2011 International Conference on Emerging Intelligent Data and Web Technologies

(EIDWT 2011)

Tirana, Albania
7-9 September 2011
Session 1: Data Network Modeling and Analysis

Towards a Maturity Model for Networks of Practice: A Case of K2 Tree Optimization

Quan Shi, Yanghua Xiao, Nik Bessis, Yiqi Lu, Yaoliang Chen, and Richard Hill

Comparison Evaluation of Horizontal and Vertical Scenarios for Delay and Jitter Metrics Using a MANET Testbed

Masahiro Hiyama, Elis Kulla, Makoto Ikeda, Leonard Barolli, and Arjan Durrusi
Session 2: Database and Data Extraction

PoLyInfo: Polymer Database for Polymeric Materials Design ......................................................... 22
    Shingo Otsuka, Isao Kuwajima, Junko Hosoya, Yibin Xu, and Masayoshi Yamazaki

A DHT-Based Data Extraction Scheme for Geographical Ocean Data ........................................... 30
    Chih-Tien Fan, Yue-Shan Chang, and Hsuan-Jen Lai

A Relational Recommender System Based on Domain Ontology .................................................. 36
    Hikmet Kapusuzoğlu and Şule Gündüz Öğüdücü

Middleware for Data Sensing and Processing in VANETs ............................................................... 42
    Stefan Nour, Raluca Negru, Fatos Xhafa, Florin Pop, Ciprian Dobre, and Valentin Cristea

Session 3: Cloud Computing

Data Location and Security Issues in Cloud Computing .................................................................. 49
    Zaigham Mahmood

Gluing Grids and Clouds Together: A Service-Oriented Approach .............................................. 55
    Ashiq Anjum, Richard Hill, and Richard McClatchey

A Taxonomy of Data Scheduling in Data Grids and Data Centers: Problems and Intelligent Resolution Techniques .................................................................................................................. 63
    Joanna Kołodziej, Fatos Xhafa, Leonard Barolli, and Vladi Kolici

Session 4: Intelligent Algorithms and Systems

Fuzzy Approaches to Proportional Fairness ..................................................................................... 72
    Mario Köppen, Kaori Yoshida, and Masato Tsuru

Designing and Implementing Intelligent Agents for e-Health ......................................................... 78
    Elton Domnori, Giacomo Cabri, and Letizia Leonardi

Collective Intelligence, Social Networks and Propagation of a Social Disease, Obesity .................. 86
    Carla Taramasco and Jacques Demongeot
Session 5: Data Mining and Semantic Web

Using Massive Processing and Mining for Modelling and Decision Making in Online Learning Systems ................................................................. 91

Fatos Xhafa, Santi Caballé, Nik Bessis, Angel A. Juan, Leonard Barolli, and Rozeta Miho

Beyond the Web Graph: Mining the Information Architecture of the WWW with Navigation Structure Graphs ................................................................. 99

Matthias Keller and Martin Nussbaumer

Open Government Data on the Web: A Semantic Approach ................................................................. 107

Julia Hoxha and Armand Brahaj

FSTI 2011 Session 1: Service Innovations and Business Management

Guiding B2B Integration of Business Processes and Services: A Process Model for SMEs ................................................................. 114

Dietmar Nedbal

A Process Framework for the Flexible Creation of Procurement Services ................................................................. 120

Werner Wetzlinger, Gerold Wagner, Christian Neumann, and Jörg Schweiger

Disruptive ICT Service Technologies: Recent Developments and Practical Implications for Strategic Management ................................................................. 125

Roman Kopetzky, Christian Stummer, Natalia Kryvinska, Markus Günther, and Christine Strauss

Strategic Demands on Information Services in Uncertain Businesses: A Layer-Based Framework from a Value Network Perspective ................................................................. 131

Corinna Engelhardt-Nowitzki, Natalia Kryvinska, and Christine Strauss

FSTI 2011 Session 2: Applications

Interactive Digital Signage - An Innovative Service and Its Future Strategies ................................................................. 137

Christine Bauer, Paul Dohmen, and Christine Strauss

Cross-Industry Innovation: The Transfer of a Service-Based Business Model from the Video Game Industry to the Music Industry ................................................................. 143

Florian Waldner, Martin Zsifkovits, Lana Lauren, and Kurt Heidenberger

On the Importance of Data Quality in Services: An Application in the Financial Industry ................................................................. 148

Kathrin Klaus

SOA-Based SDP for Complex Telco Applications Delivery - A Generic Approach to Capacities' and Requirements' Analysis ................................................................. 153

Natalia Kryvinska, Christine Strauss, and Martin Polaschek
SeDiS 2011 Session 1: Service System Design and Management

OGSA Compliant Service Administration to Support Workflow Execution on Grid ........................................................................................................................................................................159
  Vladimir Florian and Gabriel Neagu

Dynamic Web Services Selection in Service-Oriented Distributed Environments ........................................................................................................................................................................165
  Ovidiu-Marian Achim, Florin Pop, and Valentin Cristea

Multimedia Mobility Service across Heterogeneous Environments ........................................................................................................................................................................172
  Elena Apostol and Valentin Cristea

Document Processing Architecture for Interoperable Administrative Services ........................................................................................................................................................................178
  Pavel Năstase, Radu Constantinescu, and Dana Boldeanu

SeDiS 2011 Session 2: Service Based Applications

Architecturing a Financial Services Transaction Engine ........................................................................................................................................................................182
  Radu Constantinescu, Andrei Toma, and Floarea Nastase

Performance Analysis of Workflows for Service Oriented Computing ........................................................................................................................................................................186
  Irina Constantinescu, Forin Pop, and Valentin Cristea

Scalable Service Based Antispam Filters ........................................................................................................................................................................192
  Alecsandru Pătraşcu, Cătălin Leordeanu, and Valentin Cristea

Context-Aware Platform for Integrated Mobile Services ........................................................................................................................................................................198
  Ciprian Dobre

Author Index ........................................................................................................................................................................204
