IET International Conference on Communication Technology and Application

(ICCTA 2011)

IET Conference Publications 586

Beijing, China
14-16 October 2011

Volume 1 of 2

ISBN: 978-1-61839-926-7
# TABLE OF CONTENTS

## VOLUME 1

Using TV White Space for Interference Mitigation in LTE Femtocell Networks .......................................................... 1
Fei Peng, Yue Gao, Yue Chen, K. K. Chai, L. Calhbert

On Intelligent V-BLAST Detection Algorithm with D-S Theory in Correlated MIMO Channel ........................................... 6
Yonghua Li, Tiejun Lv, Xiaoguang Zhang, Ling Qin, Yunjie Li

Synchronization for MIMO-OFDM Systems Based on Preamble Signals ........................................................................ 11
Biao Yan, Mengdong Qu, Qian Hu, Jiamin Wang, Xiangyang Sun

A High Speed Turbo Decoder Implementation for CPU-based SDR System ................................................................. 15
Lin Huang, Yajuan Luo, Hao Wang, Feng Yang, Zhenning Shi, Daqing Gu

Design of a Novel Ultra-wideband Microstrip Antenna with a Frequency Notch Characteristic ...................................... 20
Lei Wang, Tieming Xiang, Qiang Li

Robust Joint Beamforming Scheme for MIMO Broadcast System with Limited Feedback ............................................. 25
Wei Zhao, Chaowei Yuan, Xi Han

New Coordinated Beamforming Scheme for Multi-cell Multi-user MIMO Systems ...................................................... 31
Wenting Li, Peng Cheng, Zhengchong Xiang, Meixia Tao, Xinying Gao

An Approximate Formula for WER of Turbo-like Codes and Its Application ............................................................... 37
Liyan Dai, Hongwen Yang

A Novel Coordinated Beamforming Scheme Based on Local Feedback and Quantization Based Combining in Downlink CoMP System .................................................................................................. 41
Zhangcheng Ding, Xin Luo, Shu Fang, Gang Wu, Chunlin Yan

Effective Channel Estimation for Sparse Multipath OFDM Systems ........................................................................... 46
Wang Nina, Zhang Zhi, Gui Guan, Zhang Ping

A Joint Scheduling and Precoding Scheme Based on Sum Chord Distance in MU-MIMO System with Limited Feedback ........................................................................................................................ 51
Xun Luo, Yang Yang, Shu Fang, Shaoqian Li

An Iterative Multiuser Detection with Frequency-domain Equalization for Relay-assisted SFBC Single-carrier Systems ................................................................................................................. 56
Haitao Zhang, Xin Zhang, Dacheng Yang

A New Beamforming for 60GHZ Wireless System with an Adaptive Approach .......................................................... 62
Tingting Zhang, Xiaotao Cheng, Guangrong Yue, Shaoqian Li

On Complexity of Sphere Decoding with Novel Sphere Radius Determining Method .................................................. 67
Yuan Qi, Rongrong Qian

Analyze and Design Receiving System of UV Communication ...................................................................................... 72
Zhongliang Deng, Mingyu Zhao

A New PAPR Reduction Scheme for OFDM Signals Based on GDFT Signal Processing Theory ........................................... 77
Haizhu Li, Songlin Sun, Xiaojian Jing

The Application of Directional Antenna in Stratospheric Communication ........................................................................ 81
Xiaojin Lin, Shuo Bao, Gengyu Wei, Xinyang Piao

A Novel Modulation Classification for PSK and QAM Signals in Wireless Communication ........................................... 85
Chisheng Li, Jing Xiao, Qingsi Xu

A Hybrid Precoding Scheme for Crossstalk Cancellation in Downstream VDSL System ............................................... 89
Xiangue Li, Danpu Liu, Jianfeng Li

Lattice-reduction-aided Tomlinson Harashima Precoding Based on MMSE Criteria in Multiuser Mimo Downlink System ........................................................................................................................ 94
Guodong Ma, Muqing Wu, Chuxi Xu, Cunyi Zhang

Improved Algorithms Based on Polynomial Cancellation Coding to Deepen Spectrum Notch ........................................... 99
Deqiang Liu, Yun Liu, Zhou Li, Chenglin Zhao

A Data-aided OFDM/QAM Synchronization Algorithm Using Maximum Posterior Probability Criterion .......................... 103
Hao Chen, Su Hu, Gang Wu, Shaoqian Li

Performance Study of Multi-way Wireless Relay Network Coding Algorithm Based on Precoding Technology .................. 108
Zhihua Yang, Qianqian Zhao, Jinquan Wang

Analysis of the Impact of Doppler Spread on OFDM-based Next-generation High-speed Rail Broadband Mobile Communications ........................................................................................................ 112
Yuqing Zhao, Jinxing Li

An Uplink User Selection Scheme Based on PF Criterion for Multi-user MIMO Systems in LTE-A ................................... 117
Zhi Li, Ying Du, Chunyan Feng
Analysis and Improvement Method on Performance of Coordinated Distributed Scheduling in IEEE802.16D WMN
Xiaohui Jiang, Jianyu Zhang, Xu Li............................................................................................................................... 263
Soft Spatial-frequency Reuse Based on Minimum Interference Leakage
Gaofeng Cui, Yang Yu, Weidong Wang, Yinghai Zhang
Sizing Buffer of Router with Pacing Mechanism
Xinying Liu, Lei Wang......................................................................................................................................................... 273
Adaptive Transmission Mode Selection in LTE-A Carrier Aggregation Scenarios
Yang Yu, Feiyuan Yan, Chaowei Wang, Yinghai Zhang
AOS Space Data Link Protocol Performance Analysis and Simulation
Junhui Zhao, Longji Zeng, Wei Yang, Liang Qian............................................................................................................. 283
A Novel Blind Decoding Method in Carrier Aggregation
Qin Mu, Xiaodong Ji, Jianchi Zhu, Liu Liu, Lan Chen, Xiaoming She
A Multi-user Cooperation Scheme Base on Component Demodulation
Qiwen Chen, Zhanji Wu, Hao Jin
A Power Optimization Algorithm for Femtocells to Suppress the Uplink Interference in OFDMA System
Shijun Min, Mengen Peng, Jieying Ji, Yao Wei................................................................................................................. 297
A Self-optimizing Load Balancing Scheme for Fixed Relay Cellular Networks
Lexi Xu, Yue Chen, Yue Gao, L. Cuthbert
Dynamic Sectorisation Based on Genetic Algorithms for OFDMA Networks
Dapeng Zhang, L. Cuthbert................................................................................................................................................. 308
Pro-active energy management for Wide Area Networks
C. Phillips, A. Gazo-Cervero, J. Galan-Jimenez, Xin Chen
End-to-end Energy Efficient Communication
L. Dittmann......................................................................................................................................................................... 319
Packet-delay Invariance to Scheduling Under Congestion
V. Wijeratne, J. Schormans
Optical Network Traffic Detectional Algorithm Based on Principal Component Analysis
Song Yang, Xiaoguang Zhang, Lixia Xi, Congpeng Lu
An Adaptive Bias Configuration Strategy for Range Extension in LTE-advanced Heterogeneous Networks
Peng Tian, Hui Tian, Jianchi Zhu, Lan Chen, Xiaoming She
Enhanced Mobility State Detection Based Mobility Optimization for Femto Cells in LTE and LTE-Advanced Networks
Yixue Lei, Yongsheng Zhang........................................................................................................................................... 337
Wireless Home Gateway: Software-defined Radio Architecture and Applications
Chaorui Zhang, Peng Xie, Deyuan Li, Jiekai Zhang, Rong Yu
Network Coding Aided Gossip Algorithms for Information Dissemination in Arbitrary Networks
Guosong Chu, You You...................................................................................................................................................... 347
Feasibility Study of Relay in 3GPP LTE-Advanced from a Coexistence Perspective
Wen Li, Zhangchun Ma, Shaoshan Shen, Jianyu Li, Hai Zhao
An Improved Algorithm of Synchronization Based on Maximum Correlation for GSM Signals
Chisheng Li, Sheng Lu, Ying Wu, Yingyi Xu
Cell Identification Based on Enhanced ICIC for Heterogeneous Networks in LTE-A Systems
Qing Yang, Dengkun Xiao, Xiaojun Jing
An Improved Viterbi Equalization Algorithm Based on the Maximum Likelihood Sequence Estimation in GSM System
Chisheng Li, Ying Wu, Sheng Lu, Qingyi Xu......................................................................................................................... 367
A Hybrid TDMA Protocol for AD HOC Networks
Wei Liu, Muqing Wu.......................................................................................................................................................... 371
WCDMA Ratio Network Optimization Approach Based on Measurement Report
Kai Zhang, Ping Yang.......................................................................................................................................................... 375
A Novel Route Selection Strategy in Decode-and-forward Relay Enhanced LTE-A Network
Chen Sun, Xiaojun Wang, Weidong Wang, Gaofeng Cui, Xiaofei Wang
Adjusting Electrical Downtilt Based Mechanism of Autonomous Cell Outage Compensation
Fuqiang Li, Xuesong Qiu, Zhengxian Tian, Bingxuan Wang, Luoming Meng
Handover Parameter Optimization of LTE System in Variational Velocity Environment
Linlin Luan, Muqing Wu, Yuhan Chen, Xian He, Chaoyi Zhang.................................................................................. 391
Study of Coexistence Between UWB and Mobile Communication System
Yu Tang, Yin Zhou, Xuebin Sun, Zheng Zhou.................................................................................................................. 396
System Performance Analysis of OFDMA Based Femtocell Networks ................................................................. 401
Mingyan Wang, Xinning Zha, Zhemin Zeng, Shaohua Wan, Wei Li
Coexistence Studies for LTE-FDD with TD-LTE in the Band 2500-2690 MHz ............................................................... 407
Biao Huang, Haiwen Tan, Wei Wei, Jian Fang, Na Zheng
Coexistence Study on Tetra and LTE System Around 806MHz .............................................................................. 413
Ben Wang, Wei Huang, Weidong Wang, Yinghai Zhang, Jiepeng Han
Research on the 3G Mobile Network Optimization .............................................................................................. 419
Dajian Wang, Yang Yu, Kai Zong, Feiyun Tan
Coverage and Networking Analysis of TD-LTE System ......................................................................................... 424
Sheng Zhou
A Novel Method for FEMTO Inbound Handover ..................................................................................................... 428
Wei Huang, Ben Wang, Weidong Wang, Ming Lei, Lei Jiang
Design of Voice Reminder System for Intelligent Transportation Based on Wireless Sensor Network .................. 433
Wei Zhao, Jiuyun Jin, Yangming Gao, Zhiyue Wang
Research on Utilizing Guard Band in LTE Uplink Coexistence Based on Uncoordinated Deployment Scenario ................................................................................................................................. 437
Wenqun Chen, Guangfeng Cai, Jie Duan, Weidong Wang, Yinghai Zhang
Hybrid Access Based on Partial Resource Sharing ............................................................................................... 443
Jie Duan, Guangfeng Cai, Wenqun Chen, Bo Li, Yinghai Zhang
Analysis for the BER of LTE System with the Interference from Radar ................................................................. 448
Jiepeng Han, Ben Wang, Weidong Wang, Yinghai Zhang, Wanqing Xia
Research on Competitive Advantage Mechanism of the Mobile Internet Ecosystem ............................................ 453
Wei Cai
A Novel Traffic Capacity Planning Methodology for LTE Radio Network Dimensioning ........................................ 458
Jun Gu, Yufeng Ruan, Xi Chen, Chaowei Wang
Employing Unified Data Model in Integrated Analysis System ............................................................................. 463
Yan Zhan, Weixi Duan, Rongsheng Li, Chao Zhang
Novel Network Simulation Model of Sensor Networks with Complex Network Characteristics .......................... 467
Dahui Han, Kai Zhang, Xinyuan Lai, Min Zhao
Performance Evaluation of Channel Detection for the Cooperative Network Coding in the Wireless Relay Network ................................................................................................................................. 472
Han Fang, Wenbin Guo, Mugen Peng
A Mathematical Modeling Approach to Optimize Repeaters Location in Wireless Telecommunication ............... 477
Xifan Zheng, Lan Li, Ling Xie
An Algorithm of Load-balance Based on Evolutionary Game Theory in Heterogeneous Wireless Networks ................................................................................................................................. 482
Haolong Wang, Wei Song, Peng Wang, Li Wang
Doppler Diversity Technique Based on Pilot-aided Channel Estimation for OFDM Wireless Mobile Communication .............................................................................................................................. 486
Jing Xue, Tao Luo, Dan Shang, Weidong Xiong
Adaptive Configuration of Antenna Down Tilt for Optimizing Coverages in IMT-Advanced Systems .......... 491
Jun Chen, Hua Jiang, Mugen Peng
Handover Parameter Optimization in Self-organizing Network ........................................................................... 496
Chunjie Feng, Xiaodong Ji, Mugen Peng
Modelling and Analysis of Voice and Data Traffics with Multi-dimensional Markovian Chains in Wireless Networks .......................................................................................................................... 501
Xing Zhang, Jie Hu, Meng Yao, Qinzi Li, Wenbo Wang

VOLUME 2

How Network Coding Helps eMBMS ....................................................................................................................... 507
Xiaoli Wang, Yongsheng Zhang, Song Xiao
Traffic Localization for Video Service on Intelligent Optical Network ................................................................. 512
Chen Tang, Hui Li, Yuefang Ji, Yuanchen Ma, Yaling Nie
Ubiquitous Femto Awareness Application Access and Service Recommendation ................................................. 517
Yingjie Wang, Yongsheng Zhang
Design of Rest APIS for the Exposure of IMS Capabilities Towards Web Services ............................................... 522
Ye Zhou, Yang Ji
Resource Search Optimization of P2P Based on ISP and Resource Character .................................................... 527
Hui Ma, Junyong Cheng
Probability Density Function Estimation Based on Representative Data Samples ................................................. 690
Jing Wang, Xiaoling Li, Jianhong Ni

A Privacy Enhanced DNS Scheme for the Internet of Things ................................................................. 695
Yanjiong Wang, Qiaoqian Wen

Generation of Tunable Radio Frequency UWB Signal Based on Optical Pulse Shaping ............................ 699
Xiaolong Yin, Jieyun Tu, Yaliu Chen, Quanxin Yuan, Yuhang Dai

A New Technology of Short-range Communication for ‘One Card Solution’ in School ............................ 703
Wei Dai, Guangyan Luo, Shaohua Liu

Mobile User Time-of-day Regularity Analysis in GPRS Network ............................................................... 709
Wei Cheng, Liuying Chen, Yinan Dou, Zhenming Lei

Study of architecture of Power Internet of Things .................................................................................. 714
Yan Chen, Lingkang Zeng, Xi Chen, Xiangchen Li, Jianming Liu

Integration of IOT with Smart Grid ........................................................................................................... 719
Xi Chen, Jinning Liu, Xiangzhen Li, Limin Sun, Yan Zhen

Study on Food Safety Ontology Reasoning Application Based on Jena ................................................... 723
Yuehua Yang, Junping Du, Juan Hu

A Middleware of Internet of Things (IoT) based on ZigBee and RFID ...................................................... 728
Chunxia Fan, Zhigang Wen, Fan Wang, Yuexin Wu

An Improved Method Using Kinematic Features for Action Recognition .................................................. 733
Yuanbo Chen, Yanyun Zhao, Anni Cai

A Compound Tag Number Estimation Scheme for Aloha Based Anti-collision Algorithm in RFID Networks .................................................................................................................. 738
Zhengping Li, Changnian Zhang, Ming Huang, Hao Shi

Internet Tourism Scene Classification with Multi-feature Fusion and Transfer Learning .......................... 743
Jie Liu, Junpeng Du, Xiaoru Wang

A Mobility Metrics Based Dynamic Clustering Algorithm for VANETs ...................................................... 748
Wei Fan, Yan Shi, Shanzhi Chen, Longhao Zou

Developing a Disaster Surveillance System Based on Wireless Sensor Network and Cloud Platform ....... 753
Jianhu Cen, Tao Yu, Zhe Li, Song Jin, Shaohua Liu

Research and Improvement on Chebyshev Transformer in Practical Application ....................................... 758
Longfei Wu, Zhennan Shi

Electronic Map Model of Indoor Location and Navigation Based on Location Fingerprints ..................... 762
Lianming Xu, Qing Sheng, Zhongliang Deng, Wenlong Liu

A New Improved DV-HOP Localization Algorithm ..................................................................................... 768
Yutong Wang, Wo Tian, Yuanqun Peng, Ying Liu

Customers Acceptance Behavior on Mobile Internet Services .................................................................. 773
Min Lu, Min Zhu

The Research of Foggy Blurring Image Restoration ..................................................................................... 778
Rong Wang, Qiwen Liu

Recent Development in Stereoscopic Display Technology ........................................................................... 783
Lina Zhao, Fei Wang, Wei Liu

Design of Identity Verification Unit and Management System ..................................................................... 788
Songwei Wang, Changwu Li, Jian Liu, Zhisen Wang

Matching Grouping Dynamic Frame Slotted ALOHA for Anti-collision in RFID Systems ..................... 792
Jiayi Qiao, Weidong Wang, Yinghai Zhang

Mobile ITS System Based on RFID ............................................................................................................ 797
Fang Wang, Jiayi Qiao, Weidong Wang, Yinghai Zhang

A Reliable Transmission Scheme for Security and Protection System Based on Internet of Things ........... 802
Zhenfeng Song, Yali Zhang, Changming Wu

A High Reliable Satellite Communication for Emergency Communications .............................................. 807
Wei Li, Mingfeng Li, Yanhai Hao

Dispersion Flattened Photonic Crystal Fibers for Supercontinuum Generation in a Telecommunication Window ................................................................................................................. 811
M. A. Hossain, Y. Namihira, Jingjing Liu, S. A. Razzak, M. A. Islam, Y. Hirako, K. Miyagi, S. Nozaki

Dispersion Flattened Nonlinear Square Photonic Crystal Fiber for Dental OCT ........................................ 815

Large Effective Area Photonic Crystal Fiber for Fiber-to-the-home Optical Communication Applications ................................................................................................................................. 820
F. Begum, Y. Namihira, Jingjing Liu
A Mobility Load Balancing Optimization Method for Hybrid Architecture in Self-organizing Network .......................................................... 824
Yao Wei, Mugen Peng

Cluster and Grid Based Weighted K-Nearest Neighbours for Outdoor Location Estimation .............................................................. 829
Kejiong Li, Peng Jiang, J. Bigham

Investigation on a NLOS Error Mitigation Algorithm for TDOA Mobile Location ........................................................................ 835
Hemli Li, Zhongliang Deng, Yanpei Yu

A Novel Finite-ground Coplanar Waveguide Structure Filters with Spurious Passband Suppression .................................................. 840
Huisheng Wang, Xiaoping Li

Real-time Speech Coding and Decoding for GSM System and Its Implement in VC ......................................................................... 844
Guojin Wan, Qingyi Xu, Jing Xiao, Sheng Lu

A Full Detection Algorithm Based on Pattern Recognition and Human Posture Analysis .............................................................. 849
Heang Cheng, Huilong Luo, Fang Zhao

Design of a Novel CPW Structure Employing Triangle-shape Groove ...................................................................................... 854
Zhongliang Deng, Lianli Chang

A Novel Implementation of Timing Synchronization Based on Convolution for Gbps OFDM Trial System ........................................... 858
Hongjian Gao, Qiang Wang, Yifei Yu, Jiahuai Zhang

The Study and Design of Data Type Specific Encryption System for Windows-based Mobile Devices ............................................ 863
Changming Wu, Zhenfeng Song

Design and Implementation of IEEE 802.16 Baseband System on FPGA ...................................................................................... 868
Chen Gu, Xu Li

A Design of Indoor & Outdoor Navigation System ...................................................................................................................... 873
Yali Jiang, Yuan Fang, Chunlong Yao, Zhisen Wang

The Design and Implementation of Elevator Monitoring System Based on Embedded Platform .............................................................. 878
Huimin Meng, Lei Fan, Xin Zhao

The Driver Design and Implementation of NAND Flash Based on Memory Technology Device .............................................................. 882
Huimin Meng, Zhenping Lan, Yuan Fang

Marginal Utility-based Power Coordination in OFDMA Downlink .............................................................................................. 886
Zhenli Shi, Daqing Ge

An Adaptive Method Utilizing Channel Reciprocity in TDD-LTE System ...................................................................................... 892
Jing Ran, Lihua Li

Design and Implementation of Kalman Filter ......................................................................................................................... 897
Zhuozi Chen, Zhuban Sun, Wenbo Wang

Research on BS Antenna Configuration in TD-LTE System ........................................................................................................... 901
Yanjie Dong, Lijun Li, Weidong Wang, Yingchai Zhang

A Cross Layer Routing Protocol for Green Communication Network ...................................................................................... 906
Chao Dai, Wang Li, Lixin Wang, Mei Song, Yong Zhang, Jinhua Xiao

Implementation of Extended Kalman Filter on FPGA .................................................................................................................. 911
Xiaoxiao Jiang, Jun Tao, Zhe Zhang

Seamless Amalgamation of Full Duplex 2.5Gbps Wireless and 10Gbps Wired Optical Access Networks Based on QAM-OFDM Technology ........................................................................................................... 918
Zhe Kang, Nianyu Zou, Dong Wang, Jingjing Liu, Yingming Gao, Ping Li

A Design of Low Cost Illuminometer with Multiple Functions .................................................................................................. 922
Yingming Gao, Huanyue Zhang, Xiaoyang He, Zhe Kang, Nianyu Zou

Effects of Flicker on Vision in LED Light Source Dimming Control Process ........................................................................... 926
Fan Cao, Desheng Li, Xiaoyang He, Yingming Gao, Min Cheng, Nianyu Zou

Research on Indoor Visible Light Communication System Employing White LED Lightings .............................................................. 930
Jiayuan Wang, Zhe Kang, Nianyu Zou

Design of LED Street Lamps with Nonsymmetrical Optical Distribution ..................................................................................... 934
Min Cheng, Jinghui Zhang, Fan Cao, Xiaoyang He, Nianyu Zou

Research on Next-generation 40Gbit/s OFDM-PON Employing OOK Modulated Upstream Signals .................................................. 938
Dong Wang, Nianyu Zou, Zhe Kang, Jingjing Liu, Yinghao Zhan

A Novel Evaluating Method of the Reliability of LED Luminaries .................................................................................................. 942
Lin Zou, Desheng Li, Yuncui Zhang, Nianyu Zou

A Comparative Study of the Tradable Bottleneck Permits Scheme and Congestion Pricing Policy .................................................. 945
Yuan Fang, Pengfei Wang, Jiefeng Huang, Deguang Meng, Zhisen Wang

Design of Lamp Life Test Instrument Based on Wireless Communication ...................................................................................... 950
Deng Pan, Yuncui Zhang, Taiming Piao, Nianyu Zou, Zhisen Wang

Field Testing Method of Color Temperature of Outdoor LED Lamps ...................................................................................... 954
Yi Yang, Jinghui Zhang, Guanying Cao, Yuncui Zhang, Nianyu Zou
Simulation of White Light Based on Mixed RGB LEDs .......................................................... 957
Xin He, Guanying Cao, Nianyu Zou

A Novel Method for Measuring Spatial Distribution of Illuminance ........................................ 961
Liyuan Gao, Jiya Jin, Zhenping Lan, Zhisen Wang

A Sensing Optimal Proposal Based on Intelligent Street Lighting System .................................. 964
Xinshun Zhang, Jiya Jin, Haimin Meng, Zhisen Wang

Design of New Hybrid Optical System of LED Cap Lamp .......................................................... 968
Qing Liu, Yuncui Zhang, Nianyu Zou, Yingming Gao, Jingjia Zhang, Guanying Cao, Fan Cao

Indoor Illumination Based on Distributive LED Lights ............................................................... 972
Yuncui Zhang, Yanran Wang, Desheng Li, Lu Liu, Xiaoqian Li, Nianyu Zou

A Method on Improvement of Wavelength Resolution of Grating Spectrometers ....................... 976
Junhao Song, Qiansuo Yang, Nianyu Zou

Influence Analysis of Road Reflective Characteristic on Roadway Luminary Design .................... 980
Jinghui Zhang, Yi Yang, Xiaoyang He, Min Cheng, Guanying Cao, Nianyu Zou

Luminescence Spectrum Analysis of CDSE/CDS Core/shell Quantum Dots Prepared by Ultrasonic Irradiation .................................................................................................................. 984
Limin An, Yuqiu Qu, Xue Dong, Jiutao Zhang, Shengchun Liu

The Fluorescent Signal Quench in the Composite Structure of CDSE Quantum Dots and Conductive Polymer .......................................................................................................................... 988
Yingmin Luo, Limin An, Jianguang Chi, Mingying Zhang, Xuyu Wang

Preparation and Optical Properties of Core-shell CAF2:Yb, ER@SIO2 Nanoparticles ....................... 993
Yuqiu Qu, Xuebin Huang, Miao Wang, Menglin Liu, Limin An, Liuyang Zhang

Investigation of the Interaction of P-benzoquinone and Aqueous Amino Acids in Liquid Core Optical Fibers with Raman Spectroscopy ................................................................. 997
Liuyang Zhang, Yuqiu Qu, Limin An

Research on Jerk Visual Model Simulation and Control Based on Simulink .................................. 1001
Chunxia Liu, Jie Yi, Hong Wei, Liang Xu, Yongqing Fu

Effects of Homo-buffer Layer and Annealing Treatment on Optical Property of ZnO Thin Film .......... 1005
Ailing Zou, Yan Wang, Yingmin Luo, Heqiu Zhang, Guanying Cao, Nianyu Zou, Lizhong Hu

Cognitive Wireless Networks: Challenges and Opportunities ....................................................... 1008
P. Zhang

Deployment Strategies of LTE of DOCOMO and Challenges for Future Mobile ......................... 1008
H. Suda

M2M Communications .................................................................................................................... 1009
H. Wang

Communications - A Rapidly Changing World .............................................................................. 1009
L. Cuthbert

The European Framework Programmes for Co-financing R&D - The Last Opportunities in FP7 (2007-2013) and Initial Plans for FP8 .......................................................... 1010
M. Potts

Field Trials of DVB-T Sensing for TV White Spaces ..................................................................... 1010
R. Davies

Where Next for Cognitive Radio? .................................................................................................. 1011
T. Clarkson

Challenges in Cognitive Radio Research: Primary Radio Aware Spectrum Sensing, Medium Access, and Routing .................................................................................................................. 1011
S. Cui
