## TABLE OF CONTENTS

### SP-283—1
Adhesive Anchors—Requirements for Their Reliable Use in Concrete Construction
Authors: Rolf Eligehausen and Werner Fuchs

### SP-283—2
Design and Qualification Provisions for Adhesive Anchors in Concrete
Author: John F. Silva

### SP-283—3
Adhesive Anchors Across Borders: A Current Look at the Similarities and Differences Between Testing, Qualification, and Design of Adhesive Anchors in the U.S. and Europe
Authors: Andra Hörmann-Gast and Jacob Olsen

### SP-283—4
Installation of Adhesive Anchors—Theory and Practice
Authors: Philipp Grosser, Werner Fuchs, and Rolf Eligehausen

### SP-283—5
Building Code Requirements for Inspections of Adhesive Anchors in Concrete
Authors: Mahmut Ekenel and Brian Gerber

### SP-283—6
Design Method for Splitting Failure Mode of Adhesive Anchor Systems
Author: Jörg Asmus

### SP-283—7
Outline of Japanese Guideline for Influence of the Embedment Length and the Edges on Tensile Resistance of Post-Installed Bonded Anchor
Authors: Katsuhiko Nakano, Yasuhiro Matsuzaki, and Tomoaki Sugiyama

### SP-283—8
Stress Versus Time-To-Failure Test Method for Evaluating the Sustained Load Performance of Adhesive Anchor Systems in Concrete
Authors: Todd M. Davis and Ronald A. Cook

### SP-283—9
Behavior and Design of Adhesive Anchors Under Sustained Load
Authors: Rolf Eligehausen, Ronald Blochwitz, and Werner Fuchs

### SP-283—10
Evaluation of Sustained Load Behavior of Bonded Anchors—Evaluation Testing Vs. Long-Term Results
Author: Hannes A. Spieth
# TABLE OF CONTENTS

SP-283—11  
Effect of Environmental Exposure on the Creep Behavior of Adhesive Anchors  
Authors: Adham M. El Menoufy, Khaled A. Soudki, Ahmed K. El Sayed, and Hannah Schell

SP-283—12  
Reliability Assessment of Bonded Anchor Systems by Use of Probabilistic Methods  
Authors: Ronald Mihala, Andreas Unterweger, and Konrad Bergmeister

SP-283—13  
Curing and Load Performance of Adhesives Anchor Systems Installed at Low Temperatures  
Authors: Ingo Alig, Dirk Lellinger, Frank Böhm, Ralf Neuerburg, and Friedrich Wall

SP-283—14  
Effect of Fly Ash as Cement Replacement on the Short Term Bond Strength of Adhesive Anchors Systems  
Author: Peter Grzesik

SP-283—15  
Simulation of Adhesive Anchoring Systems in Concrete  
Authors: B. Winkler, Y. Li, and F. Wall

SP-283—16  
Design of Carbon Fiber-Anchors Applied for Seismic Retrofitting with Carbon Fiber Sheets  
Authors: J. Iketani, H. Tsukagoshi, and M. Kawakami

SP-283—17  
Strength Evaluation of Single Adhesive Concrete Anchors under Tensile Load using Artificial Neural Networks  
Authors: A.M. Said and S.E. Robinson

SP-283—18  
EOA Approach to Qualification and Design of Post-Installed Adhesive Anchors for Fire Exposure  
Authors: Werner Fuchs and John Silva
