18th International Conference on Computers and Their Applications 2003

Honolulu, Hawaii, USA
26-28 March 2003

Editors:

N. Debnath

ISBN: 978-1-61839-549-8
# TECHNICAL PAPER INDEX

## 1. ALGORITHMS

**Comparison of Different Open Addressing Hashing Algorithms**  
Wenbin Luo and Gregory L. Heileman (University of New Mexico, USA)  .................................................. 1

**Secure Authenticated Key Exchange Protocol**  
Woo-Hun Kim, (Kyungpook National University, Korea), Hyun-Surg Kim (Kyungil University, Korea),  
Sung-Woon Lee, Kee-Young Yoo (Kyungpook National University, Korea) ........................................... 5

**Look-Up Table-based Montgomery Algorithm in GF(2^n) for Public-Key Cryptosystem**  
Nam-Yeon Kim and Kee-Young Yoo (Kyungpook National University, Korea) ........................................ 9

**A Cost Optimal Parallel Quicksort on CREW PRAM**  
Jie Liu (Western Oregon University, USA) and Jackson He (Intel Corporation, USA)  ......................... 13

**Routing Tables for Message Routing in Distributed Double Loop Networks**  
Dulal C. Kar (Texas A&M University - Corpus Christi, USA) and V. V. Bapeswara Rao (North Dakota State University, USA) ................................................................. 17

**Characterizing Open Addressing Hash Functions**  
Wenbin Luo and Gregory L. Heileman (University of New Mexico, USA) ........................................... 21

**A Frequency-Based Find Algorithm in Mobile Wireless Computing System**  
Seung-yun Kim and Waheed W. Smar (University of Dayton, USA) ...................................................... 25

**Courseware Broadcasting Tree of Second Generation CAI and Its Description Method with Fuzzy Genetic Technology**  
Fengxiang Zhang (Huazhong University of Science & Technology, China) and Yi Lan (Wuhan Star Sky Computer Co., China) ............................................................... 32
# A Genetic Algorithm Approach to Static Task Scheduling in a Reconfigurable Hardware Environment
S. M. Loo, B. Earl Wells, J. D. Winningham (University of Alabama in Huntsville, USA) ........................................... 36

# An Efficient Design and Implementation of DES and Triple-DES Algorithms
Parimal Patel and Chirag Parikh (The University of Texas at San Antonio, USA) ......................................................... 40

## 2. COMPUTER MODELING AND SIMULATION

### Simulation of Error Control Schemes for Wireless and Satellite ATM
Mansoor Alam and Balachandar Swami (The University of Toledo, USA) ................................................................. 44

### Quantized DCT on H26L Test Model
Yingjian He and Mohamed El-Sharkawy (Purdue School of Engineering and Technology, USA) ......................... 50

### A Domain Parser for a Generic Models Library
F. Bernardi and J. F. Santucci (University of Corsica, France) .............................................................................. 55

# NEURAL NETWORKS AND FUZZY LOGIC

### A New Approach to Modifying Fuzzy ARTMAP Systems
Mu-Chun Su, Wei-Zhe Lu (National Central University, Taiwan) and Chen-Chiung Hsieh (Institute for Information Industry, Taiwan) .......................................................... 59

### Software Reliability Analysis Using Parametric and Non-Parametric Methods
Sultan Aljahdali (George Mason University, USA), Alaa Sheta (ERI, Egypt), and Muhammad Habib (George Mason University, USA) ............................................................... 63

### Knowledge-Based and Data-Based Analysis of Biomedical Signals
M. E. Cohen (California State University, Fresno, USA and University of California, San Francisco, USA) and D. L. Hudson (University of California, San Francisco, USA) ...................................................... 67

## 3. COMPUTER NETWORKS

### A Delay Reduction Multicast Routing Protocol for Group-shared Ad Hoc Network
Ziiping Liu (Southeast Missouri State University, USA) and Bidyut Gupta (Southern Illinois University at Carbondale, USA) ................................................................................. 71

### A Robust Authenticated Key Agreement Protocol
Hyoung-Mok Lee, Eun-Kyung Ryu, Kee-Won Kim, Jae-Min Lee and Kee-Young Yoo (Kyung-Pook National University, Korea) ............................................................... 76

### Elastic Network Management for Flexible and Efficient Real-Time Communication
Koichi Kato, Hidenori Kobayashi, Nobuyuki Yamasaki and Yuichiro Aizai (Keio University, Japan) ...................... 80

### Fault Tolerance in Topological Optimization of Computer Networks
Mostafa Abd-El-Barr and Ahmer Zakir (King Fahd University of Petroleum and Minerals, Saudi Arabia) ........ 84

### Vehicle-Bus Interface with GMLAN for Data Collection
David C. Pheinis (Arizona State University, USA) and Jeffrey A. Tenney (Western Microsystems, USA) ........... 88

### Cluster-Based Communication in Mobile Ad-Hoc Networks
Mahesh Nanda and Bidyut Gupta (Southern Illinois University, USA) ................................................................. 93

### Fast Replacement Route Discovery in Location-Aided Mobile Ad Hoc Networks
Seungjin Park (Michigan Technological University, USA) ......................................................................................... 98
Efficient Power-aware Hybrid Routing using Zoning for Ad Hoc Network
Jong Ho Lee, Hee Yong Youn (Sungkyunkwan University, Korea) ........................................... 102

Cluster Computers and Grid Automata
M. Burgin (University of California, Los Angeles, USA) .......................................................... 106

Performance Evaluation of Six Wireless Ad Hoc Network Routing Protocols
Yik Hung Tam (Queen's University, Canada) and Wenyong Feng (Trent University, Canada) ....... 110

Protocols for Enhancing Gateway Dependability in Hybrid Mobile Ad Hoc Networks
Mohiuddin Ahmed and Son Dao (HRL Laboratories, LLC, USA) ........................................... 114

5. DATA COMMUNICATIONS

Capturing Communications Data for Development, Debugging, and Protocol Analysis
Kedar Deshpande and Dwight Egbert (University of Nevada, Reno, USA) ............................... 118

Efficient Even Distribution of Power Consumption in Wireless Sensor Networks
Ioan Raicu (Purdue University, USA) ......................................................................................... 122

Integrating Information Management with Business Process Control:
A Scenario-Based Approach
Liquin Huang and Kunihiko Higa (Tokyo Institute of Technology, Japan) ............................... 126

Foundations of a Generic Framework for Distributed Applications
Jawwad Shamsi and Hasina Abdu (University of Michigan-Dearborn, USA) ............................ 130

6. DATABASES AND INFORMATION SYSTEMS

Visualizing Query Structure
Dennis P. Groth (Indiana University School of Informatics, USA) ............................................ 134

Accelerating Multilevel Secure Database Queries using P-Tree Technology
Imad Rahal and William Perrizo (North Dakota State University, USA) ............................... 139

ERDraw: An XML-based ER-diagram Drawing and Translation Tool
Shuzun Xu (Wayne State University, USA), Yu Li (Micro Research Ins. Inc., USA) and Shiyong Lu
(Wayne State University, USA) ................................................................................................. 143

Optimal Construction of Multi-Dimensional Indexes in Time-Series Databases:
A Physical Database Design Approach
Sang-Wook Kim, Jin-Ho Kim, Byung-Ill Han (Kangwon National University, Korea) and Sanghyun
Park (Pohang University of Science and Technology, Korea) .................................................. 147

Finding Predictive Precursors in Time Series Data
William Perrizo and W. Jockheck (North Dakota State University, USA) ............................... 151

Hierarchical Classification for Multiple, Distributed Web Databases
Hui Yang and Minjie Zhang (University of Wollongong, Australia) ......................................... 155

A System for Presenting Background Scenes of Karaoke using an Active Database System
Tsutomura Terada, Masahiko Tsukamoto, Shojiro Nishio (Osaka University, Japan) .................. 160

DPC-I: An Efficient Algorithm to Find the Large Itemset of a Specific Size
Lee-Wen Huang and Ye-In Chang (National Sun Yat-Sen University, Taiwan) ......................... 166

Integrating Query Processing and Data Mining in Relational DBMSs
Qiang Ding, William Perrizo, Victor Shi (North Dakota State University, USA) and Kirk Scott
(University of Alaska, USA) ....................................................................................................... 170
An Adaptive Query Processing Method according to System Environments in Database Broadcasting Systems
M. Kashita, T. Terada, T. Haru, M. Tsukamoto, S. Nishio (Osaka University, Japan) .......................... 174

XIQS: An XML Indexing and Query System
Shubhastree Venkatesh and Gongzhu Hu (Central Michigan University, USA) ................................. 180

Incorporating Function Ontologies into the Integration of Data Sources
Hsin-Jen Tsai, Jian Xu, Sa Lin and L. L. Miller (Iowa State University, USA) ........................................ 184

Spatial Data Structure for Version Management of Engineering Drawings
Yasuaki Nakamura and Hiroyuki Dekihara (Hiroshima City University, Japan) ..................................... 188

Parallel Retrieval of Complex Object Index for Complex Queries
Takeshi Horie (Fuku University, Japan), Kazuhiro Ogura (Toshiba Tec Co., Japan), Tatsuo Tsuji,
Ken Higuchi, Teruhisa Hochin (Fukui University, Japan) ................................................................. 193

A Proposed Framework for Rough Set based Data Mining
Hoda Waguih (Sadat Academy for Management Sciences, Egypt) and Ahmed Rafea (American
University in Cairo, Egypt) .......................................................... 198

7. OPERATING AND DISTRIBUTED SYSTEMS

An Efficient Method for Irregular Acess to Large Arrays in Jukebox System
Akiyoshi Wakatani (Kan University, Japan) .................................................................................. 204

Deadlock Detection in Distributed Systems
Dominique Ambroise, Brigitte Rozoy (University of Paris XI, France) and Jean Saquet (University
of Caen, France) ................................................................................................................................. 210

Optimal Boundary Control of a Tracking Problem for a Parabolic Distributed System
using Hierarchical Fuzzy Control and Evolutionary Algorithms
R. J. Stonier, M. J. Drumm and J. Bell (Central Queensland University, Australia) .............................. 214

Analysis of Software Remaining Execution Time
Sarah Tasneem, Reda Ammar, Howard Sholl (University of Connecticut, USA) .............................. 219

The Bidding Method: A General Distributed Method for Designing Approximation
Algorithms for NP-Complete Problems
Fouad B. Chedd (Notre Dame University, Lebanon) ............................................................................. 224

A Task Migration Scheme for High Performance Real-Time Cluster System
Makoto Suzuki, Hidenori Kobayashi, Nobuyuki Yamashita and Yuichiro Anzai (Keio University, Japan) .... 228

8. REAL-TIME SYSTEMS AND COMPUTING

Scheduling Imprecise Computations with Wind-up Parts
Hidenori Kobayashi, Nobuyuki Yamashita, Yuichiro Anzai (Keio University, Japan) ............................ 232

Extensible Real-Time Data Dissemination on Channel-Based Reflective Memory
Kazuya Katsunai, Hidenori Kobayashi, Nobuyuki Yamashita and Yuichiro Anzai (Keio University, Japan) 236

Adaptive Channel Allocation for Large-Scale Streaming Content Delivery Systems
Yun Zhang, Min-Yeu Wu, and Wei Shu (The University of New Mexico, USA) ................................. 240

Scheduling Bounded Predictable (BP) and Soft Aperiodic Tasks
Jihyun Lee, Hae Sun K. Lee (University of Texas Permian Basin, USA) and Narayan C. Debnath
(Winona State University, USA) ........................................................................................................... 244
9. SOFTWARE ENGINEERING AND APPLICATIONS

A Survey and Analysis of Existing Constraint Combination Formalisms and Their Application to Software Systems Having Client-Server Relationships
Kenneth G. Ricks and D. Jeff Jackson (The University of Alabama, USA) and B. Earl Wells (The University of Alabama in Huntsville, USA) ................................................................. 248

A Survey of Middleware
Toni A. Bishop and Ramesh K. Iyer (Towson University, USA) ................................................................. 254

Complexity of Algorithms and Software Metrics
M. Burgin (University of California, Los Angeles, USA) and N. Debnath (Winona State University, USA) .. 259

Stratified Programming: Towards a New Paradigm for Software Development
Adrian Pasculescu (Alpas Solutions, Canada) and Sergiu Dascaliu (University of Nevada Reno, USA) .... 263

More Accurate Semantics Defining Constraint Combination for Software Systems Having Client-Server Relationships
Kenneth G. Ricks and D. Jeff Jackson (The University of Alabama, USA), and B. Earl Wells (The University of Alabama in Huntsville, USA) ................................................................. 269

Agent-Based Stock Trader
Xin Feng (University of North Dakota, USA) and Chang-Hyun Jo (California State University Fullerton, USA) ........................................................................................................... 275

Software Metrics from the Algorithmic Perspective
N. Debnath (Winona State University, USA) and M. Burgin (University of California, Los Angeles, USA) .. 279

10. COMPUTER ARCHITECTURE AND VLSI

New AB<sup>2</sup> Multiplier over GF(2<sup>m</sup>) using Cellular Automata
Kyo-Min Ku (Daegu National University of Education, Korea), Kyeoong-Ju Ha (Kyungsan University, Korea), Hyun-Sung Kim (Kyungil University, Korea) and Kee-Young Yoo (Kyungpook National University, Korea) ................................................................. 283

Nonlinear Discrimination Using Support Vector Machine
A. M. Shawrati Ali (Monash University, Australia), Morshed U. Chowdhury (Deakin University, Australia) and S. R. Subramanya (University of Missouri-Rolla, USA) ................................................................. 287

An Analytical Comparison of Distributed and Hierarchical Web-Caching Architectures
R. T. Hurley, W. Feng, and B. Y. Li (Trent University, Canada) ................................................................. 291

Design Considerations of Implementing a Superscalar CPU in FPGA
Parimal Patel and Venkataramana Reddy (The University of Texas at San Antonio, USA) ................................................................. 296

Improving Branch Prediction Performance by Removing Temporally Close Aliases
Wei-Ming Lin (The University of Texas at San Antonio, USA) and An-Yi Yang (Leadtek Inc., Taiwan) ...... 300

Advanced Branch Prediction Based on a Generalized Predictor
Wei-Ming Lin and Ramu Madhavaram (The University of Texas at San Antonio, USA) ................................................................. 304

11. REAL-TIME SYSTEMS RELIABILITY AND SECURITY

On the Real-Time Job Management in Dynamic Priority Scheduling under the Stack Resource Policy
Sangchul Han, Moonju Park and Yookun Cho (Seoul National University, Korea) ................................................................. 308

Protecting Secret Keys with Blind Computation Service Based on Discrete Logarithm
Moonsang Kwon and Yookun Cho (Seoul National University) ................................................................. 312
A Priority Assignment Method for Earliest Deadline Scheduling  
Moonju Park (LG Electronics, Inc., Korea), Jiman Hong (Gman Tech Inc., Korea) and Sung Y. Shin  
(South Dakota State University, USA) ................................................................. 316

Avoiding Redundancies and Conflicts in Security Protocols  
Ibrahim S. Abdullah, E. H. Sibley and Sultan Aljashdali (George Mason University, USA) ................. 321

Memory Profiling Checkpoint  
Sangsu Kim, Jiman Hong, Yookun Cho (Seoul National University, Korea) and Sung Y. Shin  
(South Dakota State University, USA) ........................................................................ 325

A Framework for Building Secure Real-Time Systems  
Charlie Y. Shim (South Dakota State University, USA), Chang Can Sung (Indiana University Southeast, USA) and Ali Salehnia (South Dakota State University, USA) ..................................................... 329

12. IMAGE PROCESSING

A Programmable Logic-Based Implementation of Ultra-Fast Parallel Binary Image Morphological Operations  
Songpol Ongwattanakul, Phaisit Chewputtanagul, David J. Jackson, Kenneth G. Ricks (The University of Alabama, USA) ........................................................................................................ 333

Implementation and Performance Evaluation of Intel V TUNE Image Processing Functions in the MATLAB Environment  
Phaisit Chewputtanagul, David J. Jackson, Kenneth G. Ricks (The University of Alabama, USA) .......... 339

Fabric Defect Detection Using a GA Tuned Wavelet Filter  
Warren Jasper, Jeffrey A. Joines and Joe Brenzovich (North Carolina State University, USA) .............. 345

Some Experiments on Peer Group Pixels Based Spatial Classifier  
Chih-Cheng Hung (Southern Polytechnic State University, USA and Alabama A&M University, USA), Tommy Coleman (Alabama A&M University, USA), and Kai Qian (Southern Polytechnic State University, USA) ................................................................. 351

Error Recovery in Facsimile without Retransmission  
Hyunju Kim and Abdou Yousef (The George Washington University, USA) ..................................... 355

13. PARALLEL PROCESSING

BLAS on the Trident Processor: Implementation and Performance Evaluation  
Mostafa I. Soliman and Stanislav G. Sedukhin (The University of Aizu, Japan) ..................................... 359

Global Positioning versus Classic Relation Graph in Human Like Processing Machines  
Abey Abraham Cohen (University of Bar-Ilan, Israel) ........................................................................ 365

A Scalable Three-Dimensional Domain Decomposition Mapping Technique Using MPI  
Saleh H. Al-Sharaeh (King Fahd University of Petroleum and Minerals, Saudi Arabia) and  
B. Earl Wells (University of Alabama in Huntsville, USA) ................................................................. 369

Load Balancing Strategies for Multi-Block Overset Grid Applications  
M. J. Djomehri, R. Biswas (NASA Ames Research Center, USA), and N. Lopez-Benitez  
(Texas Tech University, USA) ......................................................................................... 373
14. NATURAL LANGUAGES AND APPLICATIONS

Knowledge Acquisition and Text Retrieval Issues for an Intelligent Universal Situational Awareness (USA) System
Stuart H. Rubin (SPAWAR Systems Center, USA) and Gordon K. Lee (San Diego State University, USA) ................................................................. 379

Context-Based Word Prediction and Classification
Hisham Al-Mubaid (University of Houston - Clear Lake, USA) ................................................................. 384

Ontology-based Text Summarization for Business News Articles
Chia-Wei Wu and Chao-Lin Liu (National Chengchi University, Taiwan) .................................................. 389

15. PROGRAMMING LANGUAGES AND COMPILERS

A Compiler Design for the Agent-Based Programming Language
Wei Zhao (University of North Dakota, USA) and Chang-Hyun Jo (California State University Fullerton, USA) ................................................................. 393

Deriving Different Views of an Interactive Double-Ended Bounded Queue
Walter Dosch (University of Lübeck, Germany) .................................................................................. 397

A Restaurant Finder using Belief-Desire-Intention Agent Model and Java Technology
Dongqing Lin, Thomas P. Wiggen (University of North Dakota, USA) and Chang-Hyun Jo (California State University Fullerton, USA) .................................................. 404

16. MULTIMEDIA APPLICATIONS

Application-Specific Data Cache Systems
Jung-Hoon Lee (Yonsei University, Korea), Gi-Ho Park (Samsung Electronics Co., Ltd., Korea) and Shin-Dug Kim (Yonsei University, Korea) ................................................................. 408

A Support System for Multimedia Management in Teleteaching Scenarios
Freimut Bodendorf (University of Erlangen-Nuremberg, Germany) ................................................................. 413

A Cooperative Distributed Computing Concept to Improve the Quality of Streaming Multimedia Applications over the Internet
Kalamullah Raml, Fransiskus A. Ekadiyanto (Universitet Duisburg-Essen, Germany, Universitas Indonesia, Indonesia), Axel Hunger (Universitet Duisburg-Essen, Germany) ................................................................. 417

Dynamic Feedback and Elastic Scheduling Model for Flexible Workload Management
Yu Chen and Qionghai Dai (Tsinghua University, China) .................................................................................. 421

Development of a Network Load Balancing Platform for Streaming Multimedia over a Multicast High-Speed Network
Michael Hempel, Hamid Sharif and Debasis Talukdar (University of Nebraska-Lincoln, USA) ................................................................. 426

A Vision for a Multimedia Knowledge Management Framework
Wei Dai, Morshed U. Chowdhury, Daniel Prager, M. G. Mahbub Alam (Deakin University, Australia) ........................................................................ 430

17. WEB TECHNOLOGY, ENVIRONMENT AND APPLICATIONS

Develop Web Applications with XML and Java
Tim Hill and Jiang B. Liu (Bradley University, USA) .................................................................................. 434

Query Processing the Heterogeneous Information Sources using Ontology-based Approach
Ngamnij Arch-int (Chulalongkorn University, Thailand), Yuefeng Li and Paul Roe (Queensland University of Technology, Australia), and Peraphon Sophatsathit (Chulalongkorn University, Thailand) ................................................................. 438
A Brief Study on Web Caching Applied to Mobile Web Applications
Gail Kalbfleisch, William Deckert, Ranette Halverson and Nelson L. Passos (Midwestern State
University, USA) ........................................................................................................... 442

Scalable Contents-based Web Cluster Server with Self-Processing Web Switch
Young hwan Kim (Korea Electronics Technology Institute, Korea), Hee Yong Youn (Sungkyunkwan
University, Korea), Hyoong Su Lee, Chang Won Park (Korea Electronics Technology Institute, Korea) .... 446

Modeling Volunteer Computing Grid on the Web by Socially Intelligent Agents
Wei Li (Central Queensland University, Australia) and Xinghao Yu (RMIT University, Australia) .......... 450

Towards Generalized Optimal Cache Proxy Placement
Shu Zhou, Min-You Wu, and Wei Shu (The University of New Mexico, USA) ........................................ 456

18. COMPUTING PRACTICES AND APPLICATIONS

Translation of Research Models into Clinical Practice
D. L. Hudson (University of California, San Francisco) and M. E. Cohen (University of California,
San Francisco and California State University, Fresno, USA) .................................................. 460

A Play Script Editing and Playing System Based on XML
Shin Woo Kim, Sung Eun Park, Ki Ho Shin (Dongguk University, Korea), Il Kyeun Ra (University
of Colorado at Denver, USA), and Yong Kyu Lee (Dongguk University, Korea)                        464

A Combinatorial Approach to Hyperbolic Geometry as a New Perspective for
Computer Science and Technology
Maurice Margenstern (University of Metz, France) ........................................................................ 468

Iterative Methods for Solving Linear Systems of Equations on FPGA-Based Machines
Xizhen Xu and Sotirios G. Zavvaras (New Jersey Institute of Technology, USA) .......................... 472

A Data Mining Framework for Target Marketing
Daniela Stan Reicu (DePaul University, USA) ................................................................................ 476

WORM, a Visualisation Engine for the Inner Structure of Racing
Amer Salman, Emiliano Rodriguez Nuesch and Rula Salman (Thames Valley University, UK) .......... 480

Content-Based Analysis of Post-Tonal Music
Wai Man Szeto, Man Hon Wong, Dennis Ming Yiu Wu, and Eos Hui Tung Cheng (The Chinese
University of Hong Kong, Hong Kong) ..................................................................................... 486
