2011 26th IEEE/ACM International Conference on Automated Software Engineering

(ASE 2011)

Lawrence, Kansas, USA
6 – 10 November 2011
Contents

Preface
Welcome Message from the Chairs .......................................................... iii

Keynotes
Wikipedia and How to Use it for Semantic Document Representation
Ian H. Witten — University of Waikato, New Zealand ................................ 1
Unifying Testing and Analysis through Behavioral Coverage
Matthew B. Dwyer — University of Nebraska, USA ................................. 2

Testing I
Automated Web Application Testing Using Search Based Software Engineering
Nadia Alshahwan and Mark Harman — UCL, UK ................................. 3
Auto-Locating and Fix-Propagating for HTML Validation Errors to PHP Server-side Code
Hung Viet Nguyen, Hoan Anh Nguyen, Tung Thanh Nguyen, and Tien N. Nguyen — Iowa State University, USA ................................. 13
Scaling Up Automated Test Generation: Automatically Generating Maintainable Regression Unit Tests for Programs
Brian Robinson, Michael D. Ernst, Jeff H. Perkins, Vinay Augustine, and Nuo Li — ABB Corporate Research, USA; University of Washington, USA; MIT, USA; ABB Robotics, Cyprus .................................................. 23

Testing II
Heap Cloning: Enabling Dynamic Symbolic Execution of Java Programs
Saswat Anand and Mary Jean Harrold — Georgia Tech, USA .................... 33
Automatic Generation of Load Tests
Pingyu Zhang, Sebastian Elbaum, and Matthew B. Dwyer — University of Nebraska-Lincoln, USA ................................................. 43
Symbolic Search-Based Testing
Arthur Baars, Mark Harman, Youssef Hassoun, Kiran Lakhota, Phil McMinn, Paolo Tonella, and Tanja Vos — Universidad Politécnica de Valencia, Spain; UCL, UK; King’s College London, UK; University of Sheffield, UK; Fondazione Bruno Kessler, Italy ................................................................. 53

Testing III
Automated Documentation Inference to Explain Failed Tests
Sai Zhang, Cheng Zhang, and Michael D. Ernst — University of Washington, USA; Shanghai Jiao Tong University, China ....................... 63
Generating Program Inputs for Database Application Testing
Kai Pan, Xintao Wu, and Tao Xie — University of North Carolina at Charlotte, USA; North Carolina State University, USA ........................................ 73
Prioritizing Tests for Fault Localization through Ambiguity Group Reduction
Alberto Gonzalez-Sanchez, Rui Abreu, Hans-Gerhard Gross, and Arjan J. C. van Gemund — Delft University of Technology, Netherlands; University of Porto, Portugal .................................................. 83

Software Model Checking
Identifying Future Field Accesses in Exhaustive State Space Traversal
Pavel Parízek and Ondřej Lhoták — University of Waterloo, Canada .................. 93
Model Checking Distributed Systems by Combining Caching and Process Checkpointing
  Watcharin Leungwattanakit, Cyrille Artho, Masami Hagiya, Yoshinori Tanabe, and Mitsuharu Yamamoto — University of Tokyo, Japan; National Institute of Advanced Industrial Science and Technology, Japan; National Institute of Informatics, Japan; Chiba University, Japan .......................... 103

Supporting Domain-Specific State Space Reductions through Local Partial-Order Reduction
  Péter Bokor, Johannes Kinder, Marco Serafini, and Neeraj Suri — TU Darmstadt, Germany; EPFL, Switzerland; Yahoo! Research Barcelona, Spain .................................................. 113

Analysis, Verification, and Validation
Scalable and Precise Symbolic Analysis for Atomicity Violations
  Malay K. Ganai — NEC Labs, USA .................................................. 123

DC2: A Framework for Scalable, Scope-Bounded Software Verification
  Franjo Ivančić, Gogul Balakrishnan, Aarti Gupta, Sriram Sankaranarayanan, Naoto Maeda, Hiroki Tokuoka, Takashi Imoto, and Yoshiaki Miyazaki — NEC Labs, USA; University of Colorado at Boulder, USA; NEC Inc., Japan .......................... 133

Formalizing Hardware/Software Interface Specifications
  Juncao Li, Fei Xie, Thomas Ball, Vladimir Levin, and Con McGarvey — Microsoft Inc., USA; Portland State University, USA .......................................................... 143

Safe Asynchronous Multicore Memory Operations
  Matko Botičan, Mike Dodds, Alastair F. Donaldson, and Matthew J. Parkinson — University of Cambridge, UK; Imperial College London, UK; Microsoft Research Cambridge, UK ........................................ 153

Models
A Rule-Based Approach to the Semantic Lifting of Model Differences in the Context of Model Versioning
  Timo Kehrer, Udo Kelter, and Gabriele Taentzer — University of Siegen, Germany; Philipps-Universität Marburg, Germany 163

A Model-driven Framework for Guided Design Space Exploration
  Ábel Hegedűs, Ákos Horváth, István Ráth, and Dániel Varró — Budapest University of Technology and Economics, Hungary 173

Automated Extraction of Architecture-Level Performance Models of Distributed Component-Based Systems
  Fabian Brosig, Nikolaus Huber, and Samuel Kounev — KIT, Germany .......................................................... 183

Debugging
Precomputing Possible Configuration Error Diagnoses
  Ariel Rabkin and Randy Katz — UC Berkeley, USA .................................................. 193

An Optimal Strategy for Algorithmic Debugging
  David Insa and Josep Silva — Universidad Politécnica de Valencia, Spain 203

Localizing SQL Faults in Database Applications
  Sarah R. Clark, Jake Cobb, Gregory M. Kapfhammer, James A. Jones, and Mary Jean Harrold — Georgia Tech, USA; Allegheny College, USA; UC Irvine, USA .................................................. 213

Documentation, Traceability, and Program Understanding
Improving Automated Documentation to Code Traceability by Combining Retrieval Techniques
  Xiaofan Chen and John Grundy — University of Auckland, New Zealand; Swinburne University of Technology at Melbourne, Australia .................................................. 223

Iterative Mining of Resource-Releasing Specifications
  Qian Wu, Guangtai Liang, Qianxiang Wang, Tao Xie, and Hong Mei — Peking University, China; North Carolina State University, USA .................................................. 233

Flexible Design Pattern Detection Based on Feature Types
  Ghulam Rasool and Patrick Mäder — COMSATS Institute of Information Technology, Pakistan; Johannes Kepler University, Austria .................................................. 243

Software Maintenance I
Towards More Accurate Retrieval of Duplicate Bug Reports
  Chengnian Sun, David Lo, Siau-Cheng Khoo, and Jing Jiang — National University of Singapore, Singapore; Singapore Management University, Singapore .................................................. 253
Towards Dynamic Backward Slicing of Model Transformations
Zoltán Ujhelyi, Ákos Horváth, and Dániel Varró — Budapest University of Technology and Economics, Hungary

Mining Test Oracles of Web Search Engines
Wujie Zheng, Hao Ma, Michael R. Lyu, Tao Xie, and Irwin King — Chinese University of Hong Kong, China; Microsoft Research, USA; North Carolina State University, USA; AT&T Labs Research, USA

AutoODC: Automated Generation of Orthogonal Defect Classifications
LiGuo Huang, Vincent Ng, Isaac Persing, Ruili Geng, Xu Bai, and Jeff Tian — Southern Methodist University, USA; University of Texas at Dallas, USA

Observations on the Connectedness between Requirements-to-Code Traces and Calling Relationships for Trace Validation
Achraf Ghabi and Alexander Egyed — Johannes Kepler University, Austria

Proximity Based Weighting of Test Cases to Improve Spectrum Based Fault Localization
Arita Bandopadhyay and Sudipto Ghosh — Colorado State University, USA

Slicing Feature Models
Mathieu Acher, Philippe Collet, Philippe Lahire, and Robert B. France — Université Nice Sophia Antipolis/CNRS, France; Colorado State University, USA

Using Model Checking to Analyze Static Properties of Declarative Models
Amirhossein Vakili and Nancy A. Day — University of Waterloo, Canada

Finding the Merits and Drawbacks of Software Resources from Comments
Changsheng Liu, Yanzhen Zou, Sibo Cai, Bing Xie, and Hong Mei — Peking University, China

Combining Search-based and Constraint-based Testing
Jan Malburg and Gordon Fraser — Saarland University, Germany

Short Papers II

Yi Wei, Hannes Roth, Carlo A. Furia, Yu Pei, Alexander Horton, Michael Steindorfer, Martin Nordio, and Bertrand Meyer — ETH Zurich, Switzerland

Patrick Mäder and Alexander Egyed — Johannes Kepler University, Austria

Automating Analysis of Qualitative Preferences in Goal-Oriented Requirements Engineering
Zachary J. Oster, Ganesh Ram Santhanam, and Samik Basu — Iowa State University, USA

History Slicing
Francisco Servant and James A. Jones — UC Irvine, USA

Analyzing Temporal API Usage Patterns
Gias Uddin, Barthélemy Dagenais, and Martin P. Robillard — McGill University, Canada

Isomorphism in Model Tools and Editors
George Edwards, Yuriy Brun, and Nenad Medvidovic — Blue Cell Software, USA; University of Washington, USA; University of Southern California, USA

A Case for Alloy Annotations for Efficient Incremental Analysis via Domain Specific Solvers
Svetoslav Ganov, Sarfraz Khurshid, and Dewayne E. Perry — University of Texas at Austin, USA

Exploring Caching for Efficient Collection Operations
Swetha Surapaneni, Venkata Krishna Suhas Nerella, Sanjay K. Madria, and Thomas Weigt — Missouri University of Science and Technology, USA

Tracing Requirements to Tests with High Precision and Recall
Celal Ziftci and Ingolf Krueger — UC San Diego, USA

Extracting Structured Data from Natural Language Documents with Island Parsing
Alberto Bacchelli, Anthony Cleve, Michele Lanza, and Andrea Mocci — University of Lugano, Switzerland; University of Namur, Belgium; Politecnico di Milano, Italy

GRoundTram: An Integrated Framework for Developing Well-Behaved Bidirectional Model Transformations
Soichiro Hidaka, Zhenjiang Hu, Kazuhiro Inaba, Hiroyuki Kato, and Keisuke Nakano — National Institute of Informatics, Japan; University of Electro-Communications, Japan
Run-time Systems Failure Prediction via Proactive Monitoring
Pengcheng Zhang, Henry Muccini, Andrea Polini, and Xuandong Li — Nanjing University, China; Hohai University, China; University of L'Aquila, Italy; University of Camerino, Italy 484

Towards an Approach and Framework for Test-Execution Plan Derivation
Soham Sundar Chakraborty and Vipul Shah — AMD, India; Tata Research Development and Design Centre, India 488

Statistical Debugging with Elastic Predicates
Ross Gore, Paul F. Reynolds, Jr., and David Kamensky — University of Virginia, USA; University of Texas at Austin, USA 492

Diagnosis of Software Failures Using Computational Geometry
Edward Stehle, Kevin Lynch, Maxim Shevertalov, Chris Rosser, and Spiros Mancoridis — Drexel University, USA 496

GitBAC: Flexible Access Control for Non-Modular Concerns
Mark Robinson, Jianwei Niu, and Macneil Shonle — University of Texas at San Antonio, USA 500

Client-side Web Application Slicing
Josip Maras, Jan Carlson, and Ivica Crnković — University of Split, Croatia; Mälardalen University, Sweden 504

Short Papers III

Supporting Activity Based Computing Paradigm in Global Software Development
Paolo Tell and Muhammad Ali Babar — IT University of Copenhagen, Denmark 508

Inferred Dependence Coverage to Support Fault Contextualization
Fang Deng and James A. Jones — UC Irvine, USA 512

Using Model-based Assurance to Strengthen Diagnostic Procedures
Robyn Lutz, Jeremy Johnson, and Ann Patterson-Hine — Jet Propulsion Lab, USA; Iowa State University, USA; NASA Ames, USA 516

Fault-Localization Using Dynamic Slicing and Change Impact Analysis
Elton Alves, Milos Gligoric, Vilas Jagannath, and Marcelo d’Amorim — Federal University of Pernambuco, Brazil; University of Illinois at Urbana-Champaign, USA 520

Improving Source Code Search with Natural Language Phrasal Representations of Method Signatures
Emily Hill, Lori Pollock, and K. Vijay-Shanker — Montclair State University, USA; University of Delaware, USA 524

Deviation Management during Process Execution
Marcos Aurélio Almeida da Silva, Xavier Blanc, and Reda Bendraou — LIP6, France; LaBRI, France 528

PRECIS: Inferring Invariants using Program Path Guided Clustering
Parth Sagdeo, Viraj Athavale, Sumant Kowshik, and Shobha Vasudevan — University of Illinois at Urbana-Champaign, USA 532

Automated Planning for Feature Model Configuration based on Stakeholders’ Business Concerns
Samaneh Soltani, Mohsen Asadi, Marek Hatala, Dragan Gašević, and Ebrahim Bagheri — Simon Fraser University, Canada; Athabasca University, Canada 536

An Adaptive Approach to Impact Analysis from Change Requests to Source Code
Malcom Gethers, Huzefa Kagdi, Bogdan Dit, and Denys Poshyvanyk — College of William and Mary, USA; Wichita State University, USA 540

Domain and Value Checking of Web Application Invocation Arguments
William G. J. Halfond — University of Southern California, USA 544

Mixed Constraints for Test Input Generation – An Initial Exploration
Shadi Abdul Khalek, Vidya Priyadarshini Narayanan, and Sarfraz Khurshid — University of Texas at Austin, USA 548

Enhancing Architectural Recovery Using Concerns
Joshua Garcia, Daniel Popescu, Chris Mattmann, Nenad Medvidovic, and Yuanfang Cai — University of Southern California, USA; Jet Propulsion Laboratory, USA; Drexel University, USA 552

Search-Based Fault Localization
Shaowei Wang, David Lo, Lingxiao Jiang, Lucia, and Hoong Chuin Lau — Singapore Management University, Singapore 556

Towards Requirements Aware Systems: Run-time Resolution of Design-time Assumptions
Kristopher Welsh, Pete Sawyer, and Nelly Bencomo — Lancaster University, UK; INRIA Paris - Rocquencourt, France 560

Generating Essential User Interface Prototypes to Validate Requirements
Massila Kamalrudin and John Grundy — University of Auckland, New Zealand; Swinburne University of Technology at Hawthorn, Australia 564
Automatically Exploring How Uncertainty Impacts Behavior of Dynamically Adaptive Systems
Andres J. Ramirez, Adam C. Jensen, Betty H. C. Cheng, and David B. Knoester — Michigan State University, USA

Tool Demonstrations

iDiff: Interaction-based Program Differencing Tool
Hoan Anh Nguyen, Tung Thanh Nguyen, Hung Viet Nguyen, and Tien N. Nguyen — Iowa State University, USA

CloneDifferentiator: Analyzing Clones by Differentiation
Zhenchang Xing, Yinxing Xue, and Stan Jarzabek — National University of Singapore, Singapore

Implementing Efficient Model Validation in EMF Tools
Gábor Bergmann, Ábel Hegedüs, Ákos Horváth, István Ráth, Zoltán Ujhelyi, and Dániel Varró — Budapest University of Technology and Economics, Hungary

JPF-AWT: Model Checking GUI Applications
Peter Mehlitz, Oksana Tkachuk, and Mateusz Ujma — NASA Ames, USA; University of Oxford, UK

The CORE System: Animation and Functional Correctness of Pointer Programs
Ewen Maclean, Andrew Ireland, and Gudmund Grov — Heriot-Watt University, UK; University of Edinburgh, UK

APIExample: An Effective Web Search Based Usage Example Recommendation System for Java APIs
Lijie Wang, Lu Fang, Leye Wang, Ge Li, Bing Xie, and Fuqing Yang — Peking University, China

BEST: A Symbolic Testing Tool for Predicting Multi-threaded Program Failures
Malay K. Ganai, Nipun Arora, Chao Wang, Aarti Gupta, and Gogul Balakrishnan — NEC Labs, USA; Columbia University, USA

Decomposing Feature Models: Language, Environment, and Applications
Mathieu Acher, Philippe Collet, Philippe Lahire, and Robert B. France — Université Nice Sophia Antipolis/CNRS, France; Colorado State University, USA

SAUML: A Tool for Symbolic Analysis of UML-RT Models
Karolina Zurowska and Juergen Dingel — Queen’s University, Canada

TestEra: A Tool for Testing Java Programs Using Alloy Specifications
Shadi Abdul Khalek, Guowei Yang, Lingming Zhang, Darko Marinov, and Sarfraz Khurshid — University of Texas at Austin, USA; University of Illinois at Urbana-Champaign, USA

MAJOR: An Efficient and Extensible Tool for Mutation Analysis in a Java Compiler
René Just, Franz Schweiggert, and Gregory M. Kapfhammer — Ulm University, Germany; Allegheny College, USA

jCT: A Java Code Tomograph
Markus Lumpe, Samiran Mahmud, and Olga Goloshchapova — Swinburne University of Technology at Hawthorn, Australia

Generating Realistic Test Models for Model Processing Tools
Pit Pietsch, Hamed Shariat Yazdi, and Udo Kelter — University of Siegen, Germany

Guided Test Visualization: Making Sense of Errors in Concurrent Programs
Saint Wesonga, Eric G. Mercer, and Neha Rungta — Brigham Young University, USA; NASA Ames, USA

The Capture Calculus Toolset
Robert J. Hall — AT&T Labs Research, USA

A Symbolic Model Checking Framework for Hierarchical Systems
Truong Khanh Nguyen, Jun Sun, Yang Liu, and Jin Song Dong — National University of Singapore, Singapore; Singapore University of Technology and Design, Singapore

Doctoral Symposium

Automatically Detecting the Quality of the Query and its Implications in IR-based Concept Location
Sonia Haiduc — Wayne State University, USA

Using Formal Concept Analysis to Support Change Analysis
Xiaobing Sun and Bixin Li — Southeast University, China

A Framework for Managing Uncertainty in Self-Adaptive Software Systems
Naeem Esfahani — George Mason University, USA

Toward Consistency Checking of Natural Language Temporal Requirements
Wenbin Li — University of Kentucky, USA
