# TABLE OF CONTENTS

## POSTER SESSION 1

### PROTECTION, CONTROL AND STABILITY OF DISTRIBUTION NETWORKS

**ID 59: Autonomous Distributed Coordination Of Fast Power Flow Controllers In Transmission Networks**
Sebastian Lehnhoff, Ulf Häger, Thomas Zimmermann, Christian Rehtanz

**ID 72. Hierarchical Models In Power Systems Analysis And Control**
Oleg Sochaenko, Igor Yadikin

**ID 86. The Effect Of Advanced Load Shedding In The Formation Of Islanded MV Grids**
Robert de Groot, Panagiotis Karaliolios, Han Slootweg, Wil Kling

**ID 110. Controlling Price-Responsive Heat Pumps For Overload Elimination In Distribution System**
Zsuzsa Csetvei, Jacob Østergaard, Preben Nyeng

**ID 155. Indicators For Developing Innovative Feedback Technologies**
Iana Vassileva, Fredrik Wallin, Yong Ding, Hedda Schmidtke, Erik Dahlquist

**ID 156. Fault Analysis Of Distribution Network With Wind Turbines Of DFIG**
Yang Beige, Xue Hui, Bai Dandan, Hu Wei, He Jihuang

**ID 162. Accelerate Protection Scheme In Integrated Protection System**
Huo Zhang, Jinghan He, Tony Yip, Zhiqian Bo

**ID 193. In-House Monitoring And Control Network For The Smart Grid Of The Future**
Andreia Carreiro, Gregorio López, Pedro Moura, José Moreno, Aníbal Almeida, J. L. Malaquias

**ID 218. Stability Enhancement Of A Power System With Wind Generation And Statcom**
Ibrahim EL-Amin, Mohammad Abido

**ID 222. Applying The Artificial Fish Swarm Algorithm For The Co-Ordinated Design Of PSSs In A Real Large-Scale Power System**

**ID 234. Modeling Of Switching Power Interfaces For Smart-Grid Stability Studies**
Santiago Sanchez Acevedo, Maria Molinas

**ID 253. Design And Evaluation Of A Protection Algorithm For A Wind Turbine Generator Based On The Fault-Generated Symmetrical Components**
Tai-Ying Zheng, Seung-Tae Cha, Yong-Chol Kang, Peter A. Crossley, Minho Song

**ID 269. Analysis Of The Influence Of Weather Factors On Outages In Power Distribution Networks**
Víctor Barrera Nunez, Joaquín Meléndez, Sergio Herrera Jaramillo, A. Ferreira, A. Munoz

**ID 308. Protection For Distributed Generators In The DC Micro-Grid**
Won-seok Lee, Sang-Hee Kang

**ID 319. Towards A Security Architecture For Substations**
Shailendra Fuloria, Ross Anderson

## POSTER SESSION 2

### SMART HOMES AND COMMUNICATIONS

**ID 50. Bridging The Gap With Broadband Powerline (BPL) Technology**
Uwe Braun

**ID 53. Micro-Grid Development For Properties**
Xiongwei Liu, Ian Chilvers, Matzura Mohktar, Adam Bedford, Keir Stitt, Javad Yazdani

**ID 90. Proposed Components For The Design Of A Smart Nano-Grid For The Sub 50v Direct Current Voltage Home**
Mashe Dahiya, Kaval Bal, Jianhong Li, M. Ranjith Singh, Y. Shankar Rao

**ID 105. Cenelec And Powerline Communication Specification In Realization Of Smart Grid Technology**
Kaveh Razazian, Javad Yazdani

**ID 109. Communication Strategy For Grid Control And Monitoring Of Distributed Generators In Smart Grids Using Iec And Ieee Standards**
Samer Jaloudi, Egon Ortjohann, Andreas Schmelter, Paramet Wirasanti, Danny Morton

**ID 113. Proactive Control For Energy Systems In Smart Buildings**
Maria Belén Téllez Molina, Tokhir Gafurov, Milan Prodanovic
METERING, CYBER-SECURITY AND INTEGRATION OF WIND, PV AND STORAGE

POSTER SESSION 3

Id 8. Impact Of Wind Speed Uncertainty And Stochasticity On The Planning And Design Of Wind Power Projects In A Smart Grid Environment ................................................................. 196
Eduardo Martinez Cesena, Joseph Mutale

Id 28. Potential EMC Implementation Problems Of Smart Metering, Display And Communications ................................................................. 204
Chris Marshman, Mark Tyndall, Keith Armstrong, Richard Marshall

Id 33. Short Term Wind Power Prediction Using Evolutionary Optimized Local Support Vector Regression ................................................................. 209
Ehab Elattar

Id 48. Improvement Of A Voltage-Stabilizing Control System For Integration Of Wind Power Generation Into A Small Island Power System ................................................................. 216
Orie Sakamoto, Koji Yamashita, Yoshihiro Kitauchi, Toshiya Nanahara, Toshio Inoue, T. Arakaki, H. Fukuda

Id 52. Modeling And Control For Smart Grid Integration Of Solar/Wind Energy Conversion System ................................................................. 223
Emad Natshel, Alhussein Albarbar, Javad Yazdani

Id 71. Power And Energy Control Strategies For A Vanadium Redox Flow Battery And Wind Farm Combined System ................................................................. 231
Francesco Baccino, Samuele Grillo, Mattia Marinelli, Stefano Massucco, Federico Silvestro

Id 76. The Design Of Wind Plant Reactive Compensation Systems Alternatives To Meet Grid Code Requirements. ................................................................. 239
Mick Barlow, Martin Bishop, Michail Theodoridis,

Id 93. Multi-Objective Transmission Network Expansion Planning In Consideration Of Wind Farms ................................................................. 247
Hiroyuki Mori, Hiroki Kakuta

Id 99. Using Wavelet Synopses On Electric Power System Measurements ................................................................. 254
Panayiotis Mounts, Nikolaos Hatziargyriou

Id 117. Cyber Security Challenges In Smart Grids ................................................................. 261
Maria B. Line, Inger Anne Tøndel, Martin G. Jaatun

Id 178. Secure Firmware Updates For Smart Meters ................................................................. 269
Ido Schwartzman, Liran Katzir

Id 221. Smart Dispatch For Grid Integration Of Wind Generation ................................................................. 274
Kwok W. Cheung

Id 242. Developing Cyber-Physical Experimental Capabilities For The Security Analysis Of The Future Smart Grid ................................................................. 282
Bela Genge, Christos Stiaklis

Id 252. Procedure For Estimation Of Equivalent Model Parameters For A Wind Farm Using Post-Disturbance On-Line Measurement Data ................................................................. 289
Francisco Gonzalez-Longatt, Pawel Regulski, Vladimir Terzija, P. Wall
POSTER SESSION 4

INTEGRATION OF DEMAND RESPONSE

Id 23. Design Of A User-Centred Smart Grid Pilot ................................................................. 296
Jaap Kohlmann, Maarten van der Vossen, Joris Knigge, Charlotte Kobus, J. G. Slootweg

Id 46. A Simulated Annealing Algorithm For Demand Response ........................................ 304
Imthias Ahamed, Danish Maqbool, Essam A. Al Ammar, N. H. Malik

Id 67. Exploring Emerging Customer Needs For Smart Grid Applications .............................. 308
Eva Heiskanen, Kaisa Matschoss

Id 103. Economic Evaluation Of The Influence Of Overvoltages And The Integration Of Small Storage Capacity In Residential PV-Installations ......................................................... 315
Bart Verhelst, Colin Debruyne, Johan Vanalme, Jan Desmet, Jan Capelle, L. Vandevelde

Id 104. Utilizing Beyond Cenelec Standards For Smart Grid Technology .............................. 321
Kaveh Razazian, Javad Yazdani

Id 115. Building Control And Storage Management With Dynamic Tariffs For Shaping Demand Response In Electricity Grids ........................................................... 327
Frauke Oldewurtel, Andreas Ulbig, Manfred Morari, Göran Andersson

Id 127. Optimal Battery Chemistry, Capacity, Charge/Discharge Schedule, And Lifetime For Energy Storage Under Time-Of-Use Pricing ....................................................... 335
Arthur Barnes, Andres Escobar Mejia, Scott Gaurin, Juan Balda

Id 149. Demand As Frequency Controlled Reserve: Implementation And Practical Demonstration ........................................ 342
Philip J. Douglass, Rodrigo Garcia-Valle, Jacob Østergaard, Preben Nyeng, Mikael Togeby

Id 180. Optimal Management Of Electrical Energy Storages For The Integration Of Decentralised Fluctuating Generation In Distribution Grids ............................................. 349
Steffen Nicolai, Sabine Ritter, Daniel Beyer, Peter Bretschneider

Id 195. Testing Of New Fault Location Method For Medium Voltage Networks ........................ 420
Peter Braciník, Marek Höger, Juraj Altus, Miroslav Kovác

POSTER SESSION 5

RELIABILITY, POWER QUALITY AND HVDC INTEGRATION

Id 14. Method For Static And Dynamic Resistance Measurements Of HV Circuit Breaker .................. 390
Zoran Stanisic

Id 49. Monitoring Of Eps Operation By The State Estimation Methods ....................................... 395
Anna Glazunova, Irina Kolosok, Elena Korkina

Id 69. Distributed Filtering Of High Harmonics In Smart Grid .................................................. 401
Konstantin Suslov, Nafisa Solomina, Anatoly Smirnov

Mohamadreza Baradar, Mehrdad Ghandhari, Dirk Van Hertem

Id 97. Technical And Economic Assessment For Deployment Of Distribution Automation Equipments – Enabling Self-Healing Strategies ......................................................... 412
Roberto Moreira, Nuno Silva, Helder Leite

Id 195. Testing Of New Fault Location Method For Medium Voltage Networks ........................ 420
Peter Braciník, Marek Höger, Juraj Altus, Miroslav Kovác

Id 224. Subsynchronous Resonance In Meshed Networks With HVDC Lines ............................ 427
Atia Adrees, Jovica Milanovic

Id 254. Power Flow Analysis For Interconnected T&D Networks With Meshed Topology ............... 435
Elizebeth Maria Lourenço, Carolina Correa Durce, Odilon Luis Tortelli
Id 280. Developing Trend Of Domestic Electricity Tariffs In Great Britain ............................... 442
Zhimin Wang, Furong Li

Id 289. Reliability Evaluation Of Future Power Systems ................................................................. 447
Bart Tuinema, Madeleine Ghibescu, Lou van der Sluis, Mart van der Meijden

Id 306. Integration Of UPQC For Power Quality Improvement In Distributed Generation Network –
A Review ......................................................................................................................................... 453
Md Shafuzzaman Khan Khadem, Malabika Basu, Michael F Conlon

Id 309. Facilitating The Implementation Of Innovative Technologies For A Smart(ER) Future Grid ......................................................... 458
Konstantinos Kopsidas

Id 321. Active Power Filtering For A Three-Phase Four-Wire Network With Unidentifiable Harmonic
Loads.............................................................................................................................................. 465
M. J. Waite, L. Zhang, B. Chong

POSTER SESSION 6

EFFICIENCY AND ASSET MANAGEMENT

Id 11. State Of The Art And Lessons Learnt From The Cost-Benefit Analysis Methods Of Distributed
Resources Integration In Europe ........................................................................................................ 473
Florent Chiappini

Id 35. Super-Junction Trench Mosfets For Improved Energy Conversion Efficiency ............................................. 481
Olayiwola Alatise, Nii-Adotei Parker-Alley, Phil Mawby

Id 95. Analyzing Fundamental Aggregation Functions In Power Systems ................................................................. 486
Claes Sandels, Kun Zhu, Nicholas Honeth, Arshad Salam, Lars Nordström

Id 151. Aggregation Of Small-Scale Active Resources For Smart Grid Management ........................................................................... 493
Antti Koto, Shengye Lu, Turo Valavaara, Antti Rautiainen, Sami Repo

Id 163. A Smart Energy System: Distributed Resource Management, Control And Optimization .................................................. 500
Yong Ding, Christian Decker, Iana Vassileva, Fredrik Wallin, Michael Beigl

Id 223: Evaluating The Impact Of Electricity-Based Vehicle Penetration On Transformer Loss Of
Life.................................................................................................................................................... 508
Pia Grahn, Johanna Rosenlind, Patrik Hilber, Lennart Söder, Karin Alvehag

POSTER SESSION 7

VOLTAGE CONTROL, MODEL VALIDATION AND PRACTICAL APPLICATIONS

Id 7. Investigation Of Smart Grid Topologies Using Pilot Installations Experimental Results .............................................. 533
Dimitrios Stimoniaris, Dimitrios Tsiamitros, Nikolaos Poulakis, Theodoros Kottas, Vasileios Kikis, Evangelos
Dialynas

Id 20. Emergency Voltage Control With Decentralized Generation .................................................................................. 541
Johan Fredrik Baalbergen, Vasileios Karapanos, Madeleine Ghibescu, Lou van der Sluis

Id 287. Towards An Integrated Approach To Energy Efficiency: Drivers And Enablers .............................................. 551
Simon Le Blond, Tim Lewis, Mahesh Sooriyabara

Id 228. Evaluating The Impact Of Electricity-Based Vehicle Penetration On Transformer Loss Of
Life.................................................................................................................................................... 557

Id 66. Smart Grid: A New Way Of Receiving Primary Information On Electric Power System State ........................................ 565
Konstanin Suslov, Nafisa Solonina, A.S. Smirnov

Id 80. Increasing The Available Transmission Capacity By Using A Dynamic Transient Stability
Limit.................................................................................................................................................. 569
Song Guo, Sean Norris, Janusz Bialek, Douglas Wilson

Id 85. Use Case Analysis Of Real-Time Low Voltage Network Management .................................................. 576
Sami Repo, Davide Della Giustina, Guitermo Ravera, Lucio Cremaschini, Stefano Zanini, J. M. Selga, P.
Järventaus
POSTER SESSION 8

ELECTRIC VEHICLES AND ADVANCED MODELLING TECHNIQUES

Id 10. A Novel Graph Theoretical Approach In Power System Restoration ................................................. 622
Fredrik Edström, Lennart Söder

Id 63. Fast Search For Transmission Section Based On Power Component Of Line ................................. 630
Linyan Cheng, Baochui Zhang, Guanghui Li, Jín Wang, Zhiquian Bo, Tony Yip, David Writer, Yu Sun

Id 83. Case Study Of The Effects Of Electric Vehicle Charging On Grid Loads In An Urban Area ................ 635
Ville Tikka, Jokka Lassila, Juha Haakana, Jarmo Partanen

Id 101. Agent-Based Power Routing In Active Distribution Networks .......................................................... 642
Phuong Nguyen, Wil Kling, Paulo Ribeiro

Id 106. Plug-In Vehicles For Smart Grids: What Can And Cannot Be Done With Existing Technology .......... 648
Emily Parry, Miles Redfern

Id 187. Decentralized, Agent-Mediated Participation Of Electric Vehicles In Electricity Markets ................ 656
Dimitrios Papadaskalopoulos, Goran Strbac

Id 188. Impact Study Of Electric Vehicle (EV) Grid Integration On Medium Voltage Grids .......................... 664
Qiuwei Wu, Arne Hejde Nielsen, Jacob Østergaard, Seung Tae Cha, Yi Ding

Id 197. Electric Vehicle (Ev) Charging Management With Dynamic Distribution System Tariffs ................. 671
Niamh O’Connell, Qiuwei Wu, Jacob Østergaard, Arne Hejde Nielsen, Seung Tae Cha, Yi Ding

Id 198. New Paradigm Of Smart Transmission Substation – Practical Experience With Ethernet Based Fiber Optic Switchyard At 500 Kilovolts ................................................................. 678
Maciej Goraj, Roger Moore

Id 238. Extension Of Test System For Distribution System Reliability Analysis With Integration Of Electric Vehicles In Distribution System ................................................................. 683
Pramod Bangalore, Lina Bertling

Id 241. The Smart Grid’s Self-Healing: Dynamical Hierarchical Criticality Matrixes-Based Analysis ............ 690
Vyacheslav Kharchenko, Eugene Brezhnev, Artem Boyarchuk

Id 247. A New Bi-Directional Charger For Vehicle-To-Grid Integration ....................................................... 698
Ricardo J. Ferreira, Luis M. Miranda, Rui E. Araújo, João P. Lopes

Id 271. Integrating The Electrical Vehicles In The Smart Grid Through Unbundled Smart Metering And Multi-Objective Virtual Power Plants ................................................................. 703
Mihai Sanduleac, Mircea Eremia, Lucian Toma, Paul Nicolae Borza

Id 273. Serving Solar Variations With Consumption Control Of Smart Appliances And Electric Vehicles ................................................................................................................................. 711
Anett Schuelke, Kellie Erickson

ORAL SESSION 1

STANDARDS AND ARCHITECTURES FOR SG PAPERS

ID 207: Hybrid Security For Hybrid Vehicles Exploring Smart Grid Technology, Powerline And Wireless Communication .................................................................................................................... 719
Trevor Holden, Javad Yazdani

ID 21: The Ideal IED For Smart Distribution Applications ............................................................................... 724
Francisc Zavoda, Chad Abbey, Yves Brissette
ID 216: Bringing IEC 61850 And Smart Grid Together .......................................................... 729
Marco C. Janssen, Peter A. Crossley, Li Yang

ID 29: Application Of OPC UA For The Smart Grid .............................................................. 734
Sebastian Rohjans, Arno Claassen, Sebastian Lehnhoff

ID 296: Designing An Active House Deployment Architecture For Residential Electricity Customers’
Active Interaction With The Smart Grid .................................................................................. 742
Judith E. Y. Rossebo, Larisa Rizvanovic, Gargi Bag, Pia Stoll, Mikael Åkerholm

ID 270: Increasing Security Of Supply By The Use Of A Local Power Controller During Large
System Disturbances .............................................................................................................. 750
Andrew Roscoe, Chris Bright, Stuart Galloway, Graeme Burt

ORAL 1B

ARCHITECTURES FOR SG PAPERS

ID 112: Meshing Radial Networks At 11kv And LV ................................................................. 757
Andrew Cross, Dani Strickland, Benedict Ruben, Martin Aten, Bob Ferris

ID 172: Multi-Scale Dynamic Modeling To Maximize Demand Side Management ................. 765
Aristides Eippraktis, Ian Dent, Sasa Djokic, Stephen McLaughlin

ID 320: IEC 61850 Based Components, Interfaces And Services For A Smart Grid ................. 771
Alex Apostolov

ID 70: Regulatory And Technical Challenges For The Integration Of Electric Vehicles ............. 777
Oliver Warweg, Falk Schaller, Sabine Ritter, Peter Bretschneider

ID 300: Domestic End-Use Simulation Of Smart Grid Technologies ....................................... 785
Liam MacIsaac, Andrew Knox

ID 285: Impact Of Multi-Microgrid Communication Systems In Islanded Operation .............. 791
David Rua, Luis Pereira, Nuno Gil, João Abel Peças Lopes

ORAL 1C

SG & SG MANAGEMENT

ID 12: Scalable Distribution State Estimation Approach For Distribution Management Systems .......... 797
Leticia De Alvaro Garcia, Sébastien Grenard

ID 128: Decoupled Symmetrical Component Frame Power System Model For Smart Grid Application .... 803
Khalid Mohamed Nor, Mamdouh Abdel-Akher, Syafii Ghazali

ID 176: Operational Windows For Decentralized Control Of Renewable DG: Techno-Economic
Trade-Offs ............................................................................................................................... 809
Thipnatee Sansawatt, Luis F. Ochoa, Gareth P. Harrison

ID 75: An Approach To Smart Grid Metrics ............................................................................ 815
Maximilian Arnold, Han Rui, Wolfram H. Wellssow

ID 304: Recent Developments Towards Novel High Performance Computing And Communications
Solutions For Smart Distribution Network Operation ............................................................... 822
Gareth Taylor, David Wallom, Sebastien Grenard, Angel Yunta Huete, Colin Axon

ID 281: The Role Of Quality Measurements Within Smartgrids .............................................. 830
Alberto Venturi, Paul Clarkson, Alistair Forbes, Paul Wright, Euan Davidson, Andrew J. Roscoe, Graeme M.
Burt, Xin-She Yang

ORAL 1D

ENERGY MANAGEMENT PAPERS

ID 200: Non-Inertial Weight Based PSO For Economic Dispatch ........................................... 836
Xiaoqing Tang, Qun Niu, Kang Li, George Irwin

ID 89: Preventing Overvoltages In PV Grids By Integration Of Small Storage Capacity ............ 841
Colin Debruyne, Johan Vanalme, Bart Verhelst, Jan Desmet, Jan Capelle, L. Vandevelde

ID 152: Combinatory Search Method For Determining Distribution Network Automation ........ 848
Ljiliana Glamocic

ID 293: Scheduling Residential Electric Loads For CO2 Reductions ....................................... 854
Gargi Bag, Larisa Rizvanovic, Judith E. Y. Rossebo, Pia Stoll, Mikael Åkerholm
ID 279: Resource Allocation In Smart Homes Based On Banker’s Algorithm ........................................... 862
Ana Virag, Stjepan Bogdan

ID 27: Sustainable Building, Smartgrid-Ready ...................................................................................... 869
Vincent Thornley, Steve Mullins

ORAL SESSION 2A

ENERGY MANAGEMENT

ID 18: Investigating The Effects Of Dynamic Demand Side Management Within Intelligent Smart
Energy Communities Of Future Decentralized Power System .................................................................. 876
Amir Fazeli, Mark Gillott, C Mark Johnson, Mark Sumner, E. Christopher, P. Bowley, R. Hotchkiss

ID 295: Lexicographic Multi-Objective Optimization For The Unit Commitment Problem And
Economic Dispatch In A Microgrid ........................................................................................................... 884
Matteo Salani, Alessandro Giusti, Gianni Di Caro, Andrea Emilio Rizzoli, Luca Maria Gambardella

ID 51: Project Edison: Smart-De .............................................................................................................. 892
Benjamin Williamson, Miles Redfern, Raj Aggarwal, Jacob Allinson, Chris Harris

ID 36: Battery And Energy Management In Fleets Of Switchable Battery EVS ........................................ 902
Vladimir Zdornov, Yitzhak Birk

ID 256: Comparative Analysis Of Coordination Strategies For Electric Vehicles .................................... 909
Niels Leemput, Juan Van Roy, Frederik Geith, Peter Tant, Johan Driesen, B. Claessens

ID 120: An Interdisciplinary Method To Demand Side Participation For Deferring Distribution
Network Reinforcement .......................................................................................................................... 917
Mark Lawsson, Phillip Taylor, Sandra Bell, David Miller, Neal Wade

ORAL SESSION 2B

FIELD TRIALS

ID 322: The Directional Reactive Power Undervoltage Protection – A Protection Concept For
Connecting Decentralized Renewable Energy Sources .................................................................................. 925
Oliver Janke

ID 123: Case Study Of Practical Applications Of Smart Grid Technologies .............................................. 930
David Dolezilek

ID 58: Isle Of Wight Experiences Using Distributed-Intelligence Medium-Voltage Automated Feeder
Self-Healing .................................................................................................................................................. 938
John Baker, Mike Meisinger

ID 220: Application Of A Dynamic Line Rating System For A 132kv Distribution Network ..................... 942
Marc Bartlett, Divar Kadar, Geoff Murphy, Samuel Jupe, Katherine Jackson

ID 265: Improved Monitoring And Control Of Distribution Network By Smart MV/LV Substations .......... 950
Lauri Kumpulainen, Seppo Pettissalo, Petri Trygg, Kim Malmberg, Mika Loukkalahti, M. Hyvärinen

ID 292. Active House: Industrial Demonstrator ....................................................................................... 956
Larisa Rizvanovic, Mikael Åkerholm, Gargi Bag, Pia Stoll, Judith E. Y. Rossebø

ORAL SESSION 2C

SENSORS COMMS, AMI

ID 251: Systems Classification Based On Power Signatures ...................................................................... 962
Marius Marcu

ID 217: Requirements For Implementing Gossip Based Schemes For Information Dissemination In
Future Power Systems .............................................................................................................................. 968
Aleksandra Krkoleva, Vesna Borozan, Aris Dimeas, Nikos Hatziargyriou

ID 47: Game Theoretic Analysis Of Privacy-Aware Advanced Metering Infrastructure .............................. 975
Dipayan Ghosh, Stephen Wicker, Lawrence Blume

ID 143: A Partially Decentralized Forecast-Based Demand-Side-Management Approach ...................... 979
Markus Damm, Stefan Mahlknecht, Christoph Grimm, Tamás Bertényi, Tom Young, Christian Wysoudil

ID 276: Evaluation Of Narrowband Power Line Communications On A Smart Grid Testbed .................... 986
Paul Crolla, Andrea Tonello, Stephan Weiss, Graeme Burt

ID 310: Opportunistic Communications To Improve Reliability Of AMI Mesh Networks ......................... 991
Sedat Gormus, Zhong Fan, Parag Kulkarni, Zubeir Bocus
ORAL SESSION 3A

SELF-HEALING GRIDS

ID 232: Signal Processing And Classification Tools For Intelligent Distributed Monitoring And Analysis Of The Smart Grid
Irene Gu, Math Bollen, Cuong Le

ID 100: Optimal Fault Location In Distribution Systems Using Distributed Disturbance Recordings
Pierre Janssen, Tefik Sezi, Jean-Claude Maun

ID 184: Advanced Control Of Hybrid HVAC/HVDC Interconnection Interface For The Interconnected ENTSO-E – IPS/UPS Systems
Lazar Bizunic, Rachid Cherkaoui, Fortunato Villella, Anna Arestova, Andrey Grobovoy

ID 266: Cost Function For Sub-Agent Elements In Multi-Agent Energy Management System
Timur Yunusov, Ben Potter, William Holderbaum

ID 9: Protection Systems That Verify And Supervise Themselves
Pelqim Spahiu, Ian R. Evans

ORAL SESSION 3B

DATA ACQ MANAGEMENT & CYBER SECURITY

ID 119: State Reconstruction From Synchronized Phasor Measurements
Mevludin Glavic, Thierry Van Cutsem

ID 209: Processing Smart Meter Data Streams In The Cloud
Björn Lohrmann, Odej Kao

ID 40: Contributions On Harmonic Impedance Monitoring In Smart Grids Using Virtual Instruments
Alexandru Baloi, Adrian Pana, Florin Molnar-Matei

ID 159: Power Quality Assessment Of The Bogota Distribution Network Focused On Voltage Sags Analysis
Victor Barrera Nuñez, Andrés Pavas Martínez, Joaquim Meléndez Frigola

ID 194: Web Based Management System For Power Quality Assessment And Detection Of Critical Zones
Yi Yang, Tim Littler, Sakis Sezer, Kieran McLaughlin, Haifeng Wang

ORAL 3C

WAMPAC

ID 107: Optimal Placement Of Phasor Measurement Units To Improve Parallel Power System Restoration
Jairo Quiroz Tortos, Gustavo Valverde, Lei Ding, Vladimir Terzija

ID 130: Case Studies: Synchrophasors For Wide-Area Monitoring, Protection, And Control
Roy Mosley, David Dolezilek

ID 78: Anti-Islanding Detection Using Synchrophasors And Internet Protocol Telecommunications
David Laverty, David John Morrow, Robert Best, Michael Cregan

ID 44: Pmu Performance Requirements And Validation For Closed-Loop Control Applications Using A Real-Time Simulation
Harmeet Kang, Chris Mycock, Armin Edwards, Ricardo Lira

ORAL SESSION 4A

ADVANCED MODELLING & CONTROL

ID 274: Development Of A Predictive Out Of Step Relay Using Model Based Design
Brian Kirby, Li Zou, Jiayi Cao, Innocent Kamwa, Anissa Heniche, M. Dobrescu

ID 88: Decoupling Power Systems Analysis Using Hybrid Load Flow Calculation
Paramet Wirasunti, Egon Ortjohann, Seimer Jaloudi, Danny Morton
ID 61: Demand Response Using Service And Overshoot Curves ................................................................. 1114
Jean-Yves Le Boudec, Dan-Cristian Tomozei

ID 191: DG Demonet Validation: Voltage Control From Simulation To Field Test ........................................ 1122
Matthias Stifter, Benoît Bletterie, Helfried Brunner, Daniel Burnier, Henein Sawsan, F. Andrin, R. Schwalbe, A.
Abart, R. Nenning, F. Herb, R. Poinnier

ID 264: Adaptive Protection Architecture For The Smart Grid .............................................................. 1130
Ibrahim Abdulhadi, Federico Caffetti, Adam Dysko, Campbell Booth, Graeme Burt

ORAL 4B

RELIABILITY & DIAGNOSTICS

ID 140: DG Islanding Operation Detection Method In Combination Of Harmonics Protection Schemes ................................................................. 1138
Saeed Jahdi, Loi Lei Lai

ID 65: Smart Asset Management Of Aging Devices In Energy Systems: A Case Study Of Transformers ................................................................. 1146
Lian Zijuan, Saranga Abeygunawardane, Panida Jirutitijaroen

ID 62: Reliability Performance Assessment In Smart Grids With Demand-Side Management .................. 1160
Irinel-Sorin Ilie, Ignacio Hernando-Gil, Adam Collin, Jorge Acosta, Sasa Djokic

ID 202: Software Tool For Automated Design And Cost Benefit Analysis Of Offshore Grid ................ 1167
Dusko Nedic, Muhammad Ali, Jovica Milanovic

ID 249: Novel Early Warning Fault Detection For Wind-Turbine-Based DG Systems .............................. 1175
Xiandong Ma

ORAL 4C

AC/DC T&D

ID 74: A Novel Method For Recovery Of Drainage Power From Distribution Transformers .................. 1181
P.S.Chandramohan Nair, P. K. Preetha

Chomba Tumelo-Chakonta, Konstantinos Kopsidas

ID 317: Toward A Coordinated Voltage Control (CVC)-Enabled Smart Grids ................................................................. 1194
Marija Ilic, Jeffrey H. Lang, Eugene Litvinov, Xiaochuan Luo, Jianzhong Tong, Bruce Fardanesh, George Stefopoulos

ID 316: Contingency Screening In A Multi-Control Area System Using Coordinated DC Power Flow .......... 1202
Sanja Cvijic, Marija Ilic

ORAL 5A

AC/DC T&D

ID 32: Three-Phase Distribution OPF In Smart Grids: Optimality Versus Computational Burden .................. 1209
Sumit Paudyal, Claudio Cañizares, Kankar Bhattacharya

ID 57: Overload And Overvoltage In Low-Voltage And Medium-Voltage Networks Due To Renewable Energy – Some Illustrative Case Studies ................................................................. 1216
Math Bollen, Nicholas Etherden

ID 245: Performance Assessment Of IEC 61850-9-2 Based Protection Scheme For A 400kv Transmission System Mesh Corner ................................................................. 1224
An Wen, Terry Brennan, Dave Brogden, Ray Chatfield, Craig McTaggart

ID 64: Coordinated Control Of Two Phase Imbalanced Hybrid Series Capacitive Compensation Schemes For Damping Power System Oscillations ................................................................. 1229
Irfan Unal, Sushan Pan, Sherif Faried

ID 121: Investigating The Impact Of Demand Side Management On Residential Customers .................. 1235
Ning Zhang, Daniel S. Kirschen, Luis F. Ochoa

ID 150: An Innovative Risk Control Strategy In Power Systems Involving Advanced HVDC Networks .......... 1241
Emanuele Ciupressoni, Diego Cirio, Stefano Massucco, Andrea Pitto, Federico Silvestro
Id 309. Facilitating The Implementation Of Innovative Technologies For A Smart(ER) Future Grid ................. 1249
  Konstantinos Kopsidas

VPP/DER/MICROGRID

ID 244: Power Scheduling In A Virtual Power Plant ................................................................. 1256
  Davide Aloini, Emanuele Crisostomi, Marco Raugi, Rocco Rizzo

ID 272: A Multi-Objective Evaluation Of The Impact Of The Distributed Generation Penetration .................. 1263
  Renan Silva Maciel, Antonio Padilha-Feltrin, Mauro Augusto da Rosa, Vladimirio Miranda

ID 204: Models Of Distributed Energy Resources Markets In Distribution Grid Operations ....................... 1269
  Jayanti Kumar, Avnaesh Jayantilal

ID 118: Optimal Microgrid Operation With Electric Vehicles .......................................................... 1275
  Miguel Angel Lopez Perez, Sebastian Martin Rivas, Jose Antonio Aguado Sanchez, Sebastian de la Torre Fazio

ID 60: Electric Vehicle Requirements For Operation In Smart Grids .................................................. 1283
  Francesco Marra, Davide Sacchetti, Christer Træholt, Esben Larsen

Id 144. Development And Operation Of Virtual Power Plant System .................................................. 1290
  Khalil El Bakari, Wil Kling

RENEWABLES INTEGRATION

ID 19: Control Of DFIG For Wind Energy In A Network Context: A New Formulation And Interpretation Of The Control Specifications ................................................................. 1295
  Mouna Bejaoui, Bogdan Marinescu, Ilhem Slama Belkhodja, Eric Monmasson

ID 25: Probabilistic Load Flow Using Latin Hypercube Sampling With Dependence For Distribution Networks .................................................................................................................. 1302

ID 239: Grid Connected PVS & Wind Turbine With A Wide Range Of Reactive Power Control And Active Filter Capability ................................................................. 1308
  Essam Hussain, Chris Bingham, David Stone

ID 248: A Novel Control Strategy For The Doubly Fed Induction Generators To Improve Grid Fault Ride-Through Capability ................................................................. 1314

ID 96: Vector Control Strategy For Small-Scale Grid-Connected PMSG Wind Turbine Converter .................. 1321
  Chunxue Wen, Guojie Lu, Peng Wang, Zhengyi Li, Xiongwei Liu, Zaiming Fan

ID 114: An Integrated Approach To Optimization Of Energy Supply Mix In Smart Buildings .................. 1328
  Tokhir Gafurov, Belén Téllez, Milan Prodanovic

RENEWABLES INTEGRATION

ID 278: Stochastic Evaluation Of Maximum Wind Turbine Capacity In A Radial Distribution Network .................................................................................................................. 1336
  Peiyuan Chen, Birgitte Bak-Jensen, Zhe Chen

ID 73: Electrical Balancing Potential In Residential Installations .......................................................... 1342
  Korneel Verleden, Bart Verhelst, Jan Desmet, Lieven Vandevalde

ID 137: Three-Level Neutral Point Clamped Inverter Interface For Flow Battery/Supercapacitor Energy Storage System Used For Microgrids .......................................................... 1348
  Ionel Vechiu, Aitor Etxeberria, Haritza Camblong, Jean-Michel Vinassa

ID 290: Distributed Generation And Local Voltage Regulation: An Approach Based On Sensitivity Analysis .................................................................................................................. 1354
  Vito Calderaro, Vincenzo Galdi, Giovanni Massa, Antonio Piccolo

ID 34: A Frequency-Stabilizing Scheme For Integrating Photovoltaics Into A Small Island Grid .................. 1362
  Koji Yamashita, Orie Sakamoto, Yoshihiro Kitauchi, Toshiya Nanahara, Toshio Inoue, T. Arakaki, H. Fukuda

ID 192: A Prediction Based Demand Response Algorithm Using Dynamic Pricing .................................. 1369
  Saraansh Dave, Mahesh Sooriyabandara, Luyang Zhang
ORAL 6B

POWER ELECTRONICS

ID 227: Grid-Connected Three-Input PV/FC/Battery Power Converter With Active Power Filter Capability
Seyed Hossein Hosseini, Farzam Nejabatkhah, Saeed Danyali, Seyed Abdol Khalegh Mozaffari Niapour .......................... 1375

ID 108: Conduction And Switching Loss Comparison Between An IGBT/Si-Pin Diode Pair And An IGBT/Sic-Schottky Diode Pair
Ni-I-Adotei Parker-Allotey, Olayiwola Alatise, Dean Hamilton, Mike Jennings, Phil Mawby .................. 1382

ID 225: Reduced Stacked Multicell Converter With Minimized Stored Energy Of Flying Capacitors
Seyed Hossein Hosseini, Meisam Sadeghi .................................................................................................................. 1388

ID 185: 3D Packaging Technology Incorporated Power Conversion Module For Automotive
Distributed Energy Resource Application .................................................................................................................. 1393
M Jin, X Fu

ID 210: Contribution Of PMSG Based Micro Wind Generation Systems To Provide Voltage Control
In Low Voltage Networks ............................................................................................................................................... 1399
Justino Rodrigues, Fernanda Resende, Carlos Moreira

ORAL 6C

LOAD FORECASTING AND DEMAND MANAGEMENT

ID 167: Hybrid Intelligent Method Of Relevant Vector Machine And Regression Tree For Probabilistic Load Forecasting
Hiroyuki Mori, Akira Takahashi ................................................................................................................................. 1407

ID 262: Load Forecasting For Active Distribution Networks
Simone Paolletti, Marco Casini, Antonio Giannitrapani, Angelo Facchini, Andrea Garulli, Antonio Vicino .................................................................................................................................................................................. 1415

ID 250: Probabilistic Analysis Of Voltage Bands Stressed By Electric Mobility
Alexander Probst, Martin Braun, Jürgen Backes, Stefan Tenbohlen .......................................................................................... 1421

ID 134: Optimal Load Management For A Residential Distribution System In Sweden With Electric Heating And Pevs
David Steen, Salem Al-Yami, Le Anh Tuan, Ola Carlson, Lina Bertling .......................................................................................................................... 1429

ID 301: Multi-Temporal Risk Minimization Of Adaptive Load Management In Electricity Spot Markets
Jhi-Young Joo, Marija Ilic ........................................................................................................................................... 1436

PANEL SESSIONS

Id Ps001. Volt/Var Control For Distributed Generation
Andrew Keane, Tony Hearne, Teresa Fallon, Daniel Brooks ......................................................................................... 1443

Id Ps002. Feasibility Of Dc Transmission Networks
Dragan Jovcic, Niko van Hertem, Kerstin Linden, Jean-Pierre Taisne, Wolfgang Grieshaber ........................ 1444

Id Ps003. Smart Microgrids And Virtual Power Plants In A Hierarchical Control Structure
T. L. Vandoorn, B. Zwaenepoel, J. D. M. De Kooning, B. Meersman, L. Vandevelde .............................................. 1452

Id Ps004. Future Lv Distribution Network Design And Current Practices In The Netherlands
P. Kadurek, J. F. G. Cobben, W. L. Kling .................................................................................................................. 1459

Id Ps005. Future Smart Grid Prosumer Services
Stamatis Karnouskos .................................................................................................................................................. 1465

Id Ps006. Power Quality Challenges In Future Distribution Networks
J. Meyer, M. Klatt, P. Schegner .................................................................................................................................. 1467

Id Ps007. Construction Of China’s Smart Grid: Academic Viewpoint
Yuhue Hou .................................................................................................................................................................. 1473

Id Ps008. Research And Development Of Operation Smart System In CSG
Jifeng Wang, Haifeng Zhou ........................................................................................................................................... 1474

Id Ps009. Fault-Exploring Based Maintenance: A New Maintenance Strategy More Than Condition Based Maintenance
Xuming Liang, Naichao Chang ....................................................................................................................................... 1476

Id Ps010. The Development Of Microgrid In China
Haoming Liu .................................................................................................................................................................. 1477
Id Ps011. Protection Security Assessment Using Automated Analysis
Johann Jäger, Thomas Bopp

Id Ps012. Agent-Based Coordination For Charging Electric Vehicles
Geert Deconinck

Id Ps013. Integration Of Agent-Based Functions To Facilitate Operation Of Smart Distribution Networks
P. H. Nguyen, W. L. Kling, I. G. Kamphuis, P.F. Ribeiro

Id Ps014. Agent-Based Mediated Control In Smart Grids
Stamatis Karnouskos

Id Ps015. Current And Imminent Challenges For The Transmission System Operator In Germany
Joachim Vanzetta, Christoph Schneider

Id Ps084. Field Validation of Smart Energy Saving Features in a GSM Network
Luis Anaya, David Valerdi, Lin Lianhuan, Xie Wenbo, Miguel Torres

Id Ps131. Decision-Making Information From Substation IEDs Drives Equipment Life Extension, Modernization, and Retrofitting
David Dolezilek, Geraldo Rocha

Id Ps307. The Research of Fault Diagnosis in Grounding Grids
Huizhong Xu, Jun Cao
