2011 First International Workshop on Software Certification

(WoSoCER 2011)

Hiroshima, Japan
29 November – 2 December 2011
# 2011 First International Workshop on Software Certification

**WoSoCER 2011**  
Table of Contents

Message from the Workshop Chairs ........................................................................................................ v
Organizers .................................................................................................................................................. viii

## Technical Session #1: Certification Approaches and Challenges

Challenges for an Open and Evolutionary Approach to Safety Assurance and Certification of Safety-Critical Systems .............................................................................................................. 1  
*Huáscar Espinoza, Alejandra Ruiz, Mehrdad Sabetzadeh, and Paolo Panaroni*

Using Model-Driven Engineering for Managing Safety Evidence: Challenges, Vision and Experience ............................................................................................................................................................ 7  
*Rajwinder Kaur Panesar-Walawege, Mehrdad Sabetzadeh, and Lionel Briand*

Towards Goal-Based Software Safety Certification Based on Prescriptive Standards ................................................................................................................................................................................. 13  
*Erik Stensrud, Torbjørn Skramstad, Jingyue Li, and Jing Xie*

## Technical Session #2: Certification Support and Practical Experiences

The PreCertification Kit for Operating Systems in Safety Domains ........................................................................ 19  
*Domenico Cotroneo, Domenico Di Leo, Nuno Silva, and Ricardo Barbosa*

Independent Test Verification: What Metrics Have a Word to Say ............................................................................ 25  
*Nuno Silva and Rui Lopes*

Design Improvement of System Administrative Operations for Certification ................................................................. 31  
*Kumiko Tadano, Jiangwen Xiang, Fumio Machida, Yoshiharu Maeno, Takao Osaki, and Atsushi Kobayashi*

Error Models and Software Certification .................................................................................................................. 37  
*William E. Howden*

Generation of Certifiably Correct Programs from Formal Models .................................................................................. 43  
*Alexei Iliasov*
