INTERNATIONAL SOCIETY FOR COMPUTERS
AND THEIR APPLICATIONS

16th International Conference on
Computer Applications in Industry and Engineering

November 11-13, 2003
Imperial Palace Hotel, Las Vegas, Nevada  USA

TECHNICAL PAPER INDEX

INFORMATION SYSTEMS/DATABASES

A Flexible Constraint-Based Portal Architecture
Christopher J. Hogger, Frank R. Kriwaczek and Mohd S. Ahmad (Imperial College London, UK) .................. 1

A Novel System for Publishing Relational Data in XML Based on ER-DTD Method
Guohua Liu (Fudan University and Yanshan University, China), Qi He, Ziyang Chen and Ying Wang
(Yanshan University, China) .................................................................................................................. 7

On-Line Rollback in Log-Structured File Systems
Robert Matthews (St. Augustine’s College, USA) and Phil Kearns (The College of William and
Mary, USA) ......................................................................................................................................... 11

Watermarking Remotely Sensed Images (RSI) (Digital Image or Relational Data?)
Stephen Krebsbach (Dakota State University, USA), George Hamer (South Dakota State University,
USA), and William Perrizo (North Dakota State University, USA) .................................................... 17

IMAGE PROCESSING/ SIGNAL PROCESSING

Image Processing Enhancement over WAP: An Enhancement of Transmitting Image
over Mobile Devices Using WAP Architecture
Ahmed H. Salem (Sullivan University, USA), Addagarla Kondala Rayudu, Anup Kumar and
Adel S. Elmaghрабy (University of Louisville, USA) ........................................................................ 22

Message Hiding in Images
Clayton Crenshaw, Nelson Luiz Passos (Midwestern State University, USA) ........................................ 28

Effects of Compression On Digital Phantom X-Ray Images
Yongshen Ni, Ray Gamero, Hong Liu, John Y. Cheung (University of Oklahoma, USA) ......................... 32

MOBILE COMPUTING

A Brief Study of Cooperative Web Caching Protocols in Cellular Networks
Adiseshu K. Gelli, Joseph Nalluru, Eric Freeman, Nelson L. Passos (Midwestern State University, USA) .................. 36

Fault-tolerant MA Migration Scheme based on Encrypted Checkpoints
Gu Su Kim, Young Ik Eom (Sungkyunkwan University, Korea) .......................................................... 40

Mobile Agent Based Discovery Scheme in Pure P2P Environments
In-suk Kim, Moon Jeong Kim, Young Ik Eom (Sungkyunkwan University, Korea) ............................ 44
NEURAL NETWORKS/FUZZY LOGIC

Neural Network Based Anomaly Detection in Computer Networks:
A Novel Training Paradigm
Ahmad R. Sharafat (Tarbiat Modares University, Iran), Mehdi Rasti (ITRC, Iran), and Ali Yazdian
(Tarbiat Modares University, Iran) ......................................................... 50

Genetic Algorithm to Improve a Solution for a General Assignment Problem
Paul Juell, Amal S. Perera, Kendall E. Nygard (North Dakota State University, USA) ....................... 54

A Fuzzy Logic Based Multiple Reference Model Adaptive Control
Sukumar Kamalasadan, Adel A. Ghandakly (University of Toledo, USA) and Khalid S. Al-Olimat
(Ohio Northern University, USA) ................................................................ 58

INTERNET AND WEB-BASED SYSTEMS

OASIS: Text Search Using High-Speed Networks
V. V. Kluev (University of Aizu, Japan) .......................................................... 62

Performance Benefits of Partitioning in a Web-Caching Environment
R. T. Hurley, W. Feng, and B. Y. Li (Trent University, Canada) ........................................... 68

Meaningful UDDI Web Services Description
Atul Sajjanhar, Hongen Lu (Deakin University, Australia) .................................................. 74

Web-Based Parallel Computing System for Database Concurrency Control Simulation
Jinpeng Tang, Victor Shi, Vijayakumar Shanmugasundaram (North Dakota State University, USA) ....... 78

COMPUTER SECURITY I

Recent Advances on Intrusion Detection Techniques
Guangyuan Sun, Huirong Fu (North Dakota State University, USA) ........................................... 83

An Efficient Multiplication Architecture using Montgomery Algorithm based on Programmable Cellular Automata
H. Y. Park, J. C. Jeon, J. B. Oh, K. Y. Yoo (Kyungpook National University, Korea) ...................... 87

A New Authenticated Key Agreement Protocol
Kee-Won Kim, Eun-Kyung Ryu, Hyung-Mok Lee, Kee-Young Yoo (Kyungpook National University, Korea) ................................................................. 91

A Unified Architecture for the Implementation of Security Protocols
Ibrahim S. Abdulshah and Daniel A. Menascé (George Mason University, USA) ......................... 95

PATTERN RECOGNITION/COMPUTER VISION

An Integration of Principal Component Analysis and Self-Organizing Map for Effective Palmprint Retrieval
King Hong Cheung, Wai Kin Kong, Jane You, David Zhang (The Hong Kong Polytechnic University, Hong Kong) ......................................................................... 101

On Hierarchical Palmprint Coding with Multi-Features for Personal Identification in Large Databases
Jane You, Wai-Kin Kong, David Zhang and King Hong Cheung (The Hong Kong Polytechnic University, Hong Kong) ................................................................. 105
Access Control Via Invertible Multilevel Scrambling
Wenbin Luo (St. Mary's University, USA) .......................................................... 109

Fuzzy Rules for Finger Print Verification using Ridge Extraction
Gregory Vert, James Arseneau, Sara Nasser (University of Nevada, Reno, USA) ......................... 113

COMPUTER SECURITY II

A New Intruder Traceback Mechanism based on System Process Structure
Hyungwoo Kang, Jaewoo Park, Gunwoo Nam, Sangseol Park, Jinseok Lee (National Security Research Institute, Korea) .......................................................... 117

Analysis Tool for Honeypot Systems
Terry Griffin (Midwestern State University, USA) .................................................. 122

Design and Implementation of AES (Rijndael) Algorithm
Parimal Patel, Chirag Parikh (University of Texas at San Antonio, USA) .......................... 126

A Visual Algebra for Detecting Port Attacks on Computer Systems
Gregory Vert, B. Yuan, N. Cole (University of Nevada, Reno, USA) ............................ 131

AGENT-BASED SYSTEMS / AUTONOMOUS SYSTEMS

Agent-Aided Executive Project Control
Mohammad S. Haque (PHS Engineering Corp, USA) and Ken Nygard (North Dakota State University, USA) .......................................................... 136

An Agent Based Framework for Modeling UAV’s
Nathan Huff, Ahmed Kamel, and Kendall Nygard (North Dakota State University, USA) .......... 139

POMDP Planning for High Level UAV Decisions: Search vs. Strike
Doug Schesvold, Jingpeng Tang, Benzir Md Ahmed, Karl Altenburg, Kendall E. Nygard (North Dakota State University, USA) ................................................. 145

Agent-based Fault Management in Cellular Networks
Bhagyavati (Columbus State University, USA) ......................................................... 149

DATA MINING

Data Mining Strategies From Network Intrusion Detection as Applied to Identifying High-Risk Containers
Nicole Harlow, Thomas Puch and Kamal Davbar (DePaul University, USA) ....................... 153

A Scheme for Content Based Retrieval of Music Data in MIDI Format
S. R. Subramanya (University of Missouri-Rolla, USA), Morshed U. Chowdhury, Thao Pham (Deakin University, Australia), and Sanjay Shankar (University of Missouri-Rolla, USA) .................................................. 159

A Genetic Algorithm for Clustering on Very Large Data Sets
Jim Gasvoda and Qin Ding (Pennsylvania State University at Harrisburg, USA) .................. 163

Efficient Quantitative Frequent Pattern Mining Using Predicate Trees
Baoying Wang, Fei Pan, Yue Cui, William Perriz (North Dakota State University, USA) ............. 168
KNOWLEDGE-BASED/AGENT-BASED/WEB-BASED SYSTEMS

Summarization of Jewish Law Articles in Hebrew
Yaakov HaCohen-Kerner, Eylon Malin, Itschack Chasson (Jerusalem College of Technology, Israel) ........ 172

Automatic Text Categorization with Learning Logic
Hisham Al-Mubaid, Mohammad S. Siddiqui (University of Houston - Clear Lake, USA) ........................................ 178

Partitioning in Distributed and Hierarchical Web-Caching Architectures:
A Performance Comparison
R. T. Hurley, W. Feng, and B. Y. Li (Trent University, Canada) ................................................................. 184

COMPUTER MODELING / SIMULATION

Interactive Virtual Reality Visualization for a Three-Dimensional Earth's Ionosphere Simulation Problem
Saleh H. Al-Sharaaeh (King Fahd University of Petroleum and Minerals, Saudi Arabia) and
J. Montgomery (Tuskegee University, USA) ............................................................... 189

Partner Selection Modeling in a Virtual Enterprise
Zhi Liu, Mei Lai, Neng Qian (Zhejiang University of Technology, China) ..................................................... 193

A Simulation Model for Video Traffic Performance via ATM over TCP/IP
Morshed U. Chowdhury, Yiqing Tu, and Thao Pham (Deakin University, Australia) .............................. 197

Performance-Based Modeling for Object-Oriented Software
A. Abdel-raouf, R. Ammar, H. Sholl (University of Connecticut, USA) and Tahany A. Fergany
(University of New Haven, USA) .................................................................................. 203

COMPUTER-AIDED DESIGN / MANUFACTURING / EMBEDDED SYSTEMS

Displacement Monitoring at Building Construction Site
Naai-Jung Shih and Hsin-Hung Chen (National Taiwan University of Science and Technology,
Taiwan) .......................................................................................................................... 208

Parametric Estimation of Autonomous Threaded Fastenings Operation based on
Non-linear Least Square Method
N.I. Giannocarò (Università di Lecce, Italy) and Mongkorn Klingajay (King's College London, UK) ........ 211

Optimized Implementation of Distributed Real-Time Embedded Systems Mixing Control
and Data Processing
Nicolas Pernet and Yves Sorel (INRIA Rocquencourt, France) ...................................................... 216

COMPUTER NETWORKS

Video Segmentation for Transporting Pre-Stored Video across Networks
Huiling Fu (North Dakota State University, USA) and Liren Zhang (Nanyang Technological
University, Singapore) ........................................................................................................ 221

The Advantages of Real Time in TORA
Jeff Dobbelaeere, Phil Kears (The College of William and Mary, USA) and Jean Mayo (Michigan
Technological University, USA) ...................................................................................... 225

Evolutionary Programming in a Distributed Packet Scheduling Architecture
Min Song, Sachin Shetty, Weiyung Zhu (Old Dominion University, USA) .............................................. 230

A Scalable MPLS Multicast Solution for Dense Mode Multicast Networks
Mansoor Alam (The University of Toledo, USA), Min Song (Old Dominion University, USA),
Amit Deshmukh (The University of Toledo, USA) ............................................................................. 234
MEDICAL APPLICATIONS

Analysis of Consequences in a Computer-Assisted Model for Diagnosis and Management of Dementia
D. L. Hudson (University of California, San Francisco, USA) and M. E. Cohen (University of California, San Francisco, USA and California State University, Fresno, USA) .......................................................... 238

Modeling Complexity in Dementia Diagnosis
M. E. Cohen (California State University, Fresno, USA and University of California, San Francisco, USA) and D. L. Hudson (University of California, San Francisco, USA) .......................................................... 242

A Web-Based Approach for Myofascial Pain Syndrome Monitoring System in the Home
Sung Shin, Charlie Y. Shin, Xiaohong Chen (South Dakota State University, USA), Chang Oan Sung (Indiana University Southeast, USA) .......................................................... 246

Task Scheduling in Distributed Data Mining for Medical Applications
Rex E. Ganteinbein (University of Wyoming, USA) and Chang Oan Sung (Indiana University Southeast, USA) .......................................................... 250

MULTIMEDIA, VIDEO, AND SIGNAL PROCESSING/BIOMEDICAL SYSTEMS

Design and Performance Analysis of Communication Module for Linux Clustering VOD Server
Sung Y. Shin and Chan G. Yoo (South Dakota State University, USA), and Kwan-Jong Yoo (ChungNam National University, Korea) .......................................................... 254

Development of a Computational Toolkit for Biomechanical Analysis and Simulation: The Vertebrate Analyzer
K. F. Hulme, F. C. Mendel, and K. P. Chugh (University at Buffalo, USA) .......................................................... 258

Effects of Digital Watermarking On Digital Images
Ray Gamero, Yongshen Ni, Yuan Chen, Hong Liu, John Y. Cheung (University of Oklahoma, USA) ........ 264

COMPUTER ARCHITECTURE / VLSI

An Issue Logic for Superscalar Microprocessors
Feng-Jiann Shiao and Jong-Jiann Shieh (Tatung University, Taiwan) .......................................................... 268

Direct Alignment Algorithm for High-Speed Floating-Point Adder Design
Haixia Wang, Chengde Han (Institute of Computing Technology, China) .......................................................... 272

Semi Greedy Algorithm for Finding Connectivity in Microchip Physical Layouts
Clemente Izunieta (Hewlett Packard Co., USA) .......................................................... 276

Simplifying High-Frequency Microprocessor Design via Timing Constraint Speculation
Asami Tanino and Toshinori Sato (Kyushu Institute of Technology, Japan) .......................................................... 282

DATA / WIRELESS COMMUNICATIONS / DATAMINING / VLSI

A New Predictive Dynamic Reservation Strategy for Cellular Networks Using Explanation Patterns
Ahmad Almunayyes (Kuwait University, Kuwait) .......................................................... 288

Efficient Proximal Support Vector Machine for Spatial Data
Fei Pan, Baoying Wang, Dongmei Ren, Xin Hu, William Perrizo (North Dakota State University, USA) ........ 292

VLSI Implementation of Genetic Algorithm
Pratap Ramamurthy (University of Wisconsin, USA) and Jai Vasanth (University of Madras, India) ........ 298
SOFTWARE DEVELOPMENT, FRAMEWORKS AND TOOLS

Web Programming Language Evaluation using LSP
N. Debnath (Winona State University, USA), M. Peralta, C. Salgado, A. Funes, A. Dasso, D. Riesco, G. Montejano, R. Uzal (Universidad Nacional de San Luis, Argentina) ................................................................. 302

Object-Oriented Approach of Bounded Predictable (BP) Task Scheduler
Haesun K. Lee, Ilhyun. Lee (University of Texas Permian Basin, USA), Narayan C. Debnath (Winona State University, USA) ................................................................. 306

Evaluating Biometric Software Packages using a Practitioners Methodology
Luiz Humberto Sucupira Jr., Livia C. F. Araujo, Miguel G. Lizarraga, and Lee Luan Ling (State University of Campinas, Brazil) ................................................................. 310

Hardship of Program Utilization and User-Friendly Software
M. Burgin (University of California, Los Angeles, USA) and N. Debnath (Winona State University, USA) ................................................................. 314

COMPUTERS IN EDUCATION /SOFTWARE ENGINEERING

An Application to Match Campus Visitors with Student Tour Guides
Sarah Davis (Texas A&M University, USA) and Donald R. Schwartz (Millsaps College, USA) ................................................................. 318

XML based Model Linking
S. Mitterdorfer, E. Teiniker, C. Kreiner, R. Weiss (Graz University of Technology, Austria) and Zsolt Kovacs (Salomon Automation, Austria) ................................................................. 322

POSTER PAPERS

An Optimal Fuzzy Logic Controller Design for Precision Intelligent Tracking System
Jia Lu (Nova Southeastern University, USA) ................................................................. 326

Survey and Models of Spatio-Temporal Databases
Hatem Fawzi Halaeui (City University of New York, USA) ................................................................. 327

Embedded Home Gateway Systems in WAP Phone Control
Ming-Chen Chung, Chun-Yuan Yu, Chen-Chih Yang, Chen-Ming Lin (Nan Kai College, Taiwan) ................................................................. 328

Extending the Beowulf Cluster to the Desktop
George Harner (South Dakota State University, USA), Daniel Steinwand (USGS EROS Data Center, USA) ................................................................. 329

Improvement to CNN Query
Guo-hua Liu (Fudan University and Yanshan University, China), Ying Zhang (Yanshan University, China), Zi-Jun Chen (Fudan University and Yanshan University, China) Zi-Yang Chen (Yanshan University, China) ................................................................. 330

Quantitative Association Rules Mining Methods with Privacy-Preserving
Zi-Yang Chen, Zhao-Hong Ma, Ying Wa (Yanshan University, China), and Guo-Hua Liu (Fudan University and Yanshan University, China) ................................................................. 331

Integrating optimization into a Scenario of Conflict Management
Albrecht M. Fritzsche (DaimlerChrysler AG, Germany) ................................................................. 332

Hidden Challenges on Web Application Design
Eric Freeman, Katia Passos, Cerise Wuthrich, Catherine Stringfellow (Midwestern State University, USA) ................................................................. 333
An Equation Based Approach to the Implementation of Generalized PDE Solver in CEMTool
Choon Ki Ahn, Soo Hee Han, Wook Hyun Kwon (Seoul National University, Korea) ................................ 334

Design of State of the Art Video Tracker for Test Range Applications
B K Das (ITR-DRDO, India) ................................................................. 335

Applying the Perceptron Rule for Extraction of Keywords from Abstracts
Yaakov HaCohen-Kerner (Jerusalem College of Technology, Israel) ................................................. 336

Importance of Scientific Visualization Course in Curriculum
Vijayakumar Shanmugasundaram (Concordia College, USA) ......................................................... 337

Software Specification of a Web-Based Fitness Tracking Application
Steve Arnold, Cathy Osterhout, Chul Yim, Sergiu Dascalu (University of Nevada, Reno, USA) ............ 338

Towards an Automated Adaptive Content Delivery Training System
Gregory Vert, Aparna Phadnis, Rajasekhar Yakkali, Xin Yu (University of Nevada, Reno, USA) .......... 339
