........159

Zhou Shenghao and Song Jinchun

Experimental Analysis on Spiral Pressure Nozzle and Spray Angle Control in the Spray Dryer ........163

Zhaohui Ren, Yuan Hao, and Bingcheng Wang

Analysis on Model of Investment under Interest Rate Uncertainty ...................................................166

Yancheng Zhu

Measurement and Modeling for QoS of VOD System .................................................................169

Guangqing Deng, Ting Wei, Changjia Chen, Wei Zhu, Bin Wang, and Dengrong Wu

Test Case Prioritization Technique Based on Genetic Algorithm ..................................................173

Wang Jun, Zhuang Yan, and Jianyun Chen

Software Testing Based on Cloud Computing ................................................................................176

Wang Jun and Fanpeng Meng

Comparative Analysis on Spatio-Temporal Land Use and Land Cover (LULC) Characteristics in Three Asia Cities ........................................................................................................179

Xinglong Zou, Zhen Shang, Inakwu O.A. Odeh, Yizhao Chen, and Jianlong Li
Establishment on Early Warning System of Grain Security in Zhangjiagang, China
Using Immune-Based Optimized BP Neural Network Model ...............................................................183
   Jie Zhang and Jianlong Li

Analysis on Spatial -Temporal Landscape Pattern and Ecological Security
in Zhangjiagang City Using 3S Technologies and CA Model .................................................................187
   Chengming Sun, Xiaoyu Gan, Yizhao Chen, Zhengguo Sun, and Jianlong Li

The Research and Application of IP Multicast in Enterprise Network ..................................................191
   Liu Xiaohua and Cao Kai

Constructing Pairing-friendly Elliptic Curves with Small rho .................................................................195
   Mingqiang Wang and Cai Jie

Improvement on LEACH Routing Algorithm for Wireless Sensor Networks ............................................199
   Liangrui Tang and Sheng Liu

Performance Improvement of Audio-Visual Speech Recognition with Optimal
Reliability Fusion .................................................................................................................................203
   Md. Tariquzzaman, Song Min Gyu, Kim Jin Young, Na Seung You, and M.A. Rashid

Design and Implementation of Online Exam System Based on Data Mining ...........................................207
   Huiping Wang and Ruowu Zhong

Application of Association Rules in College Teaching ...........................................................................210
   Huiping Wang and Ruowu Zhong

Evolving Computing and Automatic Programming ..................................................................................213
   Qingchun Wang and Aishu Wang

A Design of Reconfigurable Satellite Control System with Reaction Wheels Based
on Error Quaternion Model ..................................................................................................................215
   Peijun Yu, Keqiang Xia, and Jiancheng Li

Research of Commonly Used Association Rules Mining Algorithm in Data Mining ...............................219
   Ruowu Zhong and Huiping Wang

A Hybrid Genetic Algorithm for Structural Optimization with Discrete Variables ..................................223
   Pengfei Guo, Xuezhi Wang, and Yingshi Han

A Note on Superconvergence of Recovered Gradients of Tensor-Product Linear
Pentahedral Finite Element Approximations ........................................................................................227
   Jinghong Liu, Decheng Yin, and Qiding Zhu

Design Three-phase Asynchronous Motor’s Vector Control System Based on DSP ...............................230
   Junyi Shen, Wenguang Luo, Chengwu Yang, and Deliang Meng

A Note on the Security Proof of Waters Identity-Based Encryption ......................................................234
   Jianbin Hu and Huaixi Wang

Analysis on Port Informatization in China .................................................................................................238
   Wanan Cui, Qianzhen Wang, and Lixia Jiang

Ports Hinterland Distribution Center Division with Shortest Path ..........................................................242
   Wanan Cui, Qianzhen Wang, and Lixia Jiang

The Practice and Application of BI .........................................................................................................246
   Xie Fang and Xu Junwu
