SS 03 AEROAUDIOUSTICS - TURBOMACHINERY NOISE / MEASUREMENT & CONTROL

CORRELATION BETWEEN THE AEOILIAN TONE AND WAKE FLOW OF TAPERED CIRCULAR CYLINDERS ................................................................. 201
Yasumasa Suzuki, Hajime Fujita, Keita Saito

EFFECT OF ROTOR BLADE DEFLECTIONS ON BLADE-VORTEX INTERACTION NOISE PREDICTION ............................................................ 216
Seungmin Lee, Seunghoon Lee, Eunkuk Son, Soogab Lee

EXPERIMENTAL INVESTIGATION AND CALIBRATION OF SURFACE PRESSURE MODELING FOR TRAILING EDGE NOISE ........................................ 222
Franck Bertagnolli

EXPERIMENTAL STUDY ON PERFORMANCE OF VARIOUS MUFFLERS FOR INTERMITTENT EXHAUST NOISE REDUCTION ........................................ 229
Jingxiang Li, Kunihiko Ishihara, Shengdun Zhao

NUMERICAL PREDICTION OF ACOUSTIC PRESSURE RADIATED FROM LARGE WIND TURBINES ............................................................... 235
Seunghoon Lee, Seungmin Lee, Soogab Lee

ROBUST GAS TURBINE COMBUSTOR WITH ACOUSTIC LINER ................................................................................................................... 239
Kazufumi Ikeda, Katsuko Ito, Koich Nishida, Masaharu Nishimura

SS 04 AEROAUDIOUSTICS - NUMERICAL SIMULATION

A LINEARIZED NAVIER-STOKES SOLVER FOR THE PREDICTION OF SOUND PROPAGATION IN DUCT SYSTEMS .................................................. 248
Axel Kierkegaard, Gunilla Efraimson, Susann Boij

APPLICATION OF DATA MINING INTO ACOUSTIC WAVES FROM A ROCKET PLUME ................................................................. 257
Seichiro Morizawa, Takao Nonomura, Akira Oyama, Kozo Fujii, Shigeru Ohayashi

COMPUTATIONAL ANALYSIS OF FOLDED CAVITY LINERS FOR TURBOFAN INTAKES ............................................................... 263
Konstantin A. Kurbatskii, Florian Menter, Jochen Schuetze, Akira Fujii

ILES OF PLASMA-CONTROLLED JETS - COHERENT FEATURES AND NEAR-FIELD PRESSURE RESPONSE ........................................ 271
Datta V. Gaitonde, Mo Samimy, Rachelle Speeth

LARGE EDDY SIMULATION TO EXTRACT FOURTH ORDER SPACE TIME TURBULENCE CORRELATIONS IN JETS INCLUDING MICROJET INJECTION ........................................................................................................ 279
G. J. Paige, M. E. Rife, C. D. Pokora

NEAR- AND FAR-FIELDS CHARACTERISTICS OF TANDEM CYLINDER FLOW USING DELAYED DETACHED EDDY SIMULATION ................. 287
Taro Imaura, Tohru Hirai, Shuji Enomoto, Kazuomi Yamamoto

NUMERICAL ANALYSIS OF AERODYNAMIC NOISE FROM LANDING GEAR COMPONENTS ................................................................. 297
Daisuke Sasaki, Hiroshi Onda, Akifumi Deguchi, Kazuhiro Nakahashi, Mitsuhiro Murayama, Kazuomi Yamamoto, Yuzuru Yokokawa

NUMERICAL PREDICTION OF LOW MACH NUMBER JET NOISE FROM RECTANGULAR NOZZLE USING APPROXIMATE COMPACT AND NON-COMPACT GREEN'S FUNCTION ........................................................................................................ 305
Sadao Akishita, Minoru Yamaguchi, Yoshifumi Ogami, Masaharu Nishimura, Riota Sasaki

NUMERICAL SIMULATION OF TRANSONIC CAVITY NOISE USING SCALE-ADAPTIVE SIMULATION (SAS) TURBULENCE MODEL ............. 316
Konstantin A. Kurbatskii, Florian Menter, Jochen Schuetze, Akira Fujii

NUMERICAL SIMULATIONS OF NOISE REDUCTION IN HOT SUPERSONIC JETS .................................................................................. 323
Kazuhisa Katsubara, Junichi Liu, Andrew Corrigan, Ravi Ramamurti

PREDICTION OF AEROAUDIOUSTIC NOISE AROUND HIGH-SPEED TRAIN USING UNSTEADY CFD ANALYSIS ....................................................... 331
Yosuke Ueno, Akio Ochi, Kenji Hayama, Takashi Sasaki

PREDICTION OF SUPERSONIC IMPINGING JET NOISE USING COMPUTATIONAL AERAOUDIOUSTICS ................................................ 337
Ali Uzun, Rajan Kumar, M. Youssif Hulssaieni, Farrahu S. Alvi

RECENT ADVANCES IN LARGE EDDY SIMULATIONS FOR JET NOISE PREDICTIONS ........................................................................ 345
Gregory Blaisdell, Anastasios Kyritzis, Yingchong Jin, Chandra Sekhar Murthy, Matthew Loomis, Zhiyuan Li

SIMULATION AND MODELLING OF THE SOUND PROPAGATION IN AN AERO-ENGINE BYPASS DUCT .................................................. 353
Lukasz Panek, Norbert Schonwald, Janis Abdel Hay, Frank Thiele

SLAT NOISE SIMULATIONS: STATUS AND CHALLENGES ........................................................................................................ 361
Meelan Choudhuri, David Lockard, Mehdi Khorrani, Raymond Mineck

SUPERSONIC JET FLOW AND NOISE SIMULATIONS OF MILITARY-STYLE BASELINE AND CHEVRON NOZZLES ......................................... 369
Yongle Du, Philip J. Morris

THE EFFECT OF HARD PATCHES ON ZERO-SPICE TURBOFAN INTAKE LINERS, A COMPUTATIONAL STUDY .................................................. 378
Jeremy Astley, Rie Sugimoto, Prateek Mustafi
TOWARD URANS-BASED PREDICTION OF ROTOR-STATOR INTERACTION NOISE ........................................................... 387
Ramos Reba, Daniel Shannon, Craig A. Reimann, Jeff M. Mendoza

TOWARDS THE PREDICTION OF ACOUSTIC TRANSMISSION THROUGH A 2D ROTOR USING COMPUTATIONAL AEROACOUSTICS .................................................................................................................. 395
Ray Hixon

UNSTRUCTURED LARGE EDDY SIMULATION TECHNOLOGY FOR AEROACOUSTICS OF COMPLEX JET FLOWS ................................. 401
Guillaume A. Bréz, Yasser Khalighi, Frank Ham, Sanjiva K. Lele

SS 05 AEROACOUSTICS - SELF-EXCITED TONE

A STUDY ON THERMOACOUSTIC SILENCING SYSTEM – DISCUSSION OF THE MECHANISM BY COMPARING AMPLIFICATION WITH ATTENUATION OF SOUND—.......................................................... 411
Tetsuya Kobayashi, Shin-Ichi Sakamoto, Daichi Tsuchimoto, Kohei Yanagimoto, Kenji Shibata, Yoshiaki Watamabe

EFFECT OF ARRANGEMENT OF IN-LINE TUBE BANKS ON ACOUSTIC RESONANCE ............................................................................................................................. 417
Hiromitsu Hamakawa, Keisuke Uchida, Azim Arshad, Atashi Wakatuki, Eiichi Nishida

EXPERIMENTAL INVESTIGATION ON CORRELATIONS BETWEEN TRANSONIC TONE AND FLOW OSCILLATION IN A SUPERSONIC NOZZLE................................................................. 425
Seungyoun Shin, Mihko Tonamine, Akira Tokamoto, Hiroki Kagayama, Toshiyuki Aoki

STUDY ON A COUNTERMEASURE OF SELF-SUSTAINED TONE BY A BAFFLE PLATE IN BOILER TUBE BANKS WITH A CAVITY ........................................................................................................ 430
Taisuke Tamehira, Kunihiyo Ishihara, Junichi Hino, Masanori Tsuji

STUDY ON A COUNTERMEASURE OF SELF-SUSTAINED TONES IN A BOILER TUBE BANK ....................................................................................... 436
Takeshi Takahashi, Kunihiyo Ishihara

TURBULENT FLOW INDUCED SELF-SUSTAINED OSCILLATIONS IN SUPERSONIC CAVITY FLOWS .................................................................................. 442
Weipeng Li, Takto Nonomura, Keizo Fujii

SS 07 AIRCRAFT NOISE PREDICTION AND CONTROL

AIRCRAFT NOISE MODELLING AND ASSESSMENT IN THE IESTA PROGRAM ............................................................... 448
Patrice Malbéqui, Yannick Rozenberg, Jean Bulhi

COMPARATIVE CONSIDERATION OF AIRPLANE CLASS DATA FOR AIRCRAFT NOISE ANALYSIS .............................................................. 454
Roman Thierbach

CORRELATION OF STRUCTURAL-ACOUSTIC TESTING AND FINITE ELEMENT ANALYSIS OF AIRCRAFT CABIN NOISE CONTROL DESIGNS .................................................................................. 458
Joshua Montgomery, Eric Bullemeier, Salvatore Ligoore, Gary Foss

DETECTION, LOCALIZATION AND TRACKING OF AIRCRAFT USING ACOUSTIC VECTOR SENSORS .................................................. 465
Nico Van Oosten

EXPERIMENTAL AND NUMERICAL STUDY ON A TWO-WHEEL MAIN LANDING GEAR NOISE .................................................................................. 476
Kazunori Yamamoto, Mitsuhito Murayama, Yuzuru Yokokawa, Hiroki Ura, Taro Imamura

JET NOISE REDUCTION BY NOTCHED NOZZLE ........................................................................................................... 488
Tsutomu Oishi

STUDY OF JET NOISE SOURCE MODELING AND SHIELDING EFFECT FOR FUTURE AIRCRAFT ............................................................................. 494
Satoshi Fukata, Kenji Hayama, Guillaume Sylvand, Stephane Alextra, Toshihiko Azuma

SS 08 NOISE EMISSION AND LIMITATION FOR IN-SERVICE ROAD VEHICLES AND TIRES

IDENTIFYING THE CHARACTERISTICS OF NOISY VEHICLES AT THE ROADSIDE .............................................................. 500
Greg Watts

INTRODUCTION OF THE VEHICLE NOISE CONTROL OF R.O.C. (TAIWAN) ............................................................................. 509
Ping-Fei Hsieh, Li-Chung Chou, Jen-Shuo Shieh, Hui-Hua Lin, Falcon Lu, Jove Pan, Shoa-Quan Zhuang, Yu-Ying Chen

LOW-NOISE TYRES -IN-USE- DO THEY EXIST? ........................................................................................................ 518
Truls Berge, Frode Haukland

STIMULATION OF LOW NOISE ROAD VEHICLES IN THE NETHERLANDS ................................................................................ 530
Gijsjan Van Blokland

SS 09 TIRE/ROAD NOISE - MEASUREMENT METHODS

CERTIFYING A TWIN-WHEELER CPX VEHICLE FOR TYRE/ROAD NOISE MEASUREMENT ......................................................... 537
Wing-Tat Hung, Yat-Ken Lam, Chung-Fai Ng, Randolph Leung, Ka-Yee Ho, Emily Fang

SOUND ABSORPTION MEASUREMENT ON FIELD CORES WITH FREE FIELD TECHNOLOGY .......................................................... 545
Mingliang Li, Win Van Keuleen, Martin Van De Ven, André Molenaar

TEMPERATURE EFFECTS ON ROAD TRAFFIC NOISE MEASUREMENTS .................................................................................. 552
Jan Jabben
TEMPERATURE EFFECTS ON TYRE/ROAD NOISE MEASUREMENTS .............................................................. 557
Erik Bühlmann, Toni Zugler

VIBRATION INDUCED ERRONEOUS SIGNAL IN TYRE/ROAD NOISE MEASUREMENT WITH CLOSE-
PROXIMITY METHOD .......................................................................................................................... 565
Y. K. Lum, R. C. K. Leung, W. T. Hung

SS 10 TIRE/ROAD NOISE - TIRES (EXTERIOR AND IN-VEHICLE NOISE)

AN INTEGRATED MODEL OF ROLLING TYRE VIBRATIONS ON A SMOOTH ROAD .................................. 571
B. Lenoach, W. R. Graham

ESTIMATION OF NOISE RADIATING PARTS OF A TIRE USING THE WAVE FINITE ELEMENT
METHOD .......................................................................................................................................... 577
Yoshiyuki Waki, Kentaro Kozuki, Hisashi Heguri

ESTIMATION OF SPINDLE FORCE EXCITED BY CLEAT ........................................................................... 585
Takayuki Kozumi, Nobutaka Tsujiiuchi, Masami Matsuhara, Fumiya Nakamura, Koji Matsuyama

IMPROVING NOISE PERFORMANCE WITH SEALED TYRE AND CAVITY ABSORBER TECHNOLOGY .......... 593
Ernst-Ulrich Saemann, Markus Dahlke, Bernd Nolte

INFLUENCE OF THE CAVITY MODE ON TIRE SURFACE VIBRATION .................................................... 600
Wonhong Choi, J. Stuart Bolton

INTERIOR NOISE REDUCTION BY TIRE SURFACE GEOMETRY AND HELMHOLTZ RESONATORS ON
TREAD PATTERNS ............................................................................................................................ 608
Atsushi Kitahara, Tokumasa Akashi, Yoshiyuki Waki, Hisashi Heguri

SS 11 TIRE/ROAD NOISE - LOW NOISE ROAD SURFACES

A STUDY ON EVALUATION AND SUSTAINABILITY OF NOISE REDUCTION PAVEMENT IN HEAVY
SNOW REGION .................................................................................................................................... 614
Mizuno Takahiro, Ogiuri Naoyuki, Fuse Koji, Abe Ryuji

ACOUSTIC IN-DEPTH ANALYSIS OF RUMBLE STRIPS ............................................................................ 622
Reinhard Weller, Manfred Haider, Marco Conter, Sara Gasparoni

ACOUSTIC PERFORMANCE EVALUATION OF THIN NOISE-REDUCING ASPHALT PAVEMENTS ................ 626
Momir Miljkovic

AGING OF LOW NOISE ROAD SURFACES AND PROCEDURE TO IMPLEMENT THEM IN A
CLASSIFICATION SYSTEM .................................................................................................................. 632
Gijsjan Van Blokland

DEVELOPMENT AND IMPLEMENTATION OF CONCRETE PAVEMENT CONSTRUCTION
SPECIFICATIONS TO CONTROL TIRE-PAVEMENT NOISE .................................................................... 638
Rob Hofman

SURVEY STUDY ON THE TRANSITION OF SOUND POWER LEVEL AND SPECTRUM OF ROAD
VEHICLE NOISE IN EXPRESSWAY POROUS DRAINAGE ASPHALT PAVEMENT ........................................ 646
Takashi Oikawa, Minoru Yamamoto, Yoshikazu Osafune, Kenichi Ishikawa, Tomotaka Ueta, Eiji Noguchi, Yasuo Ohshino, Teruo
Iwase, Kohei Yamamoto

TIRE/ROAD NOISE PREDICTION USING ROAD-PROFILE ENVELOPING PROCEDURE AND HEIGHT-
UNEVENNESS METHOD ...................................................................................................................... 654
Tatsuo Fujikawa, Yasuo Ohshino, Hideki Tachibana

SS 12 TIRE/ROAD NOISE - POROELASTIC ROAD SURFACES

PERFORMANCE OF THE POROUS ELASTIC ROAD SURFACE (PERS) AS LOW NOISE PAVEMENT ................. 660
Hitoshi Fujita, Yoshifumi Arai, Koushi Hamada

PERS THE POLITICAL CHALLENGES COST EFICTIVENESS .................................................................... 667
Rob Hofman

PERSUADE--A EUROPEAN PROJECT FOR EXCEPTIONAL NOISE REDUCTION BY MEANS OF
POROELASTIC ROAD SURFACES ....................................................................................................... 673
Ulf Sandberg, Luc Goubert

POROELASTIC ROAD SURFACE (PERS): A REVIEW OF 30 YEARS OF R&D WORK .................................. 684
Ulf Sandberg, Luc Goubert

PRESENT STATUS OF POROUS ELASTIC RUBBER SURFACE (PERS) IN JAPAN ........................................ 692
Kazuyuki Kubo

PROJECT PERSUADE : OPTIMIZATION OF POROELASTIC ROAD SURFACES IN THE LABORATORY .............. 699
Björn Kalman, Krishna Prapoorna Biligiri, Ulf Sandberg

RESULTS DUTCH PERS TEST ON AS0 .................................................................................................... 708
Rob Hofman, Peter The, Willem Jan Van Vliet
AN INVESTIGATION OF NOISE GENERATION OF SEISMIC EXPANSION JOINTS FOR HIGHWAY STRUCTURES .................................................................................................................................................. 717
Paul Donavan, Bruce Rymer

CASE STUDY OF PRACTICAL NOISE SOURCE LOCATION FOR ROAD-BRIDGE NOISE BY BEAMFORMING METHOD
Toshikazu Ota, Minoru Yamamoto, Shinichi Nakamura, Yutaka Ishii .................................................................................................................................................................................. 726

CONTROLLING EXPANSION JOINT NOISE ON THE TACOMA NARROWS BRIDGE IN WASHINGTON STATE, USA .................................................................................................................................................................. 734
Timothy Sexton

LOW NOISE EMISSION EXPANSION JOINTS WITH LONG DURABILITY ........................................................................................................................................................................................................ 740
Wolfgang Fobo

MITIGATION THE NOISE EMISSIONS OF VEHICLES TRAVELLING OVER BRIDGE EXPANSION JOINTS .................................................................................................................................................................. 753
Klaus-Peter Glaeser, Gernot Schwabtke, Marek Ziller

MODULAR EXPANSION JOINT NOISE IN B.C. ........................................................................................................................................................................................................................................ 763
Duane Marriner, Clair Wakefield

PREDICTION MODEL FOR STRUCTURE-BORNE NOISE OF VIADUCTS IN “ASJ RTN-MODEL 2008” .................................................................................................................................................................. 769
Tatsuaki Miyake, Kohei Yamamoto

ROAD TRAFFIC NOISE OF EXPANSION JOINTS - ASSESSMENT METHOD AND RESULTS ........................................................................................................................................................................ 775
Willem Jan Van Vliet, Ronald Van Loon

ADVANCED SIMULATION TECHNIQUES FOR VEHICLE ACOUSTIC PANEL LOADING PREDICTIONS, INCLUDING FEM AML AND FAST MULTIPOLE BEM (FMFEM) .................................................................................................................................................................................................. 789
Koen De Langhe, Koen Vansant, Raphael Hailez, Hadrien Borsot

ESTIMATION OF $L_{N,eq}$ BASED ON A DYNAMIC MODEL FOR ROAD TRAFFIC NOISE ................................................................................................................................................................................................ 803
Mitsunobu Matsuyama, KazUSHIRO Kuno, Toshio Sone

EXPERIMENTAL EVALUATION OF EXTERIOR NOISE CONTRIBUTION ANALYSIS WITH INDOOR PASS-BY MEASUREMENT .................................................................................................................................................................. 809
Younseo Ryu, Andreas Schuhmacher, Yumiko Sakamoto, Masamitsu Hirayama, Yoshihiro Shirahashi

INDOOR PASS-BY NOISE TESTING ON A ROLLER TEST BENCH IN A SMALL ANECHOIC CHAMBER .................................................................................................................................................................. 815
Albert Albers, Gerhard Robens

PROPOSED CRITERION FOR ELIMINATING EXTRANEOUS ABNORMAL SOUNDS MIXED IN ROAD TRAFFIC NOISE .................................................................................................................................................................. 821
Tatsuo Kitagawa, Takashi Hayashi, Yuichi Kato, Tetsuro Saeki

A STUDY OF RADIAL DISTRIBUTION OF ELECTROMAGNETIC VIBRATION AND ELECTROMAGNETIC NOISE FROM THREE-PHASE SQUIRREL-CAGE INDUCTION MOTOR .................................................................................................................................................................. 827
Isao Hirotsuka, Kanzu Tsuobo, Masayuki Kawakami

ANALYSIS OF VIBRATION AND MUSIC SCALE OF BRUSHLESS DC MOTOR WITH SURFACE PERMANENT MAGNETS .................................................................................................................................................................. 833
Takeshi Oshikawa, Ryo Ataka, Satoshi Azami, Michio Matsunami, Nobuyuki Kuriita

NOISE AND VIBRATION FOR INVERTER DRIVEN INDUCTION MOTOR .................................................................................................................................................................. 839
Shinichi Noda, Sueyoshi Mizuno, Atsumi Kondo

NOISE AUTOMATIC CONTROL METHOD FOR ELECTRICAL EQUIPMENT .................................................................................................................................................................. 845
Itako Kazutaka, Miwa Motoatsu, Ishihara Manabu

PWM CARRIER FREQUENCY EFFECT TO VIBRATION ON PERMANENT MAGNET SYNCHRONOUS MOTOR .................................................................................................................................................................. 850
Eri Zeze, Kani Akatsu

INTERIOR NOISE REDUCTION OF HIGH-SPEED ROLLING STOCK IN TUNNELS .................................................................................................................................................................. 858
Yasuaki Takano, Kyotshi Morita, Yoshitaka Mochida

OUTLINE OF TRAIN INTERIOR NOISE MITIGATION BY KAWASAKI HEAVY INDUSTRIES .................................................................................................................................................................. 865
Satoru Akiyama, Hiroshi Yano, Teruyuki Takahashi

PASSENGER DOOR TRANSMISSION LOSS IMPROVEMENT IN A TRAIN USING A VIBRO-ACOUSTIC NUMERICAL MODEL COMBINING DETERMINISTIC AND STATISTICAL TECHNIQUES .................................................................................................................................................................. 869
Alberto Vallespin, Oriol Gibert, Joan Sapena, Jordi Jose, Fabienne Guerville, Nathalie Couty

PREDICTION OF INTERIOR STRUCTURE BORNE NOISE OF A CABIN OF HIGH SPEED TRAIN USING FE-SEA HYBRID METHODS .................................................................................................................................................................. 877
Yu Yu, Xinbiao Xiao, Xueong Jin, Di Wang, Hengyu Wang
WEIGHTED DOUBLE SIDEBAND MODULATION MEASUREMENTS

VIBRATION OF THE WHEEL

A STUDY OF SOUND QUALITY IMPROVEMENT OF THE PARAMETRIC LOUDSPEAKER BASED ON SS 18 NONLINEAR ACOUSTICS AND UNDERWATER ACOUSTICS

SOURCE SIGNATURE IDENTIFICATION BY USING POLE/ZERO MODELING OF TRANSFER FOR THE GAS COMPRESSOR

SCALE-MODEL RESEARCH ON INFRASONIC RESONANCE OF THE NOISE REDUCTION WORKSHOP FOR THE GAS COMPRESSOR

SOURCE SIGNATURE IDENTIFICATION BY USING POLE/ZERO MODELING OF TRANSFER FUNCTION

A STUDY OF SOUND QUALITY IMPROVEMENT OF THE PARAMETRIC LOUDSPEAKER BASED ON WEIGHTED DOUBLE SIDEBAND MODULATION
CHARACTERISTICS OF NONLINEAR EFFECTS ON THE PROPAGATING COMPRESSION WAVE IN A TUNNEL........................................................................................................................................................................................................106
Tomoike Isihara, Toshihiko Tojo, Daisuke Sasa

EXPERIMENTATION AND ANALYSIS OF PRESSURE WAVES GENERATED WHEN A HIGH-SPEED TRAIN PASSES THROUGH A SHORT TUNNEL........................................................................................................................................................................................................1022
Hajime Takami, Hidetoshi Saitou, Katsuhiko Kikuchi, Masanobu Iida

MODEL SIMULATION OF AIRCRAFT SONIC BOOM; BEHAVIOR AND ALLEVIATION ........................................................................................................................................................................................................1027
Akihito Sasoh

PEAK PRESSURE INDUCED BY AN INTENSE EXTERNAL ACOUSTIC PULSE INSIDE A SUBMERGED FLUID-FILLED CYLINDRICAL SHELL........................................................................................................................................................................................................1032
Sergei Iakovlev, Kyle Williston, Martin Mitchell, Robynne Murray

THE REALIZATION OF STEREO EFFECTS WITH PARAMETRIC LOUDSPEAKER AND MULTIPLE REFLECTORS........................................................................................................................................................................................................1037
Sota Kurimoto, Yuitaro Sagibayashi, Masanori Morise, Takamobu Nishiura

SS 19 MARINE VEHICLE AND/OR OFFSHORE STRUCTURE NOISE

STRUCTURE-BORNE NOISE CONTROL OF DRILL SHIP USING MULTI-LAYER DAMPING STRUCTURE ........................................................................................................................................................................................................1042
Keun-Bok Song, Sung-Hoon Kim, Won-Ho Joo

THE STUDY ON STRUCTURE BORNE NOISE TRANSMISSION VIA THE FOUNDATION FOR DECK MACHINERY AROUND CABIN IN CRUISE SHIP ........................................................................................................................................................................................................1048
Kuk-Su Kim, Nho-Seong Kim, Dong-Hee Kwak

SS N1 DUCT NOISE

ACOUSTIC CHARACTERISTICS OF SIDE BRANCH SILENCERS WITH A FINITE IMPEDANCE AT THE END (DETERMINATION OF THE PEAK FREQUENCY OF THE REDUCTION EFFECT) ........................................................................................................................................................................................................1057
Masanori Tsuji, Kunihiko Ishihara

ADVERSE EFFECT OF HELMHOLTZ RESONATORS IN HVAC-DUCT SOUND CONTROL ........................................................................................................................................................................................................1063
Michihito Terao, Hidehisa Ikine, Masato Suzuki

DEVELOPMENT OF THE INTEGRATED HVAC NOISE ANALYSIS PROGRAM FOR SHIPS ........................................................................................................................................................................................................1071
Ju-Bum Han, Suk-Yoon Hong, Jee-Hun Song, Nho-Seong Kim, Seung-Hyun Chun

IN-DUCT FLOW-GENERATED NOISE PREDICTION USING COMPUTER FLUID DYNAMICS (CFD) ........................................................................................................................................................................................................1078
Cheuk Ming Mak, Ming Yin Chan

PRESSURE PULSATIONS VS ENERGY FLOW IN FLUID-FILLED PIPES ........................................................................................................................................................................................................1084
Goran Pavic

MEASUREMENT, SIMULATION AND SIGNAL PROCESSING

SS 20 3D SOUND REPRODUCTION

22.2 MULTICHANNEL SOUND SYSTEM AND ITS HOME REPRODUCTION ........................................................................................................................................................................................................1090
Akito Ando, Kimio Hamazaki

3D SOUND FIELD REPRODUCTION USING DIRECTIONAL MICROPHONES ........................................................................................................................................................................................................1098
Toshiyuki Kimura

3D SOUND IMAGE CONTROL BY INDIVIDUALIZED PARAMETRIC HEAD-RELATED TRANSFER FUNCTIONS. ........................................................................................................................................................................................................1106
Kazuhiko Iida, Yohji Ishii

ACOUSTIC SIMULATION APPLIED TO URBAN SEARCH AND RESCUE (US&R) ........................................................................................................................................................................................................1114
Akito Yoshimura, Fumitsuki Satoh, Tohru Takahashi

APPLYING SPECTRAL CUES TO GENERATE ELEVATED SOUND SOURCES DISPLAYED VIA EAR-LEVEL LOUDSPEAKERS ........................................................................................................................................................................................................1123
Hyun Jo, William L. Martens, Youngjin Park, Sunmin Kim

DESIGN OF SYSTEM TO REPRODUCE 3-D SOUND FIELD WITH MULTIPLE PARAMETRIC LOUDSPEAKERS ........................................................................................................................................................................................................1129
Yuitaro Sagibayashi, Sota Kurimoto, Masanori Morise, Takamobu Nishiura

EVALUATION OF LOCALIZED SPEECH INTELLIGIBILITY FROM BONE-CONDUCTION HEADPHONES WITH COMPETING NOISE FOR AUGMENTED AUDIO REALITY ........................................................................................................................................................................................................1135
Nanynu Anazawa, Yosuke Kobayashi, Hironuki Yagyu, Takayuki Kandu, Kazuhito Kondo

GENERATION OF SOUND ZONES IN 2.5 DIMENSIONS ........................................................................................................................................................................................................1141
Finn Jacobsen, Martin Olsen, Martin Möller, Finn Ågerkvist

HEAD MOVEMENTS DURING HORIZONTAL SOUND LOCALIZATION ........................................................................................................................................................................................................1147
Yuuki Toyoada, Daishi Morikawa, Tatuya Hirahara

IMPACT OF DYNAMIC BINAURAL SIGNALS ON THREE-DIMENSIONAL SOUND REPRODUCTION ........................................................................................................................................................................................................1153
Tatnaya Hirahara, Yuuki Sawada, Daishi Morikawa

IMPACT OF HEAD MOVEMENT ON SOUND LOCALIZATION WITH BAND-LIMITED NOISE ........................................................................................................................................................................................................1161
Daishi Morikawa, Yuuki Toyoada, Tatnya Hirahara
IN-SITU CALIBRATION OF A MULTICHANNEL LOUDSPEAKER SYSTEM FOR 3D SOUND REALIZATION ..............................................................................................................................................................................1167
Jung-Min Lee, Ji-Ho Chang, Jin-Young Park, Yang-Hann Kim

MEASUREMENT AND REPRODUCTION OF HIGH-DEFINITION SOUND SPACE INFORMATION USING NUMEROUS MICROPHONES AND LOUDSPEAKERS ..........................................................................................................................1175
Yukio Iwata, Takuma Okamoto, Jorge Treviño, Shuichi Sakamoto, Yōiti Suzuki

ON DISTORTION MEASURES EFFECTIVE FOR THE ESTIMATION OF JAPANESE SPEECH INTELLIGIBILITY OF LOCALIZED SPEED WITH COMPETING NOISE IN VIRTUAL ACOUSTIC SPACE ............................................................................................................................1183
Yusuke Kobayashi, Kazuhiro Kondo

PRINCIPAL-COMPONENT-BASED SMOOTHING OF HEAD-RELATED TRANSFER FUNCTIONS REDUCES VARIABILITY IN ELEVATION JUDGMENTS FOR VIRTUAL SOURCES LOCATED ON A CONE OF CONFUSION ............................................................................................................................1189
William L. Martens, Hyun Jo, Youngjin Park

RENDERING A DESIRED SOUND FIELD USING THE INVERSE APPROACH: ROBUST METHOD FOR THE REAL SITUATION WITH UNCERTAINTIES ..............................................................................................................................................................................1198
Seigo Enomoto, Yusuke Ikedo, Shiro Ise, Satoshi Nakamura

SOUND FIELD SHARING SYSTEM BASED ON BOUNDARY SURFACE CONTROL PRINCIPLE ...........................................................................................................................................................................................................1204
Min-Ho Song, Dong-Soo Kang, Yang-Hann Kim, Ji-Ho Chang, Hyun-Suk Kim, Jong-Tong Keum, Chang-Hee Byun

SUBJECTIVE EVALUATION OF REDUCTION IN THE NUMBER OF LOUDSPEAKERS IN A BOUNDARY SURFACE CONTROL SYSTEM .................................................................1212
Kazuo Matsuoka, Shiro Ise, Seigo Enomoto, Yusuke Ikedo, Satoshi Nakamura

SYSTEMATIC BEHAVIOR OF RESONANCE MODE IN PINNA CAVITY ..............................................................................................................................................................................................................1216
Makoto Ohnishi, Yukio Iwata, Yōiti Suzuki, Kazutomi Ishii

THREE-DIMENSIONAL SOUND FIELD REPRODUCTION USING LINEAR LOUDSPEAKER ARRAY SYSTEM ..............................................................................................................................................................................................................1224
Hiroki Okubo, Kazuho Ono, Yatsushige Nakayama

UNIFORM SOUND LEVEL DISTRIBUTION WITH HIGH INTELLIGIBILITY OPTIMIZATION OF LOUDSPEAKERS' POSITIONS AND DELAYS IN LARGE SCALE OPEN THEATER ......................................................................................................................................................1232

SS 21 NUMERICAL METHODS IN ACOUSTICS

AN EFFICIENT TECHNIQUE FOR PLANE-SYMMETRICAL ACOUSTIC PROBLEMS IN LOW-FREQUENCY FMFEM ..............................................................................................................................................................................1240
Dongyan Shi

ANALYZING ACOUSTIC RADIATION MODES USING FAST MULTIPOLE BOUNDARY ELEMENT METHOD ..............................................................................................................................................................................1249
Haijun Wu, Weikang Jiang

APPLICATION OF VIRTUAL MODE SYNTHESIS METHOD FOR SHIP COMPARTMENT IMPACT NOISE ..............................................................................................................................................................................1257
Dongyan Shi

DESIGN SENSITIVITY ANALYSIS OF 3D UNBOUNDED VIBRO-ACOUSTIC PROBLEMS USING THE WAVE BASED METHOD ..............................................................................................................................................................................1267
Kazuo Kozumi, Bert Pluymers, Wim Desmet, Semyung Wang

EXPERIMENTAL ESTIMATION METHOD OF INTERNAL LOSS FACTOR USING POWER INJECTION METHOD IN STATISTICAL ENERGY ANALYSIS ..............................................................................................................................................................................1273
Takayuki Koizumi, Nobutaka Tsujiuchi, Hirofumi Wada, Mitsugu Kaneko

EXPERIMENTAL VERIFICATION OF COVERAGE OF INVERSE-NUMERICAL ACOUSTIC ANALYSIS ..............................................................................................................................................................................1284
Takayuki Koizumi, Nobutaka Tsujiuchi, Kenji Murao, Mitsugu Kaneko

MODELLING OF SOUND TRANSMISSION THROUGH SHIP STRUCTURES USING THE PATCH TRANSFER FUNCTIONS APPROACH ..............................................................................................................................................................................1292
Laurent Mazis, Mathieu Aucejo, Jean-Louis Guyader

RIGID-FRAME POROUS MATERIAL PHYSICAL PARAMETER ESTIMATION WITH BAYESIAN ANALYSIS ..............................................................................................................................................................................1299
Cameron Fackler, Ning Xiang

SIMULATION OF THE ACOUSTIC BEHAVIOUR OF RANDOM FIBROUS MATERIALS ..............................................................................................................................................................................1304
Charles Poyre, Dominique Jutilin

STUDY OF ACOUSTIC RADIATION FROM THE FINITE DOUBLE CYLINDRICAL SHELLS WITH RIGID RIB UNDERWATER ..............................................................................................................................................................................1312
Yilin Zhang, Weikang Jiang, Jingtang Xing

SUB-GRIIDDING MESH SYSTEM FOR ACOUSTICAL FINITE-DIFFERENCE TIME-DOMAIN ANALYSIS APPLIED TO HEAD-RELATED TRANSFER FUNCTIONS ..............................................................................................................................................................................1319
Takumi Asakura, Risa Takahashi, Shinichiro Sakamoto

UPDATING ACOUSTICAL FE MODELS: LOCALIZATION OF UNRELIABLE PHYSICAL DATA..............................................................................................................................................................................1326
A. Progmeure, Ph. Bouillard, A. Dearaemaeker, P. Ludevaë

SS M1 SIGNAL PROCESSING AND ANALYSIS

A STRATEGY FOR LOCALIZATION OF A SILENT INTRUDER USING A MICROPHONE ARRAY AND A LOUDSPEAKER .............................................................................................................. 1495
Chihya Kim, Daesung Kim, Sung Q. Lee, Kangho Park, Semyung Wang

CALCULATION METHOD OF ACOUSTIC IMPEDANCE FROM SOUND ABSORPTION COEFFICIENT BY HILBERT TRANSFORM
Akinori Fukushima, Tomoyuki Itiki

CLASSIFICATION FOR GOLF BALL BY “IMPACT-SOUND” FEATURES BASED ON WAVELET SPECTRUM ..................................................................................................................... 1506
Kohei Hayashida, Takamobu Nishimura, Rock Ichii, Yutaka Kakehata, Arthur Molinari

ESTIMATION OF DISTANCE FROM SOUND SOURCE USING SINGLE MICROPHONE BASED ON INTERFERENCE BETWEEN TRANSMITTED AND REFLECTED WAVES ................................................................. 1512
Noboru Nakasako, Shimpei Hanabusa, Toshihiro Shinohara, Tetsuji Uebo

SS M2 NUMERICAL AND COMPUTATION TECHNIQUES

A COMPUTATIONAL INVESTIGATION ON THE SOUND PROPAGATION IN VENTILATION GRILLE .................................................................................................................. 1518
Yuya Nishimura, Yuuake Takashima, Quang Nguyen Hay, Sohei Nishimura, Noriko Horibe, Tsuyoshi Nishimura, Takashi Yano

DISTRIBUTION OF VIBRATIONS OF LINEAR SYSTEMS EXCITED BY RANDOM IMPULSES IMPLIES DISTRIBUTION OF THE IMPULSES ................................................................................................. 1522
Marian Jablonski, Agnieszka Oguz

MODELING OF ROTATING BLADES FOR VIBRATION ANALYSIS .......................................................................................... 1526
M. M. Altug Bicak, H. Temel Belek

ON THE ACOUSTIC IMPEDANCE OF PERFORATES AND ITS APPLICATION TO ACOUSTIC ATTENUATION PREDICTIONS FOR PERFORATED TUBE SILENCERS ......................................................... 1544
Z. L. Ji, Z. Fang

PREDICTION OF SOUND IN AN ELLIPTICAL SOUNDPROOFING ELEMENT .................................................................................. 1555
Quang Nguyen Hay, Yuya Nishimura, Sohei Nishimura, Noriko Horibe, Tsuyoshi Nishimura, Takashi Yano

THEORETICAL ANALYSIS ON THE SOUNDPROOFING UNIT WITH INPUT AND OUTPUT OPENING AT VARIOUS POSITIONS .................................................................................. 1559
Quang Nguyen Hay, Yuya Nishimura, Sohei Nishimura, Noriko Horibe, Tsuyoshi Nishimura, Takashi Yano

WAVE PROPAGATION METHOD USED FOR THE VIBRATION ANALYSIS OF MULTI-SPAN BEAM SYSTEMS WITH ARBITRARY BOUNDARY CONDITIONS ................................................. 1563
Haijun Zhou, Wangou Li, Binglin Lv, Donghua Wang, Zengbao Wang

SS 25 SPEECH RECOGNITION IN NOISE

A NEW METHOD FOR MEASUREMENT OF WORD INTELLIGIBILITY UNDER NOISY AND REVERBERANT ENVIRONMENT IN A SHORT DURATION ............................................................................ 1569
Hiroshi Sato, Shu-Ichi Sakamoto, Tadahisa Kondo, Shigeyuki Amano, Yutaka Suzuki

ADVANCED SWITCHING LINEAR DYNAMIC SYSTEM USING ENHANCED CLUSTERING METHOD FOR SPEECH FEATURE MAPPING ................................................................................. 1575
Chang Woo Han, Tae Gyoong Kang, Doo Hwa Hong, Nam Soo Kim

AN IMPROVED SPEAKER DIARIZATION SYSTEM ON MULTIPLE DISTANCE MICROPHONE MEETINGS .................................................................................................................. 1582
Zhou Yu, Li Lu, Hongbin Suo, Yonghong Yan

COMBINATION OF SOFT MASK METHODS AND MODEL BASED WIENER FILTER FOR NOISE ROBUST SPEECH RECOGNITION .................................................................................................. 1588
Byung Ok Kang, Iho Young Jung, Yun Keun Lee

DIFFERENCES IN THE EFFECT OF SPEECH RATE ON INTELLIGIBILITY IN ARTIFICIALLY SPEED ALTERED SPEECH BY PHONETIC FEATURE ....................................................................... 1593
Tora Shibuya, Youkane Kobayashi, Kazuhiro Kondo

FUNDAMENTAL RESEARCH ON A BODY-CONDUCTED SPEECH MICROPHONE USING AN OPTICAL FIBER BRAGG GRATING FOR HIGH MAGNETIC FIELD AND NOISY ENVIRONMENTS .................................................................................................. 1599
Masasahi Nakayama, Shunsuke Ishimitsu, Hayato Nagoshi, Seiji Nakagawa, Kazutoshi Fukui

LABORATORY EXPERIMENT ON INTELLIGIBILITY OF PUBLIC ADDRESS SYSTEM ANNOUNCEMENTS IN PUBLIC SPACES .................................................................................. 1604
Sakae Yokoyama, Hiroo Yano, Hideaki Seki, Hideki Tachibana
NOISE ROBUST SPEECH RECOGNITION BASED ON A NON-NEGATIVE MATRIX FACTORIZATION ................................................................. 1610
Seon Man Kim, Hong Keok Kim, Sang Joo Lee, Yun Keun Lee
POWER NORMALIZED PERCEPTUAL LINEAR PREDICTIVE FEATURE FOR ROBUST AUTOMATIC SPEECH RECOGNITION ................................................................................................................................................................. 1617
Shang Cai, Xin Li, Xueqiang Zou, Jielin Pan, Yonghong Yan
SOUND PRESENTATION OF AUDIO REALITY SYSTEMS IN ENVIRONMENT WITH WIND NOISE ................................................................. 1623
Masanori Miura, Kazuhiro Kondo, Hideharu Isaka
SPEECH ENHANCEMENT BASED ON IMPROVED SPEECH PRESENCE UNCERTAINTY TRACKING TECHNIQUE ........................................................................................................................................................................ 1629
Masanori Miura, Kazuhiro Kondo, Hideharu Isaka
SPEECH RECOGNITION ON NOISE REMOVING BY COMMON USE BY THE ADAPTIVE SS AND 3 SOURCE ASSUMPTION ICA ........................................................................................................................................................................ 1635
Kazuhide Okada
SPOKEN WORD INTELLIGIBILITY TESTS UNDER NOISY CONDITIONS .................................................................................. 1640
Tadahisa Kondo, Shigeki Sakamoto, Shigeki Amano, Yoiti Suzuki

SS 26 ACOUSTICAL METROLOGY (INSTRUMENTS, MEASUREMENTS, STANDARDS, UNCERTAINTY)

A PROTOTYPE OF NEW MICROPHONE BY USE OF THE OPTICAL TOTAL REFLECTION ................................................................. 1647
Yasuhiro Shimono, Masataka Chikai, Kenji Muto, Kazuo Yagi, Yuki Arakawa
A STUDY ON THE INFLUENCE OF 3-T MRI DRIVING SOUND TO ASSISTANT NURSE ......................................................................... 1652
Yasuhiro Shimono, Masataka Chikai, Kenji Muto, Kazuo Yagi, Yuki Arakawa
DESIGN OF A THREE-DIMENSIONAL DIRECTIONAL SOUND LEVEL METER .......................................................................................... 1658
Marinus M. Boone, George Boersma, Johannes M. Mulder, Marcel Kerver
DEVELOPMENT OF SOUND VISUALIZATION SYSTEM BASED ON BINOCULAR VISION AND SHORT-TIME WAVE SUPERPOSITION ALGORITHM ................................................................................ 1665
Fumiaki Satoh, Masato Sano, Yukiteru Hayashi, Jin Hirano, Shinichi Sakamoto
DIRECTIONAL RESPONSE MEASUREMENT OF A SOUND LEVEL METER USING SWEEP-SINE IN A SIMULATED FREE-FIELD ........................................................................................................................................................................ 1672
Guillaume Goulamhousen, Richard A. Wright
DISCUSSION ON CONSISTENCY OF FREE-FIELD SENSITIVITIES AMONG LS1P AND LS2AP MICROPHONES ........................................................................................................................................................................ 1678
Hironobu Takahashi, Wataru Tonomi, Ryo Hisumi
EUROPEAN ROUND ROBIN TEST FOR SOUND INSULATION MEASUREMENTS OF LIGHTWEIGHT PARTITION ........................................................................................................................................................................ 1684
Cyrille Demanet, Maria Jose De Rozas, Jean Baptiste Chene, Remy Foret
FREE-FIELD CALIBRATION OF MEASUREMENT MICROPHONES AT HIGH FREQUENCIES ......................................................................... 1692
Salvador Berrera-Figueroa, Knud Rasmussen, Antoni Torras Rosell, Finn Jacobsen
INFLUENCE OF LOUDSPEAKER DIRECTIVITY ON THE MEASUREMENT UNCERTAINTY OF THE ACOUSTIC TESTING OF FACADES ........................................................................................................................................................................ 1697
Antonio Pedroso, José Luis Sánchez, Vladimir Ulín, César Díaz
MULTI-PATH REFLECTION REMOVAL TECHNIQUES IN FREE-FIELD UNDERWATER TRANSDUCER CALIBRATION ........................................................................................................................................................................ 1703
Hyu-Sang Kwon, Sung-Joon Suh, Jae-Gap Suh, Hye-Seon Seo, Chee-Young Joh
ON THE PREDICTION OF ROOM ACOUSTIC PARAMETERS USING A SINGLE MEASURE ...................................................................... 1707
Csaba Huzezy, Shinichi Sakamoto
OPTICAL PRESSURE TRANSDUCER WITHOUT MEMBRANE: AN ANALYSIS OF SENSOR NOISE SOURCES ........................................................................................................................................................................ 1713
Balthazar Fischer, Rudolf Fröhlich, Ernst Winther
SIMULTANEOUS MEASUREMENT OF MULTICHANNEL ROOM IMPULSE RESPONSES USING SEMI-BSS ................................................................. 1724
Yosuke Tatekura, Takahiro Koyano, Kouji Ouchi
SOUND INSULATION MEASUREMENT USING 10 MINUTE SWEEP-SINE SIGNAL ................................................................................ 1730
Fumiaki Satoh, Masato Sano, Yukiteru Hayashi, Jin Hirano, Shinichi Sakamoto
SPECTRUM ANALYSIS OF A 3-TELA MRI DRIVING SOUND IN SPACE ON THE EXAMINATION TABLE ........................................................................................................................................................................ 1736
Masataka Chikai, Yasuhiro Shiumono, Kenji Muto, Kazuo Yagi, Yuki Arakawa

SS 27 ACOUSTICAL METROLOGY (INSTRUMENTS, MEASUREMENTS, STANDARDS, UNCERTAINTY)

ACOUSTICAL SOURCE MAPPING BASED ON DECONVOLUTION APPROACHES FOR CIRCULAR MICROPHONE ARRAYS ........................................................................................................................................................................ 1741
Elisabet Tiana-Roig, Finn Jacobsen
AEREOACOUSTIC SOURCES LOCALIZATION BY MEANS OF NEARFIELD ACOUSTIC HOLOGRAPHY ADAPTED TO WIND TUNNEL CONDITIONS ........................................................................................................................................................................ 1749
Elisabet Tiana-Roig, Finn Jacobsen
APPLICATION OF MODIFIED SONAH TO VELOCITY RECONSTRUCTION OF EXPERIMENTAL MOCK-UP ........................................................................................................................................................................ 1755
A. Koutrny, P. Švec, O. Jirícek
DEVELOPMENT OF A HELMET TYPE EAR-HELPER FOR SOUND SOURCE LOCALIZATION
................................................................. 1759
Ki-Won Kim, Dae-Hoon Seo, Koo-Hoon Kim, Yang-Hann Kim

IDENTIFICATION OF NOISE SOURCES RADIATION BASED ON 3D TRANSFER PATH ACOUSTICS
HOLOGRAPHY ............................................................................................................................................................................ 1767
Peng Hao, Shini Zheng, Xiaomin Lian, Kuiqiang Li

KALMAN FILTER-BASED MICROPHONE ARRAY SIGNAL PROCESSING ................................................................. 1776
Mingsian R. Bai, Ching-Cheng Chen

MACHINERY FAULT DIAGNOSIS BASED ON NEAR FIELD ACOUSTIC HOLOGRAPHY AND GRAY LEVEL GRADIENT CO-OCCURRENCE MATRICES .................................................................................. 1784
Wenbo Lu, Weikang Jiang, Junjian Hou

MULTIPLE SOUND SOURCE LOCALIZATION USING SIMILARITIES BETWEEN THE BEAMFORMING OUTPUT AND THE CANDIDATE SIGNAL ................................................................. 1791
Wenbo Lu, Weikang Jiang, Junjian Hou

PROCEDURES OF THE NEARFIELD ACOUSTIC HOLOGRAPHY BASED ON THE INVERSE FAST MULTIPOLE BOUNDARY ELEMENT METHOD ................................................................................................. 1799

SOUND FIELD RECONSTRUCTION BASED ON THE ACousto-OPTIC EFFECT ........................................................................ 1806
Antoni Torras-Rosell, Salvador Barrera-Figueras, Finn Jacobsen

SUPERSonic ACoustIC INtENSITY WITH STATISTICALLy OPTIMIZED NEAR-FIELD ACOUSTIC HOLOGRAPHY
Efren Fernandez-Grande, Finn Jacobsen

SUPPRESS THE SIDELOBE EFFECT IN MOVING SOUND SOURCE IDENTIFICATION WITH MICROPHONE ARRAY ................................................................................................................................. 1819
Diuangye Sang, Bing Li, Zheqin Wang, Xiaomin Lian

SS M3 MEASURING TECHNIQUES

A RESEARCH ABOUT LOW FREQUENCY SOUND MEASUREMENT USING ACOUSTIC HOLOGRAPHY .................. 1827
Masaio Nagamatsu, Mitsuo Iwahara, Masaharu Minoriwaka, Mao Takamatsu, Yuta Hanaki

ACCOUNTING FOR TIME VARIANCE EFFECTS ON SWEPt SINE AND MLS TECHNIQUES ................................................................. 1832
Joel Preto Paulo, J. L. Bento Coelho

FILEd SURVEY METHOD USING ORIGAMI IMPULSE SOURCE FOR SOUND INSULATION MEASUREMENTS .......................................................................................................................................................... 1839
Eno Toyoda, Satoshi Sugie, Junichi Yoshimura

HUMIDITY EFFECT ONTO MEASUREMENT OF ENSEMBLE AVERAGED SURFACE NORMAL IMPEDANCE OF MATERIALS USING COMBINATION OF MICROPHONE AND PARTICLE VELOCITY SENSOR ................................................................................................. 1844
Asnawiawty Kauno, Toru Otsuru, Reiji Tomiku, Noriko Okamoto, Nazli Che Din, Hiroaki Nakano

NOISE MONITORING SYSTEM FOR AREA ................................................................................................................................. 1850
Hiromitsu Umayahara, Toshiyuki Hasumi, Masaharu Ohyu, Kiyokatsu Iwahashi

OUTDOOR MEASUREMENT OF SOUND ABSORPTION COEFFICIENT USING COMBINED PARTICLE VELOCITY-PRESSURE SENSOR-INFLUENCE OF WIND SCREEN ............................................................................... 1862
Satoshi Sugie, Junichi Yoshimura

SOUND INSULATION MEASUREMENTS OF FACADES WITH VARIABLE MICROPHONE POSITIONS ...................... 1867
Sigmund Olafsen

Volume 3

STUDY OF SAMPLE HOLDING METHOD WHEN USING SAMPLE HOLDING RINGS IN NORMAL INCIDENCE SOUND TRANSMISSION LOSS IMPEDANCE TUBE MEASUREMENTS .................................................................................. 1875
Masanuru Kimura, Katsuhito Ohi, Yunecon Ryu, J. Stuart Bolton

THE UNIQUE STANDARD OF BALINESE TRADITIONAL MUSIC INSTRUMENT ................................................................. 1881
Made Miassa, Ketut Gede Sugita

PROPAGATION, MEASURES AND ACTIVE CONTROL

SS 28 ACOUSTICS IN WORKPLACE - TECHNOLOGY AND PERFORMANCE

ACOUSTIC PROPERTIES OF SCHOOL ROOMS IN ELEMENTARY SCHOOLS IN POLAND -RESULTS OF MEASURING REVERBERATION TIME AND SPEECH TRANSMISSION INDEX ............................................................................... 1886
Witold Mikulski, Jan Radosz

ACOUSTIC PROPERTY OF OPEN-PLAN OFFICES DERIVED FROM AN IDEALIZED PARTIAL ROOM-SHAPE MODEL .......................................................................................................................................................... 1892
Takashi Koga, Motoaki Iairi, Ken’ichi Takehayaishi

CASE STUDY ON A SUBJECTIVE DESCRIPTION SURVEY OF SPEECH PRIVACY FOR THE WORKERS WITH CONCENTRATED WORK IN THE CONTEMPORARY WORKPLACE OF JAPAN .................................................................................. 1898
Kazuki Kano, Yasushi Shimizu
EQUAL-INTELLIGIBILITY CONTOURS AND THOSE APPLICATION TO VARIOUS SOUND FIELDS ........................................ 1905
Yasuhiro Hashimoto, Masayuki Morimoto, Hayato Sato, Yasuhiko Odagawa
EXPERIMENTAL COMPARISON BETWEEN SOUND SOURCES WITH DIFFERENT DIRECTIVITY IN INVESTIGATING ACOUSTIC PROPERTIES OF SELECTED CLASSROOMS IN ELEMENTARY SCHOOLS .......................................................... 1911
Jan Radose, Witold Mikulski
EXPERIMENTAL STUDY OF SPEECH PRIVACY WITH A SOUND-MASKING SYSTEM IN PHARMACIES ........................................................... 1917
Mai Fujisawa, Masato Hata, Takashi Yamakawa, Yasushi Shimizu
EXPERIMENTAL STUDY ON EVALUATION METHOD OF SPEECH PRIVACY ............................................................... 1924
Hyomin Lee, Kanako Ueno, Shinichiro Sakamoto, Mai Fujisawa, Yasushi Shimizu
PEAK SOUND-PRESSURE LEVELS CAUSED BY ACOUSTIC OCCUPATIONAL ACCIDENTS (LOUD NOISES) .......................................................................................................................................................................................... 1930
Reimer Paudsen
SPEECH PRIVACY: WHAT IS THE BEST WAY TO DESIGN REGULATORY POLICY? AN OVERVIEW OF THE CURRENT STATUS OF AND FUTURE PROSPECTS FOR IMPROVED SPEECH PRIVACY IN THE WORKPLACE .......................................................................................................................... 1938
Takashi Yamakawa, Masato Hata, Mai Fujisawa, Yasushi Shimizu
THE SOLUTION OF SPEECH PRIVACY SECURED TO A WAITING SPACE FOR A CONFIDENTIAL CONVERSATION AT A PHARMACY COUNTER ........................................................................................................................................... 1945

SS 29 MATERIALS AND STRUCTURES FOR NOISE AND VIBRATION CONTROL

ACOUSTIC CHARACTERIZATION OF POROUS SUBSTRATUM USED IN GREEN NOISE CONTROL ELEMENTS ..................................................................................................................................................................................................... 1953
Kirill Y. Horoshenkov, Amir Khan, Hadi Benkreira, Agnès Mandon, Rene Rohr
ENERGY LOSS BY INTERNAL FRICTION OF PANEL-TYPE SOUND ABSORBER ............................................................................................................................................................................................................... 1959
Kenichi Takebayashi, Keita Ametani, Tatsuya Morishita, Takumi Uchiyama, Shinji Nishiwaki
EXCESS SOUND ABSORPTION IN THE NORMAL INCIDENCE OBTAINED BY TWO MICROPERFORATED PANEL ABSORBERS WITH DIFFERENT IMPEDANCE ........................................................................................................................................................................................................... 1966
Motoki Yairi, Kimihiro Sakagami, Kenichi Takebayashi, Masayuki Morimoto
EXPERIMENTAL VALIDATION OF FORCE RADIATION MODES: A NOVEL APPROACH TO REDUCTION OF SOUND RADIATION FROM VIBRATING STRUCTURE ........................................................................................................................................................................................................ 1974
Zenzo Yamaguchi, Kimihiro Sakagami, Masayuki Morimoto, J. Stuart Bolton
IMPROVEMENT OF SOUND INSULATION PERFORMANCE OF DOUBLE PANEL STRUCTURES BY USING DAMPING MATERIALS ............................................................................................................................................................................................................... 1980
Ruihui Mu, Masahiro Toyoda, Daiji Takahashi
PREDICTION OF SOUND ABSORPTION COEFFICIENTS OF POROELASTIC MEDIA BY THE HOMOGENIZATION METHOD ........................................................................................................................................................................................................ 1989
Takashi Yamamoto, Shinichi Maruyama, Kenjiro Terada, Katsuhito Izui, Shinji Nishiwaki
THE LOW FREQUENCY PERFORMANCE OF METAMATERIAL BARRIERS BASED ON CELLULAR STRUCTURES ........................................................................................................................................................................................................ 1997
Shinixsa Varasani, J. Stuart Bolton, Thomas Siegmund, Raymond J. Cipra
TRANSFER IMPEDANCE OF MICROPERFORATED MATERIALS WITH TAPERED HOLES ........................................................................................................................................................................................................ 2005
Thomas Herdité, Rondal Gordes, Jonathan H. Alexander, J. Stuart Bolton

SS 31 SOUND ABSORPTION MATERIALS AND TECHNOLOGY

A CONSIDERATION OF IMPEDANCE MATCHING ISSUES WITH METAMATERIALS ............................................................................................................................................................................................................... 2013
Simon A. Pope, Michael Pelegrinis, Steve Daley
BROADBAND THIN ABSORBERS ............................................................................................................................................................................................................... 2022
Julien Monet-Descombes, Arnaud Duval, Jean-François Rondeau, Guillaume Deshayes
ESTIMATION OF ACOUSTICAL PROPERTIES FOR MULTI-LAYERED STRUCTURES INCLUDED A PERFORATED PANEL USING THE TRANSFER MATRIX METHOD ........................................................................................................................................................................................................ 2031
Kuniharu Hinozawa
LOW FREQUENCY ABSORPTION AND ATTENUATION OF GRANULAR AEROGEL COMPOSITES ............................................................................................................................................................................................................... 2038
Matthew Azvedo, Ning Xiang, Cameron Fackler
PROPOSAL OF ALTERNATIVE DESIGNS FOR MICROPERFORATED PANELS ........................................................................................................................................................................................................ 2044
Heidi Ruiz, Pedro Cobo
RANDOM INCIDENCE ABSORPTION COEFFICIENTS OF POROUS ABSORBERS BASED ON LOCAL AND EXTENDED REACTION MODELS ............................................................................................................................................................................................................... 2050
Cheol-Ho Jeong
SOUND ABSORBING MATERIALS MADE OF RECYCLED POLYURETHANE FOAM ............................................................................................................................................................................................................... 2058
Romina Del Rey, Jesus Alba, Jorge P. Arenas, Vicente Sanchis
SOUND ABSORPTION OF A BAFFLED CAVITY-BACKED MICRO-PERFORATED PANEL ABSORBER UNDER OBLIQUE AND DIFFUSED INCIDENCE ............................................................................................................................................................................................................... 2064
Cheng Yang, Li Cheng
SUBJECTIVE RESPONSE TO FOOT-FALL NOISE, INCLUDING LOCALIZATION OF THE SOURCE POSITION

The Experimental Investigation on Floor Impact Sound Insulation with Floor Coverings Construction

Wood or Concrete Floor? - A Comparison of Direct Sound Insulation

SS 31 Prediction of Sound Transmission in Buildings

A Parameter Study of Coupling Properties in Finite Element Models of Single-Stud Double-Plate Panels

Evaluation of Floor Impact Sounds in a Box-Frame Type Scale Model Structure

Influence of Periodic Stiffening on Flanking Noise Transmission - Numerical Analysis Based on Various Frame Designs of a Lightweight Panel Structure

Modeling of Micro-Perforated Panels Effect in a Complex Vibro-Acoustic Environment Using Patch Transfer Function Approach

Numerical Investigation of the Niche Effect in Sound Insulation Measurement

Prediction of Sound Reduction Index for Laminated Glass Pane Under Various Temperatures

Predictions of Sound Insulation Performance of Honeycomb Composite Panels for Cruise Ships

Psychoacoustic Evaluation of Indoor Sound Quality of a Habitat Space by Head/Torso Simulator and Jury Test

The Challenge of Acoustic Prediction Concerning the Restoration of 19th Century Buildings

The Effects of Stiffeners on the Transient Vibroacoustic Response of a Window

Using the Framework of Statistical Energy Analysis to Incorporate Tunneling Mechanisms for Bending Wave Transmission Across a Ribbed Periodic Plate

Using Transient SEA to Assess Errors in the Total Loss Factor Determined from Measured Structural Reverberation Times in Building Acoustics

SS 33 Lightweight Constructions and Systems

Prediction of Flanking Transmission in Light Weight Timber Framed Construction with Sea-Wood, a Sea Software

Prediction of Vibratory and Acoustic Transparency in Wooden Buildings

The Sound Insulation of Lightweight Roofing Systems

Three Dimensional Observation of Sound Leakage from Slide Type Window Sash Using Particle Velocity Sensor

SS 32 Acoustics of Sustainable Buildings

A Methodology for Building Acoustics Assessment and Classification, in Portugal

Acoustic Performance of Floor-Ascending Method for Multifamily Dwellings and Its Resource-Recycling Ability

Acoustically Robust Light Weight Constructions Require Controlled Building Process
ARCHITECTURAL PLANNING FOR SUSTAINABLE LIVING .............................................................................................................. 2384
Yoshinori Sakurai

IN-SITU MEASUREMENT ON NOISE SHIELDING EFFECTS OF EAVES ATTACHED ON A HIGH-RISE
BUILDING FAÇADE ........................................................................................................................................................................... 2392
Ami Tanaka, Shintichi Sakamoto

SOUND DISPERSION AND REVERBERATION BY A SINGLE TREE ....................................................................................................... 2398
Hong-Seok Yang, Jian Kang, Chris Cheal

SUSTAINABILITY AND ACOUSTICS: WHAT ARE WE LOOKING FOR? ............................................................................................... 2408
Marc Asselineau

SS 33 ACTIVE NOISE CONTROL - NEW TARGET OF ANC
A ROBUST LEAST MEAN M-ESTIMATE ALGORITHM FOR ACTIVE NOISE CONTROL UNDER IMPULSIVE NOISE CONDITION ................................................................. 2412
Yuexian Zou, Pengfei Jiang, Sen M. Kuo

ACOUSTIC ENCLOSURE WITH ACTIVE SOUND TRANSMISSION CONTROL (ON THE COMPARISON OF ENCLOSURE'S SIZE) ........................................................................................................... 2418
Kouji Higashiyama, Akira Sanada, Nobuo Tanaka

ACTIVE CONTROL OF SOUND TRANSMISSION THROUGH A PANEL USING POINT FORCE ACTUATORS AND PVDF FILM SENSORS ........................................................................................................... 2424
Kouji Higashiyama, Akira Sanada, Nobuo Tanaka

ACTIVE CONTROL SYSTEM FOR GLOBAL CANCELLATION OF NOISE WHILE PRESERVING WANTED SOUND IN MULTI-DOMAINS ........................................................................................................... 2430
Hyun Lim, Yia W. Lam, Sergey V. Utyuzhnikov, Ali Tarun

ACTIVE STRUCTURAL ACoustic CONTROL OF THIN PLATE WITH MIXED BOUNDARY CONDITIONS ................................................................................................................................. 2436
Vojtech Jandák, Marš-Brožánek, Ondřej Brejček

ACTIVE VIBRATION CONTROL OF CLAMPED BEAMS USING FILTERED-VELOCITY FEEDBACK CONTROL .................................................................................................................................. 2442
Changgou Shim, Chinsuk Hong, Weui Bong Jeong

ACTIVE WINDOW BASED ON THE PREDICTION OF INTERIOR SOUND FIELD: EXPERIMENT FOR A BAND-LIMITED WHITE NOISE ........................................................................................................... 2454
Byoungbo Kwon, Youngjin Park

ACTIVE-NOISE-CONTROL-BASED SPEECH ENHANCEMENT BY USING HEAD-ENCLOSING LOUDSPEAKERS WITH AN IN-CAR AUDIO SYSTEM ........................................................................................................... 2458
Masanori Morise, Takayuki Iríki, Takanobu Nishiyama

ADAPTIVE ALGORITHMS FOR ACTIVE CONTROL OF IMPULSIVE NOISE ........................................................................................... 2464
Muhammad Tahir Akhtar, Wataru Mitsuhashi

AN ALGORITHM FOR ACTIVE CONTROL OF TRANSFORMER NOISE WITH A SYNTHESIZED REFERENCE SIGNAL .......................................................................................................................... 2472
Limin Zhang, Jiancheng Tao, Xiaojian Qiu

BASIC STUDY ON ACTIVE ACOUSTIC SHIELDING: PHASE 3 IMPROVING NOISE REDUCING PERFORMANCE IN LOW FREQUENCY REGION ........................................................................................................... 2478
Tatsuya Murao, Masahara Nishimura

BROADBAND DESIGN OF REMOTELY LOCATED VIBRATION CONTROL SYSTEMS: A STABLE SOLUTION FOR NON-MINIMUM PHASE DYNAMICS ........................................................................................................... 2487
Ubaid Ubaid, Steve Daley, Simon Pope

CONSTRAINTS OF IDEAL BROADBAND NOISE CANCELLATION IN FEEDFORWARD ACTIVE NOISE CONTROL SYSTEMS .......................................................................................................................... 2493
Yun-Ji Chan, Lixi Huang, James Lam

DEVELOPMENT OF A NOISE REDUCTION SYSTEM WITH PIEZOELECTRIC MATERIAL TO TRANSMITTED NOISE (FEATURE AND CONTROL PRINCIPLE) ........................................................................................................... 2500
Katsuya Yamamoto, Mineyuki Asahina, Shogo Mamada, Daigo Sato

DEVELOPMENT OF A NOISE REDUCTION SYSTEM WITH PIEZOELECTRIC MATERIAL TO TRANSMITTED NOISE (APPLICATION RESULTS TO ACTUAL EQUIPMENTS) ........................................................................................................... 2506
Mineyuki Asahina, Katsuya Yamamoto, Shogo Mamada, Daigo Sato

EFFECTS OF FREQUENCY SEPARATION IN FEEDBACK ACTIVE NOISE CONTROL SYSTEMS .......................................................................................................................... 2512
T. W. Wang, W. S. Gan, S. M. Kuo

ELECTRO-PNEUMATIC TIME-DELAY CONTROL OF HIGH AMPLITUDE VIBRATIONS AT ASYMPTOTIC STABILITY OF PNEUMATIC TABLE DUE TO MECHANICAL VALVE OPERATIONS ........................................................................................................... 2520
Jong-Oh Sun, Tae-Seok Oh, Kwang-Soon Kim, Hyoeng Gyeun Gil

ENLARGING AND SPATIALLY EQUALIZING A ZONE OF QUIET BY USING ACTIVE CONTROL OF SOUND AT VIRTUAL MICROPHONES ........................................................................................................... 2526
Marc Pawełczyk, Piotr Watras

GLOBAL ACTIVE CONTROL OF SOUND RADIATED BY AN AIRCRAFT PANEL: A NUMERICAL STUDY .......................................................................................................................... 2531
Julian Greßkowski, Henry Burkhardt, Delf Sachau

INTEGRATED ACTIVE NOISE CONTROL SYSTEM FOR LOW-FREQUENCY NOISE IN AUTOMOBILES .......................................................................................................................... 2540
Akira Takahashi, Toshito Inoue, Kosuke Sakamoto, Yasunori Kobayashi
LOCAL ACTIVE CONTROL OF NOISE IN A TRAIN COMPARTMENT
Xiaopai Zhang, Xiaojun Qiu

NOISE BARRIER USING FEEDBACK ACTIVE NOISE CONTROL
Xun Wang, Shinya Kijimoto, Yosuke Koba, Koichiro Matsuda

ON A UNIDIRECTIONAL LOUDSPEAKER SYSTEM FOR LOW FREQUENCY RANGE REPRODUCTION USING ANC TECHNIQUE
Tsuyoshi Usagawa, Syuhei Murakami, Vecky Cantius Poekeoi, Yoshifumi Ohtsaki

PROGRESS IN RESEARCH ON NATURAL VENTILATION ANC WINDOWS

REAL-TIME EXPERIMENTS OF ACTIVE NOISE CONTROL ALGORITHMS IN NEONATAL INTENSIVE CARE UNITS
Sen M. Kuo, Kapila Beemanpally

ROBUST FEEDBACK ACTIVE NOISE CONTROL USING LINEAR PREDICTION FILTER
Hiroyasu Kobayashi, Yoshinobu Kajikawa

SELF-OPTIMIZING NARROWBAND INTERFERENCE CANCELLER - CAN REFERENCE SIGNAL HELP?
Maciej Niedzwiecki, Michal Meller

SEMI-ADAPTIVE FEEDBACK ACTIVE CONTROL OF MRI NOISE
Michal Meller, Maciej Niedzwiecki, Hirofumi Tetsu, Yoshinobu Kajikawa

SOUND FIELD EQUALIZATION BY ACTIVE ACOUSTIC IMPEDANCE CONTROL
Junji Hagio, Akihiro Kakuchi, Akira Omoto

THE EFFECT OF FLOW ON SEMI ACTIVE CONTROL OF DUCT NOISE WITH A HELMHOLTZ RESONATOR
Xiaojun Shi, Chanuk Ming Mak, Jun Yang

THE WAY TO IMPLEMENT AN ANC SYSTEM BY A SINGLE CHIP
Cheng-Yuan Chang, Sheng-Ting Li

TOWARDS A NEW ERA IN FAN DESIGN - ROTOSUB THE ACTIVE FAN
Lars Strömback, Mårten Oretorp

SS 34 OUTDOOR SOUND PROPAGATION IN LIVING ENVIRONMENT

A NUMERICAL AND EXPERIMENTAL STUDY OF MICROMETEOROLOGICAL EFFECTS ON URBAN SOUND PROPAGATION

A SIMPLE NOISE CALCULATION MODEL IN CITY STREET CANYONS BASED ON A DIFFUSION METHOD
Yasuaki Ohada, Koichiro Yoshihisa, Tetsuo Iwase, Kazuhiro Kuno

A SIMPLIFIED APPROACH FOR MAKING SOUNDMAPS WITHIN A GIS SOFTWARE
Judicaël Picaut, Nicolas Fortin, Guillaume Dutilleux

AN EXPERIMENTAL STUDY ON THE INPUT AND OUTPUT OF SOUNDPROOFING UNIT
Yusuke Takashima, Yuya Nishimura, Sohei Nishimura, Quang Nguyen Huy, Norko Borbée, Tsuyoshi Nishimura, Takashi Yano

AN INVESTIGATION ON SOUND PROPAGATION IN A STREET CANYON
Tomoyuki Itiki, Akino Fujihara

LONG-TERM MONITORING STATION (LTMS): A UNIQUE EXPERIMENTAL DATABASE FOR OUTDOOR SOUND PROPAGATION
Benoît Gauvreau, Bernard Bonhomme, Hervé Poutrier

MEASUREMENTS ON EFFECTS OF WINDS TO ROAD TRAFFIC NOISE PROPAGATIONS OVER A FLAT AND OPEN FIELD
Takuya Oshima, Masaki Ii

MODEL BASED MONITORING OF URBAN TRAFFIC NOISE WITH A WIRELESS SENSOR NETWORK
Tom Basten, Peter Wesselts, Frits Van Der Eerden

PREDICTION OF OUTDOOR SOUND PROPAGATION BY APPLYING GEOMETRICAL SOUND SIMULATION TECHNIQUE
Junichi Mori, Daishuke Yoshino, Fumiaki Satoh, Hideki Tachibana

SURVEY OF THE RELATIONSHIP OF LEVEL FLUCTUATIONS OF OUTDOOR PUBLIC EMERGENCY BROADCASTING SOUND WITH METEOROLOGICAL CONDITIONS USING OBSERVATIONS OF UNATTENDED NOISE MONITORING
Eiji Muraki, Yutaka Kawase, Naoki Shinhara

Naoki Suda, Daniel Haußmann, Arne Berndt

SS 35 LONG-RANGE PROPAGATION OF IMPULSIVE NOISE

A NEW PREDICTION MODEL FOR THE DIFFERENCE BETWEEN L_{PEAK} AND L_{SEL} OF SHOOTING NOISE
Matthias Trimpop

APPLICATION OF THE LATTICE BOLTZMANN METHOD TO THE PREDICTION OF BLAST NOISE
Katsuji Akamatsu, Michael Sugiuara, Junichi Kanazawa, Michihisa Tsutahara
WORKSITE HEARING CONSERVATION POLICIES AND THE CURRENT STATUS OF WORKPLACE NOISE EXPOSURE IN JAPAN
Scichi Horie, Junro Inoue, Shoko Kawamura, Koko Takahashi

SS P4 VIBRO-AcouSTICS, ISOLATION AND DAMPING
ACOUSTIC CHARACTERISTICS OF INTERNAL SOUND FIELD IN CYLINDRICAL STRUCTURE WITH EXCITED END PLATES
Atsushi Kajima, Hiroyuki Moriyama, Yasuo Oshinoya

EXPERIMENTAL VIBRO-AcouSTIC ANALYSIS OF HONEYCOMB SANDWICH PANELS CONNECTED BY LAP AND SLEEVE JOINTS
Stephen A. Hambric, Stephen C. Conlon, John B. Fadlulle, Robert L. Campbell, Andrew R. Barnard, Micah R. Shepherd

NONLINEAR STRUCTURAL INTENSITY: A DAMAGE APPLICATION OF STRUCTURE-BORNE SOUND
Stephen C. Conlon, Fabio Semperlotto, Peter Q. Roman

POWER TRANSMISSION FROM A VIBRATING SOURCE TO CYLINDRICAL SHELL WITH GENERAL BOUNDARY CONDITIONS
Lu Dai, Tiejun Yang, Jianshao Dong, Xinhu Li

SS P6 ROOM ACOUSTICS
3 NEW RECORDING STUDIOS IN MILANO
Dario Pianta

DEVELOPMENT OF PRACTICAL SYSTEM FOR PREDICTION THE ABSORPTION COEFFICIENTS, DIMENSIONS AND REVERBERATION TIME OF CLASSROOM USING PHOTO IMAGE AND FEED-FORWARD NEURAL NETWORK
Masli Nizam Bin Yahya, Toru Otsuru, Keiji Tomikura, Takeshi Okazono

EVALUATION OF ACOUSTIC SILENCE, ACOUSTIC INTELLIGIBILITY AND ACOUSTIC SACRED FACTOR IN GOAN CATHOLIC CHURCHES
Menno A. S. M. F. Tavares, Antonio P. O. Carvalho, Saitoh J. Sharma

EXPERIMENTAL RESULTS ON SOUND ABSORPTION COEFFICIENTS OF MALAYSIAN WOODS

FIELDS OF APPLICATION FOR THREE-DIMENSIONAL MICROPHONE ARRAYS FOR ROOM ACOUSTIC PURPOSES
Ralf Schröder, Andy Meyer, Dirk Döbler, Gunnar Heilmann, Marcus Ohm

RELATIONSHIP BETWEEN SEAT LOCATIONS AT CONCERT HALLS AND EXPECTED REVERBERATION CHARACTERS BY AUDIENCE

SS 64 REDUCING THE UNCERTAINTY TO NOISE ASSESSMENT USING SUPPLEMENTS AND ALTERNATIVES TO A-WEIGHTED DNL/DENL

ALTERNATIVE AND SUPPLEMENTAL NOISE METRICS TO A-WEIGHTED AVERAGE SOUND LEVEL USED FOR ENVIRONMENTAL NOISE ASSESSMENT IN JAPAN ..........................................................4465
Ichiro Yamada, Makoto Morinaga, Jiro Kaku

ARE BINAURAL RECORDINGS NEEDED FOR SUBJECTIVE AND OBJECTIVE ANNOYANCE ASSESSMENT OF TRAFFIC NOISE? ..........................................................4472
Estefanía Cortés Rodríguez, Woosuk Song, Jonas Brunsø, Cheol-Ho Jeong, Torben Poulsen, Douglas Manvell

COMPARISON OF POTENTIAL DAY/NIGHT AVERAGE SOUND LEVEL (DNL) REPLACEMENT METRICS ..........................................................4479
Tomomi Yamada, Shigeyuki Ebisu, Sonoko Kuwano

MAXIMUM PASS-BY NOISE LEVELS FROM VEHICLES IN REAL ROAD TRAFFIC STREAMS: COMPARISON TO MODELED LEVELS AND MEASUREMENT PROTOCOL ISSUES. ..........................................................4496
Eric Schreurs, Lex Brown, Deanna Tomerini

SS 65 NOISE LABELING FOR NOISE POLICIES

“BUY QUIET!”, A EUROPEAN STRATEGY IN THE FIELD OF MACHINERY ..........................................................4502
Patrick Kurtz, Jean Jacques

PNR: A SIMPLIFIED PRODUCT NOISE RATING METHOD FOR THE GENERAL PUBLIC ..........................................................4513
Matthew J. Noble

PREPARATORY WORK FOR INTRODUCING NOISE LABELING SYSTEMS IN JAPAN ..........................................................4521
Takashi Ohmura, Masamitsu Nakanishi, Hitomi Kimura

PROSPECTUS ON “BUY-QUIET 2011” I-INCE SYMPOSIUM ..........................................................4526
Jean Tourret

QUIETING THE WORLD BY INDUCING A “BUY-QUIET” ATTITUDE AMONG PRODUCT PURCHASERS ..........................................................4532
William W. Lang, Jean Tourret

SS 66 BUILDING ENVELOP DESIGN FOR NOISE MITIGATION (TRAFFIC NOISE FAÇADE SCREENING)

ACOUSTIC CHARACTERISTICS OF OUTDOOR SPACES IN AN APARTMENT COMPLEX ..........................................................4537
Hong-Seok Yang, Myung-Jun Kim, Jian Kang

ACOUSTICAL CHALLENGES FOR ACHIEVING ENHANCED ACOUSTICAL PERFORMANCE WITHIN SCHOOLS REQUIRED BY LEED® ..........................................................4546
Zohreh Razavi

EXPERIMENTAL STUDY ON ACTIVE NOISE CONTROL AGAINST ROAD TRAFFIC NOISE FOR VENTILATION OPENINGS IN PILOT RESIDENCES ..........................................................4550
Ken Anai, Kazutoshi Fujimoto

INVESTIGATION OF SPECIAL DESIGNED BUILDING FAÇADE DEVICES FOR EFFECTIVE NOISE REDUCTION ..........................................................4558
C. C. Chiu, Maurice Yeung, Benson Lee

SOUND REDUCTION BY VEGETATED ROOF TOPS (GREEN ROOFS): A MEASUREMENT CAMPAIGN ..........................................................4564
Timothy Van Renterghem, Dick Boteldoooren

THE INFLUENCE OF INCLINED ROADS ON THE ACOUSTICAL PERFORMANCE OF BUILDING FAÇADES WITH BALCONIES ..........................................................4568
Hany Hossam Eldien

WORKSHOP

WS 02 WORKSHOP FOR INTERNATIONAL CONSORTIUM ON NOISE ISSUES IN DEVELOPING AND EMERGING COUNTRIES

HIGHLIGHTS ON ENVIRONMENTAL NOISE AND HEALTH RESEARCH IN CENTRAL AND EASTERN EUROPE, SOUTH-EAST EUROPE AND NEWLY INDEPENDENT STATES ..........................................................4578
Argalasova-Sobottova Lubica, Paunovic Katarina, Beljajevic Goran, Jeram Sonja, Ristovska Gordana, Lekaviciute Jurgita, Preis Anna, Jarkovicova Jana, Sevcikova Ludmila, Slivinska-Kowalska Mariola, Stansfeld Stephan

HOW CAN WE SHARE THE QUIET PLACES IN BANGKOK METROPOLITAN? ..........................................................4601
Krittika Lertsawat

NOISE POLLUTION MONITORING OF DHAKA CITY ..........................................................4609
Rahman Mafizur, Hasan Asm Mahmood

THE IMPACT OF TRANSPORTATION NOISES ON COMMUNITIES IN VIETNAM ..........................................................4625
Thu Lan Nguyen, Takashi Yano, Quang Nguyen Huy, Tsuyoshi Nishimura, Tetsumi Sato, Takashi Morihara, Yoritaka Hashimoto
THE REVIEW OF MARKET-BASED MEASURES IN MITIGATING AIRCRAFT NOISE AND THE APPLICATIONS FOR TAIWAN ................................................................. 4633
Cherie Lu

UPDATE ON INTERNATIONAL CONSORTIUM ON NOISE ISSUES IN DEVELOPING AND EMERGING COUNTRIES ........................................................................................................... 4644
Lawrence Finegold, Dieter Schwela

LATE PAPERS

REPORT ON BASELINE SURVEY FOR STANDARDIZATION OF MEASURES FOR QUIET VEHICLES IN JAPAN ................................................. 4651
Ichiro Sakamoto, Hiroyuki Hozumi, Takeharu Tanaka, Kazumoto Motita, Michiaki Sekine, Takehito Koremori, Yoshihumi Takemura

INVESTIGATION ON SOUND ENVIRONMENT AND COMMUNITY RESPONSE TO ROAD TRAFFIC NOISE IN TIANJIN, A CHINESE CITY ................................................................. 4660
Hui Ma, Qing Yang

NOISE REDUCTION OF CENTRIFUGAL FAN USING CFD ........................................................................................................... 4666
Hosan Kim, Jangyeok Lee, Jindong Kim, Myoungiu Kang, Gyeongjin Jung

3D MFS ANALYSIS OF SPL REDUCTION BETWEEN COUPLED ENCLOSURES ................................................................................................. 4671
Luís Godinho, Fernando G. Branco, Paulo Amado-Mendes

THE PROPERTIES OF NOISE ABSORBING BLOCKS AND THEIR APPLICATIONS FOR RAILWAY .................................................................. 4677
Jinho Kim, Kyong-Min Kim

EXPERIMENTAL AND ANALYTICAL METHOD TO HIGH FREQUENCY VIBRATIONS IN RESPONSE TO THE COMPLEX STRUCTURE FOR OPERATING UNDER THE WATER ........................................... 4683

ACOUSTIC MEASUREMENT OF A TURBOFAN ENGINE INSTALLED ON A JET PLANE ......................................................................................... 4692
Tatsuya Ishii, Hideshi Oinuma, Kenichiro Nagai, Yazuru Yokokawa, Kazuomi Yamamoto, Takeshi Tagashira, Yutaka Ishii, Kenji Tanabe

MONITORING AND DIAGNOSIS BY VIBROACOUSTIC ANALYSES: PRACTICAL APPLICATION OF THE INDICATORS OPTIMIZED VIA SOUND PERCEPTION .............................................................................. 4698
N. Hamzaoui

INFLUENCE OF PARTICLE SIZE DISTRIBUTION ON THE SOUND ABSORPTION CHARACTERISTICS OF POROUS MEDIA ................................................................. 4704
Hee Jin Park, Shigee Ivai

IMPROVING ACOUSTICAL OUTCOMES IN LEED-CERTIFIED OFFICES IN THE U.S.A. ................................................................................. 4710
David M. Sykes, Kevin Powell, William Cavanaugh

INVESTIGATION OF THE NOISE EXPOSURE FOR THE OPERATORS OF BRUSH CUTTER IN TAIWAN ............................................................ 4719
Kuei-Yi Lin, Chiu-Jung Chen, Chung-Kee Yeh, Min-Gang Sung, Shih-Yi Lu

EFFECT OF TEMPORAL DECAY OF HEAVY-WEIGHT FLOOR IMPACT SOUND ON ANNOYANCE ...................................................................... 4724
Jin Yong Jeon, Jong Kwan Ryu, Jae Ho Kim

THE EFFECT OF SOUND FIELD VARIATION ON THE HEAVY-WEIGHT IMPACT SOUND PRESSURE LEVEL ................................................................. 4730
Jeongho Jeong

AN URBAN NOISE OBSERVATORY: SCIENTIFIC, TECHNICAL, STRATEGIC AND POLITICAL CHALLENGES; A SYSTEMIC COMPLEMENTARY APPROACH TO THE NEW REQUIREMENTS OF THE EUROPEAN DIRECTIVES ........................................................................................................... 4736
Bruno Vincent, Arnaud Cristini, Julie Vallet, Céline Sales, Hélène Poimboeuf, Claire Sorrentini, Céline Anselme

COMPREHENSIVE DESIGN CYCLE FOR CAR ENGINE SOUND: FROM SIGNAL PROCESSING TO AN INTEGRATED AUDIO SYSTEM INSIDE THE VEHICLE ........................................................................................................... 4741
Patrick Bousard, Stéphane Molla, François Orange
