2011 Symposium on Piezoelectricity, Acoustic Waves and Device Applications

(SPAWDA 2011)

Shenzhen, China
9-11 December 2011
## Contents

From the Chair .............................................................................................................................................................. iii
From the Editors ........................................................................................................................................................... iv
Committees ..................................................................................................................................................................... v
List of Invited Plenary Talks ...................................................................................................................................... viii
List of Winners of Student Paper Competition ...................................................................................................... ix

<table>
<thead>
<tr>
<th>Contents</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stochastic Micro-Vibration Response Of A Spherically Symmetric Piezoelectric Shell Structure As Sensor</td>
</tr>
<tr>
<td>Research On Variable Camber Wing Driven By Ultrasonic Motors</td>
</tr>
<tr>
<td>Analysis Of Energy Efficiency Of A Box Type Sono-Reactor At Resonance</td>
</tr>
<tr>
<td>Controlled Adsorption Of Droplets Onto Anti-Nodes Of An Ultrasonically Vibrating Needle</td>
</tr>
<tr>
<td>Thermal Characteristics Of Traveling Wave Rotary Ultrasonic Motors</td>
</tr>
<tr>
<td>Analysis And Experiment Of A Novel Linear Micro Ultrasonic Motor Based On Shear Vibration Mode</td>
</tr>
<tr>
<td>Stress-Type Hybrid Ultrasonic Motors Of Using Longitudinal And Torsional Vibration Modes Based On The D31 Effect Of Piezoelectric Ceramics</td>
</tr>
<tr>
<td>Optimum Design For Stress Type Hybrid Ultrasonic Motor Using Longitudinal And Torsional Vibration Modes</td>
</tr>
<tr>
<td>FEM Investigation Of Traveling Waves Around Nodal Points Of An Ultrasonically Vibrating Plate</td>
</tr>
<tr>
<td>Study On The Axial/Radial Coupling Non-Contact Ultrasonic Piezoelectric Actuator With A Spherical Rotor</td>
</tr>
<tr>
<td>Experimental Study On A Vibratory Generator Based On Impact Of Water Current</td>
</tr>
<tr>
<td>Drive Of Micro Particles Around Vibration Node Of Copper Substrate Vibrating In Flexural Mode</td>
</tr>
<tr>
<td>Study On Energy Efficiency Of Box Type Non-Resonant Sono-Reactor</td>
</tr>
<tr>
<td>Principle Of The Rotation Of Small Particles Around A Nodal Point Of Flexurally Vibrating Strip</td>
</tr>
<tr>
<td>Experimental Study Of A Hybrid Vibration Energy Harvesting Mechanism</td>
</tr>
</tbody>
</table>
One-Dimensional Phononic Crystal Slabs Bordered With Asymmetric Uniform Layers

A Wireless Pressure Sensor Based On Surface Transverse Wave

Resonant Vibration Failure Modes Of Quartz Resonators

Love Waves In Piezoelectric Layered Structure With Functionally Graded Material Half Space

Finite Element Simulation Of Wireless Structural Vibration And Shape Control With Photostrictive Actuators

The Optimization Of Low-Loss Saw Filter With High Rectangle Factor

Active Vibration Control Of A Stiffened Plate With A Piezoelectric Actuator

Experimental Technique Based On Delay Phase Angle And Piv Measurements Of A Dual Synthetic Jets Actuator

Influence Of Europium Addition On Microstructure And Electrical Properties Of Ccto Ceramics

Effect Of Preparation Method On Properties Of Bnt-Bkt-Bt Piezoelectric Ceramics

The Analysis Of Combustion Audio Signals Based On Continuous Wavelets Transform

Research Progress Of Piezoelectric Immunosensors

Temperature Dependence Of Piezoceramic Disk Resonant Spectrum In Radial Vibration Mode

Structure And Electrical Properties Of 0.07Pb(Mn1/3Sb2/3)O3-(0.93-X)Bisco3-Xpbtio3 Piezoelectric Ceramics

The Enhanced Ferromagnetic Property Of Bfeito3-Ymno3 System

Preparation And Properties Of Batio3/Cofe2o4 Composite Ceramics

Research On The Excitation Modes Of Pzt Element In Bending Cylindrical Transducers

Study On Suppressing Saturation Of Extended Minimal Control Synthesis For Smart Structure Vibration

Tian-bing MA,  Jin-hao QIU,  Hong-li JI
Lymphocytes Favor The Attachment Of Cd11a-Targeted Microbubbles With Endothelial Cells In Vitro..........................
Wei YANG, Fei YAN, Juan-juan CHEN, Hai-rong ZHENG 314

Two-Dimensional Manipulation Of Microbubbles Using Standing Leaky Surface Acoustic Wave
Long Meng Fei-Yan Cai Hai-Rong Zheng 317

Study On The Bandgaps Of Two-Dimensional Vacuum/Solid Phononic Crystals With Helmholtz Resonators
Jiao KE, Yan-feng WANG, Yue-sheng WANG 321

Analysis Of Partially Electroded Piezoelectric Actuators With Nonuniform Thickness For The Purpose Of Reducing
Actuating Shear Stress Concentration By Ansys
Nan LIU, Hongping HU 324

Analysis Of The Vibration Of Film Bulk Acoustic Wave Resonators Based On Mindlin Plate Theory
Dejin HUANG, Ji WANG 328

Time Dependence Of Piezoelectric D33 Coefficient Of Cellular Piezoelectret Polypropylene Film: Finite Element
Modeling
Li Liangliang Fan, Yongping Wang, Zheng Zhong 332

An Equivalent Wear Method Of Friction Material For Ultrasonic Motor
Yan-li WANG, Jian-jun QU, Jian-chun LI, Xiu TIAN 335

A Nonlinear Finite Element Analysis Of High Frequency Vibrations Of Quartz Crystal Plates
Yun-li WANG, Yang-yang CHEN, Rong-xing WU, Li-hong WANG, Hui-min JING, Jian-ke DU, Yuan-tai HU, Guo-qing LI 339

Boundary Integrate Equation Method For Semi-Permeable Vertical Planar Cracks In 3d Piezoelectric Media
Cui-ying FAN, Zheng-hua GUO, Ming-hao ZHAO, Rong-li ZHANG, Ernian PAN. 344

Study On Design And Experimental Of A Piezoelectric Linear Motor Using Columnar Actuator
Wei-hua LIU, Yin WANG, Pei-hong CHEN, Wei-qing HUANG 349

MLS Meshless Method For Elastic Wave Band Structures Calculation Of One Dimensional Phononic Crystal
Xiao-jian LIU, You-hua FAN 353

A Linear Stepping Piezoelectric Motor Using Inertial Impact Driving
Yin WANG1, Song PAN, Wei-qing HUANG 357

The Antibacterial Vibration Of Mass Sensor With An Inhomogeneous Weak Interface
Peng Li, Feng JIN 361

A Decade Of Fbar Success And What Is Needed For Another Successful Decade
Rich Ruby 365

Influence Of Temperature On Microstructure And Electrical Properties Of Znic Doped Ccto Ceramics
Dong Xu, Yan ZHAO, Song BAI, Yuanling Liu, Hao Ding 370

Flexible Sensors Based On Piezoelectret Films
Qiong YOU, Ke-xing LOU, Xiao-qing ZHANG, Ye-wen ZHANG 395
SH Surface Acoustic Waves In Layered Functionally Graded Piezomagnetic /Piezoelectric Structures Loaded With Viscous Liquid .......................................................................................... Li-li Yuan, Jian-ke Du, Lei Yang, Ji Wang 399

Life Prediction Model Of Friction Material For Traveling Wave Ultrasonic Motor ..............................................................................................................

Design And Analysis Of A Disc-Type Of Traveling Wave Ultrasonic Motor With Fixing Inner Side..........................................................

Effects Of Poisson’S Ratio On The Band Gaps Of Three-Dimensional Solid/Solid Phononic Crystals

A New Meshless Method Based On 2d-Efg For The Analysis Of Piezoelectric Laminated Timoshenko Beam

Topology Optimization Of Two-Dimensional Phononic Crystals Using Fdtd And Genetic Algorithm

Temperature Compensated Piezoelectric Bulk Acoustic Wave Filters

Compressive Type Accelerometer Made By Leadfree Bi0.5na0.5tio3- Based Piezoceramics

Complete Band Gaps In Sandwich Phononic Crystal Plates

A Transmission Electron Microscopy Study Of Submicrometer Bifeo3 Particle Prepared By An Improved Solid State Reaction

Surface Acoustic Waves In A Rotating Magnetoelectric Half-Space

Vibration Analysis Of Sc-Cut Quartz Crystal Plates With The Mindlin And Lee Plate Theories

Surface Acoustic Waves In A Rotating Magnetoelectric Half-Space

A Transmission Electron Microscopy Study Of Submicrometer Bifeo3 Particle Prepared By An Improved Solid State Reaction

The Finite Element Analysis Of High-Frequency Vibrations Of Quartz Crystal Resonator Structures

Thickness-Extension Vibration Of Magnetoelectric Plate With Electrodes

Electro-Mechanical Analysis Of Piezoelectric Patch Bonding To Beams

The Correction Factors Of Mindlin Plate Theory With And Without Electrodes For Sc-Cut Quartz Crystal Plates

Inharmonic Over Tones In Partially Plated At-Cut Quartz Crystal Plates

Microscopic Actuation And Optimal Actuator Locations Of Paraboloidal Cylindrical Shells

Neural Signals On Adaptive Paraboloidal Cylindrical Shells
Size Optimization Of Conical Piezoelectric Energy Harvester ...................... Hua LI, Shun-di HU, Horn-sen TZOU 485
SH Wave Dispersion Of The Functionally Graded Piezoelectric Hollow Cylinder .................................................................Yongdong PAN, Zheng ZHONG 489

Determination Of The Surface Wave Dispersion Of A Coating Excited By Laser ................................................................. Xue-hang SONG, Yong-dong PAN, Zheng ZHONG 494

Lamb Wave Dispersion Of Piezoelectric Plate Under Laser Excitation................................................................. Gen CHEN, Jing-Feng ZHAO Yong-Dong PAN 498

Diagonal Flexoelectric Sensor On Cylindrical Shell Substructure.............. Zheng RAO, Shun-di HU, Horn-sen TZOU 502
Breathing Cylindrical Piezoelectric Energy Harvesters ................. Zheng RAO Hua LI Hornsen TZOU 506

Energy Analysis Of A Piezoelectric Patch Laminated On Cylindrical Panels Subjected To Harmonic Line Loadings .... Shuang-shuang WANG, Zheng RAO, Horn-sen TZOU 510

Electromechanical Coupling And Energy Harvesting Of Circular Rings ................................................................. Xu-fang ZHANG, Shun-di HU, Horn-sen TZOU 514

Band Structures Of 2-D Sonic Crystals With Square Lattices Based Finite Element Method .................................................. Bin WU, Zong-fa LIU, Cun-fu HE 518

Preparation Of Europium (Iii) Doped Nanocrystalline Zinc Oxide In Ionic Liquid Via An Ultrasonic Irradiation ............ Yao YANG, Bin GAO, Yue-tao YANG, Xiao-jun LIU, Shu-yi ZHANG 521

Experimental Realization Of Lower-Frequency Complete Band Gaps In 2d Phononic Crystals ........................................ Huan-yu ZHAO, Cun-fu HE, Bin WU, Yue-sheng WANG 525

Parametric Investigation Of A Piezoelectric Energy Harvester With Elastic Support .................................................. Hui-ming WANG, Long ZOU 528

A Circuit Design In Piezoelectric Vibrationmeasurement System ........ Hui-yu LI, Hua LI, Horn-sen TZOU 532

An Analytical Model Of Piezoelectric Vibration Energy Harvesters ........ Yun WANG, Lai-tao XU, Rong-qiao XU 536

Far Field Solution Of Sh-Wave Scattered By A Cavity With Arbitrary Shape In Anisotropic Medium .............................. Zhi-gang Chen Jia-long Wu 540

An Innovative Ultrasonic Motor Model For Efficiency Improvement ................................................................. Bezawada CHAKRADHAR, Potuganti PRUDHVI, Adapa SUDARSHAN, Peri RAGUVEER 545

Low-Frequency Broadband Janus-Helmholtz Underwater Acoustic Transducer .............. Yong-jie SANG, Yu LAN 549

Stiffened Panel Sound Radiation Attenuation Using Acceleration Feedback And Internal Model Control .............. Ming YUAN, Jinhao QIU, Hongli JI 554

The Exact Theory Of Piezoelectric Beams .......................................................... YANG gao, BAO-SHENG zhao 558

Transmission Spectra Of Two-Dimensional Liquid-Liquid Phononic Crystals .................................................. Feng-Lian LI, Yue-Sheng Wang, Chuanzeng Zhang 562

Propagation Of Gap Waves Between Two Functionally Graded Piezoelectric Half-Spaces .......................................................... Yan-ping KONG, Guo-quan NIE, Jin-xi LIU 566

Saint-Venant End Effect Of Piezoelectric-Elastic Sandwich Structures With Imperfect Bonding Under Anti-Plane Deformations .......................................................... Yan Xue, Jinx Li 570

100MHz Low Phase Noise Oven Controlled Crystal Oscillator With Low Supply Voltage And Miniature Package .... Xue-Fei HAN, Qi HU, Zhen-Hua SHI 574
A Newly Composite Quartz Crystal Resonator.............................................................. Chong-zhu Ma, Yu-Guo Li 577
The Xylem Cavitation Diagnosis Technology Based On Ultrasonic Acoustic Emission.................................................................
...................................................................................................................... Jian-xin Wang, Mei-li Sui, Shi-feng Yang, Xian-wei Gao 581
Vibration Control Simulation Of Beams With Piezoelectric Actuators Using Impedance And Fem .............................................
...................................................................................................................... Chang ZHENG, Xiao-Ran YIN, Guo-Qing LI, Xin-Yuan MIAO 585
High Piezoelectric Properties Of BaTiO3 Ceramics Prepared By Two-Step Sintering Technique Through Conventional
Solid-State Reaction Route ................................................. Yong-qiang TAN, Jia-liang ZHANG, Zong ZHANG, Chun-wei WANG 589
Extended Intensity Factors Of Typical Cracks In Three-Dimensional Electromagnetoelastic Materials.................................
...................................................................................................................... Tai-yan QIN, Xiao-juan LI, Lin-nan ZHANG, Peng ZHAO 594
Wave Propagation In A Functionally Graded Magnetoelastic Coating On A Cylinder ...................................... Y. Pan1, Z. Zhong 598
Band Gaps Of SH Wave Propagating In Phononic Crystals Of Piezoelectric Materials.........................................................
...................................................................................................................... Jin-feng ZHAO, Yong-dong PAN, Zheng ZHONG  N/A
