# Demand Forecasting Using Intelligent Agents with Application to a Call Processing Center
Wen-Bin Yu and James H. Graham

# Evaluation of iPVFS: A High Performance Parallel File System over iSCSI for Cluster Computing
Li Ou and Xubin He

# A Geometric Distribution-Based Approach for Aligning 3D Digital Object Models
Naoufel Werghi

# A Hybrid Clustering Method for Gene Expression Data
Baoying Wang and William Perrizo

# FPGA-Based Implementations of Quadrature Mirror Filter Banks
Ali Al-Haj

# UML-Based Methodology for Reliability Analysis of Concurrent Software Applications
Rehab A. El Kharboutly, Reda Ammar, and Swapna S. Gokhale

# Index
