17th International Conference on Computers and Their Applications 2002

San Francisco, California, USA
4-6 April 2002

Editors:

R. Gantenbein
S. Shin

ISBN: 978-1-61839-548-1
INTernational Society for Computers and Their Applications

17th International Conference on Computers and Their Applications

April 4-6, 2002
Canterbury Hotel, San Francisco, California USA

Technical Paper Index

Session 1a: Programming Languages

1. Data Link Frame Aggregation Protocol
   J. Michael Meehan and Philip A. Nelson (Western Washington University, USA) .................................... 1

2. The First Language Problem
   J. Michael Meehan, James Hearne and Jeremy Powers (Western Washington University, USA) .................. 5

3. Mechanical Software Development Process Model
   Chang Oan Sung (University of Wyoming, USA), Ali Salehnia, Charlie Y. Shim (South Dakota State University, USA) ............................................................... 9

Session 1b: Algorithm I

1. Dimension and Shape Invariant Array Programming
   Ahmed Sameh and Manal Elzat (The American University in Cairo, Egypt) ............................................ 13

2. Exact Computations of the Longest Repeated Suffix Ending at Each Point In a Word
   T. L ecoq (Université de Rouen, France), J-F. Myopport and D. Samé (Université de Picardie Jules Verne, France) ........................................................................ 18

3. Adaptive Thresholding to Eliminate up to 99% of Wavelet Coefficients
   Ye Zhou and Irene Gargantini (The University of Western Ontario, Canada) ................................................. 22

Session 1c: Special Session on Intelligent Software Reliability

   Sultan Aljahjajl (George Mason University, USA), Alaa Sheta (Electronics Research Institute, Egypt) and David Rine (George Mason University, USA) ........................................... 26

2. Software Change Analysis Using Metrics Measurement
   Hui Zeng and David Rine (George Mason University, USA) ................................................................ 30

3. Visual Hand Gesture Sequence Interpreter
   Walea M. Sheta (Informatics Research Institute, Egypt), Ahsrafi M. Emam (University of Alexandria, Egypt) and Ayman E. Ibrahim (National Institute of Electronics, Egypt) ..................................... 34
SESSION 2A: DATABASE I

1. Implementation of a Data Warehouse for Claims Processing
   Manuel Penalva (South Dakota School of Mines and Technology, USA) ............................................. 39

2. A UML Model to Relational Database Mapping for Dynamic CORBA Component Model Persistency
   S. Mitterdorfer, E. Teiniker, C. Kreiner, R. Weiss (Graz University of Technology, Austria) and Zsolt Kovács
   (Salomon Automation, Austria) .................................................................................................................. 43

3. An Effective Way to Guarantee the Physical Consistency of Lock Waiting Information in Main Memory Databases
   Sang-Wook Kim, Hwang-Kyu Choi, Chang-Yeol Choi, Ju-Ha Seo, Jeong-II Park (Kangwon National University, Korea) .......................................................... 49

4. Knowledge Discovery, Information Retrieval, and Data Mining
   M. Burgin (University of California, Los Angeles, USA) and R. E. Gantenbein (University of Wyoming, USA) ... 55

SESSION 2B: ALGORITHM II

1. Memory-Cordic Algorithm for Embedded Programmable Logic Device Designs
   Xianwei Wu, Phaik In Chewputtanagul, David Jeff Jackson, Tim A. Haskew (The University of Alabama, USA) .................................................................................................................. 59

2. An Approach from Software Reliability Modeling to Security Modeling
   Charlie Y. Shim, Ali Salehnia and Sung Shin (South Dakota State University, USA) ............................. 63

3. The Interrelationship Among Speedup Models and Performance Measurements
   Dominique Heger (IBM Corporation, USA) and Greg Simco (Nova Southeastern University, USA) .......... 67

   Saraa Tasneem, Reda A. Ammar, Howard Sholl (University of Connecticut, USA) and James V. Petrizzi
   (General Electric Company, USA) .............................................................................................................. 73

SESSION 2C: IMAGE PROCESSING I

1. A Fuzzy Neural Reasoning Approach to Edge Detection
   Gordon K. Lee (San Diego State University, USA) and Edward Grant (North Carolina State University, USA) ...................................................................................................................... 78

2. A Link-Labeling Algorithm for Computing the Shortest Path based upon Edge and Turn Constraints
   Hamdy Soliman, Chad Peyton (New Mexico Tech, USA) ........................................................................... 82

3. Grayscale Thinning
   John M. Weiss (South Dakota School of Mines and Technology, USA) .................................................. 86

4. A Fully Automated Femur and Patella Segmentation Approach to Magnetic Resonance Images of the Knee Articular
   Jiann-Shu Lee (National Taiwan Institute of Technology, Taiwan) ............................................................ 90
SESSION 3A: DIGITAL SIGNAL PROCESSING

1. Output-Based Speech Quality Assessment with Application to CTIMIT Database
   Khalid A. Al-Mashouq (King Saud University, Saudi Arabia) and Mohammed S. Al-Shaye (Lucent Technologies Int'l Inc., Saudi Arabia) ................................................................. 94

2. Pruning of a Sliding Window for Rank-Order Filtering
   Dulal C. Kar (Texas A&M University, USA) ........................................................................... 98

3. User Verification System on Telebanking Using Kernel based PCA
   Sung Y. Shin, Su Jeong Byun (South Dakota State University, USA) and Won Don Lee (Chungnam National University, Korea) ................................................................. 102

SESSION 3B: BIOMEDICAL ENGINEERING

1. Remote Linear Pressure Sensing Vibration Device for Biomedical Applications
   Maher E. Rizkalla (Indiana University Purdue University Indianapolis, USA), Ebtsam R. Rizkalla (Poplar Rehabilitation Services, Inc.) and Harry Gundrum (Indiana University Purdue University Indianapolis, USA) 106

2. Extraction and Description of Moving Human Body by Periodic Motion Analysis
   Jang-Hee Yoo, Mark S. Nixon and Chris J. Harris (University of Southampton, UK) ................... 110

3. Development of Digital Tongue Inspection System
   B. Y. Kim, J. H. Jang (Kangwon National University, Korea), Y. S. Chang (Daejin University, Korea) and K. M. Park (Kyunghee University, Korea) ................................................................. 114

SESSION 3C: DATABASE II

1. Dividing Database Log Into Equal Size Segments for Efficiency
   Prahalad Ragothaman (University of North Dakota, USA) and Brajendra Panda (University of Arkansas, USA) ........................................................................................................ 118

2. On Mining the Longest Frequent Itemset
   Chienwen Wu (National Taipei University of Technology, Taiwan) ............................................. 122

3. Cost Based Semantic Query Transformation
   Junping Sun (Nova Southeastern University, USA) ........................................................................ 126

SESSION 4A: IMAGE PROCESSING II

1. Mapping C-Extensions for Image Processing to Parallel Architectures
   Ralph Duncan, Anwar Ghuloum (Consultant, USA) ............................................................... 132

2. Feature Extraction of Man-Made Objects from Aerial Photography Images
   Ralph Flora and Chih-Cheng Hung (Southern Polytechnic State University, USA) ...................... 136

3. Competitive Fuzzy-Classifier Image Edge Detection
   Lily Rui Liang and Carl G. Looney (University of Nevada, Reno, USA) ................................... 140

4. Visualizing N Dimensional Clustering
   Paul Juell, W. Jockheck (North Dakota State University, USA) ............................................... 144
SESSION 4B: COMPUTER ARCHITECTURE

1. **Noise Reduction Techniques for Multi-Channels for Analog VLSI Applications**
   Maher E. Rizkalla (Indiana University Purdue University Indianapolis, USA), Mark M. Budnik (National Semiconductors, USA), Mohamed El-Sharkawy, Akhouri S. C. Sinha and Harry Gundrum (Indiana University Purdue University Indianapolis, USA) .......................................................... 148

2. **Minimizing Cross Talk between Multi-Channels Instrumentation Amp. Using Guard Rings**
   Maher E. Rizkalla, Mark M. Budnik, Mohamed El-Sharkawy, Akhouri S. C. Sinha, and Harry Gundrum (Indiana University Purdue University Indianapolis, USA) .......................................................... 152

3. **BURAQ: A Re-Configurable Processor Toolkit for VLIW Architectures**
   Adeel Abbas, Shoaib Khan (National University of Science and Technology, Pakistan) .......................................................... 156

4. **Exhaustive Test Pattern Generation for Parallel Testing**
   Wu Woan Kim (Kyungnam University, Korea) ........................................................................................................ 160

SESSION 4C: COMPUTER VISION

1. **Drawing Non-Intersecting Lines on a Raster Display**
   Brahma Dathan (Metropolitan State University, USA) .................................................................................... 164

2. **Cluster Analysis of Spatial Data Using Peano Count Tree**
   Qiang Ding, William Perrizo (North Dakota State University, USA) .......................................................... 168

3. **Battlespace Situation Assessment via Clustering and Case-Base Reasoning**
   Carl G. Looney and Lily R. Liang (University of Nevada, Reno, USA) .......................................................... 172

4. **A New Texture Spectrum Descriptor and its Application in Image Semantic Classification**
   Hualin Wan (Institute of Computing Technology, China), Morshed U. Chowdhury (Deakin University, Australia), Hong Hu and Zhongzhi Shi (Institute of Computing Technology, China) .......................................................... 176

SESSION 5A: DATABASE III

1. **Affordable Knowledge Discovery Through Distributed Data Mining**
   Rex E. Gantenbein and Chang-Osn (Chris) Sung (University of Wyoming, USA) .......................................................... 180

2. **A New Method for Concurrency Control in Centralized Database Systems**
   Victor T. S. Shi and William Perrizo (North Dakota State University, USA) .......................................................... 184

3. **Migration of Relational Databases**
   Heston Fernandes and Gorkghi Hu (Central Michigan University, USA) .......................................................... 188

SESSION 5B: OPERATING & DISTRIBUTED SYSTEMS I

1. **Adverse Effects of Large Files in a File Migration System**
   R. T. Hurley, W. Feng (Trent University, Canada) .................................................................................... 192

2. **Modeling of Time Criterion and Utility Function for Multiobjective Synthesis**
   J. Borén (Wroclaw University of Technology, Poland) .................................................................................... 198

3. **A Middleware for Constructing Highly Available, Fault Tolerant, and Attack Tolerant Services**
   Shivakant Mishra (University of Colorado, USA) .................................................................................... 201
SESSION 5C: COMPUTER NETWORKS I

   Le Thanh Son, Henrik Schieler and Ole Brun Madsen (Aalborg University, Denmark) ................................. 205

2. Using Wireless Sensor Networks to Narrow the Gap Between Low-Level Information and Context-Awareness
   Ioan Raitcu (Wayne State University, USA), Owen Richter (Accenture, USA), Loren Schwiebert,
   Sherali Zeadally (Wayne State University, USA) .................................................................................................. 209

3. Bi-direction Slice Arrangement Algorithm for MPEG Video Transmission over ATM Networks
   Enmin Song (University of California at San Francisco, USA), Reza Sotudeh (Hertfordshire University, UK),
   Said Boussakta (University of Leeds, UK) and Hong Liu (Inktomi Corporation, USA) ........................................... 215

SESSION 6A: COMPUTER NETWORKS II

1. Reducing Communication Overhead in Multiple Multicasts for Mesh Networks
   David R. Surma (Indiana University, South Bend, USA) ......................................................................................... 219

2. QoS Control and Performance Analysis of a Gigabit Network
   Mansoor Alam, Qing Tan (University of Toledo, USA), Min Song (Eastern Kentucky University, USA),
   and Xingxue Hao (Shandong Institute of Technology, China) ............................................................................ 223

3. An All-to-All Multicast Routing Decreasing Channel Overheads in Wireless Ad Hoc Networks
   Zhong-Hua Zhou (Columbus State University, USA) and Seong-Moo Yoo (The University of Alabama in Huntsville, USA)
   ........................................................................................................................................................................... 228

4. Edge Station in Access Networks for Video Distribution
   Min-You Wu and Wei Shu (University of New Mexico, USA) ................................................................................. 232

SESSION 6B: REAL-TIME COMPUTING

1. Minimizing Wait Time of Aperiodic Tasks in the Real-time Systems with a Non-preemptive Scheduling Algorithm
   Hoon Oh (Kangwon National University, Korea) .................................................................................................. 236

2. Flash Memory in an Educational Environment
   David C. Pheanis (Arizona State University, USA) and Christian Johnson (Inter-Tel, Inc., USA) ....................... 241

3. Real-time Fixed-point Denoising of Ultrasound Data
   A. A. Abdel-Raouf, Ian R. Greenshields, H. A. Sholl and R. A. Ammar (University of Connecticut, USA) .......... 245

4. Minimizing Task Completion Time for Real-Time Multiprocessor Systems
   Jia-Ping Wang (State University of West Georgia, USA) .................................................................................... 248

SESSION 6C: SOFTWARE ENGINEERING

1. A Language Independent Tool for Documentation Extraction
   David J. Serr and Aurel Corneli (Brigham Young University, USA) ................................................................. 253

2. Design Pattern Driven Code Generation Technique
   Woon-Yong Kim (Kwang-Woon University, Korea), R. Young-Chul Kim (Hong-Ik University, Korea) and
   Yong-Keun Choi (Kwang-Woon University, Korea) ............................................................................................... 257
3. **Building an Authoring Tool for Concept-Feature Relationships by Decomposing Phrases in the Text**  
Jong Young Kim, Martha W. Evans (Illinois Institute of Technology, USA), and David Trace  
(Trace Consulting, USA) ................................................................................................................. 261

4. **Metrics Comparison for Java Programs Using a Software Tool**  
Narayan C. Debnath (Winona State University, USA), Haesun K. Lee (University of Texas of the Permian Basin, USA), Roger Y. Lee (Central Michigan University, USA), and Waleed W. Smari  
(University of Dayton, USA) ........................................................................................................ 265

**SESSION 7A: COMPUTER NETWORKS III**

1. **A Framework for the Efficient Global Roaming Management System for the IMT-2000**  
Yeongkwun Kim (Western Illinois University, USA) and Injoo Jeong (East-West University, USA) .............. 269

2. **An Optimal Broadcasting Schema for Mesh Structures**  
Zhizhang Shen (Plymouth State College, USA) .................................................................................. 273

3. **On-Line k-Server Problem with Twin-Request**  
Weimin Ma, Hui Chen, Jane You, James Liu (Hong Kong Polytechnic University, Hong Kong) and  
Yinfeng Xu (Xi'an Jiaotong University, P. R. China) ........................................................................... 277

4. **A Configurer and GUI Network Specifier for a Multi-Processor StrongARM Network**  
E. W. K. Liew, B. C. O'Neill, S. Clark (The Nottingham Trent University, UK) and A. Cawley  
(Quantel Ltd., UK) ......................................................................................................................... 283

**SESSION 7B: INTERNET I**

1. **pSlash: A Web Content Management System**  
Derek Leung and Du Zhang (California State University, USA) .......................................................... 289

2. **On-Line Agent Scheduling in Internet Computing**  
Xinfeng Yang (Hong Kong Polytechnic University, Hong Kong and Griffith University, Australia),  
Weimin Ma (Hong Kong Polytechnic University, Hong Kong), Jane You (Hong Kong Polytechnic University, Hong Kong and Griffith University, Australia), and James Liu (Hong Kong Polytechnic University, Hong Kong) ............................................................... 293

Julius Dichter, Ausif Mahmood (University of Bridgeport, USA), and Andrew Barrett  
(Technology Farm, Inc., USA) ........................................................................................................... 297

4. **A Process Model for Reengineering Web Based Applications**  
Thomas Philip, Mark Goodman (Mississippi State University, USA) .................................................. 303

**SESSION 7C: COMPUTER PRACTICE & APPLICATIONS I**

1. **Knowledge and Data In Computer Systems**  
M. Burgin (University of California, Los Angeles, USA) ..................................................................... 307

2. **Autonomous Environment Monitoring Networks**  
Charles Hand (California Institute of Technology, USA) ..................................................................... 311
3. Pattern Identification in Electroencephalograms
   D. L. Hudson (University of California, San Francisco, USA) and M. E. Cohen (California State University, Fresno, USA and University of California, San Francisco, USA) ................................................................. 315

4. Characterizing Thermal Devices by Identifying Spectra Using Principal Component Analysis
   Thomas Philip, Yi Su, David L. Monts (Mississippi State University, USA) ............................................. 319

SESSION 8A: OPERATING & DISTRIBUTED SYSTEMS II

1. JDOP: A Virtual Machine for Java-Based Distributed Object Processing
   Julius Dichter, Tang Haofu, Auisf Mahmood (University of Bridgeport, USA) ........................................... 323

2. Providing Secure Internet Access to Health Care Information
   Rex E. Gantkenbein, Thomas L. James and Jung Y. Kim (University of Wyoming, USA) ......................... 327

3. Joint Scheduling of Bounded Predictable (BP) and Periodic Tasks
   Ilhyun Lee (The University of Texas of the Permian Basin, USA) ......................................................... 331

SESSION 8B: PARALLEL PROCESSING

1. Exploring Multiple Levels of Parallelism for Regular and Irregular Algorithms using BOPS' DSP
   Wasif Latif, Aniq Shahid, Faisal Saud and Saqib Ali (University of Engineering and Technology, Pakistan) and Shoaib Ahmed Khan (National University of Science and Technology, Pakistan) .......................................................... 335

   Weigang Ni and S. V. Vrbsky (University of Alabama, USA) ........................................................................ 339

3. Evaluation of Parallel Algorithm for DPCM Decoding of Images Using Index Decoupling
   S. R. Subramanya (University of Missouri-Rolla, USA) ............................................................................. 345

SESSION 8C: INTERNET II

1. Design and Implementation of a Web Portal for a NeoCortical Simulator
   Kishor K. Waikul, Lianjun Jiang, E. Courtenay Wilson, Frederick C. Harris, Jr., and Philip H. Goodman (University of Nevada, Reno, USA) .................................................................................. 349

2. Adaptive Routing Control of Workflow System on the Internet
   Shin-Jer Yang (Soochow University, Taiwan), W. Chung-Kung Yen (Shih Hsin University, Taiwan), and Yung-Cheng Chou (Soochow University, Taiwan) ................................................................. 354

3. Fuzzy Clustering of Web Logs for User Classification
   King-llp Lin, Ravikumar Kondadadi (The University of Memphis, USA) ...................................................... 369

SESSION 9A: OPERATING & DISTRIBUTED SYSTEMS III

1. Striped Checkpointing on Cluster Computer with Single I/O Space
   Y. S. Chang (Daejin University, Korea) and B. Y. Kim (Kyungwon National University, Korea) ...................... 364

2. InCore: Accounting and Charging Heterogeneous Unix Systems
   Moonsang Kwon, Jiman Hong, Yookun Cho (Seoul National University, Korea) and Juw Won Park (Tempworks Software, Inc., USA) .......................................................... 368

3. Distributed Mobile Applications with Dynamic Adaptive Behavior
   Iara Augustin (Federal University of Santa Maria, Brazil), Adriaber Correa Yamin (Federal University of Pelotas, Brazil), and Claudio Fernando Resin Geyer (Federal University of Rio Grande do Sul, Brazil) ........ 372
SESSION 9B: COMPUTER PRACTICE & APPLICATIONS II

1. Solar Panel based Milk Pasteurization
Kirsten Melgaard Nielsen, Tom Søndergaard Pedersen (Aalborg University, Denmark) ........................................... 376

2. Design and Use of a Programmable Logic Controller Training Station for Undergraduate Engineering Education
David Jeff Jackson (The University of Alabama, USA) .................................................................................................. 380

3. Composite Plates and Critical Buckling Temperature
Stuart Wylie, Masoud Bagheri, Suresh Chandra (North Carolina A&T State University, USA) ......................... 384

SESSION 9C: COMPUTER SECURITY I

1. Fuzzy Threat Evaluation in Computer Security
Essam M. Hamed, James H. Graham (University of Louisville, USA) ................................................................. 389

2. New AB^2 Systolic Architectures in GF(2^n)
Nam-Yeon Kim, Hyun-Sung Kim (Kyungil University, Korea), Won-Ho Lee, Kae Won Kim and Kee-Young Yoo (Kyungpook National University, Korea) ................................................................. 394

3. An Information Model for Network Security Management
Karima Boudaoud (University of Geneva, Switzerland), and Charles McCathieNeville (World Wide Web Consortium, France) ........................................................................................................... 398

SESSION 10A: COMPUTER NETWORKS IV

1. Reader-Writer Locks for Network Attached Storage and Storage Area Networks
Arun Gandhi, Elizabeth Varzi, and Swapnil Bhateja (University of New Hampshire, USA) ........................................ 402

A. Tewari, B. Gupta, and X. Dong (Southern Illinois University, USA) ................................................................. 406

3. High Performance ATM Network Simulators
Min Song (Eastern Kentucky University, USA) , Mansoor Alam, and Uday Jarajapu (The University of Toledo, USA) ........................................................................................................... 412

4. Congestion Sensitive Algorithm for Point-to-Multipoint Multicast Congestion Control in ATM Networks
Hong Liu (Inktomi Corporation, USA), Enmin Song (University of California at San Francisco, USA), Reza Sotudeh (Hertfordshire University, UK), and Christopher Bailey (University of York, UK) ................. 417

SESSION 10B: COMPUTER PRACTICE & APPLICATIONS III

1. Integrating IT Assessment Applications with University Software Administrative Systems
Daniela Marghitu, Jinghai Ma and Jackson Lin (Auburn University, USA) ................................................................. 421

2. Extending Access Grid Conferencing to Heterogeneous End-Systems
Saisrikan Mudigonda, Narendra Dantu, Wei Shu, Min-You Wu (University of New Mexico, USA) ......................... 425

3. Music Retrieval Based on the Similarity of Melody
Yuka Nakagawa and Yasuaki Nakamura (Hiroshima City University, Japan) ............................................................. 429

4. A Bayesian Classification Approach to Personal Automotive Marketing Analysis
Jantima Polpinji and Chuleerat Jaurskuldee (Kasetsart University, Thailand), and Peter Haddawy (Asian Institute of Technology, Thailand) ........................................................................................................... 433
SESSION 10C: COMPUTER SECURITY II

1. **Basic Architecture for Modular Exponentiation over GF(2^m)**
   Hyun-Sung Kim (Kyungil University, Korea) and Kee-Young Yoo (Kyungpook National University, Korea) ........................................ 438

2. **Design of New Multiplier/Squarer using Montgomery Algorithm over GF(2^m)**
   Based on Cellular Automata
   Kyo-Min Ku (Daegu National University of Education, Korea), Kyeoung-Ju Ha (Kyungsan University, Korea), Hyun-Sung Kim, Kee-Young Yoo (Kyungpook National University, Korea) ................................................... 442

3. **Architecture for AB^3 Operation over GF(2^m) using Irreducible AOP and its Applications**
   Won-Ho Lee, Kee-Won Kim, Nam-Yeon Kim, Kee-Young Yoo (Kyungpook National University, Korea), Chang-Hoon Kim and Chun-Pyo Hong (Daegu University, Korea) ................................................... 446

4. **Implementation of Real Time Intelligent Intrusion Detection Systems**
   Bin Cong (California State University, USA) ......................................................................................................................... 450

SESSION 11A: COMPUTER PRACTICE & APPLICATIONS IV

1. **Zero-Temperature-Coefficient Biasing Point of a Fully-Depleted SOI MOSFET**
   Ashok K. Goel and Terrence H. Tan (Michigan Technological University, USA) ............................................................... 454

2. **TV-CONMAN: A System for the Management of Broadcast TV Content**
   S. R. Subramanya (University of Missouri-Rolla, USA) ........................................................................................................... 458

3. **A MultiAgent Architecture for Demand Forecasting in Electronic Commerce Supply Chain Systems**
   Wen-Bin Yu, James H. Graham (University of Louisville, USA) .............................................................................................. 462

4. **Automatic Generation of System Descriptions for Plant Supervisory Control Systems**
   Hideo Nakata, Satoshi Harauchi and Taizo Kojima (Mitsubishi Electric Corporation, Japan), and Yasuaki Nakamura (Hiroshima City University, Japan) ......................................................... 467

5. **Shot Boundary Detection of Video Sequence using Hierarchical Hidden Markov Models**
   Jong-Hyun Park, Soon-Young Park, Man-Won Bang, Seong-Jun Kang (Mokpo National University, S. Korea), and Wan-Hyun Cho (Chonnam National University, S. Korea) ........................................ 471

SESSION 11B: COMPUTER SECURITY III

1. **A Promising Labeling Scheme for On-the-fly Data Race Detection**
   Keum-Sook Ha (Kumi College, Korea), Eun-Kyung Ryu, Kee-Young Yoo (Kyungpook National University, Korea) .................... 475

2. **Extending the Compiler Functionality with Source Code Compression**
   Vladimir Zanev (Columbus State University, USA) .................................................................................................................. 479

3. **Mobile Agents over E-business**
   Ying-Hong Wang (The University of Aizu, Japan), Chen-An Wang, Wen-Nan Wang, and An-Cheng Cheng (Tamkang University, Taiwan) .................................................................................. 483

4. **An Alternative Routing Algorithms for the Pyramid Structures**
   Zhizhang Shen (Plymouth State College, USA) .......................................................................................................................... 487

5. **Distributed Object System with the Concurrent Use of CORBA and RMI**
   Haklin Kimm (East Stroudsburg University of Pennsylvania, USA) ............................................................................................ 491
SESSION 11C: COMPUTER PRACTICE & APPLICATIONS V

   Srikanth Krishnamurthy and Ibrahim Zeid (Northeastern University, USA) ............................................. 495

2. Software Simulation of Intelligence Routing Method
   Jun Dong (East China Normal University, China) ......................................................................................... 499

3. Web-based Intelligent Tutoring System
   Injoo Jeong (East-West University, USA), Martha W. Evens (Illinois Institute of Technology, USA) and
   Yeongkwun Kim (Western Illinois University, USA) .................................................................................... 503

4. Tool to Generate a Local Internet Weather Report
   Fabio Gonzalez, Nivedita Sumi Majumdar, Kim-Ip Lin and Dipankar Dasgupta (The University
   of Memphis, USA) .................................................................................................................................... 507

5. Modeling Optimizing Compiler Effects and Processes Communication in Evaluating
   Software Power Consumption
   H. Arafat Ali (Mansoura University, Egypt), Tahany A. Fergany (University of New Haven, USA) and
   Reda A. Ammar (University of Connecticut, USA) ..................................................................................... 511
