Comprehensive Quality by Design in Pharmaceutical Development and Manufacture

Topical Conference at the 2011 AIChE Annual Meeting

Minneapolis, Minnesota, USA
16-21 October 2011

ISBN: 978-1-61839-584-9
# TABLE OF CONTENTS

Quality by Design (QbD) Opportunities, Challenges and Future Direction .................................................. 1  
   Moheb Nasr

QbD - It's Not Just for Breakfast Anymore ........................................................................................................ 2  
   Paul C. Collins

Challenges and Opportunities for Process Systems Engineering Approaches to QbD and Design Space .......... 3  
   G. V. Reklaitis

Evolution of QbD From a Drug Substance Scientist's Perspective ............................................................... N/A  
   Timothy J. Watson

Practical Applications of QbD for a Parenteral Drug Product ......................................................................... 4  
   Nancy J. Harper, Venkat Koganti, Gautam R. Ranade

Rational Design and Scale-up of Batch Lubrication Processes for Immediate Release Formulations ............... 7  
   Joseph Kushner IV, Daniel O. Blackwood, Bruce C. Macdonald, Mark Polizzi, Francis M. Moore, Bruno C. Hancock

Automation and Control of Drug-On-Demand Technology .......................................................................... 8  
   Laura Hirshfield, Arun Giridhar, Gintaras V. Reklaitis, Venkat Venkatasubramanian, Michael T. Harris

Dynamic Simulation of the Dissolution of Pharmaceutical Tablet Integrated with Continuous Manufacturing Process ................................................................................................................................................................................................. 9  
   Fani Boukouvala, Lukasz Mioduszewski, Rohit Ramachandran, Mariam G. Ierapetritou

Innovative Techniques for Planning Experiments Across Multiple Unit Operations ...................................... 10  
   Kelly Canter, Leonard Perry

Real-Time Process Management and Knowledge Management for Continuous Pharmaceutical Manufacturing .................................................................................................................................................................................................................. 11  
   Girish Joglekar, Arun Giridhar, Gintaras V. Reklaitis, Venkat Venkatasubramanian

Linkage of Critical Quality Attributes Across a Multi-Unit Operation Process Train Using a High-Shear Wet Granulation Design of Experiment ................................................................. 12  
   Diana S. Hou, Julianne Farabaugh, Gina Thompson, David Lavrich

An Integrated Quality by Design (QbD) Approach towards Prediction of Protein Degradation In Heated Mixing Vessels by Computational Fluid Dynamics ................................................................................. 13  
   Marco Iannuccelli, Siegfried Adam, Daniele Suzzi, Johannes G. Khinast

Applications (and Challenges) of Utilizing QbD, DOE and Other Process Tools In the Transfer of a Sterile Lyophilized Product From One Site to Another - Practical Perspectives ................................................................. 15  
   Daniel Kim, Manish Sharma, David Unger, Stelios Tsinontides

Dissolution of Disintegrating Solid Dosage Forms In a Modified Dissolution Testing Apparatus 2 .................................................................................................................................................................................................................................................................................. 16  
   Shrutiben R. Parekh, Piero M. Armenante

QbD – More Than Just An Acronym ................................................................................................................... 18  
   Sean E. Mackey

Rethinking Assessment of Raw Material Variability In Drug Product Development Experiments ..................... N/A  
   Stephen L. Conway

Implementing Quality by Design in Pharmaceutical Salt Selection ............................................................... 19  
   Jeremy Merritt, Shekhar Viswanath, Gregory Stephenson

QbD Principles for Packaging Design and Stability: A Regulatory Perspective ............................................. 21  
   Sharmista Chatterjee

Stability In a QbD Framework .......................................................................................................................... 22  
   Theodora Kourti

Science-Based Stability and Packaging Development Under the Umbrella of QbD ......................................... 23  
   Rey Chen

Using QbD to Assess the Factors That Affect Stability and Packaging ........................................................... 25  
   Stephanie Krogmeier, Kevin J. Bittorf

Designing Pharmaceutical Packaging Using a Product-Packaging Stability Modeling .................................... 26  
   Seung-Yil Yoon

Implementation of QbD Paradigm In Sterile Dosage Form Packaging – Some Practical Considerations ................................................................................................................................................................................................................................................................. 27  
   Hemant N. Joshi

Application of Design Space Mapping Accounting for Model Uncertainty and Common Cause Variability In Drug Substance Development ........................................................................................................................................................................................................................................................................ 28  
   Shankar Vaidyarmanan, Isabel Figueroa, Sze Wing Wong, Shekhar Viswanath
Design Space Development for the Final Recrystallization Process for Axitinib, a Complex Solvating API ................................................................. 29
  Steven M. Guiness, Brian P. Chekal, Gregory S. Steeno
Impurity Fate Mapping In the Development of Pazopanib ................................................................. 30
  Michael A. McGuire
A Model-Centric Solution to Link Content Uniformity Targets with API Particle Size Specifications and Process for a QbD Exercise ................................................................. 31
  Salvador Garcia-Muñoz, Wei Li Yu, Mark A. Pinto, Sean K. Bermingham
  Huiqian Wu, Maury White, Mansour A. Khan
A QbD Approach to Improve Tablet Coating Uniformity ................................................................. 47
  Anu Dubey, Fani Boukouvala, Golshid Keyvan, Richard Hsia, Kostas Saranteas, Dean Brone, Tushar Misra, Maranithi Ierapetritou, Fernando J. Muzzio
FDA Perspective on QbD for Analytical Methods ................................................................. 48
  Elaine Morefield
Co-Operative Implementation of Quality-by-Design Based Experimentation Between Product Development and Analytical R&D Laboratories - A Recipe for Success! ................................................................. N/A
  Graham Shelver
Quality by Design for Analytical Methods In Early Development ................................................................. 49
  Jackson Pellett
Examples of Applying Quality by Design Principles to Analytical Methods ................................................................. 50
  Kimber Barnett, Timothy Graul, Melissa Hanna-Brown
Quality by Design for Particle Size Analysis ......................................................................................... 51
  Zhigang Sun
Setting CQA Acceptance Criteria for a Quality by Design Approach to Development ................................................................. N/A
  Paul Mochnik
Progress In Quality by Design Implementation In Fda's Office of New Drug Quality Assessment ................................................................. 52
  Christine Moore
QbD Approaches for Continuous Manufacturing ......................................................................................... 53
  Fernando J. Muzzio
Experiences with Quality by Design Filings and Prior Approval Inspections ................................................................. 54
  Chris Balducci
Quality by Design for Generic Drugs ................................................................................................. 55
  Yingyu Peng
To Be Updated .......................................................................................................................... N/A
  Stefanie Pluschkel
QUALITY by Design (QBD), Biopharmaceutical Manufacture ......................................................................................... 56
  Kurt Brorson
Taking PAT From the Laboratory to Commercial Manufacturing ......................................................................................... 58
  Mark A. Lapack, Stephen B. Jeffery, Steven J. Doherty, Joseph R. Martinelli, Christopher L. Burcham
Combining Microwave Resonance Technology to Multivariate Data Analysis as a Novel PAT Tool to Improve Process Understanding In Fluid Bed Granulation ......................................................................................... 59
  Vera Lourenco, Thorsten Herdling, Gabriele Reich, Jose Cardoso Menezes, Dirk Lochmann, Jens Schevitz
PAT Application and Validation of Online Particle Sizing Measurement for Controlling a Critical Quality Attribute ................................................................................................. 60
  Kevin J. Bittorf
Experimental and Theoretical Study of Lyophilization From a Packing of Vials: Using of Tunable Diode Laser Absorption Spectroscopy (TDLAS) for Process Monitoring and Model Calibration ................................................................................................. 61
  Pavol Rajniak, Cassandra Milkoovich, Leon Farber
Optical Coherence Tomography: A New PAT-Tool for Fast and Non-Destructive Analysis of Tablet Coating Quality ......................................................................................... 63
  Daniel M. Koller, Christoph Schinwald, Otto Scheibelhofer, Michael Leitner, Johannes G. Khinast
QbD-Driven PAT Applications for Precision Spray-Coating Development and Control ................................................................................................. 64
  Charles Miller, Bruce T. Thompson, Fan Zhang-Plasket, Patrick T. Schilling, John Higgins, Gert Thuraus, Mano Ramasamy, Eric Ahuja
Process Analytical Technology for Recombinant Pandemic Flu Vaccines: Viral Ultrastructure, Aggregation, and Binding ................................................................................................. 65
  De-Hao Tsai, Daniel Lipin, Suvajyoti Guha, Jeremy Feldhyum, Kenneth D. Cole, Kurt A. Brorson, Michael Zachariah, Michael J. Tarlov, Anton P. J. Middelberg, Leonard F. Pease III
Caption for the image: This page lists various topics and authors of contributions to a technical document, possibly related to biopharmaceuticals and quality by design. The topics range from modeling and analysis to practical applications of quality by design in different processes and scales. Authors are listed at the bottom, indicating their involvement in specific sections.
