### Session 1: Communication and Networks

- Evaluating Contact-Ignorant and History-Based Routing Protocols of Disrupted Mobile Networks
  - Mah-Rukh Fida, Tabinda Salam, and Ameer Shakayb Arsalaan
  - 1

- Fully Distributed Cooperative Spectrum Sensing for Cognitive Radio Ad Hoc Networks
  - Waleed Ejaz, Najam ul Hasan, Hyung Seok Kim, and Muhammad Awais Azam
  - 9

- A Delay-Scheduler Coupled Game Theoretic Resource Allocation Scheme for LTE Networks
  - Salman Ali and Muhammad Zeeshan
  - 14

- On Robust Approaches to the Semidefinite Relaxation Detector
  - J. Ali, H. M. Tariq, and M. T. N. Qaisrani
  - 20

### Session 3: Software Engineering

- Assessment and Support for Software Capstone Projects at the Undergraduate Level: A Survey and Rubrics
  - Ehsan Ahmad, Bilal Raza, and Robert Feldt
  - 25

- SBVR2UML: A Challenging Transformation
  - Hina Afreen, Imran Sarwar Bajwa, and Behzad Bordbar
  - 33

- A Systematic Review on Software Measurement Programs
  - Touseef Tahir and Ali Jafar
  - 39

- Factors Influencing Adoption of Information Technology Based Banking Services: A Case Study of Pakistan
  - Malia Azim, Adil Ali, and Jahanzeb Sattar
  - 45
Session 4: Communication and Networks

An Application of Markov Jump Process Model for Activity-Based Indoor Mobility Prediction in Wireless Networks ................................................................. 51
  Joanna Kolodziej, Samee Ullah Khan, Lizhe Wang, Nasro Min-Allah,
  Sajjad A. Madani, Nasir Ghani, and Hongxiang Li

Network Performance Optimization: A Case Study of Enterprise Network Simulated in OPNET .......................................................................................................................................................... 57
  Munam Ali Shah, Ghazanfar Ali Safdar, Carsten Maple, and Khurram Sardar

Evolution of Orthogonal Frequency Division Multiplexing Modulation to Discrete Wavelet Multitone ...................................................................................................................... 63
  Tabassum Nawaz Bajwa, Arsla Khan, and Sobia Baig

Session 5: Artificial Intelligence, Genetic and Evolutionary Computation

The Pervasive Nature of Variability in SOC ................................................................................................................................. 69
  Ateeq Khan, Christian Kästner, Veit Köppen, and Gunter Saake

Detect HTTP Specification Attacks Using Ontology ................................................................. 75
  Rana Faisal Munir, Nabeel Ahmed, Abdul Razzaq, Ali Hur, and Farooq Ahmad

Polymorphic Circuit Design for Speedy Handwritten Character Recognition Using Cartesian Genetic Programming ................................................................. 79
  Abdul Rehman and Gul Muhammad Khan

Session 6: Computer Graphics, Vision and Image Processing

Palm Print Recognition Using Oriented Hausdorff Distance Transform ......................................................... 85
  Mian Mahmood Ali, Mubeen Ghafoor, Imtiaz A. Taj, and Khizar Hayat

Efficient Image Retrieval Based on Quantized Histogram Texture Features in DCT Domain ................................................................................................................................. 89
  Fazal-e-Malik, Baharum Bin Baharudin, and Kifayat Ullah

A Survey on Sign Language Recognition ................................................................................................................................. 95
  Sumaira Kausar and M. Younus Javed

Session 10: Scalable Computing

Operating System-Aware Cache Optimization Techniques for Multi Core Processors ................................................................................................................................. 99
  Hasina Khatoon, Shahid Hafeez Mirza, and Talat Altaf

Architecture and Implementation of Modular Arithmetic Unit for SOC ................................................................................................................................. 106
  Mohammad Hammad Ahmad, Syed Wasi Alam, and Irum Baig
Session 11: Computer Graphics, Vision and Image Processing

Texture Analysis for Liver Segmentation and Classification: A Survey .............................................. 121
  Saima Rathore, Muhammad Aksam Iftikhar, Mutawarra Hussain, and Abdul Jalil

Medical Image Segmentation Using H-minima Transform and Region Merging Technique ............................................................. 127
  Kamran Ali, Abdul Jalil, M. Umair Gull, and Mustansar Fiaz

Updating Farmland Satellite Imagery Using High Resolution Aerial Images ........................................ 133
  Sajid Saleem, Abdul Bais, and Yahya M. Khawaja

Vision Based Intelligent Traffic Management System ............................................................................. 137
  Muhammad Hassam Malhi, Muhammad Hassan Aslam, Faisal Saeed, Owais Javed, and Muhammad Fraz

Session 12: Intelligent Systems, Computers and Society

SWAM: Stuxnet Worm Analysis in Metasploit ....................................................................................... 142
  Rahat Masood, Um-e-Ghazia, and Zahid Anwar

Enhancing Stealthiness & Efficiency of Android Trojans and Defense Possibilities (EnSEAD) - Android’s Malware Attack, Stealthiness and Defense: An Improvement ................................................................. 148
  Mohammad Ali, Humayun Ali, and Zahid Anwar

Optimizing Predictive Prefetching in Multi-client Single-Server Environment .................................. 154
  Naveed Ahmad, Azam Khan, and Faiza Bibi

A Study to Examine If Integration of Technology Acceptance Model’s (TAM) Features Help in Building a Hybrid Digital Business Ecosystem Framework for Small and Medium Enterprises (SMEs) ................................................................. 161
  Muhammad Abdul Tawab Khalil, P. D. D. Dominic, Hassan Kazemian, and Usman Habib

Session 13: Controls and Automation

Implementation of a Novel Microcontroller-Based Voltage Source Sine-Wave Inverter ............................. 167
  Muhammad Usman Rafique, Saad Aslam, and Jahanzeb Anwer

Analysis of Fast Parallel Sorting Algorithms for GPU Architectures’ ........................................................................ 173
  Fiaz Gul Khan, Omar Usman Khan, Bartolomeo Montrucchio, and Paolo Giaccone
Kalman Filter Based State Estimation for Linearized Twin Rotor System .......................................................... 179

Khawaja Shafiq Haider, Ijaz Hussain Kazmi, and M. Inam-ur Rehman

Real-Time Control of an Inverted Pendulum: A Comparative Study ................................................................. 183

M. Hamza, Zaka-ur-Rehman, Q. Zahid, F. Tahir, and Z. Khalid

Session 14: Computer Applications

High Throughput Hardware Implementation of Secure Hash Algorithm (SHA-3)
Finalist: BLAKE .................................................................................................................................................... 189

Kashif Latif, Athar Mahboob, and Arshad Aziz

Improving Generation in Machine Translation by Separating Syntactic
and Morphological Processes ............................................................................................................................ 195

Nayyara Karamat, Kamran Malik, and Sarmad Hussain

A Novel Key-Based Transposition Scheme for Text Encryption ........................................................................ 201

Sidra Malik

Dynamic Collaborations for Information Sharing within and across Virtual
Teams .................................................................................................................................................................. 206

Ahmad Kamran Malik and Schahram Dustdar

Session 16: Software Engineering

Understandability of Concrete versus Parametric Test Cases ............................................................................ 212

Touseef Tahir, Ali Jafar, and Mohan Maharajan

Using Component-Oriented Process Models for Multi-metamodel Applications ............................................. 218

Fahad R. Golra and Fabien Dagnat

Quantifying Non-functional Requirements in Service Oriented Development .............................................. 224

Jawaria Sadiq, Athar Mohsin, and Fahim Arif

Session 17: Communication and Networks

Particle Swarm Optimization Based Methodology for Solving Network
Selection Problem in Cognitive Radio Networks ................................................................................................ 230

Najam ul Hasan, Waleed Ejaz, Hyung Seok Kim, and Jae Hun Kim

Clock Frequency Offset Correction through Computationally Simple Algorithms ........................................ 235

Qasim M. Chaudhari

Reflection Considerations in Seeded DWDM Transmission Links .................................................................... 238

Syed Aun Abbas, Hee-Yeal Rhy, Changhee Lee, Bongsoo Kim, and Jun-Young Kim
Session 19: Computer Applications

Computer-Based Simulation of Multiphase Flow ................................................................. 242
  Abdullah Shah

Session 22: Communication and Networks

Secure Solution to Data Transfer from Sensor Node to Sink against Aggregator Compromises ................................................................................................. 247
  Sarfraz Azam, Rizwana Manzoor, and Mata ur Rehman

Turbo-Coded HARQ with Switchable Relaying Mechanism in Single Hop Cooperative Wireless System ........................................................................................................ 253
  Ibrahim Khalil, Adnan Ahmed Khan, and Zohaib-Ur-Rehman

Iterative Common Phase Error Correction in OFDM Systems ................................................. 258
  Asma Bibi, Aizaz Ali Shah, and Shahid Khattak

MCDM Method and Semantics Integration for Unified Communication Management and Control ............................................................................................................. 263
  Sajjad Ali Musthaq, Christophe Lohr, and Annie Gravey

Session 23: Computer Graphics, Vision and Image Processing

Efficient Gender Classification Using Interlaced Derivative Pattern and Principal Component Analysis ............................................................................................................. 270
  Sajid Ali Khan, M. Nazir, Usman Asghar, and Naveed Riaz Ansari

Gradient Adjusted Predictor with Pseudo-Distance Technique for Lossless Compression of Color-Mapped Images .................................................................................. 275
  Basar Koc and Ziya Arnavut

Lossless Data Hiding Using Optimized Interpolation Error Expansion ..................................... 281
  Talat Naheed, Imran Usman, and Amir Dar

Browsed-Back Post Event Analyzer .......................................................................................... 287
  Ahmad Ali, Ilyas Butt, and Asifullah Khan

Investigating Integration Challenges and Solutions in Global Software Development ......................................................................................................................... 291
  Atique Zafar, Sajad Ali, and Raja Khurram Shahzad

Automated Change Request Triage Using Alpha Frequency Matrix ....................................... 298
  Sana Nasim, Saad Razzaq, and Javed Ferzund
Fuel Nozzle Spray Pattern Classifier .................................................................303
  Mubeen Ghafoor, Usama Ijaz Bajwa, and Imtiaz A. Taj

Trusted Framework for Health Information Exchange .........................................308
  Muhammad Afzal, Maqbool Hussain, Mahmood Ahmad, and Zahid Anwar

Session 27: Computer Applications

Online UPnP A/V Device Database for Quick and Easy Capability Checking ........314
  Andreas Riener and Martin Gutenbrunner

Development of an Optical Sensor for the Detection of Volatile Organic
Compounds ........................................................................................................321
  Usman Masud and Muhammad Iram Baig

Author Index ........................................................................................................327
