# TABLE OF CONTENTS

**SESSION T1A: A MINI-WORKSHOP ON HOW PEOPLE LEARN:**

A Mini-Workshop on How People Learn ............................................................................................................................ 1

*Louis Everett, Susan Finger, Don Millard, Russell Pimmel, Janis Terpenny*

**SESSION T1B: MINI WORKSHOP – INNOVATION FOR A CROWDED CURRICULUM: LEARNING MODULES FOR TOMORROW'S ENERGY ENGINEERS**

Mini Workshop - Innovation for a Crowded Curriculum: Learning Modules for Tomorrow’s Energy Engineers ................................................................. 3

*Donna Riley*

**SESSION T1C: EXAMPLES OF PROGRESS IN ONLINE LEARNING: ASSESSMENT AND NEW CONTEXTS:**

Work in Progress - Assessing Cognitive Skills in Asynchronous Online Discussion: A Case Study of Student Centered E-Learning Environment in Indonesia ........................................................................................................ 5

*Harry B. Santoso, Oenardi Lawanto, Zainal A. Hasibuan, Rizal F. Aji*

Work in Progress - Classroom and Distance Components of a GK12 Program Placing Graduate Students in High School Classrooms ............................................................... 7

*Justin Brough, Mary Baker, Dominick Casadonte*

Work in Progress – Performance Evaluation of Online Learning Tools .................................................................................. 9

*Alexander A. Kist, Andrew P. Wandel*

Successful Practices for Online Computing, Engineering, and Technology Courses .............................................................................. 11

*Carol J. Romanowski, Rajendra K. Raj, S. Manian Ramkumar*

**SESSION T1D: STRATEGIES FOR K-12 INITIATIVES: ENGINEERING PROJECTS AND TEACHING DEVELOPMENT:**

Improving Energy Literacy among Middle School Youth with Project-based Learning Pedagogies ........................................ 17

*Jan E. DeWaters, Susan E. Powers*

Evaluation of a K-8 LEGO Robotics Program ......................................................................................................................... 24

*Tanja Karp, Andreas Schneider*

Work in Progress - Initiating the Beaver Contest on Computer Science and Computer Fluency in Israel ................................................................................................................................. 30

*Brunia Haberman, Haim Averbuch, Avis Cohen, Valentina Dagienne*

High School Teacher Development Workshops that Create Long-Term Student Impact ............................................................... 32

*Jane Petrus, James Nelson, Galen Turner, Kelly Crittenden*

Work in Progress - NEESacademy as a Cyber-enabled Learning Experiences for K-16 Earthquake Engineering and Science Education .................................................................................. 38

*Sean Brophy, Jason Lambert, Thalia Anagnos*

**SESSION T1E: INSTRUCTIONAL TECHNOLOGIES AND COURSE DESIGN: SYNERGIES:**

Work in Progress - Enhancing Communications among Courses Linked with Prerequisites ........................................ 41

*Ziliang Zhou*

Educators + Tech-heads = Ed-Techs, 'The Symphony' .......................................................................................................................... 43

*Patrick Kelcher, John Mark*

iGraf: an Interactive Graphical Software for CSET Education ........................................................................................................ 49

*Reginaldo do Prado, Anarosa A. F. Brandao, Leonidas de Oliveira Brandao*

Accountability and the Use of Classroom Response Devices ........................................................................................................ 55

*Edward F. Gehringer, Mridu Baldevraj Narang*
Towards Flexibility on IMS Learning Design Scripts
Luis de-la-Fuente-Valentin, Derick Leony, Abelardo Pardo, Carlos Delgado Kloos

SESSION T1F: ADVANCES IN ENGINEERING DESIGN: CAPSTONE COURSE AND PROJECT-BASED LEARNING:

Enhancing Capstone Design Education in Civil Engineering: The Potential Synergies between Academics and Practitioners
Waddah Akili

Engineering Capstone Project an Individual Approach
Carlos Miguel Tobor

Work in Progress - A Comparison of Mentoring Functions in Capstone Courses across Engineering Disciplines
James J. Pembridge, Marie C. Paretti

On Project-Based Learning through the Vertically-Integrated Projects Program
Meredith Baxter, Byungki Byun, Edward J. Coyle, Tuan Dang, Thomas Dwyer, Ilseo Kim, Chin-Hui Lee

Work in Progress - Peer-Directed Learning in a Project Based Model
Andrew McNally

SESSION T1G: APPROACHES TO DEVELOPMENT GLOBAL COMPETENCY:

A Senior Service-Learning Design Project in Ecuador
Rob Gradoville, Dan Budny

GLOBAL SYSTEMS: Advancing Global Competency in an Innovative Course for Sophomores
Ron Rosenberg

Work in Progress - The Process of Evaluating the Impact of an International Experience on Students’ Global Engineering Skills
Catherine T. Amelink, Nicole Sanderlin, Elizabeth Tront, Joseph G. Tront

Human Side of Engineering: Dealing with Complex and Ethical Challenges
Melany M. Ciampi

An Evaluation of the Australian Engineers Without Borders Challenge from the Course Coordinators’ Perspectives
Stephanie Cutler, Maura Borrego, Dan Loden

SESSION T1H: ADVANCES IN SOFTWARE ENGINEERING EDUCATION: TEAMS AND PROJECTS:

Work in Progress - Elassys: Online Tool for Teamwork Analysis and Assessment in Software Engineering Education
Alexandr Mamei, Rainer Todtenhoefer, Dragutin Petkovic

Teaching Students Software Engineering Practices for Micro-Teams
Sheeta Deshpande, Joe Bolinger, Thomas D. Lynch, Michael Herold, Rajiv Rammuth, Jayashree Ramanathan

Developing Case Modules for Teaching Software Engineering and Computer Science Concepts
Salamaa Salamah, Massood Towhidnejad, Thomas Hilburn

How to Involve Students in FOSS Projects
Heidi J. C. Ellis, Gregory W. Hislop, Mel Chua, Sebastian Dziallas

SESSION T1J: TOPICS IN ENGINEERING EDUCATION 1:

Proposal of Methodology for Learning of Standard Mechanical Elements Using Augmented Reality
Jorge Martin-Gutierrez

Results from a Pilot Survey of Engineering and Engineering Technology Students in 2-Year and 4-Year Institutions
Michael T. Gibbons, Elizabeth T. Cady, Catherine Didion, Norman L. Fortenberry

ASME Vision 2030: Helping to Inform Mechanical Engineering Education
Scott Daniels, Allan Kirkpatrick, Edie Ervin

Work in Progress - Development and Integration of an Online Soil Mapping Web Application
Laura A. Kocur, Ronald J. Glotzbach, Darrell G. Schulze, Christopher C. Miller
SESSION T2A: SPECIAL SESSION – COGNITIVE PROCESSES CRITICAL FOR ILL-DEFINED PROBLEM SOLVING: LEARNING THEORY, RESEARCH, AND CLASSROOM IMPLICATIONS:

Special Session - Cognitive Processes Critical for Ill-Defined Problem Solving: Linking Theory, Research, and Classroom Implications
Senay Purzer, Jonathan C. Hilpert

SESSION T2B: PANEL – WHAT IS GLOBAL ENGINEERING EDUCATION FOR?: THE MAKING OF INTERNATIONAL EDUCATORS:

Gary Downey, Kacey Beddoes

SESSION T2C: INTEGRATING SUSTAINABILITY, TEAMWORK, AND COMMUNICATION WITH ENGINEERING COURSES:

Work in Progress: Data-Rich Learning Environments for Engineering Education
V. William DeLuca, Aaron Clark, Jeremy Ernst, Nasim Lari

Work in Progress - Adapting Team-Based Learning to the First Circuit Theory Course
Robert M. O’Connell

Work in Progress - Match or Mismatch? The Teaching and Learning of Teamwork and Communication Skills
Holly M. Matusovich, Marie Paretti, Andrea Motto, Kelly Cross

A Grounded Theory Approach to Effects of Virtual Facilitation on Team Communication and the Development of Professional Skills
Uyen Mai, Daniel Swift, Tracey Wiggins, Ray Luechtefeld

A Novel Pedagogical Tool integrating Sustainability Competence into Engineering Degrees
Yolanda Bolea, Antoni Grau

SESSION T2D: ENHANCING STUDENT SUCCESS AND DEVELOPMENT VIA INTRODUCTORY ENGINEERING COURSES:

Mixed Reality for Development of Spatial Skills of First-Year Engineering Students
Jorge Martin-Gutierrez, Rosa E. Navarro, Montserrat Acosta Gonzalez

A Pass/Fail Option for First-Semester Engineering Students: A Critical Evaluation
Ken Stanton, Tom Siller

An Introductory Electronics Course Oriented to Develop Real-Life-Engineering Design Skills
Ariel Lutenberg, Sebastián Carbonetto, Mariano García Inza, Daniel Rus

Work in Progress - Extending Parallelism Education to the First Year with a Bottom-Up Approach
Gregory Lammons, Cordelia Brown

Work in Progress – Design and the Robotically-Controlled Mini-Plant in Freshman Chemical Engineering
Bill B. Elmore

SESSION T2E: ENGINEERING FRONTIERS OF INSTRUCTIONAL TECHNOLOGIES:

Work in Progress - LOM4CE: LOM for the Content Ecosystem
Alfonso Vicente, Regina Motz, Martin Llamas, Manuel Caetano

Work in Progress - Developing a Cognitively Based Digital Logic Calculator
Joseph Handzik, Geoffrey L. Herman

The Third Dimension in Open Learning
Colin Allison, Alan Miller, Thomas Sturgeon, Indika Perera, John McCaffrey

Work in Progress - A Video Game for Teaching Dynamics
B. D. Coller
Work in Progress - A Framework for Assessing the Impact of Instructional Technology on the Nature of Teaching and Learning ................................................................. 221
Catherine T. Amelink, Glenda Scales

SESSION T2F: APPROACHES TO INVOLVING STUDENTS AT ALL LEVELS IN RESEARCH:

Utilizing Topic Modeling Techniques to Identify the Emergence and Growth of Research Topics in Engineering Education ................................................................. 224
Aditya Johri, G. Alan Wang, Xiaomo Liu, Krishna Madhavan

A System for Forecasting Student Performance Based on Course Evaluation ........................................... 230
Rodrigo Filev Maia, Selma Shin Shimizu Melnikoff

On Providing Successful Research Experiences for Undergraduates ........................................... 236
Reynold J. Bailey, Hans-Peter Bischof, Minseok Kwon, Tracy Miller, Rajendra K. Raj

Design-based Research: A Framework for Designing Novel Teaching and Learning Experiences in Middle School Engineering Education ........................................... 242
Tirupalavanam G. Ganesh

Work in Progress – Exploring the Evolution of the Mentoring Relationship in a Summer Undergraduate Research Program ................................................ 249
Renata A. Revelo Alonso, Michael C. Loui

SESSION T2G: TRANSFORMING ENGINEERING LABORATORIES THROUGH INFORMATION TECHNOLOGIES:

Work in Progress - Enhancing Students Learning Through Instructional Videos during Hands-On Laboratories on Renewable Energy Sources ........................................... 251
Oxana Pantchenko, Shehba Shahab, Daniel Tate, Philippe Matteini, Michael Isaacson, Ali Shakouri

Serious Gaming for Experiential Learning ........................................... 253
David Gouveia, Duarte Lopes, Carlos Vaz de Carvalho

A PIC18 Robot-Centered Microcontroller Systems Laboratory ........................................... 259
Kathleen A. Kramer, Michael Anderson

Work in Progress - Modules and Laboratories for a Pathways Course in Signals and Systems ........................................... 265
Kostas Tsakalis, Jayaraman Thiagarajan, Tolga Duman, Martin Reisslein, G. Tong Zhou, Xiaoli Ma

Control System Experiments at Home ........................................... 267
Musa K. Jouaneh, William J. Palm

SESSION T2H: NEW DIRECTIONS INFLUENCING PARTICIPATION OF WOMEN IN ENGINEERING:

Inspiring Future Female Scientists ................................................................. 273
Marsha Zaidman

The Co-operative Education Work Term: A Comparison of Expectations and Outcomes for International Engineering Graduates in Canada ........................................... 278
Sandra Ingram, Anita H. Ens

Women and Higher Engineering Education – Choosing One's Degree Program ........................................... 285
Aura Paloheimo, Kaisa Pohjonen, Pirjo Putila

Impact of Introducing Single-Gender Classrooms in Higher Education on Student Achievement Levels - A Case Study in Software Engineering Courses in the GCC Region ........................................... 291
Amruth N. Kumar

RESULTS FROM REPEATED EVALUATION OF AN ONLINE TUTOR ON INTRODUCTORY COMPUTER SCIENCE ........................................... 297
Amruth N. Kumar

SESSION T2J: GRADUATE STUDENTS, GRADUATE PROGRAMS, AND PREPARING ENGINEERING GRADUATES:

Work In Progress - Design and Delivery of the Graduate Course on Electronic Systems Integration ........................................... 303
Qing Zheng, Ramakrishnan Sandaram, Fong Mak
The Challenge of Embedding Information Literacy as a Graduate Attribute into Engineering and Technology Courses.................................................. 305
Patrick Keleher, Joanne Keleher, Karin Simon
Work in Progress - Effect of Departmental Culture on ePortfolios for Graduate Engineering Programmatic Assessment ........................................................................................................................................... 311
Mahnas Jean Mohammadi-Araghi, Lisa McNair
Work in Progress – Developing a Graduate Consortium in Engineering Education ............................................................................................................ 313
Lauren D. Thomas, Brook Sattler, Adam R. Carberry

SESSION T3A: MINI WORKSHOP:

Mini Workshop – A Strategy for Assessing Student Work on Open-Ended Problems ................................................................. 315
Heidi Diefes-Dux, Monica E. Cardella

SESSION T3B: MINI WORKSHOP:

Mini Workshop – Designing Project-Based Courses for Learning and Cost-Effective Teaching ............................................................. 317
Kristina Edstrom, Stefan Hallstrom, Jakob Kuttenkeuler

SESSION T3C: DEVELOPMENT OF CRITICAL THINKING, LIFELONG LEARNING, LEADERSHIP, AND VALUES: INTEGRATION WITHIN ENGINEERING CURRICULA:

A Behavioral Approach to Building Cognitive Foundations for Effective Thought and Action in a Freshman Critical Thinking Course ........................................................................................................................... 319
Eric Pappas
Work in Progress – Developing an Individualized Life-Long Learning Plan for Junior Electrical and Computer Engineering Majors .................................................................................................................. 325
Michael Elmore, James Constable
Work in Progress - Assessment of a Leadership Curriculum ................................................................................................................................. 328
Andrew L. Gerhart, Donald D. Carpenter, Melissa L. Grunow
Knowledge and Information Sharing Improved by Simulation Technology: A Quantitative Study .................................................................................................................. 331
Adrienne Colbert, Angelica Guzman, Martha McQueen, Ray Luechtefeld
Student Development in the Co-curriculum through Values-Based Teaming ................................................................................................................... 337
Dan Dolan, Mike Batchelder, Jim McReynolds, Kim Osberg, Ryan Koontz, Pat Mahon, Mike Keegan, John Weiss

SESSION T3D: UNDERSTANDING HOW K-12 LEARNERS THINK ABOUT ENGINEERING AND HOW TECHNOLOGIES MIGHT INFLUENCE THEIR BELIEFS:

Mobile Laboratory Programs as Vehicles to Promote STEM Education in K-12 and Beyond .................................................................................. 343
Carl Franzblau, Carla A. Romney, Russell Faux, Donald DeRosa
Work in Progress - Exercises in Squeak Smalltalk for Pre-College Education .................................................................................................................. 349
Steve E. Watkins, Nicolette Kowalewski, Kathryn N. Rodhouse, Benjamin Cooper
Work In Progress - SUNRISE: Schools, University 'N' (and) Resources in the Sciences and Engineering-A NSF/GMU GK-12 Fellows Project .................................................................................................................. 352
Rajesh Ganesan, Donna Sterling, Philip Henning
Work in Progress - Developmental Engineering: Using Observation for Understanding Child Behaviors as Precursors to Engineering Thinking .................................................................................................................. 354
Diana Bairaktarova, Demetra Evangelou, Christina Citta
First Experiences with eBlocks as an Assistive Technology for Individuals with Autistic Spectrum Condition .................................................................................................................. 356
Jennifer Drain, Mario Riojas, Susan Lysecky, Jerzy Rozenblit

SESSION T3E: FACULTY DEVELOPMENT: PERSPECTIVES FROM PEERS AND STUDENTS:

A Review of an Engineering Teaching Apprenticeship Program ................................................................................................................................. 363
Kerry Meyers, Jay Brockman
SESSION T3F: PROJECT-ANCHORED AND TEAM-BASED APPROACHES TO TEACHING ENGINEERING DESIGN:

A Two-Channel Bioamplifier Design as a Cross-Course Experience......................................................... 388
Steve Warren, James DeVault, Kejia Li

Work in Progress - An Innovative Design of a Master in Computer Science Program.................................. 394
Lixin Tao, Constantine Coatrass, Nayarayn Murthy, Richard Kline

Student Perspectives on Learning Through Developing Software for the Real World........................................ 396
Christopher Dean, Thomas D. Lynch, Rajiv Ramnath

Team-based Software/System Development in a Vertically-Integrated Project-Based Course ......................... 402
Randal Abler, Ed Copley, Agrita Kiopa, Julia Melkers

SESSION T3G: ARE THERE NEW APPROACHES TO DESIGNING ENGINEERING LABORATORY EXPERIENCES?

High Tech Garbage Can Help Engineering Colleges to Improve Hands-on Education.................................. 409
Samuel E. de Lucena

Green’ Remote Laboratory for Chemical Engineering Degree: A New Paradigm for Training .................... 415
Yolanda Bolea, Antoni Grau

Yong Xu, Kathleen Meehan, Xiangyu Wei, Alan B. Overby, Cortney Martin

A Preliminary Motivational Evaluation of Milestone-Based Laboratory Assessment.................................... 424
Ken Stanton, Euan Lindsay

Work in Progress - Creating a Collaborative Learning Environment for Engineers and Technologists........ 430
Craig Downing, Anneliese Watt, Julia Williams, Rick Stumper

SESSION T3H: HOW MIGHT TECHNOLOGICAL DEVELOPMENTS MAKE DIFFERENCES IN THE LIVES OF ENGINEERING STUDENTS AND PEOPLE IN GENERAL?

Ultra-Low Power and the Millennium Generation....................................................................................... 433
Antonio F. Mondragon-Torres, Adriana Becker-Gomez

Work in Progress - Development of an Integrated Circuits Course that Includes the Full Experience of Designing an ASIC in a CMOS Process................................................................. 438
Jose Lipovetzky, Alejandro De La Plaza, Martano Garcia Itza, Ariel Lutzenberg, Martin Carra, Pablo Barbeito

A Novel Interdisciplinary Course in Gerontechnology for Disseminating Computational Thinking............. 441
Hem-I Yang, Peter Martin, Debra Satterfield, Ryan Babbitt, Johnny Wong, Mack Shelley, Carl K. Chang

Effectiveness of Technology Education Learning Activities on the Improvement of Spatial Skills................ 447
Susan K. Donohue

Work In Progress - Programming in a Confined Space – A Case Study in Porting Modern Robot Software to an Antique Platform........................................................................................................................... 453
Stacey L. Montresor, Jennifer S. Kay, Michel Tokic, Jonathan M. Summerton

SESSION T3J: ASSESSMENT: CHANGING PRACTICE OF ENGINEERING FACULTY AND BEHAVIORS AMONG ENGINEERING STUDENTS:

The Effect of Assessments on a Telematics Course for Telecommunication Engineers ................................ 456
Maria-Dolores Cano
Legitimization of Subject Matter in a Design Intensive Degree Program

Charles D. Cox

Five Years with Kattis – Using an Automated Assessment System in Teaching

Emma Enstrom, Gunnar Kreitz, Fredrik Niemela, Pehr Soderman, Viggo Kann

Defining, Integrating, and Assessing a Purposeful Progression of Cross-Curricular Initiatives into a Computer Science Program

Steve Hadfield, Dino Schweitzer, David Gibson, Barry Fogin, Martin Carlisle, Jeff Boleng, Dave Bibighaus

Interactions Among Undergraduate Engineers: How Care and Respect are Demonstrated Among Peers

Janice E. Austin, Elizabeth G. Creamer

SESSION T4A: SPECIAL SESSION:

Special Session - Assessing Student Learning of Engineering Design

Monica E. Cardella, William C. Oakes, Carla B. Zoltowski, Robin Adams, Senay Purzer, Jim Borgford-Parnell

SESSION T4B: SPECIAL SESSION:

Special Session - Attracting and Supporting Military Veterans in Engineering Programs

Susan M. Lord, Kathleen A. Kramer, Rick T. Olson, Mary Kasarda, David Hayhurst, Sarah Rajala, Robert Green, David Soldan

SESSION T4C: INFORMING PRACTICE IN DESIGN AND IMPLEMENTATION OF ONLINE COURSES:

Team Formation by Region to Improve Outcomes for Distance-Education Students in a PBL Course

Andrew P. Wandel

Improving Efficiency in Engineering Education Through Asynchronous Computer-Based Instruction

Ronald D. Williams, Joanne Bechta Dugan

Work in Progress - Design of Interactive Learning Objects for Improvement of Digital Electronics Teaching and Learning in High School and Distance Learning Universities

Sergio Martin, Jose Joaquin Fabnel, Elio Sancristobal, Manuel Castro, Juan Peire

Work in Progress – Development and Practice of National Colleges of Technology Version Embedded Technology Skill Standards

Kazuhide Sugimoto, Kentarou Noguchi, Chikatoshi Yamada, Takahiro Yonamine

Work in Progress – Alternative Interfaces for e-Learning Platforms used in Remote Areas

Lilian S. Oliveira, Didier V. Oliveros, Maria da Graça Pimentel, Jose Pinheiro Queiraz-Neto

SESSION T4D: NOVEL INITIATIVES TO LEARN ABOUT AND EDUCATE K-12 TEACHERS AND STUDENTS – CAN YOU DO BETTER?:

Work in Progress - STEM Collaboration Cubed

Stephen J. Zilora

Public School Students Left Behind: Contrasting the Trends in Public and Private School Computer Science Advanced Placement Participation

Kevin Friesen, Tim Sanders, Jennifer S. Kay

Work in Progress – Exploring Teacher and Student Differences in Assessment of Constructivist Practices

Taylor Martin, Pat Ko, Stephanie Baker Peacock

Work in Progress - Merging Science Inquiry and Engineering Design: A Summer Workshop Series for Middle and High School Science Teachers

Patricia Carlson, Peter Hylton, Michael Robinson, Renee Rogge, Justin Shearer

Reinventing the Engineering: An Extracurricular Program Designed to Attract New Engineering Students

Juliana Mesquita Vidal Martinez de Lucena, Vicente Ferreira de Lucena Junior, Claudia Magalhaes do Valle
SESSION T4E: FACULTY INNOVATION IN TEACHING VIA TECHNOLOGIES:

Work in Progress - A Smartphone Application as a Teaching Tool in Undergraduate Nursing Education
Jesse Vivanco, Bryan Demianyk, Robert D. McLeod, Marcia R. Friesen .......................................................... 533

Demo Program for Teaching the Characteristics of Low-Pass IIR Filters
Gordana Jovanovic Dolecek .......................................................... 536

Work in Progress - Higher-Level-Learning Enhancements to Online Assignments in an Electrical Engineering Linear Systems Course
Chen Jia, Steve Warren .......................................................... 542

An Application for the Collaborative Development of Semantic Content
Miguel Rodriguez-Artacho, Paola Sarango Lapo, Ines Jara Roa .......................................................... 544

Knowledge Servers for the Classroom
Michael Wollowski, Kevin Risden .......................................................... 550

SESSION T4F: STUDENT DEVELOPMENT OUTCOMES VIA CURRICULAR INNOVATIONS:
CREATIVITY, TEACHING PREPARATION, GRADUATE SCHOOL:

Factors Influencing the Decision to Enroll in an Engineering PhD Program
Hoda Baytiyeh, Mohamad K. Naja .......................................................... 556

Assessing Creativity in Engineering Students
Susan Anato-Henderson, Amber Kempainen, Gretchen Hein .......................................................... 561

Work in Progress - Putting the “E” in STEM Teacher Preparation: A New Bachelor of Science
Degree with an Engineering Education Major
Kenneth J. Reid, Eric Baumgartner .......................................................... 564

Work in Progress – Developing a Curriculum to Prepare Engineers to Participate in Public Policy
Ida Ngambeki, Demetra Evangelou, Suresh Rao, Monica Cox, Lamis Behbehani .......................................................... 566

A Survey on Computer Science K-12 Outreach: Teacher Training Programs
Jiangjiang Liu, Ethan Philip Hasson, Zebulun David Barnett, Peng Zhang .......................................................... 568

SESSION T4G: INNOVATIONS IN TEACHING CSET COURSES: PROGRAMMING, FORMAL LANGUAGES, COMPUTER ENGINEERING, SOFTWARE ENGINEERING:

Work in Progress – The Evaluation Tools Database for Assessing Engineering Education Innovations
Michael S. Trevisan, Denny Davis, Jennifer E. LeBeau, Mo Zhang .......................................................... 574

Student Reflections as an Influence in the Dynamics of an Introductory Programming Course
Scheila W. Martins, Antonio J. Mendes, Antonio D. Figueirêdo .......................................................... 576

The use of Concept Maps in Computer Engineering Education to Promote Meaningful Learning,
Creativity and Collaboration
Inaki Calvo, Ana Arruarte, Jon A. Elorriaga, Mikel Larranaga, Angel Conde .......................................................... 582

Joe Bolinger, Michael Herold, Rajiv Ramanath, Jayashree Ramanathan .......................................................... 588

SESSION T4H: FACTORS INFLUENCING DECISIONS OF WOMEN TO SELECT AND/OR CONTINUE IN ENGINEERING:

Work in Progress - Why Are Most Underrepresented Groups Even More Underrepresented in a Vehicle Design Program?
Janet M. Braun .......................................................... 594

Engineering Futures: Female Students, Careers, and Work/Life Balance
Jonathan C. Hilpert, Melissa L. Carrion, Jenefer Husman, Laura Baughman .......................................................... 597

Implications of Black Greek Letter Membership on the Development of the Engineer of 2020
Denise R. Simmons, Julie P. Martin .......................................................... 602

Work in Progress - The Bridge to the Doctorate Experience: A Reflection on Best Practices and Project Outcomes
Tuncay Aktosun, Ariana Arciero, Benjamin Flores, Helmut Knaust, Cristina Villalobos .......................................................... 607
Work in Progress: Gender Impacts of Relevant Robotics Curricula on High School Students’ Engineering Attitudes and Interest ................................................................. 609
  Benjamin S. Terry, Brandi N. Briggs, Stephanie Rivale

SESSION T4J: HOW LEARNERS UNDERSTAND CSET CONCEPTS AND CAREERS:

Does an Avatar Motivate? ........................................................................................................ 612
  Mohammad Nur Achar Mazlan, Liz Burd

Work in Progress - Analysis of misconceptions of Engineering Technology Students About Electrical Technology Concepts. A Mixed Methods Study .............................................. 618
  Tatiana V. Goris, Michael J. Dyrenfurth

Informal Learning In Engineering Education: Where we are - where we need to go ........................................ 621
  Daria Kotys-Schwartz, Mary Besterfield-Sacre, Larry Shuman

Work in Progress - Does the Marketing of Engineering Courses Through Pedagogical Differentiation Matter? ........................................................................................................ 628
  Josef Rojter

Work in Progress - Does Maintenance First Improve Student's Understanding and Appreciation of Clean Code and Documentation ................................................................. 631
  Maureen Doyle, Brooke Buckley, Wei Hao, James Walden

FRIDAY SESSIONS:

SESSION F1A: MINI WORKSHOP:

Mini Workshop – How to Organize a Professional Development Workshop for High School CS Teachers ........................................................................................................ 633
  Joanne McGrath Cohoon, James P. Cohoon

SESSION F1B: MINI WORKSHOP – THE CS2013 COMPUTER SCIENCE CURRICULUM GUIDELINES PROJECT:

Mini Workshop - How to Improve Teaching and Learning: Selecting, Implementing and Evaluating Digital Resources in the Engineering Pathway ................................................................. 634
  Joseph G. Tront, Flora P. McMartin, Alice M. Agogino

SESSION F1C: DEVELOPING AND ASSESSING PROFESSIONAL SKILLS: TEAMWORK, SKETCHING, COMMUNICATION:

Work in Progress - Effective Teaching of Technical Teamwork to Large Cohorts of Engineering Students in China ................................................................................................. 636
  Dan Zhang, Laurie Cuthbert, Steve Ketteridge

Work in Progress - Technical Freehand Sketching ........................................................................ 639
  Kenneth S. Manning, John Hampshire

A Take-home Exam to Assess Professional Skills ........................................................................ 641
  David Lopez, Josep-Llorenç Cruz, Fermín Sanchez, and Agustin Fernandez

Work in Progress - Cognitive Scaffolding in Contemporary Computer Documentation .............. 647
  Kenneth R. Price

Teaching Teamwork in Engineering and Computer Science ......................................................... 649
  Robert Lingard, Shan Barkataki

SESSION F1D: INNOVATIONS IN TEACHING STUDENTS FUNDAMENTAL IDEAS AND SKILLS:

Conducting Successful Studies in Materials Science and Engineering with Consideration to a Multiplicity of Student Cohorts and Delivery Modes ......................................................... 654
  Patrick Keleher, Arun Patil, Kai Duan

An Automatic Correction Tool That Can Learn ............................................................................ 660
  Ferran Prados, Josep Soler, Imma Boada, Jordi Poch
Work In Progress – Student Learning as a Function of Attendance in Large Engineering Classes ................................................. 665
  Michael Elmore, Koeraad Gieskes

Work in Progress - Promoting Metacognitive Knowledge and Shared Note-Taking to Learn Electric Circuit Concepts through Enhanced Guided Notes .......................................................... 668
  Oenardi Lawanto, Paul Schreuders, Doug Holton, James Dorward

An Analysis of DC Circuit Theory Content in an Engineering Textbook: Presentation Features, Conceptual Content, and Use of Analogies .......................................................... 671
  Deepika Sangam, Brent K. Jesiek, Julia Thompson

SESSION F1E: SERVICE LEARNING:

LORSE: Intelligent Meta-Searcher of Learning Objects over Distributed Educational Repositories Based on Intelligent Agents .......................................................... 677
  Silvia Margarita Baldiris, Jorge Luis Bacc, Adriana Noguera Rojas, Juan Carlos Guevara

Teaching a Service Learning Introductory Engineering Course - Lessons Learned and Improvements Made .......................................................... 682
  Tanja Karp

Work in Progress - Interdisciplinary International Preprofessional Service within the First-Year Engineering Curriculum .......................................................... 687
  Kenneth J. Reid, Robin M. White, Christine L. North

Security Planning for Small Businesses: A Service-Learning Course .......................................................... 692
  Todd Burri, Susan J. Lincke

From the Manager's Perspective: Classroom Contributions to Open-Source Projects .......................................................... 698
  Edward F. Gehringer

SESSION F1F: LENSES FOR UNDERSTANDING DESIGN EDUCATION: HANDS-ON, COGNITION, LIFELONG LEARNING, COMPLEXITY, PROJECT-BASED:

Jump-starting a Senior-level Capstone Project through Hands-on Laboratory Exercises .................................................. 703
  James Bluman, J. Ledlie Klosky

Effects of Design Education on Design Cognition: A Preliminary Study of a Sophomore Design Course .......................................................... 709
  Christopher B. Williams, Yoon Suk Lee, Marie C. Paretti, John S. Gero

Fostering Lifelong Learning in a Capstone Design Environment: An Implementation Assessment .......................................................... 716
  Gonca Altuger-Genc, Constantin Chassapis

Teaching Capstone Design: The Influence of Problem Complexity .......................................................... 721
  C. Osterman, V. Viswanathan, J. Linsey

Work in Progress – Implementation of a Project-Based Learning Curriculum .......................................................... 727
  Ron Ulseth, Dan Ewert, Bart Johnson

SESSION F1G: DIRECTIONS FOR INNOVATION IN ENGINEERING LABORATORIES: FUN, PERSONAL, VIRTUAL, REMOTE ONLINE:

Work in Progress - Integrating Educational Online Lab Platforms around the iLab Shared Architecture .......................................................... 729
  Danilo Garbi Zutin, Michael E. Auer

Classroom Mediated by Technology Model: A New Proposal for Education to Remote Regions of the Amazon .......................................................... 732
  William R. Malvezzi, Katia C. Neles, Graca Bressan

Work in Progress - Tools and Technology to Implement a Students Personal Laboratory .......................................................... 736
  Mark Walters

Wow! Linear Systems and Signal Processing is fun! .......................................................... 738
  Maurice F. Aburdene, Kundan Nepal

SESSION F1H: USING GAMES TO TEACH CSET:

Game Tel: An Approach to Multi-Format and Multi-Device Accessible Engineering Education .......................................................... 744
  Luis Anido, Daniel Burgos, Manuel Caeiro, Javier Torrente, Manuel Fernandez, Javier Gonzalez, Mario Manso
An Agile Boot Camp: Using a LEGO®-Based Active Game to Ground Agile Development Principles

Thomas D. Lynch, Michael Herold, Joe Bolinger, Shweta Deshpande, Thomas Bihari, Jayashree Ramanathan

Introducing Object Oriented Design Patterns through a Puzzle-Based Serious Computer Game

Adrian Rusu, Robert Russell, Remo Cocco, Spence DiNicolantonio

Work in Progress - A Survey of Popular Game Creation Platforms Used for Computing Education

Kathlyn Doss, Valerie Juarez, Daniel Vincent, Peggy Doerschuk, Jiangiang Liu

Work in Progress - Games for Life Workshop: Outreach to Middle and High School Age Girl Scouts

Stephen Jacobs

SESSION F1J: MATHEMATICAL AND SCIENCE FOUNDATIONS FOR ENGINEERING EDUCATION:

Developing Instruments to Assess First-year Calculus and Physics Mechanics Skills needed for a Sophomore Statics and Dynamics Course

Kristi J. Shryock, Arun R. Srinivasa, Jeffrey E. Froyd

Tablet PC Use in Freshman Mathematics Classes Promotes STEM Retention

Carla A. Romney

Mobile Learning Experience in the Calculus Classroom

Travis Kowalski, Kevin Israel, Ambu Sreedharan

Work in Progress - Calculus Placement Modeling for Engineering Student Potentially Contributes to Appropriate Advising

Qu Jin, Lorie Groll, P. K. Imbrie, Tori Reed-Rhoads

Work in Progress - Engineering Math With Early Bird

Sabina Jeschke, Olivier Pfeiffer, Erhard Zorn

SESSION F2A: MINI WORKSHOP:

Mini Workshop – P – 12 Engineering Education: Using Engineering Teaching Kits to Address Student Misconceptions in Science

Susan K. Donohue, Larry G. Richards

SESSION F2B: SPECIAL SESSION – HOW TO IMPROVE TEACHING AND LEARNING: SELECTING, IMPLEMENTING AND EVALUATING DIGITAL RESOURCES IN THE ENGINEERING PATHWAY:

Special Session – The CS2013 Computer Science Curriculum Guidelines Project

Mehran Sahami, Steve Roach, Richard LeBlanc

SESSION F2C: DEVELOPING ENGINEERING PROFESSIONAL SKILLS: ETHICS, WRITE, TEAMWORK, LIFELONG LEARNING:

Reading Strategies and Student Comprehension in an Internet Ethics Course

Mark A. Holliday

Work in Progress - Early Improvement in Report Writing Skills Using Critiques

Jeffrey R. Mountain

A Quantitative Study of the Impact of Automated Facilitation on Engineering Student Dyadic Task Completion

Ricardo Romero, Richard Savage, Paul Figueroa, Ray Luechtefeld

Decision-Making and Conflict Resolutions Skills Enhanced by Virtual Facilitation: A Qualitative Study

Adrienne Colbert, Angelica Guzman, Martha McQueen, Ray Luechtefeld

Frontiers of Engineering: Opportunity and Challenges

Claudio da Rocha Brito, Melany M. Ciampi
SESSION F2D: ENTREPRENEURIAL SKILLS TO PROMOTE INNOVATION:

Work in Progress - Enhancing the Entrepreneurial Mindset of Freshman Engineers .................................................. 819
Kenneth J. Reid, Daniel M. Ferguson

Patents and Intellectual Property in Entrepreneurship Education in Computing at Hofstra University .......................... 822
Gerda L. Kamberova, Andrea Pacell, John Impagliazzo, Edward H. Carrie, Simona Doboli

Work in Progress - Engineering Creativity and Propensity for Innovative Thinking and Design in Engineering Students ............................................................... 828
Gisele Ragusa

Work in Progress - Product Evolution from an Engineering Perspective ................................................................. 832
David Benson

Work in Progress - Entrepreneurship Literacy for Engineering Students ................................................................. 835
Nathalie Duval-Couetil, Teri Reed-Rhoads, Shiva Haghighi

SESSION F2E: LIFELONG LEARNING FOR ENGINEERING FACULTY: TEACHING, LEADERSHIP, DISCIPLINARY CONTENT:

Perspectives on Leadership Concepts by Engineering Academics ............................................................................. 837
Steven Goh, Todd Hartle, Megan Brodie

In-Service Teaching Assistant Training (InsTAT) for Engineering and Computer Science Graduate Students in Hong Kong: A Blended-Learning Approach ............................................................................................... 844
Kai-Pan Mark, Dimple R. Thadani, David Santander Calonge, Cecilia P. H. Pun, P. H. Patrio Chiu

Work in Progress - The Organization of a Symposium that Supports Faculty Development in the Embedded-Systems Field .................................................................................................................. 850
Ariel Lutenberg, Julian Bruno, Juan Manuel Cruz, Ignacio Zaradnik, Diego Brengi

Introducing CATs to STEM Faculty through Graduate Students ............................................................................. 853
Maria Gabriela Garcia, Rebecca Bates, Jeremy Pincozy, Gregg Asher

SESSION F2F: FACTORS IN STUDENT SUCCESS: CHOOSING ENGINEERING, IDENTITY, TRANSFER, CAREER DEVELOPMENT:

Success Factors for Students Transferring into Undergraduate Engineering Degree Programs ............................... 859
Michael F. Anderson, Lance C. Pérez, David Jones, Carmen Zaff

Work in Progress - Identity Development of First-Year Engineering Students through a Summer College Prep Program .................................................................................................................................................. 865
Rachel A. Louis, Holly M. Matusovich

Work in Progress - What Attracts Students to the Study of Engineering? Perceptions and Motivations .......................... 868
Josef Rojter

Work in Progress - Engineering’s Grand Challenges: An Analysis of Student Viewpoints ........................................... 871
James R. Rowland

Evaluation of a Ten Year Life Planning Assignment for an Academic Scholarship Success Class ................................. 873
Mary R. Anderson-Rowland

SESSION F2G: HANDS-ON, COOPERATIVE, AND REMOTE APPROACHES FOR ENGINEERING LABORATORIES:

Multi-core System Education through a Hands-on Project on FPGAs ........................................................................ 880
Xiaofang Wang

Work in Progress - Developing a Hands-On Course on Network Science ....................................................................... 886
Janne Riihijarvi, Petri Mahonen

Work In Progress - Cooperative and Competitive Projects for Engaging Students in Advanced ICT Subjects .................................................................................................................................................................................. 888
Montse Pardas, Antonio Bonafonte

Work in Progress - Interactive Signal-Processing Labs and Simulations on iOS Devices ............................................. 891
Jinru Liu, Andreas Spanias, Mahesh K. Banavar, Jayaraman J. Thiagarajan, Karthikeyan Natesan Ramamurthy
SESSION F2H: FACTORS IN CSET STUDENT SUCCESS: CHOOSING A MAJOR, IDENTITY, AND SOCIAL CAPITAL:

Developing a Survey Instrument to Characterize Social Capital Resources Impacting Undergraduates' Decisions to Enter and Persist in Engineering ................................................................. 893
Julie P. Martin, Kyle Gipson, Matthew K. Miller

Encouraging Participation in Computer Science with CONNECT ................................................................. 899
Brandon Vargo, Cyndi Rader, Tracy Camp

Examining the Impact of Mathematics Identity on the Choice of Engineering Careers for Male and Female Students ................................................................. 905
Cheryl A. P. Cass, Zahra Hazari, Jennifer Cribbs, Philip M. Sadler, Gerhard Sonnert

Comparing Attributes of Electrical Engineering, Mechanical Engineering and Non-Engineering Students ................................................................. 910
Michele Miller, Leonard Bohmann, Chris Van Arsdale, Benjamin Mitchell

Focusing High School Teachers on Attracting Diverse Students to Computer Science and Engineering ................................................................. 916
James Cohoon, Joanne M. Cohoon, Mary Lou Soffa

SESSION F2J: TEACHING ENGINEERING: CURRENT ISSUES AND CLASSROOM APPROACHES:

Tragedy in the Gulf: A Call for a New Engineering Ethic ................................................................. 921
George D. Catalano

New Pedagogic Challenges in Engineering Education and the Answer of IGIP ................................................................. 926
Michael E. Auer, Dana Dobrovolska, Arthur Edwards

Demonstrating the Impact of Multitasking in the Classroom ................................................................. 933
Steven Fulton, Dino Schweitzer, Lauren Scharff, Jeff Boleng

Increasing Instrumentality Without Decreasing Instructional Time: An Intervention for Engineering Students ................................................................. 939
Krista Puruhito, Jenifer Husman, Jonathan C. Hilpert, Tirupalavanam Ganesh, Glenda Stump

SESSION F3A: SPECIAL SESSION:

Special Session – Engineering Ethics: Toward a Definition ................................................................. 945
Craig Titus, Carla Zoltowski, William Oakes

SESSION F3B: SPECIAL SESSION:

Special Session – Connecting and Expanding the Emerging Engineering Education Research (EER) and Engineering Education Innovation (EEI) Communities ................................................................. 947
Karl A. Smith, Ruth A. Streveler

SESSION F3C: APPLYING ACCEPTED CSET EDUCATION PRACTICES IN DISTANCE EDUCATION CONTEXTS:

Enabling Remote Access to Computer Networking Laboratories for Distance Education ................................................................. 949
Carlos E. Caicedo Bastidas

Using Virtual Worlds in Distance Learning Environments ................................................................. 955
Itana Stiubiener, Waleska Barbosa, Carlos Alberto Kamienski

Work in Progress - Item Retrieval System in Distributed Repositories to Generate Adaptive Assessments Supported in Items Response Theory (IRT) ................................................................. 961
Yehiry Pulido, Gloria Fernández, Silvia Baldiris, Juan Guevara

A Video-Message Evaluation Tool Integrated in the UNED E-learning Platform ................................................................. 965
Rafael Pastor, Roberto Hernandez, Salvador Ros, Antonio Robles-Gomez, Agustin Caminero, Manuel Castro, Rocael Hernandez

Virtual Collaborative Space to Support Active Learning ................................................................. 971
Gerardo J Alanis-Funes, Luis Neri, Julieta Noguez
SESSION F3D: ADVANCES IN INTRODUCTORY ENGINEERING COURSES: TOPIC MODULES, RUBRICS, STUDENT CAREER PERCEPTIONS, DIVERSITY, SELF ASSESSMENT:

Work in Progress: Integration of Topic Modules and Organization of Session Flow for the First-Year Seminar Course in Engineering to Motivate and Sustain Student Learning ................................................................. 977
Ramakrishnan Sundaram

A First Course in Operating Systems With and Without Rubrics ................................................................. 979
Osvaldo Chua, Maria Feldgen

Work in Progress - Diversity Harnessing in a General Education Course on Digital Information Technology ................................................................................................................................. 984
Christopher D. Schmitz, Renata A. Revelo Alonso, Michael C. Lou

Using Low-Stakes Quizzing for Student Self-Evaluation of Readiness for Exams ................................................................. 986
Kirsten A. Davis

Students' Perceptions of the Engineering Profession and Implications for Interest in the Field ................................................................. 992
Emily Towers, Jennifer A. Simonovich, Yevgeniya V. Zastavker

SESSION F3E: TRENDS IN INSTRUCTIONAL TECHNOLOGIES: VISUALIZATION, LEARNING OBJECTS, OPEN SOURCE:

Visualizing Conductive and Convective Heat Transfer using Thermographic Techniques ................................................................................................................................. 999
Masoud Naghdelofteizi, Sanjeev Arora, James E. Glover

Work in Progress - Enhancing On-Line Interaction with Graphical Tools ................................................................. 1004
William Schleter, Richard Bennett

Work in Progress - Live Programming Learning Objects Repository ................................................................................................................................. 1006
Kai Qian, Lixin Tao, Wanjun Hu, Richard Kline

Work in Progress - Enhancing Interactive Geometry Systems with Intelligent Tutoring Features ................................................................. 1008
Danilo L. Dalmon, Seiji Isotani, Anaurina A. F. Brandao Leonidas O. Brandao

Building a Medical Learning Methodology Based on Open Source Technologies ................................................................. 1010
Antonio Vieira de Castro, Carlos Vaz de Carvalho, Eurico Carvapatoso

F3F: IMPROVING PROFESSIONAL SKILLS THROUGH UNDERGRADUATE RESEARCH EXPERIENCES:

Work in Progress - Undergraduate Research Course Design at KFUPM, A Basic Starting Experience ................................................................. 1017
Amar Khoukhi

Work in Progress - Intervening to Improve the Dissertation of Final Year Engineering Research Projects ................................................................. 1020
Steven Goh, Harry Ku

Work in Progress: The J-DSP/ESE Software for Analyzing Earth Systems Signals ................................................................. 1026
Linda Hinov, Karthikeyan Natesan Ramamurthy, Andreas Spanias

A Novel REU Program to Develop the Skills of the Engineer of 2020 ................................................................. 1028
Michael West, William Cross, Stuart Kellogg, Alfred Boysen

Work in Progress - A Health Information Technology Centralized Web Application ................................................................. 1034
Ronald J. Glotzbach, Laura A. Kocur, James L. Mohler, Carlos R. Morales

SESSION F3G: IMPROVING STUDENT LEARNING IN INTRODUCTORY PROGRAMMING COURSES:

Improving Programming Education in Tanzania: Teachers’ and Students’ Perceptions ................................................................. 1036
Mikko Apiola, Matti Tedre, Josephat O. Oroma

Comparing the Collaborative and Independent Viewing of Program Visualizations ................................................................. 1043
Teemu Rajala, Erkki Kaila, Johannes Holvitie, Riikka Haavisto, Mikko-Jussi Laakso, Tapio Salakoski

Identifying Cognitive Abilities to Improve CSE Outcome ................................................................. 1050
Ana Paula Ambrosio, Fabio Moreira Costa, Leandro Almeida, Amanda Franco, Joaquim Macedo

Work in Progress - Courses Dedicated to the Development of Logical and Algorithmic Thinking ................................................................. 1057
Orna Muller, Amir Rubinstein
Work in Progress - Web Penetration Testing: Effectiveness of Student Learning in Web Application Security ................................................................. 1060
   Hwee-Joo Kam, Joshua J. Pauli

SESSION F3H: THEMES IN IMPROVING ENGINEERING COURSES: COLLABORATION, FREQUENT ASSESSMENT, STUDIO ENVIRONMENTS, DEEP INSIGHT:

Results of the Cooperative Learning Program at Telemark University College, Norway ................................................................. 1063
   Trond Clausen, Svein Thor Hagen
Developing an Intermediate Embedded-Systems Course with an Emphasis on Collaboration ................................................................. 1068
   Andres Djordjalian, Ariel Lutenberg, Juan Manuel Cruz, Sebastian Garcia, Pedro Martos, Pablo Gomez
Understanding a Studio Environment: A Complex System Approach to a Community of Practice ................................................................. 1076
   Ashley Thompson, Brook Sattler, Jennifer Turner
Thayer Quiz Method: Replacing Homework with Frequent Quizzes in Engineering Classes ................................................................. 1082
   Kenneth Viall, Christopher Lowrance, Scott Bronkowski
Teaching Deflection of Stepped Shafts: Castigliano's Theorem, Dummy Loads, Heaviside Step Functions and Numerical Integration ................................................................. 1088
   E. M. Odom, C. J. Egelhoff

SESSION F3J: REACHING BEYOND TRADITIONAL BOUNDARIES AND CHARACTERIZATIONS OF CSET STUDENTS:

Work in Progress - Streamlining Pathways to Engineering Degrees for Military Veterans ................................................................. 1094
   David L. Soldan, Noel N. Schulz, Don M. Groenbacher, Blythe Marlow Vogt, Rekha Natarajan
Work in Progress - Teaching Engineering Concepts to Liberal Arts Students ................................................................. 1096
   Polly R. Piergiovanni
Teaching Computational Thinking to Non-computing Majors Using Spreadsheet Functions ................................................................. 1099
   Kuo-Chuan Yeh, Ying Xie, Fengfeng Ke
Work in Progress - Interpreting Elementary Students’ Advanced Conceptions of Engineering from the Draw-An-Engineer Test ................................................................. 1104
   Heidi A. Diefes-Dux, Brenda M. Capobianco
Work in Progress - A New Laboratory Project in a Required Electrical Engineering Course for Non-Majors: Design, Survey, and Analysis of Student Feedback ................................................................. 1106
   Hongwei Liao, Alexander Ganago

SESSION F4A: MINI WORKSHOP:

Mini Workshop - Exploration of the Ethical Development of Engineering Undergraduates ................................................................. 1108
   Donald D. Carpenter, Janel Sutkus, Cynthia Finelli, Trevor Harding

SESSION F4B: PANEL:

Panel - Tales from the Field – Cross-College Curriculum Development ................................................................. 1110
   Ruth A. Streveler, Tim Riordan

SESSION F4C: VIRTUAL LEARNING ENVIRONMENTS: ASSESSMENT, COLLABORATION, COMMUNITY:

Work in Progress - The Impact of Time on Building Community in an ALN ................................................................. 1112
   Timothy J. Ellis
Automatic Assessment for the e-Learning of the Network Services in the context of the EHEA ................................................................. 1114
   Antonio Robles-Gomez, Llanos Tobarra, Salvador Ros, Roberto Hernandez
Student Empowerment in Higher Education Through Participatory Evaluation ................................................................. 1120
   Dina Soeiro, Antonio Dias de Figueiredo, Joaquim Armando Gomes Ferreira
Applying a Assessment Tool in Distance Learning Education ................................................................. 1126
   Elio Sancristobal, Nuria Oliva, Juan J. Aguado, Juan Vicente Miguez, Sergio Martin, Gabriel Diaz, Jose Carpio
Improving Cooperation in Virtual Learning Environments Using Multi-Agent Systems and AIML... 1134
Marcio Alencar, José Magalhães Netto

SESSION F4D: PRE-COLLEGE OUTREACH THROUGH PROJECTS, AND MULTI-INSTITUTION COLLABORATIONS:

Multi-university Precollege Outreach from a Renewable Energy Focused Engineering Research Center
Keith E. Holbert, Kristen Molyneaux, Lisa L. Grable, Patricia Dixon

Implementing Nanotechnology Education in the High School Classroom
Ben Pelleg, Manuel Figueroa, Matthew VanKouwenberg, Adam Fontecchio, Eli Fromm

Work in Progress - Using a “Cigar Box” Guitar to Teach Waves and Sound in a High School Physics Program
Kelly Crittenden, Heath Tims, Krystal Corbett, David Hall, Michael Swanbom

Set up and Delivery of Electrical and Computer Engineering Projects at Undergraduate Engineering Universities for Outreach and Partnership with K-12 STEM Schools
Ramakrishnan Sundaram

Work in Progress - Student Task Interpretation, Design Planning, and Cognitive Strategies in Engineering Design Project: An exploratory study for Grades 9-12
Oenardi Lawanto

SESSION F4E: ISSUES USING INSTRUCTIONAL TECHNOLOGIES TO FACILITATE LEARNING: USABILITY, FEEDBACK, CONTEXT, PERSONALIZATION, DEVELOPMENT TIME:

Work in Progress - Open Source Usability Evaluation: The Case of Moodle
Hoda Baytiyeh

Work in Progress - Evaluation and Feedback for Web Programming Curriculum
Ronald J. Glotzbach, Laura A. Kocur

Model-Driven Development of Learning Objects
Marco Aurelio Graciotto Silva, Ellen Francine Barbosa, Jose Carlos Maldonado

Context-Aware Recommendation Algorithms for the PERCEPOLIS Personalized Education Platform
Amir Bahmani, Sahra Sedigh, Ali R. Hurson

Work in Progress - Virtual Facilitation and Procedural Knowledge Education
Ray Luechtefeld, Steve E. Watkins

SESSION F4F: FACILITATING DEVELOPMENT OF ENGINEERING DESIGN KNOWLEDGE AND SKILLS:

Comparing Design Cognition of Undergraduate Engineering Students and High School Pre-Engineering Students
Matthew D. Lammi, John S. Gero

Work in Progress - An Agile Embedded Systems Design Capstone Course
Antonio F. Mondragon-Torres, Alexander Kositsky, Clifford Bundick, Edward McKenna

Work in Progress - Computer Science Perspectives on Integration with Human-Centered Design
Michael Herold, Aaron Ganci, Bruno Ribeiro, Rajiv Rammuth, R. Brian Stone

Realistic Trade-off Conditions
Ariel Lutenberg, Mariano Garcia Inza, Sebastian Carbonetto, Jose Lipovetzky, Gabriel Gabian

SESSION F4G: LEARNING PROGRAMMING LANGUAGE CONCEPTS AND METHODOLOGIES: CONSISTENT CHALLENGES, NEW APPROACHES:

Facing Computer Science Misconceptions: An Introductory Course Based on Historical Strands and Career Paths at a Glance
Siegfried Rouvrais, Ioannis Kanellos
New Tools and Methodologies for Programming Languages Learning using the Scribbler Robot and Alice .......................................................... 1204
Sebastian Londono Salcedo, Ana Maria Orozco Idrobo

Experiences with CS2 and Data Structures in the 100 Problems Format ......................................................... 1210
Nicholas Kraft, Xiaoyan Hong, John C. Lusth, Debra McCallum

A Class Record and Reviewing System Designed to Promote Programming Learning ........................................... 1217
Alvaro Santos, Anabela Gomes, Antonio Mendes

Work in Progress - Using Graphical Programming to Contextualize a Conventional Programming Course .................................................................................................................. 1223
Ali Jamal-Kamali, Eric Freudenthal

SESSION F4H: BROADENING PARTICIPATION IN STEM: PERCEPTIONS, RECRUITMENT, RETENTION, SUCCESS:

Representation of Women and Perceptions of Support in Engineering .......................................................... 1225
Elizabeth G. Creamer

STAIRSTEP: an Interdisciplinary Program for Retention and Outreach in STEM .................................................. 1231
Peggy Doerschuk, Cristian Bahrim, Jennifer Daniel, Joseph Kruger, Judith Mann, Christopher Martin

Robots, Recruitment, and Retention: Broadening Participation Through CS0 .................................................. 1237
Laura M. Grabowski, Pearl Brazier

A Gender Analysis of Student Learning in Physics ............................................................................................... 1242
Teresa L. Larkin

Problematisations of Women’s Underrepresentation: Comparing Educator Interviews with the Literature ............................................................................................................................... 1249
Kacey Beddoes

SESSION F4J: SUSTAINABILITY:

Activities to Infuse Sustainability and Renewable Energy Concepts in Electrical and Computer Engineering ............................................................................................................................. 1255
Anil Pahwa, William B. Kuhn, Ruth Douglas Miller, Andrew Rys, Chris Eldridge, Scott Geier, Jeff Schuler, Matt Morley, Ian Sobering, Jonathan Stacks

Work in Progress - Sustainability and Senior Design at the University of San Diego ............................................... 1261
Susan M. Lord, Charles N. Pateros

Work in Progress - Weaving Threads of Sustainability into the Fabric of the Mechanical Engineering Curriculum .......................................................................................................................... 1264
Michele Miller, John Gerchenson, Chuck Margoaves, Ibrahim Miskioglu, Gordon Parker

Introducing Sustainability Concepts in Lower Division Engineering Core Courses .................................................. 1266
Juneseok Lee, Nicole Okamoto, Richard Chung, Thalia Anagnos

SATURDAY SESSIONS:
SESSION S1A: MINI WORKSHOP:

Mini Workshop – Real World Engineering Projects: Discovery-Based Curriculum Modules for First-Year Students .......................................................................................................................... 1272
Stephen Williams, Masoud Agah, Luiz DaSilva, Kamyar Dezhgosha, Allen MacKenzie

SESSION S1B: SATISFYING ACCREDITATION EXPECTATIONS:

Evolution of the University of Denver Engineering Programs due to ABET Accreditation Criteria ........................................ 1276
Ronald R. DeLyser

Effective Evaluation Strategies to Meet Global Accreditation Requirements ...................................................... 1282
Lyn Brodie, Frank Bullen, Lesley Jolly

Unifying Program-Level ABET Assessment Data Collection, Analysis, and Presentation ...................................... 1288
Ken Christensen, Rafael Perez, Purushottam Panta, Pummy Bedaravally

Enabling Scalability, Richer Experiences and ABET-Accreditable Learning Outcomes in Computer Science Capstone Courses Through Inversion of Control ......................................................................................... 1294
Thomas Bihari, Igor Malkiman, Moez Chaabouni, Joe Bolinger, Jay Ramanathan, Rajiv Rannath, Michael Herold
The Articulation of Military Training onto Engineering Degree Plans ...................................................... 1301
Dave Lighthart, David T. Hayhurst, Patricia Reily

SESSION S1C: SUCCESSFUL CAREERS AFTER GRADUATION: WHAT IS NEEDED? HOW ARE PROGRAMS EVOLVING TO DEVELOP EXPECTED COMPETENCIES?

Practitioner Engineers Perceptions for a Successful Early Employment Career............................................... 1306
Hoda Baytiyeh, Mohamad K. Naja
A Comprehensive Project Utilizing Spatial Visualization Skills ........................................................................... 1311
Amber Kemppainen, Brett Hamlin
Acquiring Professional Skills: Virtual Facilitator as Model for Team Communication ........................................ 1316
Tracey Wiggins, Daniel Swift, Uyen Mai, Ray Luechtefeld
Development of Professional Competencies in Engineering Education ............................................................... 1321
Asa Cajander, Mats Daniels, Brian R. von Konsky

SESSION S1D: WHAT ENGINEERING INTERESTS AND ENGINEERING SKILLS CAN BE NURTURED THROUGH OUTREACH PROGRAMS?

Work in Progress - United States Coast Guard Academy Robotics on Water Competition as Recruiting Tool – Program Enhancement for STEM & Diversity Outreach ......................................................... 1326
Brian Maggi, Hudson Jackson, Kassim Tarhini, Jonathan Russel
Work in Progress - Introducing Solar Energy Engineering in an Australian Middle Elementary School ................................................................. 1328
Bernardo A. Leon de la Barra, Karen L. Wilson
Work in Progress - The Rod-Spring Approximation: An Intuitive Approach to the Best-Fit Least-Squares Linear Approximation .................................................................................................................. 1330
Steven Gutstein, Eric Freudenthal, Ali Jamal-Kamali, Vladik Kreinovich, David Morgenthaler
Work in Progress - Computing for Middle-School Students: The Experience of Teaching Computers for 7th Grade Students ................................................................. 1332
Simona Doboli
Affordable K-12 Robotics Programs ............................................................................................................................. 1334
Eric Levy, Mangnan Tan, Richard Gale, Tanja Karp, Alan Barhorst

SESSION S1E: MOBILE AND AUTHORING INSTRUCTIONAL TECHNOLOGIES:

SHERPA: a Mobile Application for Students and Educators in the Classroom .................................................. 1339
Dino Schweitzer, Scott Teel
Work In Progress - An Immersion Course Concentration in Mobile Web Computing ........................................ 1344
Carol J. Romanowski, Rajendra K. Raj, Minseok Kwon
Timeline-Based authoring tool for E-Textbook: Bringing the “Mind-mapped Learning Model” ............................. 1346
HzeeJong, Jasmine Lee, TeongJoo Ong, Christopher Hugh Messom
Work in Progress - The iCollaborate MSE Project ................................................................................................. 1351
Kathleen L. Kitto, Debra Jasak
Work in Progress - A Blended Mobile Learning Context Oriented Model applied to an Information Systems Undergraduate Degree Curriculum ................................................................. 1354
Fernando Moreira, Maria Joao Ferreira

SESSION S1F: STORIES ABOUT ENGINEERING STUDENTS: INTEREST, SUCCESS, CAREER TRANSITIONS:

Work in Progress - Engineering Pathways Study: The College-Career Transition ........................................... 1356
Sheri Sheppard, Holly M. Matusovich, Cindy Atman, Ruth A. Streveler, Ronald L. Miller
Work in Progress - The Age of Apathy: Reigniting Engineering Educating ............................................................ 1359
Elif Eda Miskioglu
Work in Progress - Asleep in Class Are the Schedules of College Students Hampering Their Ability to Learn? ................................................................................................................................. 1362
Maurice Baynard, Donald McEachron
It’s Not What You Think: A Theory for Understanding the Lack of Interest among Domestic Students in the Engineering PhD
Michelle C. Howell Smith, Amanda L. Garrett, Ellen Weissinger, Namas Chandra
Work in Progress - Preparation Creating Effective Faculty of Engineering: A Technological Literacy Approach
Mani Mina, Diane Rover, Mack Shelley

SESSION S1G: TECHNOLOGIES AND QUALITY ASSURANCES: APPROACHES TO IMPROVING ENGINEERING EDUCATIONS ACROSS THE WORLD:

Use of LMS Functionalities in Engineering Education
Martin Llamas, Manuel Caiero, Manuel Castro, Inmaculada Plaza, Edmundo Tovar
Work in Progress – Exploiting Videoconferencing Possibilities to Promote the European Convergence Process
Enrique Barra, Sandra Aguirre, Juan Quemada
Leading Change in the Internal Quality Assurance System Implantation of a European Technical University
Edmundo Tovar, Gonzalo Carrillo, Jose Domingo Carrillo
Gift Young Engineers: An Extra-Curricular Initiative for Updating Computer and Electrical Engineering Courses
Vicente Ferreira de Lucena Junior, Jose Pinheiro de Queiroz Neto, Joao Edgar Chaves Filho
Teaching Mobile Solution Development in a Global Context: Comparing Solutions Proposed by Students in the Developed and Developing World
Christelle Scharff, Jean-Marie Preira, Roslyn Kay, Serene Hang Su

SESSION S1H: PROMOTING FEMALE AND MINORITY ENGINEERING STUDENTS:

Conflicted Identities and Sexism in Computing Graduate Programs
J. McGrath Cohoon, Monica Nable, Paul Boucher
Engineering Self-Efficacy of Women Engineering Students at Urban vs. Rural Universities
K. L. Jordan, Sheryl Sorby, Susan Amato-Henderson, Tammy Haut Donahue
Work in Progress - Assessing and Evaluating Mentorship programs affecting students retention at the University of Maryland Baltimore County in Mechanical Engineering
Jamie Gurganus, Anne Spence
Work In Progress - Modeling Academic Success of Female and Minority Engineering Students Using the Student Attitudinal Success Instrument and Pre-college Factors
Joe J. Lin, P.K. Imbrie, Kenneth J. Reid, Junqiu Wang
Work In Progress - Reporting S-STEM Retention: New Diversity vs. Supporting Existing Diversity
Mary Virnoche, Elizabeth A. Eschenbach

SESSION S2A: MINI WORKSHOP:

Mini Workshop - Aligning Content, Assessment, and Pedagogy in the Design of Engineering Courses
Ruth A. Streveler, Karl A. Smith, Mary K. Pilotte

SESSION S2B: CREATIVITY IN THE CLASSROOM:

Work in Progress - Structural Art: Encouraging Student Creativity and Artistic Expression
Andrew T. Rose
A Social-based Meta-multidisciplinary Framework to Motivate the Creation of a New Generation of Electronics 2.0 Systems
Cesar Cardenas
Developing the Next Generation of Entrepreneurs
Edward H. Currie, Simona Doboli, Gerda L. Kamberova
Assessing Creativity Practices in Design
Guy-Alain Amoussou, Michael Porter, Steven J. Steinberg
Nathalie Duval-Couetil, Brandon Barrett

SESSION S2C: PROFESSIONAL SKILLS BEYOND TEAMWORK AND COMMUNICATION:

Engineering Positive Organizational Behavior and Managing the Psychological Capital for Learning Effectiveness................................................................. 1439
Hamid Khan

Work in Progress - Assessing Information Literacy in Civil Engineering ........................................................................ 1445
Hudson Jackson, Nathan Runsey, Patricia Daragan, Sharon Zelmanowitz

Introducing “Sustainability and Social Commitment” Skills in an Engineering Degree ................................................................. 1447
David Lopez, Fermín Sanchez, Jordi Garcia, Marc Alier, Jordi Piguillem, Martha Velasco

Work in Progress - A Grand Challenge Leadership Course for Engineering Students ......................................................... 1453
J. Elaine Seat, C. D. Pionke, J. R. Parsons

Synergies and Opportunities Between Engineering and Law .................................................................................................... 1455
Ladimer S. Nagurney

SESSION S2D: ASSESSING AND DEVELOPMENT ENGINEERING ATTITUDES AND SKILLS IN K-12:

An Exploratory Evaluation of an Elementary Mathematics and Science Attitude Survey ...................................................... 1460
Tonya Lauriski-Karriker, Anna Forssen, Barbara M. Moskal

Work in Progress - Soil Watering Systems as Teaching Materials for Technology Education in Junior High Schools .......... 1465
Yasumasa Oomori, Kan Nagai, Naoya Kawasaki, Hideo Nagumo

Work in Progress - Application of the Boe-Bot in Teaching K12 Electricity Fundamentals ..................................................... 1468
Heath Tims, Krystal Corbett, David Hall, Galen Turner, Davis Harbour

Middle School Girls' Perceptions of Engineers Before and After a Female Only Summer Enrichment Program ............................................................. 1471
Linda S. Hirsch, Suzanne Berliner-Heyman, Rosa Cano, Howard Kimmel, John Carpinelli

SESSION S2E: VISUALIZING FUTURE INSTRUCTIONAL TECHNOLOGIES:

Web Editing Module for Tagging Metadata of the Fedora Commons Repository Learning Objects under DRD and LOM Standards ........................................................................ 1477
Silvia Baldiris, Cecilia Avila, Paola Andrea Rivera, Juan Carlos Guevara, Ramon Fabregat

Preparing for Future Data Center Professionals: Integrating Storage Technology into the Computer Information Technology Curriculum........................................................................ 1482
Wei Hao, Hetal Jusani, Traian Marius Truta

Evaluation of a Natural Sketch Interface for Truss FBDs and Analysis ........................................................................ 1488
Olufunmilola Atilola, Martin Field, Erin McTigue, Tracy Hammond, Julie Linsey

Work in Progress - Collaborative and Reflective Learning in Engineering Programs .............................................................. 1494
Neelam Soundarajan

An Experimental Nexos Laboratory Using Virtual Xinu ........................................................................................................... 1496
Paul Ruth, Dennis Brylow

SESSION S2F: NOVEL CONTEXTS FOR DEVELOPING ENGINEERING DESIGN COMPETENCIES:

Integrating Developmental Instruction in Sustainability Contexts into an Undergraduate Engineering Design Curriculum: Level Two .................................................................................. 1502
Eric Pappas, Olga Pierrakos

Reference Designs for Embedded Controls ......................................................................................................................... 1508
Chiu H. Choi

Utilizing University Research and Upper-Division Course Material for an Enhanced First-Year Design Experience ......................... 1514
Amber Kemppainen, Gretchen Hein, Amy Hamlin
Distributed Systems Design supported by Reflective Writing and CATs ................................................................. 1520

Maria Feldgen, Osvaldo Clua

Work in Progress - Direct Assessment of Course Outcomes in a Computer Modeling and Simulation Class ................................................................. 1526

Keith Garfield

SESSION S2G: INTRODUCTORY COMPUTER SCIENCE COURSES:

Teaching Computer Systems through Common Principles ......................................................................................... 1528

Mark A. Holliday

Work in Progress - Integrating Mathematical Modeling with Computer Visualization to Improve Students’ Problem Solving in an Introductory Engineering Course ................................................................................ 1534

Ning Fang

New Approach to Teaching an Introductory Computer Science Course ........................................................................ 1536

Asad Azemi, Nannette D'Imperio

Work in Progress – The Impact of Integrating First-Year Students into the Broader Curriculum ............................ 1542

Robert Elliott, Nancy Evans

Using the Matlab-based iRobot Create Simulator to Engage Introductory Computer Programming Students in Program Development and Observing Computational Errors ......................................................... 1544

K.-Y. Daisy Fan, Kathryn Conway Dimiduk

SESSION S2H: HOW CAN EXPECTED SCIENTIFIC FOUNDATIONS FOR STUDENT LEARNING BE NURTURED?

Student Difficulties with Basic Concepts in Introductory Materials Science Engineering ................................................................. 1550

Andrew F. Heckler, Rebecca Rosenblatt

Group-Work Tutorials for an Introductory Materials Engineering Course ........................................................................ 1556

Rebecca Rosenblatt, Andrew F. Heckler, Katharine Flores

Predictive Assessment of Student Performance for Early Strategic Guidance .......................................................... 1562

Patrick D. Schalk, David P. Wick, Peter R. Turner, Michael W. Ransdell

Renewable Energy Education at the Colorado School of Mines: A Survey of Development .............................................. 1567

Chuck Stone

Probing a Deeper Understanding of Modern Physics Concepts ......................................................................................... 1574

Jessica Uscinski, Teresa L. Larkin

SESSION S3A: MINI WORKSHOP:

Mini Workshop – Exploration of a Direct Method for Measuring ABET Professional Skills ........................................ 1580

Steve Beyerlein, Ashley Ater Kranov, Jay McCormack, Pat Pedrow, Edwin Schmeckpeper, Mo Zhang

SESSION S3B: PROBLEM AND PROJECT BASED LEARNING:

On Implementation of Problem-Based Learning in Engineering Education: Thoughts, Strategies and Working Models ................................................................................................................................. 1582

Waddah Akili

Problem-Based Learning and Adaptive Expertise ........................................................................................................ 1588

Jeffrey E. Froyd

Work in Progress - Project-Based Service Learning in Engineering: Investigating Partner Relationships ..................... 1593

Julia D. Thompson, Brent K. Jesiek

Capstone Experiences: Effects of Adapted Physical Activity Design Projects on Attitudes and Learning .................. 1595

David W. Hey, Bridie Jean McCarey, Lynne A. Slivovsky, J. Kevin Taylor, Brian Self, James Widmann

Work in Progress - A Problem-Based Learning Approach for Systems Understanding in the MSU AES Program ................................................................................................................................. 1602

Jon Sticklen, Ronald Rosenberg
SESSION S3C: ELEARNING: APPROACHES AND TOOLS:

Cloud-based e-Learning Infrastructures with Load Forecasting Mechanism Based on Exponential Smoothing: a Use Case .............................................................. 1604
Agustin C. Caminero, Salvador Ros, Roberto Hernandez

Work in Progress - P12E, Towards a Google Home Page for e-learning .......................................................... 1610
Manuel Caetano-Rodrigues, Martin Llamas-Nistal, Juan Gonzalez-Tato, Javier Alvarez-Osuna

Work in Progress - Enhancement of Distance Learning through Hybrid e-Learning Approach ......................... 1612
Asad Azemi, Gary Chinn, Thomas Litzinger

Work in Progress - Integrating Computational and Engineering Thinking Through Online Design Simulating and Simulation of Multidisciplinary Systems ................................................................. 1615
Alejandra J. Magana, Prabhakar Marepalli, Jason V. Clark

Facilitating the Design of Physics Active Learning ............................................................................................... 1617
Luis Neri, Juileta Noguez, Ivan Perez, Gerardo Aguilar

SESSION S3D: DEVELOPING INTEREST AND SKILLS IN ENGINEERING: TEAMS, ARTIFACTS, PROJECTS, AND DECISION MAKING:

The Effect of Emotive Language in Virtual Teams ............................................................................................... 1623
Nicholas Richter, Linda Williams, Obed Magney, Ray Luechtefeld

Multidiscipline Interactions in STEM: Analysis by Artifact ................................................................................ 1629
Paul Schreuders, Matthew Verleger, Kimberly Otteson

Algae as a Biofuel: An Interdisciplinary High School Curriculum Incorporating Engineering, Biology and Education .......................................................................................... 1634
Kenneth J. Reid, Debra Gallagher, Robert Verb

Mathematics Instruction Using Decision Science and Engineering Tools ............................................................. 1639
Karen Keene, Richelle Dietz, Krista Holstein, Amy Craig

University Outreach in STEM Education through a Roller Coaster Science and Engineering Camp .......... 1645
David P. Wick, Michael W. Ramsdell, Kathleen Fowler, Peter Turner, Patrick D. Schalk

SESSION S3E: CHALLENGES IN DESIGNING CSET INSTRUCTIONAL TECHNOLOGY IMPLEMENTATIONS:

Measuring CS1 Perceptions of Parallelism ........................................................................................................ 1651
Brian Rague

Work in Progress - Music Synthesizers: A Tool in Engineering Education ......................................................... 1657
Steven Billis, Nada Anid, Steven Giordano

Work in Progress - An Interactive, Execution-safe System for Teaching e-Commerce using Real-time Feedback ........................................................................................................ 1659
William Burns, Alfred C. Weaver

Work in Progress - A Framework for Building Interactive Learning Modules .................................................. 1662
Danilo L. Dalmon, Anarosa A. F. Brandao, Seiji Isotani, Leonidas O. Brandao

Work in Progress - An Example of the Variations of Visual Representations in Mechanical Engineering Education ........................................................................................................ 1664
Koenraad Gieskes, Charles DeRusso, Roy McGrann

SESSION S3F: INSIGHTS THROUGH TEACHING ENGINEERING DESIGN: MENTORING, SYSTEM DESIGN, PHYSICAL MODELS, TEAMS, SUSTAINABILITY:

An Interactive Approach to Renewable Energy Research and Education ........................................................ 1667
Jonathan Bush, Matthew Kane, Kai Segrud, Damon Fick, Ziliang Zong

Assessing the Impact of Faculty Advising and Mentoring in a Project-Based Learning Environment on Student Learning Outcomes, Persistence in Engineering and Post-Graduation Plans ...................................................... 1672
Mary Raber, Susan Amato-Henderson, Valerie Troesch

Understanding Physical Models in Design Cognition: A Triangulation of Qualitative and Laboratory Studies ............................................................................................................... 1678
Vimal Viswanathan, Julie Linsey
Work in Progress – Implementing and Evaluating Efforts to Engage Interdisciplinary Teams to Solve Real-World Design Challenges

Z. Maria Oden, Marcia K. O’Malley, Gary L. Woods, Tracy M. Volz

SESSION S3G: ISSUES IN COMPUTER SCIENCE EDUCATION: MULTICORE PROGRAMMING, OBJECT-ORIENTED DESIGN, TEAMS, DESIGN SCIENCE, COMPETENCIES:

Work in Progress - Course Development of Programming for General-Purpose Multicore Processors

Wei Zhang

Teaching Object-Oriented Software Design within the Context of Software Frameworks

Zoya Ali, Joseph Bolinger, Michael Herold, Thomas Lynch, Jay Ramanathan, Rajiv Ramanath

Work in Progress - Vertically Integrated Teams to Inspire Student Interest in Computing

Gregory W. Hislop, Massood Towhidnejad, William M. Marcy

Teaching and Assessing an Interdisciplinary Science of Design Pilot course

Guy-Alain Amoussou, Steven J. Steinberg

Work in Progress - Transversal Competencies Contributions to Computer Science 1 Course

Ines Friss de Kereki

SESSION S3H: GENER AND DIVERSITY: TIOSPAYE, SOCIAL MEDIA, MICROAGRESSION, ACADEMIC CAREER TRAJECTORIES, INNOVATION:

Tiospaye in Engineering and Science: Inculcating a Sustained Culture for Recruiting, Retaining, and Graduating American Indian Students

Jacqueline McNeil, Carter Kerk, Stuart Kellogg

Work in Progress - Using Social Media to Teach Engineering Process

Bruce R. Maxim, Margaret Turton, Wassin M. Nahle

"Microaggressions" in Engineering Education: Climate for Asian, Latina and White Women

Michelle Madsen Camacho, Susan M. Lord

Performance Trajectory of Students in the Engineering Disciplines

Marisa K. Orr, Ida Ngambeki, Russell A. Long, Matthew W. Ohland

Does Diversity in Novice Teams Lead to Greater Innovation?

Nicholas D. Fila, Ruth E. H. Wertz, Senay Purzer

SESSION S4A: PANEL:

Engineering Education in Iberian America

Melany M. Ciampi, Claudio da Rocha Brito, Maria Feldgen, Edmundo Tovar

SESSION S4B: ENABLING AND ASSESSING CSET LEARNING: PORTFOLIOS, BELIEFS, RESIDENCY, CONTEXTS, AND RELATIONSHIPS:

Work in Progress - The Role of Working Memory and Epistemic Beliefs on Open-Ended Problem Solving

Elliot P. Douglas, Mirka Koro-Ljungberg, David J. Therriault, Christine Lee, Zaria Malcolm, Nathan McNeill

Work in Progress - Software Residency: a Contribution for Professional Maturity

Luiz Ricardo Begosso, Luiz Carlos Begosso, Alex Sandro Romeo de Souza Poletto

Providing End-to-End Perspectives in Software Engineering

Michael Herold, Joe Bolinger, Rajiv Ramanath, Thomas Bihari, Jay Ramanathan

Work In Progress - Computer Science E-portfolios: Perspectives from Upper and Lower Division Students

Karen Anewalt, Jennifer Polack-Wahl

Identifying and Assessing Relational Understanding in Ordinary Differential Equations

Karen Allen Keone, Michael Glass, Jung Hee Kim
SESSION S4C: CHALLENGES IN LEARNING ENGINEERING: PROBLEM SOLVING, COLLABORATION, TEAMS, AND COMMUNICATION:

A Qualitative Analysis for the Facilitation of Innovative Problem Completion Amongst Dyads of Engineering Students............................................................................................................................................................................................... 1756
Paul Figueroa, Richard Savage, Ricardo Romero, Ray Luechtefeld
Mixing Numbers and Letters: Collaboration Between Engineering and English to Improve Graduate Student Work ............................................................................................................................................................................................................................................................... 1762
Craig Baltimore, Deborah Wilhelm, Mary Forte, Pamalee Brady
Inversion of Technical and Communication Emphasis in an Engineering Product Design Class ............................................................................................................................................................................................................................................................... 1768
Dave Custer
Work In Progress - A Feedback System for Peer Evaluation of Engineering Student Teams to Enhance Team Effectiveness............................................................................................................................................................................................................................................................................................................................... 1774
Junqiu Wang, P. K. Imbrie, Joe J. Lin
Work in Progress - Robust Engineering Problems for the Study of Problem Solving Strategies ............................................................................................................................................................................................................................................................................................................................... 1779
Sarah J. Grigg, Lisa C. Benson

SESSION S4D: APPROACHES TO DEVELOPING ENGINEERING LEARNERS: METACOGNITION, COMMUNITY COLLEGES, GRADING, CO-CURRICULA, FEEDBACK:

Work in Progress - Using the Levenshtein Distance to Examine Changes to Teams’ Model-Eliciting Activity Solutions throughout a Semester............................................................................................................................................................................................................................................................................................................................... 1782
Jacob Bishop, Matthew Verleger
Work in Progress - Prediction of Students’ Academic Performance in an Introductory Engineering Course............................................................................................................................................................................................................................................................................................................................................................................................... 1785
Shaobo Huang, Ning Fang
Work in Progress – Developing Engineers for 2020 – An Innovative Curricular and Co-Curricular Approach............................................................................................................................................................................................................................................................................................................................................................................................... 1788
Monica J. Bruning, Diane T. Rover, Ana M. Williams
The Itasca CC Engineering Learning Model............................................................................................................................................................................................................................................................................................................................................................................................... 1791
Bart Johnson, Ron Ulseth
Work in Progress - Using Multiple Methods to Investigate the Role of Feedback in............................................................................................................................................................................................................................................................................................................................................................................................... 1797
Monica E. Cardella, Heidi A. Diefes-Dux, Matthew Verleger, Amanda Fry, Mark T. Carnes

SESSION S4E: INSTITUTIONALIZING INNOVATIONS IN CSET EDUCATION:

Work in Progress - Improving the Dissemination of CCLI (TUES) Educational Innovations ............................................................................................................................................................................................................................................................................................................................................................................................... 1800
Joseph G. Tront, Flora P. McMartin, Brandon Muramatsu
Curricula Design Model for Designing and Evaluating Systems and Computing Engineering Programs............................................................................................................................................................................................................................................................................................................................................................................................... 1806
Jorge Villalobos, Oscar Gonzalez, Claudia Jimenez, Francisco Rueda
Systematic Analysis of Peer Interaction in Cooperative Learning ............................................................................................................................................................................................................................................................................................................................................................................................... 1813
Chien-Hung Lai, Bin-Shyan Jong, Yen-Teh Hsia, Pai-Feng Lee, Te-Yi Chan

SESSION S4F: FACILITATING STUDENTS IN LEARNING CSET DESIGN:

Learning from an Initiative – Hands-on Robotics Workshops by IEEE Student Branch ............................................................................................................................................................................................................................................................................................................................................................................................... 1820
Tuhin S. Mukherjee, P. Purkait
Work in Progress – Analyzing Engineering Student Conceptions of Modeling in Design ............................................................................................................................................................................................................................................................................................................................................................................................... 1825
Adam R. Carberry, Ann F. McKenna
Cognitive Dissonance During Engineering Design............................................................................................................................................................................................................................................................................................................................................................................................... 1827
Senay Purzer, Jonathan C. Hilpert, Ruth E. H. Wertz
A Comparative Study of Academic Partnerships from a Student Perspective ............................................................................................................................................................................................................................................................................................................................................................................................... 1832
Amalia Rusu, Spoorthy Gowda
Work in Progress - Creating a Professional Software Development Environment to Support Capstone Programming Projects ............................................................................................................................................................................................................................................................................................................................................................................................... 1838
Meg Coffin Murray
SESSION S4G: OUTPOSTS IN ENGINEERING LABORATORIES: REMOTE EXPERIMENTS, PERSONAL LABORATORIES, SYSTEM PERFORMANCE, SIMULATIONS:

Using Remote Experimentation in a Large Undergraduate Course: Initial Findings .......................................................... 1841

Work In Progress – A Hardware Platform for a Continuous-Time Signals and Systems Course ........................................... 1848
  Mario Simoni

An Advanced Level Radio-Frequency Circuit Course with Laboratory and Design Exercises that Emphasize Complete System Performance ................................................................................................................... 1850
  Taylor Barton, Mariano Alvira

Work in Progress - A Transparency and Scaffolding Framework for Computational Simulation Tools ............................. 1856
  Alejandra J. Magana, Dragica Vasteska, Shaikh Ahmed

SESSION S4H: CAN STUDENTS LEARNING CSET SUBJECTS THROUGH GAMES

Early Project Based Learning Improvements via a "Star Trek Engineering Room" game framework, and competition ........................................................................................................................................................................... 1858
  Peter Jamieson

Work in Progress - Using Mobile & Social Game Technology with Location-based Services for Building Learning Communities .......................................................... 1863
  Anthony D. Ellerton, Patrick Seeling

Nash Meets Van Valkenburg: A Game-Theoretic Approach to Effective Learning and Teaching in Engineering ........................................................................................................................................................................... 1866
  Quanyan Zhu

Work in Progress - Using a Computer Gaming Strategy to facilitate Undergraduates' Learning in a Computer Programming Course: An Experimental Study .......................................................... 1869
  Kuo-Chuan Yeh, Wei-Fan Chen

Assessment of the Pilot Implementation of a Game-based Gear Design Laboratory ........................................................... 1871
  Yizhe Chang, El-Sayed Aziz, Sven K. Esche, Constantin Chassapis

ADDITIONAL PAPERS:

A Select and Annotated Bibliography of Philosophy in Engineering Education .......................................................... 1877
  John Heywood, Adam Carberry, William Grimson

A Historical Overview of Recent Developments in the Search for a Philosophy of Engineering Education .......................................................... 1903
  John Heywood

VISIR Deployment in Undergraduate Engineering Practices ........................................................................................................... 1917
  Mohamed Tawfik, Elio Sancristobal, Sergio Martin, Charo Gil, Alberto Pesquera, Pablo Losada

Quantifying Qualitative Data in Mixed Methods Research in Engineering Education .......................................................... 1924
  E. G. Creamer

Using IDEALS to Demonstrate Development of Professional Skills in Project Courses .......................................................... 1926
  Steve Beyerlein, Denny Davis, Mike Trevisan

Evaluation of Education Development Projects ........................................................................................................... 1928
  Louis Everett, Susan Finger, Don Millard, Russell Pimmel, Janis Terpenny

Developing Cross-Disciplinary Collaborations for Engineering Education Research .......................................................... 1930
  Robin S. Adams, Wendy C. Newstetter

Assessing and Developing Critical Thinking Skills ........................................................................................................... 1931
  Susan Wolcott, Jennifer Karlin

Developing Active Learning Classroom Exercises for use with Tablet PCs ........................................................................................................... 1933
  Joseph G. Tront

Introducing and Teaching Smartphone Application Development ........................................................................................................... 1935
  Qusay H. Mahmoud

Service-Learning in Engineering, Technology and Computing ........................................................................................................... 1936
  William Oakes, Carla Zoltowski

Application and User Perceptions of Using the WebLab-Deusto-PLD in Technical Education .......................................................... 1938
  Javier Garcia-Zubia, Pablo Orduna, Ignacio Angulo, Unai Hernandez, Olga Dziabenko, Diego Lopez-Ipina

A Survey of Issues and Approaches to Remote Laboratory Adoption by Teacher-Academics .......................................................... 1944
  Steven W. Tuttle, David B. Lowe, Bruce Moulton
