Peng Feng, Tongfei Ding, Bo Liu, Jianmin Wu, Lin Gui, Haibo Zhou

A Self-Awareness Routing Scheme with Power Control for Underlay Spectrum Sharing Networks ................................................................. 1085
Yongfei Ding, Jianmin Wu, Haibo Zhou, Peng Feng, Bo Liu, Lin Gui

Non-orthogonal Pilot Design and Analysis for CoMP Systems ............................................................................................................................... 1090
Zhang Xiaojun, Chen Xiang, Zhou Shidong, Wang Jing

The Achievable Secrecy Rate of MISO Wiretap Channels ............................................................................................................................... 1095

Flaw Classification in Ultrasonic Guided Waves Signal Using Wavelet Transform and PNN Classifier ................................................................. 1099
Xiaozhai Zhang, Guangmin Sun, Haomin Liu, Qite Wang

Vehicle Color Recognition Using Monocular Camera ............................................................................................................................... 1104
Mengjie Yang, Guang Han, Xiaohei Li, Xuechun Zhu, Liang Li

Investigation on Best Combining Scheme for Diversity Branches in Joint MLD for PUCCH in LTE Uplink ............................................................................................................................... 1109
Hideyuki Numata, Teruo Kawamura, Mamoru Sawahashi

Connectivity Guaranteed Cluster Header Selection Scheme Based on Spectra Analysis of Graph ............................................................................................... 1114
Fenglin Xie, Zhiyong Feng, Zhiqiang Wei

Improved Iteration Strategy of Game-based Channel Allocation Method for Cognitive Wireless Network ........................................................................................................................................ 1119
Jun Liu, Xiufeng Xie

Transient-Based Identification of 802.11b Wireless Device ........................................................................................................................................ 1125
Zhiyuan Shi, Man Liu, Lianfen Huang

A New Robust Beamforming Method Against Signal Steering Vector Errors and Moving Jammers ........................................................................................................................................ 1130
Wei Guo, Pengcheng Mu, Qinie Yin, Wenjie Wang

Distributed Power Control with Limited Message Passing for Nonconcave Utility Maximization ........................................................................................................................................ 1135
Li Ping Qian, Ying Jun Zhang

Synchronization Acquisition Threshold Based on Peak-To-Average Ratio of Correlation Energy for UWB Communications ........................................................................................................................................ 1140
Chen Li, Yukui Pei, Ning Ge

A Comparison of Image Registration Techniques for Joining Sequential Images ........................................................................................................................................ 1144
P. Duraisamy, S. Jackson, K. Namuduri, B. Buckles, Ye Yu

Utilizing Weighted Rating of Multiple Attributes Scheme to Enhance Handoff Efficiency in Heterogeneous Wireless Networks ........................................................................................................................................ 1150
Shin-Jer Yang, Wei-Chieh Tseng

Soft Input Channel Estimation for Two-Way Cooperative-OFDM ........................................................................................................................................ 1156
Wei Wu, Xin Jia, Yueming Cai, Huachao Hu

40Gbps Multi-Connection TCP/IP Offload Engine ........................................................................................................................................ 1161
Yong Ji, Qing-Sheng Hu

Resources Allocation in Mobile Communications on Aircraft ........................................................................................................................................ 1166
Chao Zhang, Keke Pang

Joint Access and Power Control in Cognitive Femtocell Networks ........................................................................................................................................ 1172
Qian Li, Zhiyong Feng, Wei Li, Yang Liu, Ping Zhang

Design of Indoor Optical Wireless Collaborative Cellular System ........................................................................................................................................ 1177
Chengcheng Pei, Debin Wu, Zaichen Zhang, Diecui Zhang

Spectrum Sensing Using Non-asymptotic Behavior of Eigenvalues ........................................................................................................................................ 1183
Lei Wang, Baoyu Zheng, Jingwai Cui, Wenjing Yue

Improvement of Ghost Imaging on Orbital Angular Momentum by Using JPEG & Linear Block Codes ........................................................................................................................................ 1188
Xiaoliang Dong, Fei Cao, Shengmei Zhao, Baoyu Zheng

Spectrum Sensing in Opportunity-Heterogeneous Cognitive Radio Networks: Non-Cooperative Case ........................................................................................................................................ 1192
Guoru Ding, Qihui Wu, Fei Song, Jinlong Wang

Multicast or Broadcast in Multiuser OFDM Systems ........................................................................................................................................ 1197
Jose Saavedra, Pierre Duhamel

Diversity Transmission and Channel Modeling of Mobile Communications on Aircraft ........................................................................................................................................ 1202
Chao Zhang, Junzhou Yu, Keke Pang

Researches on Echo Kernels of Audio Digital Watermarking Technology Based on Echo Hiding ........................................................................................................................................ 1207
Xulai Cao, Linghua Zhang

On File Delay Minimization for Content Uploading to Media Cloud via Collaborative Wireless Network ........................................................................................................................................ 1212
Ge Zhang, Yonggang Wen, Jiang Zhu, Qingshua Chen

Variable Bandwidth Spectrum Access for Secondary User in Cognitive Radio Networks ........................................................................................................................................ 1218
Fu Yu, Zhang Quanyu, Wang Ye, Guan Xin
Coordinated Beamforming with Relaxed Zero Forcing (Invited Paper) ................................................................. 1223
  G. Lee, J. Park, Y. Sung, M. Yukawa
A Mobile Health Monitoring Solution for Weight Control .................................................................................... 1228
  Ivo M. Lopes, Bruno M. Silva, Joel J. P. C. Rodrigues, Jaime Lloret, Mario L. Proença
Source Localization with Acoustic Intensity Flux Matched-Field Processing .................................................. 1233
  Wangsheng Liu, Guolong Liang, Yan Wang, Jianfei Jia
A New Energy-Efficient Scheduling Scheme for Multiple Target Coverage in Wireless Sensor Networks ........................................ 1237
  K.B. Amir, M. N. A. Shouq, M. A. Matin
Graph-Based Spectrum Sharing for Multiuser OFDM Cognitive Radio Networks ........................................... 1241
  Tao Qiu, Wenyun Xu, Zhiqiang He, Kai Niu, Baoyu Tian
A New Uni-Scheduling Algorithm in S-MAC based Wireless Sensor Networks ........................................... 1246
  D. Saha, M. A. Matin
Capacity Analysis for Secondary User in Cognitive Radio Network ............................................................... 1251
  Wang Ye, Zhang Qinyu
On Design of Asymmetric Interference Alignment and Cancelation Scheme in MIMO X Network .................. 1257
  Lu Yang, Wei Zhang
A Predictive Deadbeat Control in Shunt Active Power Filter ........................................................................ 1262
  Zhihua Bao, Zongchun Wang, Shihbing Zhang
An Improved Adaptive Channel Estimation Method for Multiuser Multiantenna OFDM Systems .................. 1266
  Yue-Xing Gao, Jie Yang, Qing-Min Meng, Wei-Ping Zhu
Improved Compressed Sensing-based UWB Channel Estimation ................................................................. 1271
  Chunyu Jian, Xinrong Ye, Wei-Ping Zhu
Design of Simplified Overlapped Code Division Multiplexing System ........................................................... 1276
  Peng Sun, Daoben Li, Li Fang
A New Approach to Weighted Sum-Rate Maximization for the K-User Gaussian Interference Channel .................. 1282
  Liang Liu, Rui Zhang, Kee-Chaung Chua
An Audio Watermarking of Wavelet Domain Based on BP Neural Network .................................................. 1287
  Liang Chen, Huan Hao, Guohong Zheng
Detecting Selective Forwarding attacks in WSNs using Watermark ............................................................. 1292
  Deng-Fin Zhang, Chao Xu, Lin Siyan
Multi-hop Relay Pairs Transmission Scheme Based on Fountain Code .......................................................... 1296
  Huafeng Liu, Weijia Lei, Xianzhong Xie
A Chinese Speech Compensation Method for the Leakage Based on Generalized Sidelobe Canceller in Hearing aids ................................................................................................................. 1302
  Hui Wang, Linghua Zhang
A Digital Audio Watermarking Algorithm Based On Block Encoding ......................................................... 1306
  Linghua Zhang, Zhiyuan Huang, Xudai Cao
Adaptive Feedback Scheme on Multicell Multiuser MISO System ............................................................... 1311
  Zhang Rui, Song Rongfang
Zone Based Downlink Frequency Planning Scheme in Relay Enhanced Cellular Systems .......................... 1317
  Xing Yang, Tiankui Zhang, Chuyuan Feng, Zhongfeng Li
Feedback-Aided Pilot Placement for Two-Way Cooperative-OFDM ........................................................... 1322
  Wei Wu, Xin Jia, Yueming Cai, Huachao Hu
Research on Decreasing Resource Consumption in Wireless O2O Services Operation .................................. 1327
  Qian Xiaocong
Downlink Power Control in Cognitive Femtocell Networks ........................................................................ 1331
  Daolong Sun, Xinning Zhu, Zhimin Zeng, Shaohua Wan
Distribution of PAPR in LOFDM Systems Based on Extreme Value Theory ................................................. 1336
