INTERNATIONAL JOURNAL OF COMPUTERS AND THEIR APPLICATIONS

TABLE OF CONTENTS

Implementing Templated Design Patterns: A Category Theoretic Approach ................................................................. 169
Yujun Zheng, Qimin Hu, and Jinyun Hue

A Randomized Queueless Algorithm for Breadth-First Search ................................................................. 177
K. Subramani and K. Madduri

Handling Overload and Data-Relaxation Control in Distributed Real-Time Database Systems ..................................... 187
Samia Bouzefrane, Jean-Paul Etienne, and Claude Kaiser

A Decision Support Tool for Prioritizing the Construction of Short Roads Using an Expert System Approach ....................... 201
Hussam M. Ramadan and Yousry I. Taha

Scalability in Analyzing the Availability of Large-Scale Networks using Multicast ............................................ 217
Falko Dressler

Statistical Source Modeling of Walkthrough Navigators ................................................................................... 225
H. A. Hassan, S. A. F. Bassiouny, M. S. Abougabal, and W. M. Sheta
