</table>
All Health Care is Not Local: An Evaluation of the Distribution of Emergency Department Care Delivered in Indianapolis

Workflow Concerns and Workarounds of Readers in an Urban Safety Net Telereferential Screening Study

Development of a Workflow Integration Survey (WIS) for Implementing Computerized Clinical Decision Support

An Evaluation of the UMLS in Representing Corpus Derived Clinical Concepts

Testing Three Problem List Terminologies in a Simulated Data Entry Environment

Understanding the Work of Pediatric Inpatient Medicine Teams: Implications for Information System Requirements

Critical Finding Capture in the Impression Section of Radiology Reports

The EpiCanvas Infectious Disease Weather Map: An Interactive Visual Exploration of Temporal Correlations

NeuroLOG: Sharing Neuroimaging Data Using an Ontology-based Federated Approach

Visual Clustering Analysis in Support of Clinical Decision Intelligence

Using Digital Crumbs from an Electronic Health Record to Identify, Study and Improve Health Care Teams

Automatic Computation of CHA2DS2-VASc Score: Information Extraction from Clinical Texts for Thromboembolism Risk Assessment

Toward a Two-Tier Clinical Warning System for Hospitalized Patients

GEM at 10: A Decade's Experience with the Guideline Elements Model

Auditing Hierarchical Cycles to Locate Other Inconsistencies in the UMLS

An Empirical Study of Opinion Leader Effects on Mobile Information Technology Adoption in Healthcare

Using a Unified Usability Framework to Dramatically Improve the Usability of an EMR Module

Sharing is Caring, But Not Error Free: Transparency of Granular Controls for Sharing Personal Health Information in Social Networks

Evaluation of Semantic-Based Information Retrieval Methods in the Autism Phenotype Domain

Development and Early Usage Patterns of a Consumer-Facing Family Health History Tool

An Analysis and Recommendations for Multidisciplinary Computerized Handoff Applications in Hospitals

Linking Supermarket Sales Data To Nutritional Information: An Informatics Feasibility Study

A DEPediation: A Scalable and Standardized Knowledge Base of Adverse Drug Events Using Semantic Web Technology

Evaluating De Novo Locus-Disease Discoveries in GWAS Using the Signal-to-Noise Ratio

Improving Predictions in Imbalanced Data Using Pairwise Expanded Logistic Regression

Graphical Methods for Reducing, Visualizing and Analyzing Large Data Sets Using Hierarchical Terminologies

Health Information Exchange, Health Information Technology Use, and Hospital Readmission Rates

A Pilot Prospective Study of Organ-at-Risk Definition Using Target Contour Testing/Instructional Computer Software (TaCTICS), a Training and Evaluation Platform for Radiotherapy Target Delineation

Integration of Heterogeneous Clinical Decision Support Systems and Their Knowledge Sets: Feasibility Study with Drug-Drug Interaction Alerts

Use of Topic Modeling for Recommending Relevant Education Material to Diabetic Patients
The Knowledge Program: An Innovative, Unique Comprehensive Electronic Data Capture System and Warehouse ................................................................. 683
Irene Kattan, Michaele Speck, Chris Dopfer, John Urchek, Kay Bielawski, Cheryl Dunphy, Lara Jeli, Charles Rae, Amandra Parchman

Development and Evaluation of a Prototype Search Engine to Meet Public Health Information Needs ................................................................. 693
Jonathan W. Keesing, Anne M. Turner, Eileen E. Allen, Steven A. Rowe, Jacqueline A. Merrill, Elizabeth D. Liddy, Howard R. Turtle

A Surveillance Tool to Support Quality Assurance and Research in Personalized Medicine ................................................................. 701
Naqi A. Khan, Josh F. Peterson

Volume 2

Representation of Nursing Terminologies in UMLS ................................................................. 709
Tae Youn Kim, Amy Coenen, Nicholas Hardiker, Claudia C. Bartz

Using UMLS Lexical Resources to Disambiguate Abbreviations in Clinical Text ................................................................. 715
Youngjun Kim, John Hurdle, Stéphane M. Meystre

Anomaly and Signature Filtering Improve Classifier Performance For Detection of Suspicious Access To EHRs ................................................................. 723
Jihoon Kim, Janice M. Grillo, Aziz A. Boxwala, Xuanqiang Jiang, Rose B. Mandelbaum, Bhakti A. Patel, Debra Mikels, Staal A. Vinterbo, Lucia Ohno-Machado

Supporting Cancer Patients' Unanchored Health Information Management with Mobile Technology ................................................................. 732
Predrag Klasnja, Andrea Hartzler, Christopher Powell, Wanda Pratt

Characteristics Associated with Hospital Health IT Vendor Switching and Dropping ................................................................. 742
Eric J. Lammer, Kai Zheng

SEACOIN - An Investigative Tool for Biomedical Informatics Researchers ................................................................. 750
Eva Lee, Hae-Rin Lee, Alexander Quarshie

Alignment and Clustering of Breast Cancer Patients by Longitudinal Treatment History ................................................................. 760
Wei-Nichie Lee, Will Bridewell, Amar K. Das

Determining the Reasons for Medication Prescriptions in the EHR Using Knowledge and Natural Language Processing ................................................................. 768
Ying Li, Hojjat Salmasian, Rave Harpaz, Herbert Chase, Carol Friedman

Cross-mapping Clinical Notes Between Hospitals: An Application of the LOINC Document Ontology ................................................................. 777
Li Li, C. Paul Morey, David Baeroto

Complex Disease Networks of Trait-Associated SNPs Unveiled by Information Theory ................................................................. 784
Haiqun Li, Younghee Lee, Jianrong Li, James L. Chen, Ellen Rebmam, Kelly Regan, Yves L. Lussier

Data Quality and Fitness for Purpose of Routinely Collected Data - A General Practice Case Study from an Electronic Practice-based Research Network (ePRBN) ................................................................................................. 785
Siuw-Teng Liu, Jane Taggart, Sarah Dennis, Anthony Yeo

Assessing the Usability of a Telemedicine-based Medication Delivery Unit for Older Adults through Inspection Methods ................................................................. 795
Investigating the Semantic Interoperability of Laboratory Data Exchanged Using LOINC Codes in Three Large Institutions ................................................................................................. 805
Ming-Chin Lin, Daniel J. Vreeman, Stanley M. Huff

Modeling Drug Exposure Data in Electronic Medical Records: An Application to Warfarin ................................................................. 815
Mei Liu, Min Jiang, Vivian K. Kavai, Charles M. Stein, Dan M. Roden, Joshua C. Denny, Huajiu Xu

Beyond Regional Health Information Exchange in China: A Practicable and Industrial-strength Approach ................................................................. 824
Shengqing Bi, Baoxiao Zhou, Gaotong Xie, Jing Mei, Haifeng Liu, Changhong Liu, Liang Qi

Mapping Annotations with Textual Evidence Using an scLDA Model ................................................................................................. 834
Bo Jin, Vicky Chen, Lujia Chen, Xinghua Lu

Extracting Temporal Constraints from Clinical Research Eligibility Criteria Using Conditional Random Fields ................................................................................................. 843
Zhihua Liao, Stephen B. Johnson, Albert M. Lai, Chunhua Weng

Patient Safety Problems Associated with Healthcare Information Technology: An Analysis of Adverse Events Reported to the US Food and Drug Administration ................................................................................................. 853
Farah Magarbi, Mei-Sing Ong, William Runciman, Enrico Coiera

Role Prediction Using Electronic Medical Record System Audits ................................................................................................. 858
Wen Zhang, Carl A. Gunter, David Liebovitz, Jian Tian, Bradley Malin

Early Prediction of the Response of Breast Tumors to Neoadjuvant Chemotherapy Using Quantitative MRI and Machine Learning ................................................................................................. 868
Subramani Mani, Yukun Chen, Lori R. Arlinghaus, Xia Li, A. Bapo Chakravarthy, Sandeep R. Bhave

Medication Reconciliation: Work Domain Ontology, Prototype Development, and a Predictive Model ................................................................................................. 878
Eliz Markowitz, Elmer Y. Bernstam, Jorge Hershkovitz, Jiajie Zhang, Ben Shneiderman, Catherine Plaisant, Todd R. Johnson

A Prototype Knowledge Base and SMART App to Facilitate Organization of Patient Medications by Clinical Problems ................................................................................................. 888
Allison B. McCoy, Adam Wright, Archana Laxmisin, Harddeep Singh, Dean F. Sittig

Knowledge-based Method for Determining the Meaning of Ambiguous Biomedical Terms Using Information Content Measures of Similarity ................................................................................................. 895
Bridge T. McIntee, Ted Pedersen, Ying Liu, Genevieve B. Melton, Serguei V. Pakhomov

A Cognitive Architecture for Simulating Bodies and Minds ................................................................................................. 905
Sergei Nirenburg, Marjorie McShane, Stephen Beale, Roberta Catzzone
Query Log Analysis of an Electronic Health Record Search Engine .................................................. 915
Lee F. Tang, Qianyu Ma, Kui Zheng, David A. Hanauer

A Legal Framework to Enable Knowledge Sharing and Clinical Decision Support Services across Institutional Boundaries .......................................................... 925
Tanya Hongsermeier, Saverio Maviglia, Lena Tsarikova, Dan Bogaty, Roberto A. Rocha, Howard Goldberg, Seth Meltzer, Blackford Middleton

Determining Word Sequence Variation Patterns in Clinical Documents Using Multiple Sequence Alignment ................................................................. 944
Frank Meng, Craig A. Morojske, Suzie El-Saad

Reconciling Pairs of Concurrently Used Clinical Practice Guidelines Using Constraint Logic Programming .......................................................... 954
Szymon Wilk, MartinMichalowski, WojtekMichalowski, MarielsaMainegraHing, KenFarion

An Investigation into the Feasibility of Spoken Question Answering .................................................. 979
Tim Miller, Kourish Ravazz, James J. Cimino, Hong Yu

OpenMRS, A Global Medical Records System Collaborative: Factors Influencing Successful Implementation .......................................................... 960
Nareena A. Mohammed-Rajput, Dawn C. Smith, Burke Mamlon, Paul Biondich, Brad N. Doebbeling

Comparison of SNOMED CT versus Medcin Terminology Concept Coverage for Mild Traumatic Brain Injury .......................................................... 969

Automated Non-Alphanumeric Symbol Resolution in Clinical Texts .................................................. 979
Sangrim Moon, Serguei Pakhomov, James Ryan, Genevieve B. Melton

Temporal Evolution of Biomedical Research Grant Collaborations across Multiple Scales - A CTSA Baseline Study .......................................................... 979
Radhakrishna Natarajan, Curtis L. Lowery, William R. Hogan

Federating Clinical Data from Six Pediatric Hospitals: Process and Initial Results from the PHIS+ Consortium .......................................................... 994
Scott P. Narus, RajenduSrivastava, RamkrishnaGourpeddi, Oren E. Livne, Peter Mo, Jonathan P. Bickel, David De Regt, Joseph W. Hales, Eric Kirkendall, Richard L. Stepanek, Jamie Toth, Ron Keren

Sample-efficient Learning with Auxiliary Class-label Information .................................................. 1004
Quang Nguyen, Hamed Valizadeh, Amy Seybert, Milos Hauskrecht

The Effect of Reference Datasets and Software Tools on Genotype Imputation .................................................. 1013
KwangyongNo, Li Shen, SangeunKim, Sharker Suamithanath, Shannon L. Bischofer, Andrew J. Saini

Pattern Mining for Extraction of Mentions of Adverse Drug Reactions from User Comments .......................................................... 1019
Azadeh Nikfarjam, Graciela H. Gonzalez

Teleradiologic Screening for Diabetic Retinopathy in Six Los Angeles Urban Safety-Net Clinics: Initial Findings .......................................................... 1027
Omolola Ogungbemi, Elizabeth Terrien, Alicia Eccles, Lauren Patty, Sheba George, Allison Fisz, Senait Teklehaimanot, Ramarao Ilapakurthi, Olsen Amini, Richard Baker

Evaluating the Effectiveness of Clinical Alerts: A Signal Detection Approach .................................................. 1036
Mesi-Song Ong, Enrico Coiera

Assessing the Motivation of MDs to Use Computer-based Support at the Point-of-Care in the Emergency Department .......................................................... 1045
Dympha M. O'Sullivan, Julie S. Doyle, Wojtek J. Michalowski, Szymon A. Wilk, Ken J. Farion, Craig E. Kaziemsky

Evaluation of Medication List Completeness, Safety, and Annotations .................................................. 1055
Michael C. Owen, Nancy M. Chang, David H. Chong, David K. Vawdrey

Automatically Detecting Problem List Omissions of Type 2 Diabetes Cases Using Electronic Medical Records .......................................................... 1062
Jennifer M. Pacheco, Will Thompson, Abdul Kho

Who Are Portal Users vs. Early E-Visit Adopters? A Preliminary Analysis .................................................. 1070
C. Jung, B. Padman, G. Shevchik, S. Paone

The Role of the Electronic Medical Record in the Assessment of Health Related Quality of Life .......................................................... 1080
Serguei V. S. Pakhomov, Siify D. Shah, Holly K. Van Houten, Penny L. Hanson, Steven A. Smith

Using RxNorm and NDF-RT to Classify Medication Data Extracted from Electronic Health Records: Experiences from the Rochester Epidemiology Project .......................................................... 1089
Jytisdana Pathak, Sean P. Murphy, Brian N. Willaert, Hidal M. Kremers, Barbara P. Yawn, Walter A. Rocca, Christopher G. Chute

Document Clustering of Clinical Narratives: A Systematic Study of Clinical Sublanguages .......................................................... 1099
Olga Patterson, John F. Furdie

Drug Repositioning for Cancer Therapeutics Based on Selective Multi-targeting to Biologically Relevant Cavities Associated with Cancer Signaling Pathways .......................................................... N/A
Xiaodong Peng

An Approximate Matching Method for Clinical Drug Names .......................................................... 1117
Lee Peters, Joan E. Kapusnik-Uner, Thang Nguyen, Olivier Bodenreider

Exploring Schizophrenia Drug-Gene Interactions Through Molecular Network and Pathway Modeling .......................................................... 1127
Daniel K. Putnam, JingchunSun, ZhongmingZhao

Semantic Interoperability of Health Risk Assessments .......................................................... 1134
Jay Rajda, Daniel J. Freeman, Henry D. Wei

Evaluation of HL7 v2.5.1 Electronic Case Reports Transmitted from a Healthcare Enterprise to Public Health .......................................................... 1144
Deepthi Rajev, Catherine Staes, R. Scott Evans, Andrea Price, Mary Hill, Susan Motisce, Ilene Risk, Robert Bolfl

Evaluation of an Android-based mHealth System for Population Surveillance in Developing Countries .......................................................... 1154
Zeshan A. Rajput, Samuel Mbugua, David Amadi, Viola Chepng’Eno, Jason J. Saleem, Yaw Anokwa, Carl Hartung, Gaetano Borriello, Burke W. Mamlon, Samson K. Nlayege, Martin C. Were

Approaching the Limits of Knowledge: The Influence of Priming on Error Detection in Simulated Clinical Rounds .......................................................... 1154
Elie Razzouk, Trevor Cohen, Khalid Almoosa, Vimla Patel
Lexically Suggest, Logically Define: Quality Assurance of the Use of Qualifiers and Expected Results of Post-Coordination in SNOMED CT ................................................................. 1165

Modeling the Oldest Old: Using Personas to Design Technology-Based Solutions for Older Adults ................................................................. 1166
Blaine Reeder, Oleg Zaslavsky, Katarzyna M. Wıłamowska, George Demiris, Hilaire J. Thompson

Design and Validation of a Data Simulation Model for Longitudinal Healthcare Data ................................................................. 1176
Richard E. Murray, Patrick B. Ryan, Stephanie J. Reisinger

How Communities Are Leveraging the Health Information Technology Workforce to Implement Electronic Health Records ................................................................. 1186
Joshua E. Richardson, Erika L. Abramson, Elizabeth R. Pfok, Ratna Kaukhal

MiDaS: Automatic Extraction of a Common Domain of Discourse in Sleep Medicine for Multi-center Data Integration ................................................................................................................................. 1196
Sathy S. Sahoo, Chimezie Ogbujii, Lingyun Luo, Xiao Dong, Licong Cui, Susan S. Redline, Gao-Qiang Zhang

A Vector Model Based Approach to Identify Genetically Related Diseases ................................................................................................................................. 1206
Indra Neel Sarkar

Improving Patient Safety by Modifying Provider Ordering Behavior Using Alerts (CDSS) in CPOE System ................................................................................................................................. 1207
Eshita Saxena, Barry R. Lang, Judy R. Becker

Feasibility and Potential Benefit of Collecting Complementary and Alternative Medicine Data Through a Computerized Patient Interview ................................................................................................................................. 1217
Lou Ann A. Scarton, Qing Zeng, Bruce E. Bray, Laura Shane-McWhorter

Right Diagnosis, Wrong Care: Therapeutic Reasoning Errors in Emergency Care Computer-Based Case Simulations ................................................................................................................................. 1224

Usage Evaluation of a Personal Health Record ................................................................................................................................. 1233
Na Segall, Jeffrey G. Saville, Pete L'Engle, Boyd Carlson, Melanie C. Wright, Kevin Schulman, James E. Tchong

Qualitative Analysis of Workflow Modifications Used to Generate the Reference Standard for the 2010 i2b2/VA Challenge ................................................................................................................................. 1243
Brett R. South, Shuying Shen, Rohyn Barrus, Scott L. Duvall, Ozlem Uzuner, Charlene Weir

Automated Medication Reconciliation and Complexity of Care Transitions ................................................................................................................................. 1252
Pamela A. Bezzo Silva, Elmer V. Bernstam, Eliz Markowitz, Todd R. Johnson, Jiachun Zhang, Jorge R. Herskovic

Wireless Data Collection of Self-administered Surveys Using Tablet Computers ................................................................................................................................. 1261
Kyle W. Singleton, Maro Lian, Corey Arnold, Mani Vahidi, Lisa Arangua, Lillian Gelberg, Alex A. T. Bui

Structured vs. Unstructured: Factors Affecting Adverse Drug Reaction Documentation in an EMR Repository ................................................................................................................................. 1270
Stephen Skentzos, Maria Shubina, Jorge Plutzky, Alexander Turchin

Identifying Certification Criteria for Home Care Electronic Health Record Meaningful Use ................................................................................................................................. 1280
Paulina S. Sokolow, Marguerite C. Adelsberger, Kathryn H. Bowler

Statistical Machine Translation for Biomedical Text: Are We There Yet? ................................................................................................................................. 1290
Cuijun Wu, Fei Xia, Louise Deleger, Inre Solti

Modeling Patient Safety Incidents Knowledge with the Categorial Structure Method ................................................................................................................................. 1300
Julien Souvignet, Cédric Bouquet, Pierre Lewalle, Béatrice Trombert-Paviot, Jean Marie Rodrigues

A Discriminative Approach to EEG Seizure Detection ................................................................................................................................. 1309
Ashley N. Johnson, Daby Sow, Alain Blem

Quantifying the Longitudinal Value of Healthcare Record Collections for Pharmacoepidemiology ................................................................................................................................. 1318
Matthew Sperrin, Sarah These, James Weatherall, William Dixon, Iain Buchan

PASTE: Patient-Centered SMS Text Tagging in a Medication Management System ................................................................................................................................. 1326
Shane P. Stenner, Kevin B. Johnson, Joshua C. Denny

Variability in Drug Formularies and Implications in Decision Support ................................................................................................................................. 1327
Matthew J. Stephens, John T. Finnell, Linus Simoniatis, J. Marc Overhage

Implementation of an Electronic Referral System for Outpatient Specialty Care ................................................................................................................................. 1337
Susan G. Straus, Alice Hm Chen, Hal F. Yee Jr., Margot B. Kashel, Douglas S. Bell

Developing National eHealth Infrastructures - Results and Lessons from Europe ................................................................................................................................. 1347
Karl A. Straetmann, Jürg Arimann, Veli Streutmann

Family Physicians' Completion of Scoring Criteria in Virtual Patient Encounters ................................................................................................................................. 1355
Walton Summer II, Thomas R. O'Neill, Guy Roussel, Jin Zhong Xu, Haiqiu Fu, Doug Ivins, Michael D. Hagen

Evaluation of the Use of Electronic Health Data to Classify Four-Year Mortality Risk for Older Adults ................................................................................................................................. 1361
Marie B. Synnestvedt, Mark G. Weiner

Undergoing Screening Colonoscopies ................................................................................................................................................................................................. 1366

Application of a Temporal Reasoning Framework Tool in Analysis of Medical Device Adverse Events ................................................................................................................................. 1372
Cui Tao, Craig G. Parker, Thomas A. Omsk, Jyotishman Pathak, Stanley M. Huff, Christopher G. Chute

Reducing Missed Laboratory Results: Defining Temporal Responsibility, Generating User Interfaces for Test Process Tracking, and Retrospective Analyses to Identify Problems ................................................................................................................................................................................................. 1382
Sureyya Tarkan, Catherine Plaissant, Ben Shneiderman, A. Zachary Hettinger

A Student Authored Online Medical Education Textbook: Editing Patterns and Content Evaluation of a Medical Student Wiki ................................................................................................................................................................................................. 1392
C. L. Thompson, Wade L. Schulz, Terrence Adam

Empowering Older Patients to Engage in Self Care: Designing an Interactive Robotic Device ................................................................................................................................................................................................. 1402
Priyadarshi Tiwari, Jim Warren, Karen Day
Using Medical Text Extraction, Reasoning and Mapping System (MTERMS) to Process Medication Information in Outpatient Clinical Notes
Li Zhou, Joseph M. Plasker, Lisa M. Mahoney, Neelima Karipineni, Frank Chang, Xuemin Yan, Penny Chang, Dana Dimaggio, Deborah S. Goldman, Roberto A. Rocha

Race and Medication Adherence and Glycemic Control: Findings from an Operational Health Information Exchange
Vivienne J. Zulu, Wanzuu Tu, David G. Murrero, Marc B. Rosenman, J. Marc Overhage

SRCAST-Diagnosis: Understanding How Different Members of a Patient-care Team Interact with Clinical Decision Support System
Shizhuo Zhu, Madhu Reddy, John Yen, Christopher Deflatch

POSTER

Techniques for Federating Queries across Different "Ontologies" in i2b2
Aaron Abend, Aaron Mandel, Matvey B. Palchuk

Analyzing Information Needs in Critical Care Handoffs
Joanna Abraham, Vickie D. Nguyen, Yimia L. Patel

Return-on-Investment from Electronic Health Records in Community Practices
Julia Adler-Milstein, Carol Green, David W. Bates

MyMedEffects: Improving Drug Safety by Enabling Self-Reporting of Adverse Events and Side Effects Using Social Microblogging
Syed Toufeeq Ahmed, Kevin B. Johnson

Prevalence of Drug-Drug Interaction Alerts and Override by Type
Eun Kyoung Anh, Hye Jin Kam, Rae Woong Park

Toward Dynamical Phenotyping with Clinical Data
David Albers, Noemie Elhadad, George Hripcsak, Esteban Tabuk

Development of Provenance Aware Cloud Based Semantic Web Data Services
Alexander Gruenenberg, Wolfgang Maass, Helena Deus, Jonas Almeida

RPE: A Process Approach to Linking Researchers, Providers and Patients
Mark Arratoon, Ladan Bany, Rebecca Kush, Jozef Aerts

Use of Real Time Geographic Information Systems in Health Promotion
Uba Backonja, Patricia F. Brennan

Systematic Collection of Patient Reported Outcomes Within an EHR-based Clinical Work Flow
Charles J. Bae, Michael Speck, Irene Katzar

Predictors of Tobacco Use Screening Rates of Nurses Using an mHealth Tool
Kenrick Cato, Suzanne Bakken

Expanding the WorkWeb Portal to Enhance Research Collaboration between Investigators from Community-based Organizations and the University
Sylvia Trembowski, Stephen B. Johnson, Bernadette Boden-Albala, J. Thomas Bigger, Daniel Dine, Suzanne Bakken

Patient Information Needs and Desired Features of an Aid to Facilitate Decision Making Related to Temporal Lobe Epilepsy Surgery

Mapping the Data Deluge to LOINC®- Tsunami, Downpour or Drought?
Pam Banning

A Naive Bayes Classifier to Estimate Mandibular Growth by the Cervical Vertebrae Maturation Method
Roberto S. Baptista, Camila L. Quaglio, Laila M. E. H. Mourad, Cristina Lúcia F. Orotolani, Ivan T. Pina

Proposed Evaluation Methodology for the SMART Adoption

Increasing Patient Empowerment by Utilizing a Computer-Based Patient "Power Page"
Catherine S. Barnes, Circe W. Tass, Jane Caudle, Adrienne Herron, Nicole Kluz, David C. Ziemer

Time Analysis Performance of Manual and Computerized Registry of the Nursing Care Systematization in Intensive Care and Surgery Unit
Vanessa C. Gurgel Silva, Cristiane Aparecida Betta, Elizabeth Akemi Nishio, Jacques Wainer, Claudia Barsottini

Decision Support System in Diagnoses and Prescription of Physical Activity
Eduardo F. Caiçzi Gomes, Claudia Nolasco Barsottini, Jacques Wainer

The Biomedical Information and Informatics Curriculum Thread: A Partnership between Biomedical Informatics and a Health Sciences Library
Denise E. Beaudoin, Jeanne M. Le Ber, Amy E. Honisett, Jean P. Shipman, Joyce A. Mitchell

The Care-Coordination Capability Maturity Model: Understanding HIT Adoption
Nina A. Behkami, David A. Dorr, Tugrul U. Daum

Voice Recognition for a Point-Of-Care History Taking Tool Written for iOS and Implemented on the Apple iPad
William E. Bennett Jr., Walton Sumner

Telehealth Second Opinion Archetypes for Case Study Standardized Shared Information in Brazil
Marion Bernon-Hegray, Filipe S. Silva, Amanda S. Campos, Magda E. Novais

More Than Looks Alone: Cognitive Support in an Emergency Department Information Display System
Bjoern-Toby Berster, Ying Liu, Min Zhang, Yimia L. Patel, Jiajie Zhang, David J. Robinson, Amy Franklin

Assessment of Pulmonary Hypertension from Semi-Automated Geometric Analysis of Computed Tomography Images
Holly L. Berty, Brian E. Chapman

Towards a Decision Basis of Breast Reconstruction: Defining the Alternatives ........................................ 1978
Clement S. Sun, Daifeng Wang, John Lee, Gregory P. Reese, Michelle C. Fingeret, Melissa A. Croby, Elisabeth K. Beuhm, Mia K. Markay

Systematic Screening for Depression in Primary Care: Will Electronic Medical Records Outperform Paper-Based Systems in Better Health Greater Cleveland? .............................................................. 1979
Thomas P. Swales, David C. Kazeroori

When Physicians Control Access to PHRs They Variously Restrict Patient Options ..................................... 1980
Yonas S. Temeat, Bradley H. Crotty, Shane Beti, Henry J. Feldman, Bruce E. Landon, Charles Safran

Physician Variation by Specialty in Personal Health Record Use .......................................................... 1981
Bradley H. Crotty, Bruce E. Landon, Charles Safran

Theory-Based Evaluation of Public Health Information Systems .............................................................. 1982
Sanjeev Tandon, Cynthia Lerooge, Sanduk Ganesan

Normalized Representation of Data Elements for Phenotype Cohort Identification in the Electronic Health Record ........................................................................................................................................ 1983
Cai Tao, Susan Rea Welch, Wei-Qi Wei, Thomas A. Onkii, Craig G. Parker, Jyotishman Pathak, Stanley M. Huff, Christopher G. Chute

Statistical Approach for Categorizing Content in Medical Informatics, Computer Science and Health Domains ........................................................................................................................................ 1984
Fabio O. Teixeira, Anderson D. Hummel, Edvane B. L. De Domenico, Luciano V. Araujo, Ivan T. Pisa

VIVO: Discovery Through Linked Open Data .......................................................................................... 1985
Mike Conlon, Kristi L. Holmes, Michele R. Tennant

Cognitive Engineering Approach to Visualizing Clinical Data .............................................................. 1986
P. Thayyilkathak, Michael Dziubak, Miguel H. Torres-Ureguido, Amit Acharya, Titus Schleier

Impact of Outreach Efforts on an Untethered PHR, myNYP.org .................................................................. 1987
Victoria L. Tiase, Sofia Fatatevich, Aurelia G. Royer

Integrating Metabolomic and Physiological Data Using Informatics Tools in Interdisciplinary Research Environment ........................................................................................................................................ 1988
Priyaranjan Tokachichi, Kristine Muller, Greg J. Beilman

Visualizing Influenza Activity Using the iPhone Platform ......................................................................... 1989
Timothy N. Trautman, Lanny Derby, Hamid Saoudian, Victoria Barrett, Jeffrey S. Schuen, Jonathon Neber

VA Informatics and Computing Infrastructure’s VINCI Workspace ............................................................ 1990
Circe W. Tsui, Jane M. Caudle, Gina J. Ryan, Catherine S. Barnes, Junye M. Hickman, Amy Franklin, David C. Ziemer

Nancy M. Tucker, Ross Shehng, C. Ed Heu, Susan Tomniero

Michael Ng, Evan Duderwicz, Brendan Harris, Thomas Jenkins, Ken Miyachi, Bengisu Tulu, Emmanuel A. Simas, Milagros Rosal

Do Copied Electronic Notes Reflect Patient Care? A Study of Lifestyle Counseling Documentation in Patients with Diabetes .................................................................................................................................... 1994
Alexander Tischin, Sarvel J. Goldberg, Eugene Breydo, Maria Shihina, Jonathan Einbinder

MiniBio: A Flexible Web-based Tool for Support of Systematic Literature Reviews ..................................... 1995
Kim M. Uerli, Timothy A. Coffman

Geographic Distribution of Patients Visiting a Health Information Exchange in New York City ................. 1996
Sandip R. Vaidya, Jason S. Shapiro, Arit Onyile, Gilad Kapernan

Klaar Yanopstal, Robert Vander Stichele, Godelieve Laureys, Joost Buyschaert

Information Needs and Technical Self-Efficacy of Midwives in Rural Ghana ........................................ 1998
Olivia Félix, Patricia Miehael, Andrew Kanier, Suzanne Balken

Early Findings from the Evaluation of the State HIE Cooperative Agreement Program ............................ 1999
Prashila Dullab, Christine Nye, Julia-Adele Milsken, Adil Mallah, Vaithall N. Patel, Lindsay M. Virost, Elizabeth Babalola, Ayeha Mahmoud, Jason C. Goldwater, Matthew Swain, Ashuel K. Jha

Medical Imaging Informatics Bench to Bedside .......................................................................................... 2000
Yanhong Wang, Shawn N. Murphy, Daniel Marcell, Christopher D. Herrick, Timothy Olsen, Randy L. Gollub, Steven D. Pieper, Wendy Pleistika, Darren Sack, Jesse Wei, Katherine P. Andreole, Paul Lomonos, Tawnei Durand Wang, William Tellier

Griffin M. Weber

An Evaluation of the Impact of Additional Longitudinal Data on an EMR-Based Phenotype Algorithm for Identifying Type 2 Diabetes Mellitus Subjects ...................................................................................... 2002
Wei-Qi Wei, Cynthia L. Leibson, Christopher G. Chute

Practical Issues in Mapping a Local Medication Terminology to a National Standard ..................................... 2003
Mark G. Weiner, Kevin Haynes, Peter Gabriel, Maggie Massary, Brenton Moore, Lee Min Lau
