ISSC 2011 Papers

**SOS**
Chair: Kady

*The Need for SoS Safety Classes* 1  
Rob Alexander, Tim Kelly, George Despotou; University of York, York, UK

*Is the “System of Systems” a Useful Concept for Hazard Analysis?* 11  
A.J. Rae; University of York; Heslington, North Yorkshire, UNITED KINGDOM  
R.D. Alexander; University of York; Heslington, North Yorkshire, UNITED KINGDOM

**ACCESS: A Toolset for Safety Case Creation and Management** 21  
P. Steele; University of Virginia; Charlottesville, Virginia, USA  
K.R. Collins; University of Virginia; Charlottesville, Virginia, USA  
J.C. Knight, Ph.D.; University of Virginia; Charlottesville, Virginia, USA

*Using Rapid Risk Assessment Techniques to Combat Degraded Modes of Operation* 31  
Chris W. Johnson; School of Computing Science, University of Glasgow, Glasgow, UK, G12 8RZ.

**Global I**
Chair: Raheja

*Developing a Global System Safety Perspective* 40  
R. W. Fletcher, P. Eng, M. Sc., PMP, RFSS Inc., Ottawa, Canada

*Common Implementation of Different Safety Standard Approaches* 50  
W. Sebron, Dipl.-Ing.; Vienna Institute for Safety and System Engineering; Vienna, AUSTRIA  
H. Tschürtz, M.Sc., M.Sc.; Vienna Institute for Safety and System Engineering; Vienna, AUSTRIA  
G. Schedl, Dipl.-Ing.; Frequentis AG, Vienna, AUSTRIA

*Potential Pitfalls in Relation to Safety Initiatives and other Aspects of Cultural Failure* 60  
Malcolm Jones, B.Sc., Ph.D., F. Inst. P., C. Phys., C Eng; AWE; Aldermaston, Berks., UK, RG7 4PR.

**Space**

*Preparing a Space Debris Assessment Report (SDAR) for the Space & Missile Systems Center (SMC)* 69  
Francis McDougall; Bachelor of Science (BS) in Physics, Naval Postgraduate School (NPS) Certificate; LAAFB; El Segundo, CA USA  
Justin Ferrell; Bachelor of Science (BS) in Mechanical Engineering; LAAFB; El Segundo, CA USA  
Mark Huang; Master Business Administration (MBA) & BS in Electrical/Electronic Engineering Technology; LAAFB; El Segundo, CA USA  
Lan Dang; BS in Chemical Engineering; LAAFB; El Segundo, CA USA
A Case Study on the Failure on Apollo 13 73
Brenda Lindley Anderson; NASA Marshall Space Flight Center; Huntsville, AL, USA

Personnel and public safety hazards and controls for evolved expendable space launch vehicles 80
Srinath. V. Iyengar, P.E.; United Launch Alliance; Denver, Colorado, USA

Common Cause Failure Modes 88
Jon Wetherholt, NASA Marshall Space Flight Center, Huntsville, Alabama, USA
Timothy J. Heimann, NASA Marshall Space Flight Center, Huntsville, Alabama, USA

Aviation
Chair: Gill

Integrity of Final Approach Segment Data based on Ground Based Augmentation Systems (GBAS) 96
Amaya Atencia Yepez (1), Chris W. Johnson (2)

Aircraft Safety Certification and Reliability Analysis Techniques 106
Mark Saglimbene -The Omicon Group, Inc.

Use of SED DALΔ Software Risk Estimator (DΔSRE) Methodology for Estimation of Software Contribution to System Safety Risks in a Military Environment 114
Josh McNeil, BSEE; US Army AMRDEC Software Engineering Directorate; Redstone Arsenal, AL, USA
Willie Fitzpatrick, PhD; US Army AMRDEC Software Engineering Directorate; Redstone Arsenal, AL, USA
Howard Kuettner, BA; APT Research, Inc.; Huntsville, AL, USA
Richard Vance, BSE, MBA; Vance Research; Huntsville, AL, USA

General I
Chair: McDermid

A New Approach for Identifying Unsafe Actions to Support Safety-Related Design Decisions N/A
Nancy Leveson, Ph. D. Massachusetts Institute of Technology

The Parable of the Boiled System Safety Professional: Drift to Failure 124
C. Herbert Shivers, NASA Marshall Space Flight Center, Huntsville, Alabama, USA

Mathematical Techniques to Improve the Utility of a Hazard Risk Matrix 136
Donald W. Swallom; U.S. Army Aviation and Missile Command; Redstone Arsenal, Alabama, USA

Human Factors
Chair: Sandom

Learning From Major Accidents 146
K.R. Alderson, Author, Senior System Safety Manager, BMT Designers & Planners, Inc.
Alex Ruttenberg, Co-author, System Safety Group Manager, BMT Designers & Planners, Inc.
Fratricide mishap analysis within systems-of-systems context, a Force Level Safety (FLS) process 153
Archibald McKinlay, VI, M.Sc.; Naval Ordnance Safety & Security Activity (NOSSA)

The Psychology of Safety N/A
Brenda Lindley Anderson; NASA Marshall Space Flight Center; Huntsville, AL, USA

Reporting Systems – The Hidden Story N/A
Tanya Hewitt, MSc, PHRAM, PhD candidate; University of Ottawa; Ottawa, Ontario, Canada

Weapons I
Chair: Caro

Origin of Test Requirements and Passing Criteria for the Qualification of Primary and Booster High Explosives 161
Ken Tomasello; NavyInsensitive Munitions Office; Indian Head, MD USA
John Adams; Associate, Booz Allen Hamilton; Arlington, VA USA
Michael Sharp; MSIAC/NATO, Brussels, Belgium

Joint Service Weapons Safety Review Lesson’s Learned 177
Robert Adkins, Joint Principal for Safety; Stafford, Virginia, USA

Near–Miss Management and Applicability to Weapons System Safety 183
David R. Sadler BSME EE; DON Naval Surface Warfare Center; Dahlgren, VA

The Curious Bent Pin Problem – I: Computer Search Methods 190
Richard R. Zito, Ph.D.; Raytheon Missile Systems Tucson, Arizona, USA

Weapons II
Chair: Bower

A Robust Approach to Nuclear Weapon Safety – SAND 2011-4123 C 200
Alton P. Donnell, Jr., MEng, MBA; Sandia National Laboratories, Albuquerque, New Mexico, USA

Lessons for the Future of Counter IED (C-IED) Operations 208
Chris W. Johnson, School of Computing Science, University of Glasgow, Glasgow, UK, G12 8RZ

US Air Force ESOH Lessons Learned for MRAP Vehicles 217
D. K. Parrish, PhD; Booz Allen Hamilton, Inc; Stafford, Virginia, USA
Jefferson Walker; Booz Allen Hamilton, Inc; Arlington, Virginia, USA
Alexander Sweeney; Booz Allen Hamilton, Inc; Arlington, Virginia, USA
Sherman Forbes, United States Air Force (SAF/AQRE); Arlington, Virginia, USA

The Curious Bent Pin Problem – II: Matrix Methods 227
Richard R. Zito, Ph.D.; Raytheon Missile Systems, Tucson, Arizona, USA
ESOH
Chair: Coulter

Environment, Safety and Occupational Health (ESOH) Processes Across the Marine Corps Military Acquisition Life Cycle / Summary of Department of Defense Instruction (DoDI) 5000.02 ESOH Processes  234
Pamela Millin, M.Ed.; Science Applications International Corporation (SAIC); Stafford, Virginia, USA
Amanda Sale, MURP; SAIC; Stafford, Virginia, USA

An Integrated System Safety Approach for the Liquefied Natural Gas Production  241
M. Samir, MEM.; Control Engineer; CH2MILL, Abu Dhabi, UAE
A. Alsharafi; General Manager; Royal Gardens, Abu Dhabi, UAE
N. Hassan; Assistant Professor; Industrial Engineering Department; Alhosn University, Abu Dhabi, UAE
R. Kady; Assistant Professor; Industrial Engineering Department; Alhosn University, Abu Dhabi, UAE

Risk and Safety Evaluation of Well and Drilling Operations in the Marcellus Shale Play  251
R.O. Olawoyin; Pennsylvania State University; University Park; Pennsylvania, USA
S.A. Oyewole; Pennsylvania State University; University Park; Pennsylvania, USA

A Systematic and Cost Effective Approach to Achieving Safe Systems  262
J.M. Kuniega, Principal Engineer - System Safety; Northrop Grumman Electronic Systems; Baltimore, Maryland

Software I
Chair: Andrews

Application of the Hazard and Operability Study (HAZOP) to Safety Related Software(s)  273
J. Gupta; The Ohio State University; Columbus, OH, USA
X. Li; The Ohio State University; Columbus, OH, USA
M. Allocco; Federal Aviation Administration; USA
G. McCartor; Federal Aviation Administration; USA
C. Smidts; The Ohio State University; Columbus, OH, USA

Challenges of Software Safety Assurance Requirements  283
DI Dr. L. Fritz; Frequentis AG; Vienna, Austria
DI J. Flötzer; Frequentis AG; Vienna, Austria
DI G. Schedl; Frequentis AG; Vienna, Austria

Principles of NPP digital safety system design  292
Timokhin D.S., Malikova E.Yu.
All-Russian Research Institute of Automatics named after N.L. Dukhov (VNIIA), Moscow, Russia

Safety Analysis of Component Systems  299
Elena Troubitsyna, Ph.D.; Abo Akademi University, Turku, Finland
What are the Potential Safety Hazards to Be Considered When Integrating a System with Network Switches?

Robert C. Petersen; General Dynamics Electric Boat; Groton, CT, USA

A Process for the Verification and Validation of Secondary Data Used in Safety Related Software

Xiang Li; The Ohio State University; Columbus, Ohio, USA
Jatin Gupta; The Ohio State University; Columbus, Ohio, USA
Michael Allocco; Federal Aviation Administration; Washington DC, USA
Gerry McCartor; Federal Aviation Administration; Oklahoma City, Oklahoma, USA
Carol Smidts: The Ohio State University; Columbus, Ohio, USA

Validating The Safety Of COTS Hardware

Ronald J. Bartos, PE, CSP; Raytheon Integrated Defense Systems; Sudbury, MA, USA

Certification Process for Safety products and Systems involving COTS components, Saving Costs and Time to Markets

Thor Myklebust; Certification manager; SINTEF ICT

Assessing System Mishap Risk using a Black Box / White Box Safety Analysis Methodology

Peter S. Van Horn; Naval Surface Warfare Center, Dahlgren Division; Dahlgren, Virginia, USA

Systematic Evaluation of a Semi-quantitative Risk Assessment Method from IEC 62061

Jens Braband; Siemens AG, Industry Sector, Mobility Division, Rail Automation, Braunschweig, Germany
Birgit Milius; Institute of Railway Engineering and System Safety, Technische Universität Braunschweig Braunschweig, Germany

System Safety Standards: Comparison of Prescriptive and Goal-based Approaches

Barbara J. Czerny, Ph.D.; General Motors Company; Warren, Michigan, USA
David Ward; MIRA Ltd.; Nuneaton, Warwickshire, England
Kelly Stashko; General Motors Company; Milford, Michigan, U.S.A

A Systematic Approach to Designing CBTC Signalling Systems with Effective Uncertainty Handling to Ensure Operational Safety

Fenggang Shi, PhD; Thales Rail Signalling Solutions Inc. Toronto, Canada

Safety Strategy for Autonomous Systems

Rami Debouk, General Motors
How to Avoid Common Pitfalls in Electrical Grounding

Garo Dakessian, Raytheon

Chris W. Johnson (1), A. Atencia Yepez (2)
(1) School of Computing Science, University of Glasgow, Glasgow, UK, G12 8RZ.
(2) GNSS Business Unit, GMV, C/ Isaac Newton 11, PTM, 28760, Tres Cantos, Spain.

Applying System Safety Program Lessons to the Evolving Cyber Security Landscape

Christopher J. Bender; Northcross Group; Portland, Maine, USA

Competency Management Systems to Support Accident and Incident Investigators

Chris W. Johnson, School of Computing Science, University of Glasgow, Glasgow, UK, G12 8RZ

Evaluating Safety Analysis – a Meta-Model Perspective

L. Sun; Department of Computer Science, University of York; York, UK
T. P. Kelly, Ph.D.; Department of Computer Science, University of York; York, UK

Accelerated Aging of Electro-physical Systems and Possible Cost Reduction

I.M. Zheleznov, Ph.D., All-Russian Research Institute of Automatics named after N.L. Dukhov (VNIIA), Moscow, Russia
A.V. Sokovichin, Ph.D. All-Russian Research Institute of Automatics named after N.L. Dukhov (VNIIA), Moscow, Russia

System Safety Engineering: The Benefits and Practicalities of Globalization

J A McDermid, OBE FREng; University of York, York, UK

If I had everything I need in a SOW for Safety what would that look like?

Archibald McKinlay, VI, M.Sc.; Naval Ordnance Safety & Security Activity (NOSSA), Indian Head, MD 20640

System Safety Concerns for Composite Material Usage Within a Naval Weapons System

Tiffany Owens; Naval Surface Warfare Center Dahlgren Division; Dahlgren, Virginia, USA
Carolyn Tilghman; Naval Surface Warfare Center Dahlgren Division; Dahlgren, Virginia USA

The Curious Bent Pin Problem – III: Number Theory Methods

Richard R. Zito, Ph.D.; Raytheon Missile Systems, Tucson, Arizona, USA

Safety – A Design Factor

N. D. Pham; Naval Surface Warfare Center, Dahlgren Division; Dahlgren, Virginia, USA
Weapons IV
Chair: Leipper

Lessons Learned from a Local Process to Update Range Safety Requirements 458
D.E. Strub; 30th SW/SEAL; Vandenberg AFB, California, USA

SubmissSafety of Flash-PLDs in Fuzes, Ordnance, and other DOD Safety Critical Applications 463
Gary Warren, Ph.D.; SAIC; McLean, VA, USA
Michael H. Demmick; NOSSA-N3; Indian Head, MD, USA

A Contractors Perspectives on Fuze System Qualification for Use in the US Navy 469
Greg Huffman; Raytheon Corporation; Portsmouth, Rhode Island

Use of the Multiple Severity Method to Determine Mishap Values and Life Cycle Cost Savings N/A
Jason Taubel, Naval Surface Warfare Center Dahlgren Division

General III
Chair: Dusenshine

The Use of Crow-AMSAA Plots to Assess Mishap Trends 477
Jeffrey W. Dawson, Ph.D.; NASA Safety Center; Cleveland, Ohio, USA

A Statistical Analysis of Natural Gas Pipeline Risk Factors and Failure Rates 484
C.A Uzoh; Pennsylvania State University; University Park, Pennsylvania, USA
S.A. Oyewole; Pennsylvania State University; University Park, Pennsylvania, USA

Applying System Safety Methodology and Related Tools for a Public Private Partnership Programme 497
Yue Sang, Fan, M. Sc; Defence Science & Technology Agency; Singapore
Boon Heng, Chua, B. Eng; Defence Science & Technology Agency; Singapore
Soon Hoe Ronald, Tan, M. Eng; Defence Science & Technology Agency; Singapore
Minyi. Heah, B. Eng; Defence Science & Technology Agency; Singapore
Chee Ken, Ooi, M. Eng; Defence Science & Technology Agency; Singapore

Rigor in Automotive Safety Critical System Development 508
Padma Sundaram; Dave Hartfelder; General Motors

Software III
Chair: Allocco

P. R. Oliver; Lockheed Martin Missiles and Fire Control; Orlando, Florida, USA

Software Safety Risk Assessment 532
Douglas J. Bower, Systems Safety Engineer, Naval Ordnance Safety and Security Activity, Indian Head, MD, USA
Producing Robust and Reliable Software with a Prescriptive Quality Improvement Process 537
Jay Abraham, MathWorks, Natick, MA

Equivalence of Risk: A Mathematical Approach N/A
Aaron Banerjee, Naval Surface Warfare Center, Dahlgren Division

Software IV
Chair: Shampine

New Tools for Failure Modes and Effects Analysis of System Interconnection Designs 545
Nathaniel W. Ozarin, The Omnicon Group Inc.

Efficient Verification of Non-Functional Safety Properties by Abstract Interpretation: Timing, Stack Consumption, and Absence of Runtime Errors 555
Daniel Kästner, Christian Ferdinand

Adaptation of Software Hazard Risk Assessment 565
Suk Yen NG; Operational Excellence Centre, ST Electronics (Info-Software) Pte Ltd; Singapore
Boon Eang MOK; Operational Excellence Centre, ST Electronics (Info-Software) Pte Ltd; Singapore
Laurent FABRE; Critical Systems Labs; Vancouver, BC, Canada

Improving System Safety with Message-Level Software FMEA 573
Nathaniel Ozarin; The Omnicon Group Inc.; Hauppauge, New York, USA

General IV
Chair: Beard 2

Myths and Barriers to the Introduction of Safety Cases in Space-Based Systems 582
Chris W. Johnson (1), Derek A. Robins (2)
(1) School of Computing Science, University of Glasgow, Glasgow, UK, G12 8RZ.
(2) Environmental Health and Safety, Marine Well Containment Company, Houston, Texas, USA.

The Benefits of Tracking Errors via United Launch Alliance’s Error Prevention Program 593
James E. Allison; Error Prevention Lead; United Launch Alliance; Denver, Colorado, USA
Shawn M. Laabs; System Safety and Error Prevention Engineer; United Launch Alliance; Denver, Colorado, USA
Joseph P. Russell; System Safety and Error Prevention Engineer; United Launch Alliance; Denver, Colorado, USA

Applying System Safety Risk Principles to M&S VV&A 603
James Elele, Ph.D.; Naval Air Systems Command; Patuxent River, MD, USA
David Hall; SURVICE Engineering Company; Ridgecrest, CA, USA

Attaining High Error Prone Zone Identification Fidelity by Reporting Specific Information 613
Shawn M. Laabs; System Safety and Error Prevention Engineer; United Launch Alliance; Denver, Colorado, USA
Web-Based Hazard Tracking: Can You Go It Alone? 619
Darlene Davenport; APT Research, Inc.; Huntsville, AL, USA
Susan Cantrell; APT Research, Inc.; Huntsville, AL, USA

Lessons Learned from Teaching System Safety N/A
D.E. Strub; 30th SW/SEAL; Vandenberg AFB, California, USA

Lessons Learned in the Safety Verification Process 627
Terry L. Hardy; Great Circle Analytics, Denver, CO, USA

Practical Software Airworthiness/Safety and Computer Resources Criteria for Airworthiness Qualification of Military Unmanned Aircraft Systems 637
Josh McNeil, BSEE; US Army AMRDEC Software Engineering Directorate; Redstone Arsenal, AL, USA
Willie Fitzpatrick, PhD; US Army AMRDEC Software Engineering Directorate; Redstone Arsenal, AL, USA
Howard Kuettnner, BA; APT Research, Inc.; Huntsville, AL, USA
Richard Marten, BSCS, MCS; APT Research, Inc.; Huntsville, AL, USA

Weaponization of (previously unarmed) Unmanned Systems (UMS) Safety Considerations 645
Eric Hawley, M.Sc.; Naval Ordnance Safety & Security Activity (NOSSA), Indian Head, MD 2064
Archibald McKinlay, VI, M.Sc.; Naval Ordnance Safety & Security Activity (NOSSA), Indian Head, MD 20640

Comparison of Safety Assessments of an Unmanned Aerial Vehicle and a Manned Aircraft 654
Sirma CELIK; Turkish Aerospace Industries, Inc.; Ankara, TURKEY

A Discussion on the Services, Tools, and Value MSIAC Provides to the International Arena of Munitions Safety 661
Roger L. Swanson; MSIAC, NATO HW Brussels, Belgium

Predictionong Future Aviation Safety Issues using a Data-driven Process 670
Brian E. Smith; NASA Ames Research Center
Maggie Clark; Boeing Commercial Airplane Company
Rudi den Hertog; Fokker Aircraft
Michael Kavoliunas; Bombardier Aerospace
Andy Marosvari; National Air Traffic Controllers Association, International Federation of Air Traffic Controllers

Performing Hazard Analysis on Complex, Software- and Human-Intensive Systems 679
J. Thomas, S.M.; Massachusetts Institute of Technology; Cambridge Massachusetts, USA
N. G. Leveson Ph.D.; Massachusetts Institute of Technology; Cambridge, Massachusetts, USA
