2012 29th National Radio Science Conference

(NRSC 2012)

Cairo, Egypt
10-12 April 2012
# Table of Contents

Department of Electronics and Electrical Communications Engineering
Welcome to the NRSC 2012 at Cairo University
Conference Scope
A Concise Report on the Activities of the NRSC
2012 29th National Radio Science Conference Committees
2012 29th National Radio Science Conference Board of Referees
Honored Egyptian Pioneers
NRSC2012 Technical Program

**Invited Paper**

Conductive carbon fiber composite materials for antenna and microwave applications

**Commission B**

B1. Nanotechnology in RF and Microwave Applications: Review Article
B2. Approximate Electromagnetic Cloaking of Spherical Bodies
B3. Compact and Broadband Left handed CPW Power Divider/Combiner for C/X bands
B4. Analysis and Design of Single Section and Three-Section Ultra-Wideband Quadrature Hybrid Couplers
B5. Ultra Wideband Patch Antenna and Power Amplifier Transmitter Front End
B6. Delivering Maximum Power From Microwave Transistors
B7. Impedance Bandwidth Improvement of Compact Low Permittivity RDRA Using Parasitic Conducting Metallic Strip
B8. CPW fed Hybrid Planar Monopole/Dielectric Resonator Antenna for W-Band Applications
B9. Dielectric Resonator Antenna Array for Direction Finding Systems
B10. Multilayer Dielectric Resonator Antenna Transmitarray for Near-Field and Far-Field Fixed RFID Reader
B11. Rectangular Dielectric Resonator Transmitarrays
B12. Dual Polarized Dual Feed Aperture-Coupled DRA Reflectarray
B13. CPW-Fed Square-Spiral Slot Antenna Design for Wideband Applications
B14. Active millimeter-Wave Imaging System for Hidden Weapons Detection
B15. Tri-band Slotted Bow-Tie Antenna Design for RFID Reader using Hybrid CFO-NM Algorithm
B16. Effect of Mutual Coupling on the Performance of Four Elements
Microstrip Antenna Array Fed by a Butler Matrix 127
B17. Planar Inverted-F Antenna Performance For Smart Handsets Including The Interaction With A Human Hand-Head 141

Commission C

C3. Teletraffic Performance Modeling of Cellular Communication with Heavy-Tailed Distributed Cellular Dwell Time 165
C4. Vertical Handoff in Heterogeneous Wireless Networks with Predictive SINR using GM(1,1) 175
C5. Time Difference of Arrival by The IEEE 802.11a,g Based on a Practical Estimation 185
C7. A Multi-Level Information Hiding Integrating Wavelet-based Texture Analysis of Block Partition Difference Images 203
C8. An Efficient Approach for Image Cryptosystem based on Chaotic Confusion-Diffusion Mechanisms 211
C9. Chaotic Encryption of Images in the Fractional Fourier Transform Domain Using Different Modes of Operation 223
C10. Improved histogram-based reversible data hiding for digital Images 237
C11. An Efficient Fractional Fourier Transform Approach for Digital Image Watermarking 245
C12. Image Compression Using Exponential B-SPLINE Functions 255
C13. Region Based Image Registration Approach Using an Artificial Immune System 263
C14. Estimation of optimal set of Parameters for pan-sharpening Satellite Images Based on Nonsubsampled Contourlet 271
C15. Registration Of Multi-Focus Images Using Hough Transform 279
C16. An Efficient Iris Localization Algorithm 285
C17. Automatic Detection and Classification of Weld Defects in Radiographic Images Using Wavelet Transform and Support Vector Machines 293
C18. Modified CamShift algorithm for Adaptive Window tracking 301
C20. Evolutionary Algorithm in the Classification of Calcification in Mammograms 315
C22. Enhanced Fusion for Infrared and Visible Images 335
C23. An Enhanced Fast Iterative Blind Deconvolution Algorithm for Noiseless and Noisy Images

C25. Digital Signal Classification by Compressed Cyclostationary Features

C26. Selective On-Fly Scrambling Algorithm (SOFSA) for CELP Coders for Secured Real-Time Voice Communications

C27. Investigation About Speech Conversion Using Different Techniques

C28. Studying R-Score of VoIP Streams over WIMAX Using Convolutional Product Code (CPC) vs Turbo Codes

C29. Source-Channel Rate Allocation Scheme for Robust progressive Image Transmission Using LDPC

C30. Enhancement Of OFDM Modulation And Adaptive Array Beamforming Using Discrete Wavelet Transform

C31. Efficient Image Transmission Over the Single Carrier Frequency Division Multiple Access System Using Chaotic Interleaving

C32. Greedy Power Allocation Algorithm for Proportional Resource Allocation in Multi-User OFDM Systems

C33. Performance evaluation of chaotic interleaving with FFT and DWT OFDM with chaotic interleaving

C34. Enhanced Blind, Adaptive Channel Shortening for Multi-carrier Systems

C35. Wavelet-Based SC-FDMA System

C36. Design and Implementation CFAR Processor with Programmable Timer

C37. Updating Multicore Processor Simulator to Support Dynamic Design in Fetch Stage

C38. Appraisal of Different Particle Filter Resampling Schemes Effect in Robot Localization

C39. Efficient Control Logic Algorithm for Wind Turbine

C40. Improved Potential Field Controller for Obstacle Avoidance in Mobile Robots

C41. Multisensor Estimate Fusion Based on Bayesian Minimum Mean Square Error Criterion

C42. PAPR Reduction for LFDMA Using a Reduced Complexity PTS Scheme

C43. Combined Collaborative and Precoded MIMO for Uplink of the LTE-Advanced

C44. Secure Cooperative Blindly-Optimized Compressive Spectrum Sensing for Cognitive Radio

C45. Classification of OFDM Signals Using Higher Order Statistics and Clustering Techniques

C46. Robust Beamforming in Multi-Users Cognitive Radio System
Commission D

D1. Long holding and short acquisition times for CMOS Analog Memory
D2. Simplified Analytical Iterations for Electron Wavefunction using Self-Consistent Solution of for nm MOS Gate Stacks
D4. Monte Carlo Simulation of Single Electronics based on orthodox theory
D5. Wideband Tunable MEMS Phase Shifters for Radar Phased Array Antenna
D6. High Speed all optical Flip Flops by using the hardlimiter
D8. Analysis Of Optical Fiber By Using SEIM With VM : Application To Optical Fiber Directional Coupler

Commission K

K1. High Performance Compressed Sensing MRI Image Reconstruction
K2. Automatic pectoral muscle boundary detection in mammograms Using Eigenvectors Segmentation
K3. Synthetic Transmit Aperture Medical Ultrasound Imaging
K4. Gene Network Construction and Pathways Analysis for High Throughput Microarrays
K5. Merging Genetic Algorithm with Different Classifiers for Cancer Classification using Microarrays
K6. Circular Binary Segmentation Modeling of Array CGH Data on Hepatocellular carcinoma
K7. SH-SAW sensor for detecting the air-bubbles in the blood flow
K10. Embedded Real Time Ultrasound System
K11. Modified Hybrid Median Filter for Image Denoising
