Second Workshop on Statistical Parsing of Morphologically Rich Languages 2011

(SPMRL 2011)

Co-located with IWPT 2011

Dublin, Ireland
6 October 2011

# Table of Contents

*Statistical Dependency Parsing in Korean: From Corpus Generation To Automatic Parsing*
  Jinho D. Choi and Martha Palmer ................................................................. 1

*Morphological Features for Parsing Morphologically-rich Languages: A Case of Arabic*
  Jon Dehdari, Lamia Tounsi and Josef van Genabith ...................................... 12

*French parsing enhanced with a word clustering method based on a syntactic lexicon*
  Anthony Sigogne, Matthieu Constant and Eric Laporte .................................. 22

*Testing the Effect of Morphological Disambiguation in Dependency Parsing of Basque*
  Kepa Bengoetxea, Arantza Casillas and Koldo Gojenola ............................... 28

*Discontinuous Data-Oriented Parsing: A mildly context-sensitive all-fragments grammar*
  Andreas van Cranenburgh, Remko Scha and Federico Sangati .......................... 34

*Multiword Expressions in Statistical Dependency Parsing*
  Gulsen Erygit, Tugay Ilbay and Ozan Arkan Can ........................................... 45

*Linguistically Rich Graph Based Data Driven Parsing For Hindi*
  Samar Husain, Raghu Pujitha Gade and Rajeev Sangal ................................... 56

*Data point selection for self-training*
  Ines Rehbein ..................................................................................................... 62
