# TABLE OF CONTENTS

Adaptive Multiple Level Mobility Anchor Point Selection Scheme in HMIPv6 ............................................................... 1  
Yunsheng Ge  
A Cross-layer Approach for Neighbor Discovery in Opportunistic Networks ................................................................. 6  
Zhi Ren, Hong Chen, Jianling Cao, Yukun Yao  
Research of Multi-path Intrusion Tolerance Wireless Transmission Method Toward Remote Island ............................................. 11  
Bo Li, Fanglin Cheng, Yifei Zhang, Ying Ye  
Relaying Kalman Filters for Range-based Sensor Networks ........................................................................................... 14  
Zhigang Liu, Jinkuan Wang  
A Star Low-power Wireless Sensor Network Design and Analysis ..................................................................................... 18  
Yanan Zhang, Yongzhou Dai, Hai Niu, Tengteng Xie  
Research of On-board Optical/Electric Switching of Broadband Multimedia Satellite ..................................................... 22  
Rui-Xin Li, Shang-Hong Zhao, Zhouhui Yao, Wei Zheng, Yong-Jun Li, Yuan Qian  
Wisdom Network .............................................................................................................................................................. 26  
Xianwei Zhou, Zhimi Cheng, Yueyun Chen, Yan Ding, Jiahui Hu, Qian Liu, Qixiang Huang  
Capacity and Cell Range Estimation of Mobile WiMAX ................................................................................................ 30  
S. Al-Rashdy, Qing Guo  
K. Rafique, Chunhui Yuan, M. Saeed  
Neighbor Node Discovery Based Clustering and Cooperation for Dense Reader RFID Systems ........................................... 40  
Guangshan Zhang, Wang Kang, Zhaohao Wang, Youguang Zhang  
Encryption and Displacement Based Scheme of Defense Against Primary User Emulation Attack ....................................... 44  
Xiao Zhou, Yang Xiao, Yuanyuan Li  
Design of GPS IF Signal Acquisition and Tracking Circuits Based on FPGA .................................................................... 50  
Man Yang, Jincheng Li  
Wide-range, Accurate Frequency Offset Compensation Algorithm Based on LDPC for Space Coherent Optical Communication ......................................................................................................................... 54  
Jingsong Xiang, Miaomiao Zhang, Xiaolei Zhang, Shengming Ma  
An Improved Backoff Algorithm with Node Access Fairness in WLAN ......................................................................... 59  
Xiaoying Zhang, Lei Guo  
A Modified AODV Routing Protocol Based on Route Stability in MANET ........................................................................ 63  
Zonghua Mou, Xiaojing Meng  
CCMA: Collision Coordinated Multiple Access in Wireless LAN ...................................................................................... 68  
Ji Fang, Zhenhui Tan, Kun Tan, Yong Kong  
Study on Different Implementations of UWB Wireless Communication System ................................................................. 73  
Haoxiang Zhang, Linyi Gao  
Performance Evaluation for 60 GHz PAM Systems with Amplitude Detection Receiver .................................................... 77  
Hao Zhang, Wei Wang, Tingting Lu, T. A. Gulliver  
A Digitally Controlled Oscillator for Wireless Communication Application .......................................................................... 82  
Xiu-Long Wu, Yuan Chen, Jian Meng, Jun-Ning Chen  
Cross-layer Communication Power Allocation for Distributed Detection in Wireless Sensor Network ...................................... 85  
Xiangyang Liu, Wenbin Bai, Xiaoying Cheng, Jin Pan  
Transmission Power Optimization in Two-way Transmission Aware Relay-aided Cellular Networks .................................... 90  
Guanyao Du, Ke Xiong, Dandan Li, Yu Zhang, Zhengding Qu  
Research on Cell Reselection Criteria in TETRA .................................................................................................................. 95  
Congcong Sun, Shijuan Hou, Hai Li  
Overview of the Receiver Techniques for BOC Modulation Signal .................................................................................... 99  
Lin Li, Wenhui Zhou, Shasen Tan  
BER Performance Analysis of RCPC and PCCC Codes for TETRA Release 2 ...................................................................... 103  
Huayu Liang, Dongning Yao, Lei Xiong  
A Class of (3, k) Quasi-cyclic LDPC Codes from Difference Sequences with Girth 8 .............................................................. 108  
Bing Li, Lijun Zhang, Lee Lung Cheng  
Construction of Nonbinary LDPC Codes: Prime Difference Approach ........................................................................... 114  
Xin Zhao, Lijun Zhang, Leelung Cheng  
Construction of QC-LPDC Codes Based on PSO Algorithm .................................................................................................. 118  
Yang Yang, Yang Xiao
Capacity Degradation of Representative Antenna Selection Algorithms and an Antenna Selection Scheme .............................................................................................................. 123
Jun-Ling Wang, Mei-Guo Gao, Tuo Fu, Cheng-Fa Xu
MIMO Interference Alignment for Cognitive Radio Network ............................................. 127
Yuanfang Li, Yang Xiao, Moon Ho Lee
Decoding Algorithm and BER Performance of Interference Alignment and Cancellation System in MIMO Networks ................................................................. 131
Yamayuan Li, Yang Xiao, Moon Ho Lee
Sparse Time-variant MIMO Channel in High Speed Mobile Scenario .................................. 137
Binghao Chen, Zhanghui Zhang, Bo Ai
Performance Evaluation for High-speed Railway Mobile Communication on HIL Simulation Platform ................................................................................................. 141
Lei Xiong, Zhanghui Zhang, Bo Ai, Hong Wei
Adaptive Initial Ranging Resource Allocation Algorithm in IEEE802.16 System .................. 145
Xu Zhu, Zhao Sun, Wenbo Wang
Spectrum Sensing Using Two-stage Detection to Compensate for Reduced Primary User Duty Cycle .......................................................... 149
K. Chang, B. Sonadji
Polarization Information Based Spectrum Detection Algorithm for Cognitive Radio .............. 155
Yu Deng, Xuekang Sun, C. Guo
Multi-source Cooperative MIMO Cognitive Network Based on Distributed Interference Alignment ............................................................................................................. 160
Yongli An, Yang Xiao, Guangzhi Qu
Soft MIMO: A Software Radio Implementation of 802.1 in Based on Sora Platform .............. 165
Ji Fang, Zhenhui Tan, Kan Tan
Linear Interference Alignment Based on Signal and Interference Space Ranks ....................... 169
Haitao Li
Key Parameters Influence on Wavelet Based OFDM Systems ............................................. 173
H. Sadreazami, M. Amini
Performance Analysis of Space-frequency Coding in MIMO Cognitive Radios ..................... 177
Xin Duan, Yang Xiao, Shujuan Shang, Moon Ho Lee
An Automatic Mosaic Method for Unmanned Aerial Vehicle Video Images Based on Kalman Filter .............................................................................................................. 182
Yan-Shan Li, Ji-Hong Pei, Wei-Xin Xie, Liang-Qun Li
Mixed Noise Removal Using Cellular Automata and Gaussian Scale Mixture in Digital Image ............................................................................................................. 187
Jiayao Liu, Kequan Lin
FPGA Based High Speed Design for Blind Equalization of 8PSK Signals ............................ 192
Bo Jiang, Qunna Li, Tao Xu, Cuihui Liu, Dong Wen
Frame Synchronization in SC-FDE System Using PN Sequence Modulation ......................... 196
Xuewen Zeng, Mafei Liu, Hong Ni, Jindin Wang
Extracting Singing Melody in Music with Accompaniment Based on Harmonic Peak and Subharmonic Summation ............................................................... 200
Tian Cheng, Wei Xu, Yu Tian, Xiaojun Hei
A New Method for Noise Power Spectrum Estimation ..................................................... 206
Yao Yu, Heming Zhao
ROI-based MB-level Adaptive Frequency Weighting .......................................................... 210
Yan Huo, Tao Jing, Qingqing Niu
Research on Underground Wireless Video Encoding Algorithm Based on Region of Interest for Interprediction .......................................................... 216
Hongxian Tian, Wei Yang
Epidermal Contour Segmentation by Using Level Set with Prior Shape and Region ................ 220
Zeming Zhou, Yuanxiang Li, Ning Ma, Yi Wang, Jie Xiang
Object Detection in Smoke Screen Interference Image Sequences Based on Fractal .............. 225
Xiaoke Yan, Junjie Zheng, Caicheng Shi
Research on Wireless Video Encoding Algorithm for Underground Based on Background Registration and Motion Segmentation ......................................................... 229
Hongxian Tian, Wei Yang
A New Algorithm for Fast Block-matching Motion Estimation Based on Tree-structured Block Partition ........................................................................................................ 234
Yanshan Li
Facial Expression Recognition Using Local Binary Covariance Matrices ............................ 237
Song Guo, Qiuqi Ruan
An Orthogonal Tensor Rank One Discriminative Graph Embedding Method for Facial Expression Recognition .......................................................... 243
Shuai Liu, Qiuqi Ruan, Zhan Wang
Regularized Neighborhood Boundary Discriminant Analysis for Facial Expression Recognition ............................................. 248
Zhan Wang, Qiaqi Ruan, Shaqi Liu, Song Guo

Independent Gabor Analysis of Illumination Insensitive Isophote-angle for Face Recognition ........................................... 253
Gaojun An, Jiyong Wu, Qiaqi Ruan

Multiple Description Image Coding Based on Fast Fractal Coding .......................................................... 257
Meiqin Liu, Yan Zhao, Junpeng Qi, Dongxia Chang

Facial Expression Recognition Based on Local Facial Regions ........................................................................... 262
Nan Zhang, Xue Geng

Simulation Study of Buffering Mechanism in P2P Live Streaming System .......................................................... 266
Guangqiang Deng, Changjia Chen

The Effects of Replication on the QoS in P2P VoD Systems ........................................................................... 270
Dan Huang, Yi Zheng, Yushuai Chen, Changjia Chen

Link Performance Based Neighbor Selection Mechanism in BitTorrent for the Wireless Networks ...................... 274
Wen Zhou, Wei Xiang, Yongchao Wang, Kuntai Li

Moderate Prefetching Strategy Based on Video Slicing Mechanism for P2P VoD Streaming System .......... 279
Guangqiang Deng, Ting Wei, Changjia Chen, Wei Zhu, Bin Wang, Deng Rong Wu

Understanding Users’ Access Failure and Patience in Large-scale P2P VOD Systems ................................ 283
Qiafang Ying, Yuchun Guo, Yushuai Chen, Xiaoping Tan, Wei Zhu

Understanding IPv6 User Performance on Private BT System ........................................................................... 288
Naixiang Ao, Changjia Chen

User Data Mining in a Large-scale Peer-assisted Offline Download System .......................................................... 294
Yingying Xu, Naixiang Ao, Changjia Chen, Yushuai Chen, Yan Huang

Bandwidth Allocation Algorithms in the Short Video Sharing System .......................................................... 299
Dan Huang, Changjia Chen

Video Search Algorithm Using the Motion Vectors Map .................................................................................. 303
Jung-Yang Kao

Mechanism for Generic Purpose SIM Card Communication and Its Applications ............................................. 307
Defan Long, Xiang Gao

Building the Database of Category and Craft of Shaanxi Qin Embroidery Art ....................................................... 311
Junmei Zeng

An Intrusion Detection Scheme Based on Anomaly Mining in Internet of Things .................................................. 315
Rongrong Fu, Kangfeng Zheng, Dongmei Zhang, Yixian Yang

Design and Implementation of an Efficient Load-balancing Method for Virtual Machine Cluster Based on Cloud Service ............................................................................. 321
Rui Wang, Wei Le, Xuejie Zhang

Ergodic and Outage Capacity for Ricean Fading Channel with Shadow Fading on High-speed Railway ......................... 325
Lei Xiong, Zhanghui Zhong, Bo Ai, Jinlong Qian

A Load-balanced Cooperation Stimulation Mechanism for Selfish Behavior of Nodes in Wireless Network Coding .................................................................................. 329
Li Huang, Shenghui Wang, Zhengding Qiu

Meilin Lin, Jianhua Ge, Ye Yang, Chao Shen, Zhengding Qiu

SER Analysis of Physical Layer Network Coding at High SNR Over AWGN Channels ...................................... 338
Dandan Li, Ke Xiong, Yu Zhang, Zhengding Qiu

Power Allocation and Relay Selection for Cellular Network with Cooperative Network Coding ............... 342
Shenghui Wang, Xiuhua Fu, Ke Xiong, Zhengding Qiu

Group Network Codes Based on Exponentiation and Multiplication Over a Subgroup of PGL(2,p) .................. 346
Hang Zhou

Universal Access Authentication for Wireless Network ............................................................. 350
He Liu, Menghui Liang, Wenjuan An

Physical Layer Signal Test System of CAN Bus ...................................................................................... 356
Jiankang Yang, Xiaochen Wang, Tong Li

The Fine Structures of Three Idempotent Latin Squares with Small Orders ......................................................... 360
Chuanqi Li, Size Li

The Four-way Real-time Audio and Video Transmission System Design and Implementation by Satellite-based Communication Channel ........................................................................... 364
Bing Wang

A Method to Construct Elements of IdFin(2v+1) by Using Elements in IdFin(v) .................... 369
Chuanqi Li, Size Li
Research on Economic Benefit for PHM ................................. 373
Warding Li, Zhenheng Wang, Yan Chen, Xiangjun Song

Image Defect Inspection Based on Human Visual Characteristics .................................................. 377
Fanci Guo, Chune Zhang, Ke Xiong

Author Index
