2011 30th IEEE Symposium on Reliable Distributed Systems Workshops

(SRDSW 2011)

Madrid, Spain
4-7 October 2011
# 2011 30th IEEE Symposium on Reliable Distributed Systems Workshops

**SRDSW 2011**

**Table of Contents**

| Message from the General Chair | vii |
| Message from the Technical Program Committee Co-Chairs | viii |
| Conference Committees | ix |
| Technical Program Committee | x |
| Reviewers | xi |

## DNCMS Workshop

Accelerated Processing of Secure Email by Exploiting Built-in Security Features on the Intel EP80579 Integrated Processor with Intel QuickAssist Technology

*Vallisha Keshavamurthy, Shambhu Upadhyaya, and Vinodh Gopal*

Later Validation/Earlier Write: Concurrency Control for Resource-Constrained Systems with Real-Time Properties

*Kamal Solaiman and Graham Morgan*

MTFR: Mobility Tolerant Firework Routing

*Gen Motoyoshi, Kenji Leibnitz, and Masayuki Murata*

Towards Tag-based Cooperation for Mobile Ad Hoc Networks

*Nor Effendy Othman and Stefan Weber*

Lightweight Dependable Adaptation for Wireless Sensor Networks

*Luis Marques and António Casimiro*

Symbiosis of a Lightweight ECC Security and Distributed Shared Memory Middleware in Wireless Sensor Networks

*Anna Sojka, Krzysztof Piotrowski, and Peter Langendoerfer*

MhRep: Multi-hop Replication Scheme for Data Survival in Unattended Wireless Sensor Networks

*Domenico Vitali, Angelo Spognardi, Antonio Villani, and Luigi V. Mancini*
RACOS Workshop

Analysis and Comparison of Security Protocols in Wireless Sensor Networks ...............................................................52
  Valentina Casola, Alessandra De Benedictis, Annarita Drago, and Nicola Mazzocca

NetODESSA: Dynamic Policy Enforcement in Cloud Networks ..........................................................................................57
  John Bellessa, Evan Kroske, Reza Farivar, Mirko Montanari, Kevin Larson, and Roy H. Campbell

Autonomic Service-Oriented Architecture for Resilient Complex Systems .................................................................62
  Pieter den Hamer and Torbjørn Skramstad

Towards a Federated Simulation Approach for Reliability Evaluation of Unmanned Aircraft Vehicles within Aeronautical Communications Networking .................................................................67
  Magali Andreia Rossi, Jorge Rady de Almeida Junior, Andrea Bondavalli, and Paolo Lollini

WNR Workshop

WNR Technical Session 1

Wide-Area Virtual Machine Migration as Resilience Mechanism ..................................................................................72
  Andreas Fischer, Ali Fessi, Georg Carle, and Hermann de Meer

Route Lookup Optimization Including Energy Efficient Conditions in an Optical Transmission Network ................78
  Mary Luz Mouronte, María Luisa Vargas, and Paloma Martínez

WNR Technical Session 2

On the Benefit of Network Coding for Timely and Reliable Event Dissemination in WAN ........................................84
  Christian Esposito, Stefano Russo, Roberto Beraldi, and Marco Platania

Attack Resistant Network Embeddings for Darknets .....................................................................................................90
  Benjamin Schiller, Stefanie Roos, Andreas Höfer, and Thorsten Strufe

Distributed Fault Diagnosis Using Bayesian Reasoning in MAGNETO .................................................................96
  Pablo Arozarena, Raquel Toribio, and Álvaro Carrera

Author Index ........................................................................................................................................................102
