2011 Seventh International Conference on Intelligent Information Hiding and Multimedia Signal Processing

(IIH-MSP 2011)

Dalian, China
14-16 October 2011
Preface ...........................................................................................................................................................................xii
Committee Lists ...........................................................................................................................................................xiii
Reviewers .....................................................................................................................................................................xxi
Sponsors .....................................................................................................................................................................xxiii

Cross-Discipline Techniques in Signal Processing and Networking

Design of 3-D FIR Cone-Shaped Filters by McClellan Transformation
and Least-Squares Contour Mapping ..............................................................................................................................1
Jong-Jy Shyu, Soo-Chang Pei, and Yun-Da Huang

Design of 2.45GHz Planar Meander Dipole Antenna .................................................................5
Yuh-Yih Lu, Shih-Chiang Wei, Chun-Yi Li, and Hsiang-Cheh Huang

A Study on ENF Discontinuity Detection Techniques .................................................................9
Feng-Cheng Chang and Hsiang-Cheh Huang

Reversible Data Hiding with Difference Modification and Rhombus Relationships
in Quadtree Decomposition .................................................................................................................................13
Hsiang-Cheh Huang, Yuh-Yih Lu, and Yueh-Hong Chen

An Integrated Building Fire Evacuation System with RFID and Cloud Computing .........................17
Liou Chu and Shih-Jung Wu

A Copyright Information Embedding System for Android Platform ................................................21
Yueh-Hong Chen and Hsiang-Cheh Huang

A Novel Packet Scheduling Scheme for Downlink LTE System ..................................................25
Shih-Jung Wu and Liou Chu

Content-Adaptive Multi-level Data Embedding for Lossless Data Hiding ........................................29
Hsiang-Cheh Huang, Wei-Hao Lai, and Feng-Cheng Chang

The Design of an XMPP-based Service Integration Scheme .......................................................33
Feng-Cheng Chang and Duen-Kai Chen
Histogram-Based Difference Expansion for Reversible Data Hiding with Content Statistics ..........................................................37
  Hsiang-Cheh Huang, Yueh-Hong Chen, and Yuh-Yih Lu

The Research of Acoustic Emission Signal Classification ..................................................41
  Xiaojing Meng, Weidong Liu, and Enjie Ding

Techniques and Algorithms for Multimedia Security
A Blind Digital Steganography Scheme Based on Complete Complementary Codes ..................45
  Ryusuke Mayazumi and Tetsuya Kojima

Asynchronous Stochastic Decoder for Spread Spectrum Digital Watermarking ..........................49
  Nao Teranishi and Masaki Kawamura

Content-Based De-anonymisation of Tweets ........................................................................53
  Tomotaka Okuno, Masatsugu Ichino, Tetsuji Kuboyama, and Hiroshi Yoshiura

A New Compression-Based Method for Estimating LSB Replacement Rate in Color and Grayscale Images ......................................................................................57
  Viktor Monarev and Andrey Pestunov

Wavelet-Based Entropy for Digital Audio Watermarking ........................................................61
  Shuo-Tsung Chen, Huang-Nan Huang, Chih-Yu Hsu, Kuo-Kun Tseng, Chun-Hua Wu, and Jeng-Shyang Pan

Data Hiding, Visual Cryptography, and Secret Image Sharing
Prediction-Based Lossless Data Hiding by Adaptive Coefficient-Bias Algorithm ..................65
  Ching-Yu Yang, Chih-Hung Lin, and Wu-Chih Hu

Data Encrypting in a Binary Image Base on Modified Data Hiding Method ..........................69
  Kuang Tsan Lin

Improved Halftone Data Hiding Scheme Using Hilbert Curve Neighborhood Toggling ........73
  Brian K. Lien and Zhi-Lin Lan

Hierarchical Three-Dimension Mesh Model Sharing ................................................................77
  Shang-Kuan Chen, Chiu-Jian Hsu, and Yen-Wu Ti

Perceptual Watermarking for 3D Stereoscopic Video Using Depth Information ..................81
  Min-Jeong Lee, Ji-Won Lee, and Heung-Kyu Lee

Video Watermarking on Overlay Layer ...............................................................................85
  Ji-Won Lee, Tae-Woo Oh, Min-Jeong Lee, Hae-Yeoun Lee, and Heung-Kyu Lee

Offline QR Code Authorization Based on Visual Cryptography ...........................................89
  Wen-Pinn Fang

Improved Invertible Secret Image Sharing with Steganography ..........................................93
  Yung-Yi Lin and Ran-Zan Wang

Single-Packet IP Traceback with Less Logging .....................................................................97
  Wen-Chung Kuo, Yi-Lin Chen, Shuen-Chih Tsai, and Jung-Shian Li
A Novel Multi-division Template Protection (MDTP) Scheme for Iris Recognition Based on Fuzzy Vault

Ning Wang, Qiong Li, Qi Han, Ahmed A. Abd El-Latif, and Xiamu Niu

A Robust and Compression-Combined Digital Image Encryption Method Based on Compressive Sensing

Rong Huang and Kouichi Sakurai

Multimedia Signal Processing and Networking

Design and Research on the Control of Biped Robot System Based on RUP

Meiqiang Zhu, Jun Wang, Ming Li, and Dong Li

Static Gait Analysis and Planning of Biped Robot

Meiqiang Zhu, Jun Wang, Ming Li, and Yajing Lin

The Research on the Module of Bipedal Robot Balance Adjustment

Hanjun Li

Super-resolution Reconstruction Based on Irregular Sample and Local Statistics

Jianping Qiao, Huamei Xin, and Xiaojuan Yang

A Novel Image Hashing Scheme Based on Wave Atoms

Fang Liu and Lee-Ming Cheng

A Saliency Detection Approach to Combine LSK and Color for Color Image

Xin He, Huiyun Jing, Qi Han, and Xiamu Niu

Intelligent Watermarking Techniques, Image Authentication, and Visual Cryptography

Multimedia Privacy Protection System for Mobil Environments

Chih-Yang Lin, Chao-Chin Chang, Yi-Hui Chen, and Panyaporn Prangjarote

A New Approach of Image Compression Based on Difference Vector Quantization

Jau-Ji Shen and Ya-Hsin Lo

An Anti-phishing User Authentication Scheme without Using a Sensitive Key Table

Wei-Bin Lee, Hsing-Bai Chen, Shun-Shyan Chang, and Chia-Chi Yang

An Efficient Mutual Authentication with Key Agreement Protocol for Mobile Devices

Jen-Ho Yang, Chin-Chen Chang, and Shih-Yi Lin

Fast Decoding Method for On-line Visual Secret Sharing by Parallel Processing Approach

Wen-Pinn Fang

Distributed Steganography

Xin Liao, Qiao-yan Wen, and Sha Shi

Low Computational Color Secret Sharing Schemes with High Shares Quality Color Secret Sharing

Chin-Chen Chang, Kuo-Nan Chen, and Ying-Hsuan Huang

Data Hiding Scheme Based on Features of Chinese Text

Chia-Chen Lin, Li-Cheng Yang, and Yi-Hui Chen

</table>
A New Scheme to Improve the Quality of Compressed Image Transmission by Turbo Unequal Error Protection Codes  .................................................................................................................. 226  
Qian Mao, Boqing Xu, and Yanping Qin

HB Family RFID Mutual Authentication Protocol  ................................................................................................. 230  
Chia-Min Lin, Shyh-Chang Tsaur, Yeong-Chin Chen, and Iuon-Chang Lin

A Multi-stage Fast Intra Mode Decision Algorithm in H.264  ........................................................................................ 236  
Lu-Lu Wang, Ke-Bin Jia, and Zhuo-Yi Lu

Visual Attention Model with Cross-Layer Saliency Optimization  .................................................................................. 240  
Jiande Sun, Jie Zhang, Hua Yan, Likun Zhang, and Wei Liu

General Threshold Signature Based on the Chinese Remainder Theorem  ............................................................................ 244  
Cheng Guo and Chin-Chen Chang

A General Sharing Model Based on Proxy Re-encryption  ................................................................................................. 248  
Guojun Ma, Qinqi Pei, Yuchen Wang, and Xiaohong Jiang

A Robust and Efficient Smart Card Oriented Remote User Authentication Protocol  .................................................... 252  
Chin-Chen Chang, Hai-Duong Le, Chia-Yin Lee, and Ching-Hsiang Chang

Reversible Data Hiding by Reduplicated Exploiting Modification Direction Method  .................................................... 256  
Chin-Feng Lee and Kai-Chin Chen

Secure Template Protection in Touch-less Based Fingerprint Verification System  ........................................................................ 260  
Hiew Bee Yan and Andrew Teoh Beng Jin

Modulation Recognition Algorithms for Communication Signals Based on Particle Swarm Optimization and Support Vector Machines  ............................................................. 266  
Yu-e Wang, Tian-qi Zhang, Juan Bai, and Rui Bao

Robust Image/Video Coding and Transmission

A Video Transmission Framework Based on Packet Criticality Model  ................................................................................. 270  
Jianchao Du, Song Xiao, Chengke Wu, and Jianlong Zhang

A Threshold-Based Coefficients Cutting Method for Compressive Imaging  .............................................................................. 274  
Lei Quan, Song Xiao, Jianchao Du, and Janli Zhou

Fast Mode Decision Algorithm for H.264/SVC Based on Motion Vector Relation Analysis  .......................................................... 278  
Xuesong Sun, Song Xiao, Jianchao Du, and Min Hu

A Rate Distortion-Based Network Coding Design for Video Transmission  ...................................................................................... 282  
Ying Kang, Song Xiao, Ji Lu, and Chengke Wu

An Error Concealment Algorithm Based on Non-uniform Lagrange Interpolation  ................................................................. 286  
Jianlong Zhang, Xinbao Gao, Song Xiao, and Jianchao Du

An Opportunistic Network Coding Algorithm Based on the Queue State and Network Topology  .............................................................. 290  
Li Zhang, Song Xiao, Ning Cai, and Jianchao Du
New Possibility of Audio Information Processing Based on Information Hiding and Enrichment Techniques

The Effect of Speaker and Noise Type on the Accuracy of Estimated Speech Intelligibility Using Objective Measures ................................................................................................................................. 294

Kazuhiro Kondo

Manipulating Vocal Signal in Mixed Music Sounds Using Small Amount of Side Information ........................................................................................................................................................................... 298

Yuto Sasaki, Seong-Jun Hahm, and Akinori Ito

Median Plane Mislocalization of Virtual Sound Presented through Headphones ................................................................................................................................. 302

Ryouichi Nishimura, Hiroaki Kato, Parham Mokhtari, and Hironori Takemoto

Audio Trick Art Based on Information Misreading Technique ................................................................................................................................. 306

Naofumi Aoki

Robust Character Recognition Using Connected-Component Extraction ........................................................................................................................................................................... 310

Wai-Lin Chan and Chi-Man Pun

Reversible Watermarking for Digital Audio Based on Cochlear Delay Characteristics ................................................................................................................................. 314

Masashi Unoki and Ryota Miyauchi

Reversible Audio Data Hiding Using Linear Prediction and Error Expansion ................................................................................................................................. 318

Akira Nishimura

Information Hiding Based on the Artificial Fiber Pattern with Improved Robustness against Foreground Objects ................................................................................................................................. 322

Kitahiro Kaneda, Yuta Kito, and Keiichi Iwamura

Information Hiding Based on a Single Dot Pattern Method with Improved Extraction and Robustness against Foreground Objects ................................................................................................................................. 330

Kitahiro Kaneda, Yoshiaki Tachibana, and Keiichi Iwamura

An Efficient Key Generation Method in Audio Zero-Watermarking ........................................................................................................................................................................... 336

Rimba Whidiana Ciptasari, Aulia Fajar, Fazmah Arif Yulianto, and Kouichi Sakurai

Intelligent Video Processing

License Plate Location for Vehicles Passing through a Gate ........................................................................................................................................................................... 340

Chao-Ho Chen, Tsong-Yi Chen, Chi-Ming Huang, and Da-Jinn Wang

Abrupt Cut Detection Based on Motion Information ........................................................................................................................................................................... 344

Chun Wang, Zhonghua Sun, and Ke-bin Jia

Crowd Density Estimation Based on Frequency Analysis ........................................................................................................................................................................... 348

Wei-Lieh Hsu, Kun-Fong Lin, and Chang-Lung Tsai

Low-Complexity Encoding Method for H.264/AVC Based on Visual Perception ........................................................................................................................................................................... 352

Pengyu Liu and Kebin Jia

Playfield Detection Using Color Ratio and Local Entropy ........................................................................................................................................................................... 356

Xuefeng Bai, Tiejun Zhang, Xianhua Song, and Xiamu Niu

A Joint Approach to Frame Synchronization in Presence of Frequency Offset ........................................................................................................................................................................... 360

Wang Yongcheng, You Ling, and Mi Liang
Digital Forensics

Design of U Disk Remote Monitoring System in Trusted Computing Environment .........................................................365
Shidou Yan, Yatao Yang, and Zichen Li

Image Encryption Scheme of Pixel Bit Based on Combination of Chaotic Systems ..........................................................369
Ahmed A. Abd El-Latif, Li Li, Ning Wang, and Xiamu Niu

Sockpuppet Detection in Online Discussion Forums ..................................................................................................374
Xueling Zheng, Yiu Ming Lai, K.P. Chow, Lucas C.K. Hui, and S.M. Yiu

Privacy Preserving Confidential Forensic Investigation for Shared or Remote Servers ................................................378
Shuhui Hou, Tetsutaro Uehara, S.M. Yiu, Lucas C.K. Hui, and K.P. Chow

Automatic Online Monitoring and Data-Mining Internet Forums ..............................................................................384

Development of Domestic and International Computer Forensics ........................................................................388
Rongsheng Xu, K.P. Chow, and Ying Yang

Research on Path ID and VPI/VCI Relating Guess Solution for TD-SCDMA Network
Centralized Monitoring System ....................................................................................................................................395
Fang Cheng, Lei Tian, and Jinfeng Xie

Author Index ..............................................................................................................................................................399
