2nd International
ISEKI Food Conference

(ISEKI Food 2011)

Milan, Italy
31 August - 2 September 2011

Editors:

Cristina L. M. Silva
Inês N. Ramos

Paola Pittia
Sara M. Oliveira

ISBN: 978-1-61839-403-3
## Table of contents

**CONFERENCE TOPIC: IP**

### Technical Programme

**INVITED ORAL PRESENTATIONS: IP1-IP20**

<tbody>
<tr>
<td>IP1</td>
<td>Bridging research and Food &amp; Drink Industry needs and future skills</td>
<td>Daniele Rossi</td>
<td>25</td>
</tr>
<tr>
<td>IP2</td>
<td>New frontiers in food nutrition</td>
<td>Marisa Porrini</td>
<td>26</td>
</tr>
<tr>
<td>IP3</td>
<td>How Europe can deliver adequate food to our citizens: Partnership involving regulators, industries and consumers</td>
<td>John Dalli</td>
<td>27</td>
</tr>
<tr>
<td>IP4</td>
<td>Selecting and developing talents for R&amp;D</td>
<td>Marc Dreyer</td>
<td>28</td>
</tr>
<tr>
<td>IP5</td>
<td>Changes and perspectives in Food Studies</td>
<td>Elisabeth Dumoulin</td>
<td>29</td>
</tr>
<tr>
<td>IP6</td>
<td>Assessment of job market needs - Track Fast_WP1</td>
<td>Katherine Flynn, Erik Wahnström, Bárbara Ruiz Bejarano and Mona Popa</td>
<td>30</td>
</tr>
<tr>
<td>IP7</td>
<td>Competences for PhD in food science and technology</td>
<td>Chelo González-Martínez, Cristina L.M. Silva and Rui Costa</td>
<td>31</td>
</tr>
<tr>
<td>IP8</td>
<td>Promoting cognitive complexity in food science and technology students using revised Bloom’s taxonomy - a mean to meet food industry needs</td>
<td>Victoria A. Jideani</td>
<td>32</td>
</tr>
<tr>
<td>IP9</td>
<td>Challenges in food scientist training in a global setting</td>
<td>G. Schleining, A. Höhl and W. Kneifel</td>
<td>33</td>
</tr>
<tr>
<td>IP10</td>
<td>Food science and technology education in the US: trends, challenges and perspectives</td>
<td>Purnendu C. Vasavada</td>
<td>34</td>
</tr>
<tr>
<td>IP11</td>
<td>Academia’s role in driving innovation and social responsibility</td>
<td>Sam Saguy, Cristina L.M. Silva, Paola Pittia and Gerhard Schleining</td>
<td>35</td>
</tr>
<tr>
<td>IP12</td>
<td>Top Institute Food and Nutrition, combining industrial and scientific excellence in a successful public-private partnership</td>
<td>Jan Maat</td>
<td>36</td>
</tr>
<tr>
<td>IP13</td>
<td>Nanotechnology: the word is new but the concept is old. An overview of the science and technology in food and food products at the nanoscale level</td>
<td>Rickey Y. Yada</td>
<td>37</td>
</tr>
<tr>
<td>IP14</td>
<td>CFD simulations in food processing with digital tools</td>
<td>Ziynet Boz, Rahmi Uyar and Ferruh Erdogan</td>
<td>38</td>
</tr>
<tr>
<td>IP15</td>
<td>Computational modeling as a tool to study food digestion</td>
<td>R. Paul Singh, Fanbin Kon, Gail Bornhorst and Maria Ferrua</td>
<td>39</td>
</tr>
<tr>
<td>IP16</td>
<td>Plasma treatment of foods: potential and evaluation</td>
<td>Oliver Schlüter</td>
<td>40</td>
</tr>
<tr>
<td>IP17</td>
<td>Food for life - food for wellbeing</td>
<td>Karl Schebesta</td>
<td>41</td>

CONFERENCE TOPIC: S1

Session 1: New Skills For New Jobs

POSTER PRESENTATIONS: P1-P20

P1 Knowledge transfer: the graduate experience of the FUSION programme in Island of Ireland food companies
  Mai Mitchell and Peter Mitchell

P2 Model of fruit drying by combined technology as family business for rural development
  Mirko Babić, Ljiljana Babić, Ivan Pavkov and Milivoj Radojičin

P3 Food scientists: the new Brazilian profession
  Paulo Roberto de Araújo Berni and Gilma Luchavezchi Sturion

P4 Recognition of Prior Learning - Results of a WP7 activity under the ISEKI_Food 3 project
  Marco Dalla Rosa, Rui Costa and Cristina Silva

P5 Student mobility - a potential catalyst for research and development cooperation between universities and food industry?
  Thomas Berger and Uwe Grupa

P6 A model for training Food Technologists focusing on bridging the gap between academia and industry
  Jessy Van Wyk

P7 WPM2: Facilitating global lifelong learning in higher education in the field of food studies
  Ingrid Bauman and Dominique Colin

P8 Effect of processing on the functional characteristics of red beet (Beta vulgaris L.)
  Adria C. Rivera Rojas, S. Marina González-Herrera, L. Araceli Ochoa-Martínez and Juliana Morales-Castro

P9 Contributions of honey productive chain for the teaching of beekeeping in technical training
  Sandra Regina Gregório and José Jonas de Melo Alves

P10 Correlation between the labour market and vocational training of food technicians, regarding quality control in agribusiness
  Sandra Regina Gregório and Antonio Divino Jacob

P11 Experiences on the creation of a specialization career in Industrial Biotechnology: a case of synergistic interaction between academic and industry – oriented institutions
  Miryan Cassanello, Alberto Díaz, Alicia Baldessari, Pilar Buera, Gabriela Cabrera, María Ángeles Cappa, Flavia Forchiassin, Jorge Muschietti, Alejandro Krimer, Julia Pettinari, Lelia Dicelio, Alicia Couto, Nancy López, Sandra Guerrero, Laura Matos and Alicia Supanitsky

P12 Food handlers’ knowledge about food handling practices at fast food restaurants in the city of Rio de Janeiro, Brazil
  Giselle Moura Messias, Kátia Cilene Tabai and Celso Guimarães Barbosa

P13 Social representations of the consumption of cachaça due to their productive characteristics in the course of technology, regarding the cachaça production
  Pedro Paulo Oliveira, Sandra Regina Gregório and Luciana Helena Maia Porte
CONFERENCE TOPIC: S2

Session 2: New Tools For Research And Food Process Innovation

POSTER PRESENTATIONS: P21-P143

P21  Design a multiplex PCR for simultaneous detection of rope-forming Bacillus strains in Iranian breads dough
Alireza Sadeghi, Seyed Ali Mortazavi and Ahmad Reza Bahrami

P22  Investigating the sourdough potential for enhance microbiological shelf life and roasty aroma of traditional Lavash bread
Balal Sadeghi, Seyed Ali Mortazavi and Alireza Sadeghi

P23  Effect of single or combined process treatments on phytic acid content of legumes
K. Rasha Mohamed, A. Y. Gibriel, Nagwa M. H. Rasmy and Ferial M. Abu-Salem

P24  Optimization of baking cycles in industrial ovens using a change of scale framework taking into account the product properties
Alain Sommier, Yannick Anguy, Elisabeth Dumoulin, Juan Rojas and Marc Vignolle

P25  Effect of folic acid and pantothenate on the patulin reduction in apple juice concentrates
Narmela Asefi

P26  Validation of differential calorimetry analysis for the evaluation of oxidation of fats and oils
Carolina Garcia-Darras, Christophe Pradere, Jean Toutain, Alain Sommier and Maud Cansell

P27  A comparative evaluation of mesophilic bacterial load in muscles of fresh ice-stored Barbus grypus fish by reference plate count and impedance-splitting methods
Ali Fazlara

P28  Multiplex PCR for identifying Shiga-like toxin-producing Escherichia coli isolated from coldwater fishes
Mojtaba Bonyadian and Ebrahim Rahimi

P29  Effect of temperature and maltodextrin concentration on the physicochemical properties of spray dried blackberry powder
Cristhiane C. Ferrari, Silvia P. M. Germer and José M. Aguirre
Isolation, purification and characterization of a new gum from *Acanthophyllum pungens* roots  
Ghazaleh Milani and Kambiz Jahanbin  

Effect of ozonation and packaging on shelf life extension of fresh tomatoes during storage under refrigeration  
Evangelia S. Karakosta, Michael G. Kontominas and Kyriakos A. Riganakos  

Influence of microbial transglutaminase on some physical and microstructural properties of cow milk coagulum supplemented with whey proteins  
E. A. Romeih and Essam M. Hamad  

Production of fine emulsions at pilot scale  
Christelle Turchiuli Nicolas Lemarié and Elisabeth Dumoulin  

Application of mid-infrared spectroscopy to measure quality parameters of fermented and distilled alcoholic beverages  
Burcu Ozturk, Dila Yucesoy and Banu Ozen  

Barrier and antioxidant properties of resveratrol based bioactive edible films  
Clara Pastor, Melanie Duarte, Amparo Chiralt, Maite Chafe and Chelo Gonzalez-Martinez  

Electric mini oven with belt conveyor control in real time  
Luis Arthur Malta Pereira, Max Vicente, Gustavo Voltani von Atzingen, Aldo Ivan Céspedes Arce, Ana Carolina Sousa Silva, Adriano Rogério Bruna Tech, Emane José Xavier Costa  

ACE inhibitory and Ca-Binding properties of tuna cooking juice hydrolysate using protease from tuna spleen extract  
Jirawadee Kasiwut, Pitiya Adulyatham and Wirote Youravong  

Correlation of acid value and dielectric parameters for a model vegetable oil system  
Tjaša Prevc, Nataša Poklar Uširh and Nataša Šegatin  

Interactions of some flavonoids with model lipid membranes  
Barbara Berlec, Ajda Ota, Marjeta Šentjurc, Nataša Poklar Uširh and Veronika Abram  

Cryoprotective treatment of strawberries  
Elena Velickova, Urszula Tylewicz, Marco Dalla Rosa, Eleonora Winkelhausen, Slobodanka Kuzmanova and Federico Gómez Galindo  

Effect of yeast and water on bread dough rheology and microstructure  
Rutuja Upadhya and Anurag Mehra  

Study on the development of lactic acid bacteria in cow and sheep milk treated with ultrasound  
Y. Kartalska, K. Dimitrova, A. Aladjadjiyan and I. Zheleva  

High throughput evaluation of industrial growth conditions for industrial yeasts  
Anita Van Landschoot, Sylvie Vandoorne, Dana Vanderputten and Gary Prescott  

Can we prevent formation of acrylamide during deep frying with antioxidants? A Bachelor thesis in collaboration with industry  
Kristel Sniegowski, Eveline Budna, Koen De Leersnijder, Lise Loyens, Lars Pinxten, Thomas Van der Have and Myriam Meyers  

Analytical procedure for the determination of phthalates in recycled cardboard packaging materials and food simulant (Tenax)  
Ioanna-Efpraxia Parigoridi, Konstantina Akrida-Demertzis and Panagiota G. Demertzis  

Rapid detection methods for viable *Mycobacterium avium* ssp. *paratuberculosis* (MAP) cells in milk  
Sandra Weirich, Omer Akineden and Michael Bülte  

Flow behaviour of commonly used food powders determined by powder rheometer method  
Maja Benković and Ingrid Bauman  

Im mobilized lipases catalyze the conversion of oils from coffee waste into biodiesel  
Elisabetta De Angelis, Diana Fattor, Patrizia Spizzo, Luciano Navarini and Lucia Gardossi
Rheological properties of fresh and refrigerated Asian noodles prepared from durum flour
D.W. Hatcher and G.G. Bellido

Trends on patenting the methods of production of galactooligosaccharides
Anastasia Rodnaya and Aleksey Lodygin

Effects of chilled storage, vacuum and modified atmosphere packaging on quality of meagre, Argyrosomus regius (Asso, 1801) fillets: a combined experimental and predictive approach
İsmail Yüksel Genç, Eduardo Esteves, Jaime Aníbal and Abdullah Diler

Relationship between wheat flour characteristic and sponge cake-making performance
Malena Moiraghi, Esther de la Hera, Alberto E. León, Gabriela T. Pérez and Maniel Gómez

Enzymatic lactose hydrolysis in whey permeate
Aleksey Lodygin, Svetlana Lodygina, Ivan Evdokimov, Nikita Donskoy and Anton Vardanyan

Shelf life of refrigerated Ultra High Pressure Homogenized-treated vegetable beverages
Fabio Poliseli-Scopel, Dora Valencia, Manuela Hernandez-Herrera, Buenaventura Guarnis and Victoria Ferragut

Ringing evaluation: an analytical tool to measure a visual quality defect
Alessandra Arecchi*, Thomas Zwicky1, Gabriela Badalato1 and Loni Schweikert

Effect of plant extracts on colour in frankfurters manufactured without sodium nitrite and sodium ascorbate during chill storage
J. Viguera, F. Solano, M. Armenteros, D. Morcuende and M. Estévez

Control of Escherichia coli O157:H7 on leafy greens using a bacteriophage cocktail and MAP
İpek Goktepe, Olay Baycioglu, Manan Sharma and Alexander Sulakvelidze

Extrusion parameters influence on isolate soy protein and vital gluten meat extender obtained by high moisture extrusion process
Marcio Schmiele and Yoon Kil Chang

Innovative solutions in food science involving designers, users and food specialists
Hafdis Sunna Hermannsdottir, Anna Marie Fisker and Poul Henning Kirkegaard

Amazon caiman meat for commercial cut production: characterization for food process innovation
Augusto Kluczkovski Junior, Ariane Mendança Pacheco, Fabio Markendorf, Ronís Da Silveira and Fabio Tonisi Moroni

Application of bio decontamination systems and techniques to food

Sensory analysis of fruits and food products of different persimmon species (Diospyros spp.)
Olga Grygorieva, Ján Brindza, Vladimír Vietoris, Lucia Kucelová, Dezider Tóth and Miroslava Hricová

Behaviour of Pseudomonas fluorescens in two different types of mozzarella cheese
V. Ruggiero, S. D’Amico, L. Bodei, E. Oliverio, P. Daminelli, B. Bertasi and G. Finazzi

Development of a rheological prediction model for food suspensions and emulsions
Hasan Murat Velioğlu, İsmail Hakkı Boyacı and Şefik Kurultay

Evaluation of an anaerobic sequencing biofilm batch reactor (ASBBR) mixed by recirculation for dairy effluents treatment
Mayara S. Figueiredo, Pedro. A. S. Silva, Roberta S.S. Santana, Rogers Ribeiro, Samantha C. Pinho and Giovana Tommaso

Sorption properties of alginate-pectin composite edible films
Sabina Galus, Anna Turska and Andrzej Lenart

Determination of internal quality of freeze-damaged citrus fruit via UV-radiation
Inga Huismann and Uwe Grupa

Ultra-short gas-phase pulsed corona discharge technology for VOCs abatement for food preparation industry
A. Gregor, N. Martin, A. Lilley, B. McKenna, G. Schleining, G. Surzenkov, L. Lundberg6 and M. Tapola
Comparative study of the pumping quality between a rotary lobe pump and a newly developed centrifugal pump on the basis of the suspension cheese curd-whey

Christian Schmitt and Uwe Grupa

Links between Polish food industry and science

Iwona Szczepaniak and Marek Wijjer

Encapsulation of lipid-soluble functional food ingredients in commercial yeast cells

Adrian Czerniak, Łukasz Łakowiecki and Tomasz Jankowski

Modelling and optimization of ethyl butyrate production by response surface methodology

Carla Grosso, Suzana Ferreira Dias and Paula Pires Cabral

Inhibitory effect of selective agents in ALOA on growth kinetics of Listeria ivanovii colonies

Natthiga Saeteaw, Siripailin Kosonpisit, Ruamporn Llamkaew and Aluck Thipayarat

Evaluation of Oxford and OCLA agars to enhance isolation and colony growth kinetics of Listeria innocua

Natthiga Saeteaw, Ruamporn Llamkaew, Pattarin Supanivatin and Aluck Thipayarat

Role of carbon and nitrogen sources to enhance the growth of Listeria spp. during non-selective enrichment

Siripailin Kosonpisit, Ruamporn Llamkaew, Natthiga Saeteaw and Aluck Thipayarat

The MoniQA Network of Excellence

A. Höhl, G. Schleining, D. Schichtinger, R. Poms and W. Knefel

Decontamination of aflatoxin M₁ in milk by Saccharomyces cerevisiae

Carlos Carassin, Fernanda Bovo, Roice Rosim and Carlos Oliveira

Thermal food processing optimization: algorithm and software

Alik Abakarov

Killer activity and ethanol tolerance of Saccharomyces cerevisiae isolates

David Santo, Susana Barros and Célia Quintas

Survivability of Listeria ivanovii under different inhibitory stresses during selective enrichment in suspended cell cultivation

Pattarin Supanivatin, Siripailin Kosonpisit, Natthiga Saeteaw and Aluck Thipayarat

Alternative enrichment media to resuscitate and multiply Listeria ivanovii for industrial food samples

Siripailin Kosonpisit, Pattarin Supanivatin, Natthiga Saeteaw and Aluck Thipayarat

Academia, government and industry: state-funded innovation support for the South African food landscape

Larry Dolley

Physical and oxidative stability of whey protein oil-in-water emulsions stabilized by ultra high pressure homogenization: effect of pressure and protein concentration on emulsion characteristics

Essam Hebishy, Martin Buffa, Victoria Ferragut, Buenaventura Guamis and Antonio José Trujillo

Quality aspects and critical process parameters in plasma treatment of fresh produce

Matthias Baier, Werner B. Herppich, Jürg Ehlebeck, Dietrich Knorr and Oliver Schlüter

Antimicrobial effect of chitosan-essential oils films on minced pork meat

Jeannine Bonilla, Lorena Atarés, Amparo Chiralt and Maria Vargas

Study of different wall material combinations in the microencapsulation of flaxseed oil by spray drying

Helena C. F. Carneiro, Renata V. Tonon, Carlos R. F. Grosso and Miriam D. Hubinger

</tbody>
</table>
Influence of the addition of soy protein isolate, modified egg albumin and pre-gelatinized rice flour on native rice flour pasting properties
Leandra Zafalon Jaekel, Patricia Mello Garrido Ishida, Marcio Schmiele, Yoon Kil Chang and Caroline Joy Steel

Innovative image analysis applications for graduate and undergraduate biotechnology and food science classes
Marcela Agudelo-Laverde, Patricio Santagapita, Abel Farroni and Pilar Buera

Modeling of non-thermal technologies treated juices - impact on safety and quality
Nicolás Meneses, Angie Martínez, Henry Jaeger and Dietrich Knorr

Drying characteristics of nutmeg kernel applying tempering intermittently
Louis R. Djokaria and Hadi K. Purwadaria

Physico-chemical and thermal properties of taro (Colocasia esculenta) powders as affected by state of maturity at harvest and drying method
Carl Mbafung, Himesa Madloff, Nicolas V. Njintang, Richard M. Nguimbou, Joel Scher and Balaam Facho

Entrapment of Mexican in alginate beads: preparation, activity and operational stability
Grisel Flores-Miranda, Roberto Briones-Martínez, Maria del Carmen Oliver-Salvador, Jorge Yáñez-Fernández

Identification of the optimal level of damaged starch upon wheat grinding by a fractionation/reconstitution experiment: a case of collaborative study between academic and industrial research
Giampiero Sacchetti, Salvatore Rapino, Carla Di Mattia, Lila Neri and Dino Mastrocola

Monitoring milk coagulation of cow, sheep and goat milk mixtures using a light backscatter fiber optic sensor
Ahmed Abdel-Gawad Eid, Victoria Ferragut, Buenaventura Guamis, Manuel Castillo

Red Laser Light modulation influence on seedlings of eggplant (Solanum melongena sp. - variety “Dragaica”) Silvana Dănilă-Guidea, Petru NicuIţă, Esofina Ristică, Mona Popa, Marian M. Ristică, Floarea Burnich, Mihaela Draghici and Mihaela Geicu

Research on encapsulation systems for the industrial development of functional food products
Peggy Ponce-Cevallos, Florencia Mazzobre, Cristina dos Santos, Beatriz Elizalde, Sandra Lazzaroni, Yanina Pavón, Sergio Rozycki and Pilar Buera

Bactericidal effects of electrochemically activated water – inactivation kinetics and mechanisms
Henry Jäger, Antje Fröhling, Antje Gruber, Oliver Schlüter, Antje Schulz, Erik Voigt and Dietrich Knorr

Effect of gums influence on the quality of bread made with flour of poor technological properties
Svetlana Palivoda, Vera Urchak and Tatjana Golikova

Improvement of the reconstitution properties of baby food powders
Karolína Szulc, Katarzyna Nowakowska and Andzej Lenart

A NMR approach to understand water behaviour on chitosan/ glycerol films
Joana F. Fundo, Pedro Almeida, Alexandra Carvalho, Mofalda A.C. Quintas, Gabriel Feio and Cristina L. Silva

Using of capillary electromigration methods for determination of impact of cows diet composition on the production and composition of milk caseins
Míloš Dvořák, Milena Vespalcová and Ludmila Křížová

Application of microwave toroidal cavity resonators for conditioning of food industry wastewater sludge
Sándor Beszédés, Lajos Ludányi, Petra Veszelovszki, Cecilia Hodur and Gábor Szabó

Molecular distillation for the physical refining of rice bran oil
Jiang Shaotong and Pang Min

Genetic resources and intellectual property rights: research and development implications for Botswana’s National Food Technology Research Centre
Seláeló M. Mpotokwane, Annastacia N. Nkwe-Mosele and Bernard T. Bulawayo
P125 Bridging the academy research and agribusiness in the recovering of byproducts from swine farming
Estela Nunes, William Arenhardt, Janaina C. Pasqual

P126 Production and characterization of omega-3 carrying solid-lipid nanoparticles
B. Kristinsson, T. Helgason, J. Weiss and K. Kristbergsson

P127 Effect of roasting on the levels of functional compounds in a novel tropical herb tea made from leaves of Apocynum cannabinum (L.)
Carl M.F. Mbofung and Romelle Feumba Dibanda

P128 Use of energy saving systems in small artisanal food productions. “Solar candies”: a traditional product made up through a solar drying system. Comparison between the traditional and the innovative technique
Marcello della Campa, Alexa Avitabile Leva, Gianni Bertolo and Andrea Maestrelli

P129 Freeze-thaw stability of oil-in-water emulsions with layer by layer technique using sodium caseinate and chitosan-pectin polymers
Thora Arnadottir, Kristberg Kristbergsson and Julian McClements

P130 Texture characterization of spray dried capsules before and after α-tocopherol extraction and its relation with the atomization process
Maria-Ximena Quintanilla, Cynthia Cano, Amor Monroy, Liliana Alamilla, José-Jorge Chanana, Humberto Hernández, Antonio Jimenez and Gustavo-Fidel Gutierrez

P131 Proteases recovery from Jacaratia mexicana cell culture by ultrafiltration
Sergio-Garcia Salas, Denisse Navarrete-Gutierrez, Elias O. Gómez- Montes, Jorge Yañez-Fernández, Carlos Orozco-Alvarez and Maria del Carmen Oliver-Salvador

P132 Knowledge transfer – driver for innovation in food processing
Kerstin Lienemann

P133 Bioactive compounds of phenolic extracts from grape skins and seeds
Kajetan Trošt, Branka Mozetič Vodopivec, Melita Sternad Lemut, Katja Jug, Peter Raspor and Sonja Smole Možina

P134 Effect of using starch on off-odours retention in tuna dark meat
M. Junsi, W. Usawakesmanee and S. Siripongvutikorn

P135 Application of thermoluminescence, electron spin ressonance and GC/MS methods for the detection of non-approved foods to irradiation in Korea
Yeon-Hwa Kwak, Ho-Won Chang, Hee-Sook Lee, So-Young Won, Yoon-Jung Kang, Hwee-Jae Lee, Mi-Kyoung Jin, Kyoung Youl Kim, Jae-I Kim and Young-Mi Jang

P136 Optimization and physicochemical characterization of enzymatic hydrolysates of proteins from co-products of Atlantic salmon and Yellowtail kingfish
Shan He, Chris Franco and Wei Zhang

P137 Elaboration and characterization of chitosan: quinoa protein blend films: effect of pH and various protein concentrations
Carolina Valenzuela, Lilian Abugoch and Cristian Tapia

P138 Agroindustrial residues of guava fruit used in the baking of energy bar added with probiotic
Jonathan Nathaniel Cervantes-Zurita, Maria Elena Sánchez-Pardo and Alicia Ortiz-Moreno

P139 Structural changes of dough after part-baking and rebaking of French bread made with whole wheat flour
Eveline Lopes Almeida, Vivaldo Silveira Junior and Yoon Kil Chang

P140 Determination of presence of aflatoxin in dried figs using image processing and artificial neural networks
Hasan Murat Velioğlu, İsmail Hakki Boyacı and Şefik Kürsütyay

P141 Rheological properties of mayonnaise prepared using xanthan gum obtained by hydrolyzed rice bran fermentation
Ahmet Sükrü Demirci, Tuncay Gümüş and Muhammet Arci

Sodium chloride content of bread from in-store bakeries and the effect of reduction and substitution on quality
Margret S. Kujinga and Afam I. Jideani

Nutritional enhancement of indigenous Ramonnana cowpeas through solid state mold fermentation
Pulane Mswela, Gaamangwe Maruatona, Samuel Leareng, Bernard Bulawayo and Lewis Ezeogu

Development of a new functional cheese: low-cholesterol, low-salt with potential probiotic and antihypertensive effects - generation of consumer expectations
Clara Talens, Iban Sagardia and Maruxa Garcia

Enzymes addition to gluten-free breads: effects on starch and protein fractions and bread quality
Lorena S. Sciarini, Pablo D. Ribotta, Alberto E. León and Gabriela T. Pérez

Study of the concentration of lycopene from the pulp of papaya (Carica papaya L.) by ultrafiltration on a pilot scale
Juliana Paes and Luiz Antônio Viotto

Characterization of lupin protein-enriched bread aroma profile
Adamantini Paraskevopoulou, Andreas Chrysanthou and Maria Koutidou

Effects of the regular intake of yacon root (Smallanthus sonchifolius) on the TNBS-induced colitis in mice
Grethel T. Choque Delgado, Rodolfo Thomé, Dirce Lima Gabriel, Wirla M. S. C. Tamashiro and Glaucia M. Pastore

Effect of inulin and oat fibre incorporation on technological quality of cookie
Marilana Gastaldo, M. Eugenia Steffolani, Alberto E. León and Pablo D. Ribotta

The food texture, a challenge for the future
Gabriela Iordachescu, Mirela Praisler, Gabriela Vlasceanu and Victor Radu Ceaus

Is powder Guarana (Paullinia cupanna) a potential source for antioxidant and antimicrobial agents
Ariane Mendonça Pacheco, Ana Claudia Santos and Maristela Martins

Wild mushrooms as a potential source for antioxidant and antimicrobial agents
Lina Smolskaite, Thierry Talou and Petras Rimantas Venskutonis

Morphological characteristics of bee pollen collected from rape (Brassica napus L. var. napus) as a potential raw material for food production
Ján Brindza, Daniel Biro, Vladimir Vietorics, Lucia Kucelová, Radovan Ostrovský, Beáta Stehlíková and Dezider Tóth

Revitalisation of traditional knowledge on original land-varieties of squash (Cucurbita spp.) exploitation in agro-food branches
Ján Brindza, Ján Sajbidor, Vladimir Vietorics, Lucia Kucelová, Anna Tirpáková and Dezider Tóth

Using hazelnut testa in bread and cookie production
Kadir Gürbüz Güner and Serap Durokki Velioglu

Quality of fatty acids of bocaiuva (Acrocomia aculeata (Jacq.) Lodd.): flour and kernel oils
Cláudia Leite Munhoz, Eliana Janet Sanjinez-Argandoña, Iriani Rodrigues Maldonade, Rita de Cássia Avellaneda Guimarães, Vanessa Tais Nozaki, Luiz Henrique Viana, Priscila Aiko Hiane, Maria Lígia Rodrigues Macedo

Effect of process conditions on aged black garlic
Taynara Camilo de Macedo, Iriani Rodrigues Maldonade, Deusanio Gonçalves Mendes and Nathalie Alcantara Ferreira

Cooking time before and after soaking and iron and zinc contents in cowpea (Vigna unguiculata L. Walp.) cultivar BRS Aracê
Lucia Maria Jaeger de Carvalho, Elen Jesus Pereira, Sílvia Cordeiro de Freitas, Daniela Soares Viana, Marilia Regini Nutti, Maurisrael M. Rocha, Raquel Damasceno-Silva and José Luiz Viana de Carvalho

Antioxidant capacity in cagaita fruit (Eugenia dysenterica DC) using the oxygen radical absorbance capacity (ORAC) assay
Ediane Maria Gomes Ribeiro, Daniela Soares Viana, Patrícia Barros Gomes, Lucia Maria Jaeger de Carvalho, Hilda Duval Barros and Mirian Ribeiro Leite Moura
