2011 34th IEEE Software Engineering Workshop

(SEW 2011)

Limerick, Ireland
20 – 21 June 2011
2011 34th IEEE Software Engineering Workshop
SEW 2011

Table of Contents

Foreword ...................................................................................................................................................................viii
Conference Committee Members and Reviewers ...........................................................................................ix

Requirements Specification & Analysis 1
Architectural Models of Ambient-PRISMA in Channel Ambient Calculus ............................................................1
  Nour Ali and Emilio Tuosto
An ASSL Approach to Handling Uncertainty in Self-adaptive Systems ..............................................................11
  Emil Vassev, Mike Hinchey, Dharini Balasubramaniam, and Simon Dobson
Language for Use Case Specification ..................................................................................................................19
  Dušan Savić, Ilija Antović, Siniša Vlajić, Vojislav Stanojević, and Miloš Milić
An Approach to Synchronize UML-Based Design Components for Model-Driven Protocol Development ................27
  Prabhu Shankar Kaliappan and Hartmut Koenig

Security
Offline Validation of Firewalls .........................................................................................................................36
  Stephan Windmüller
Availability Assessment of Embedded Systems with Security Vulnerabilities .......................................................42
  Andrew J. Kornecki, Janusz Zalewski, and Wendy F. Stevenson

Software Quality Assurance 1
Metrics and Antipatterns for Software Quality Evaluation .................................................................................48
  Francesca Arcelli Fontana and Stefano Maggioni
  Markus Doedt and Bernhard Steffen
Special Session

“Simplification through Change of Perspective”

Tiziana Margaria and Bernhard Steffen

A Change of Perspective Yields Formal Analysis

R. Grosu, F. Fenton, S. Smolka, and E. Bartocci

Constraint-oriented Variability Modeling

Ina Schaefer, Anna-Lena Lamprecht, and Tiziana Margaria

Simplified Validation of Emergent Systems through Automata Learning-Based Testing

Bernhard Steffen and Johannes Neubauer

Software Development and Maintenance

Implementing Software Effort Estimation in a Medium-sized Company

João Carlos Cunha, Sérgio Cruz, Marco Costa, Ana Rita Rodrigues, and Marco Vieira

Software Maintenance through Supervisory Control

Benoit Gaudin and Alessandra Bagnato

Energy Efficiency with Runtime Models for Energy-aware Embedded Systems

Zdravko Karakehayov and Emil Vashev

Software Reuse

Integrating GQM and Data Warehousing for the Definition of Software Reuse Metrics

Marco Vieira, Henrique Madeira, Sérgio Cruz, Marco Costa, and João Carlos Cunha

Towards a Framework for Weapon Control Systems

Kevin P. Adams and Denis Gračanin

Software Quality Assurance 2

Variability and Rigour in Service Computing Engineering

Maurice H. ter Beek, Stefania Gnesi, Alessandro Fantechi, and José L. Fiadeiro

Applying the Test Template Framework to Aerospace Software

Maximiliano Cristià, Pablo Albertengo, Claudia Frydman, Brian Plüss, and Pablo Rodriguez Monetti

Toward Intelligent Software Defect Detection - Learning Software Defects by Example

Markland J. Benson
