TABLE OF CONTENTS

VOLUME 1

Effect Of The Compressive Strength In An Electrochemical Chloride Extraction ................................................................. 1
Sandra Rodriguez, Angel Cardenas, Juana Maria Miranda, Lilia Narvaez, Doris Espericueta

Development of a Web-Based Corrosion Cost Inventory System for Saudi Arabia .............................................................. 10
Shafiqur Rehman, Luali M. Al-Haddhrami, Afifah Ahmad, Shamsuddin Khan, Huseyn Saricimen, Ayaz Ul Hassan Khan

Quality Improvements with High Nickel Alloy Castings in Refinery Applications ................................................................. 21
James L. Gostlett, Michael S. Cayard, Patrick J. Kurtz

Field Trials With 3 Combination Corrosion/Scale Inhibitors in a Horizontal Water Supply Well ........................................... 39
Michael Lynch

Corrosion of Mild Steel and Inhibition of Two Field-used Inhibitors in the Presence of Elemental Sulfur ............................... 53
Xiao Jiang, Dmgrong Qu, Yanling Zhang, Xiaohui Liu, Tian Zuo, Shanjun Mu, Anthony Ikechukwu Ohike, Haijeng Zhang

Twelve Year Study of Underground Corrosion of Activated Metals .................................................................................. 63
M. Kay Adler Flitton, Timothy S. Yoder

Investigation of Stress Corrosion Cracking on Brass Valves with Laboratory Testing and X-ray Computed Tomography ................................................................. 72
Behzad Bavarian, Jia Zhang, Lisa Reiner

SCC and Crevice Corrosion Inhibition of Steam Turbine ASTM A470 Steel ................................................................. 84
Rubber Linings for the Mining Industry ................................................................. 99
Frank Anhamn, Wolfgang Berger, Patrick Pfeil

The Effect of Sulfide on Carbon Steel Corrosion in Anaerobic Near-Neutral Saline Solutions ........................................... 114
Brent W. A. Shear, Peter G. Keech, David W. Shewsmith, James J. Noel, Robert G. Worthingham

Short Crack Growth Rates in a Steam Turbine Blade Steel ...................................................................................... 131
A. Turnbull, S. Zhou

A Methodology for Projecting Time-to-Corrosion Initiation and Cracking/ Delamination for Reinforced Concrete with an Admixed Corrosion Inhibitor ................................................................. 139
William H. Hartt

Degradation of Cement-steel Composite at Bonded Steel-cement Interfaces in Supercritical CO2 Saturated Brines ...................................................................................... 151
Simulating Wellbore Systems ................................................................................................................................. 151

Service Life Projection For Chloride Exposed Concrete Reinforced With Black And Corrosion Resistant Bars .......................... 180
William H. Hartt

Performance of Liquid Epoxy at High Temperatures ............................................................................................................ 195
Mayra Arellano, Omaira Centeno, Carlos Fernandez

Stiffing of Crevice Corrosion and Repassivation: Cathode Area versus Controlled Potential Decreases .............................. 205
F. Bocher, J. R. Scully

Testing of Very Old Cathodic Protection Systems on Ohio Bridge Decks ................................................................................. 224
Jack Bennet, Tom Turk, Clem Firlotte, Matt Sexton

Galvanic Corrosion Induced By The Use Of High Alloy Stainless Steel In Seawater Applications ........................................... 235
N. Larche, J. Blanc, I. Iken, D. Thierry

Minimizing Wear-Accelerated Corrosion in Sucker Rod Pumped Oilwells with Corrosion Inhibitors ........................................... 254
Richard L. Martin

Surface Resistivity/Conductivity of Different Organic-Thin Films by a Combination of Optical Shearography and EIS ................................................................................................. 265

Utilization of RBI Methodology for T&I Extension ............................................................................................................ 278
Khaled Habb

A Surface Kinetic Scaling Model for CaCO3 on a Stainless Steel Surface (316 L) ................................................................. 285
Feth-Allah Setta, Anne Neville, Huey J. Chen

Elemental Sulfur Uptake and Corrosion Protection in Sour Gas Systems ...................................................................................... 304
Qiang Liu, Anca Diaconu, Dale Grey

Corrosion Monitoring Program at the Accelerated Retrieval Project Facilities ................................................................. 319
Mark D. Argyle, Thomas E. Bechtold, M. Kay Adler Flitton

Uns N07725 Nickel Alloy Connection Failure ............................................................................................................. 334
Steven S. Shademan, John W. Martin, Al P. Davis

QA/QC Tools to Ensure the Quality of Duplex Stainless Steel Components ..................................................................... 357
Roger Francis, Glenn Byrne, Geoff Warburton, Jason Wilson

Welding Of Lean Duplex Stainless Grades: Microstructure, Corrosion Resistance And Mechanical Properties ....................... 367

Beneficial Effects of Chemical Treatment and Maintenance Pigging Programs in Returning an Offshore Pipeline to Pre-Hurricane Ike Conditions Following a Breach and the Ingress of Seawater and Sand, and the Effects of Bacteria Generated H₂S ............................................................................................................. 385
Daniel Powell, Dale Fincher, Raymond Gonzalez, Burkin Melancon, Robert H. Winters, Brad Rodrigue, Elliot Brown

Organic Coatings for Corrosion Protection of Transformers in Underground Chambers ................................................................. 2714

Adriana De Arayjo, Zehnbour Panossian, Neustaigio L. De Almeida, Alberto S. Junior, Clay M. Martins

Determination of Skin Burn Temperature Limits for Insulative Coatings Used for Personnel Protection ................................................................. 2728

Howard Mitchke, George More

Real Time Monitoring of Corrosion and Fouling in Power Generation Boilers and Waste to Energy Plants ..................................................... 2744

William M. Cox, David Svensen, Martin De Jong

Mechanistic Study On PWSOCC Of Ni Based Alloys Considering A Role Of Hydrogen In Metals ................................................................. 2759

Nobuo Totsuka

Would the Real -850 mVCSE Criterion Please Stand Up ................................................................................................................................. 2770

R. A. Gummow, W. Fieltsh, S. M. Segall
Influences of the Reinforcement and Surface Layers on the Apparent Concrete Resistivity by Using a Four-Electrode-Probe ................................................................. 3188
Koen J. Rechling, Michael Raupach, Robert Schulte Holthausen

A Novel Method to Mitigate the Top of the Line Corrosion in Wet Gas Pipelines by Corrosion Inhibitor within a Foam Matrix ................................................................. 3203
I. Jevremovic, V. B. Miskovic-Stankovic, D. Blumer, T. Baugh, M. Singer, S. Nesic

The Eight Forms of Non-metallic Corrosion .................................................................... 3218
Joseph Monte

Effective Corrosion Protection for New and Old Nuclear Power Station Cooling Water Systems ......................................................................................................... 3230
Graham Greenwood-Sole

Calculation Methods For The Performance Of Impressed Current Cathodic Protection Systems For Aboveground Storage Tanks Bottoms .................................................. 3242
Roberto Solis, Hernan Rivera, Jorge Canto, Lorenzo Martinez, Lorenzo M. Martinez De La Escalera, Norberto Pesce

Corrosion Assessment In Karan Gas Field Development ................................................. 3257
Marc Singer, Stefan Nestic, Jamal N. Al-Khansis

Studies of Threshold Chloride Levels for Localized Carbon Steel Corrosion in Simulated Concrete Pore Solutions Using Coupled Multielectrode Array Sensors ..................................................................................... 3278
Lietai Yang, Kuang-Tsun Chiang, Hui Yu, Roberto T. Pabalan, Biswajit Dargupta, Luis Ibarra

Anodic Behavior of Nickel base Alloys in Media Containing Bicarbonate and Chloride Ions .................................................................................................................. 3291
Natalia S. Zadoroznev, Ricardo M. Carranza, Mabel C. Giordano, Alicia E. Ares, Raul B. Rebak

Evaluation Of Coating Systems for Steel Structures ....................................................... 3307
Helene Gauthier, Marie-Andree Ayotte, Michel Vienneau, Marie-Claude Lessard, Germain Larocque

Localized Corrosion Resistance of 21Cr Ferritic Stainless Steel .................................... 3317
E. Nanez Moran, Y. H. Kim, G. S. Franka

Construction and Verification of Pourbaix Diagrams for CO2 Corrosion of Mild Steel Valid up to 250°C ........................................................................................................ 3329
T. Tanaprabu, Sun, D. Young, Brown, S. Nesic

Evaluation of Migrating Corrosion Inhibitors Used in the Restoration and Repair of Reinforced Concrete Structures ........................................................................ 3345
Matt Drew, Jexi Jackson Meyer, Joshua Hicks

Qualification of Alloy 686 (UNS N06686) as a High-Strength, Corrosion-Resistant Fastener for Marine Applications .................................................................................. 3355
Debashis Maitra, Jim Crum, Lewis Shomuder

Experimental Research of Sand Erosion in Gas Dominant Flows ................................. 3369
Chenliang Fan, Brenton S. McLaury, Siamuck A. Shirazi, Edmund F. Rybicki

AC Interference Prediction for a New 8 in (203 mm) Gas Pipeline in Guadalajara City ................................................................. 3384
Hernan Rivera, Jorge Canto, Lorenzo M. Martinez-Dela-Escalera, Lorenzo Martinez

UT Measurements to Determine Erosion Patterns in a Bend for Single and Multiphase Flows ................................................................. 3396
N. R. Kesana, S. A. Grubb, B. S. McLaury, S. A. Shirazi

Corrosion And Hydrogen Insertion In UNS G41300 Steels In Brine Acid Solutions Saturated With Hydrogen Sulfide ........................................................................ 3412
Maria Jose Cancio, Mauricio L. Latino, Teresa E. Perez

Corrosion Behavior of Alloys in High Temperature Supercritical Carbon Dioxide ................................................................................................................. 3428
Jacob J. Jennek, Mark Anderson, Gaoping Cao, Kamar Sridharan, Todd R. Allen, Vaheh Firouzdor

Some Peculiarities of Alloying of Nickel Superalloys Resistant to High-Temperature Corrosion ........................................................................................................ 3435
V. E. L. Sanchugov, Anatoly A. D. Koval, Sergey S. B. Belikov

Experimental Validation of Long Term Thermal Exposure Sensitization of AA5xxx Alloys ............................................................................................................. 3439
Yakan Zhu, Soumya Kar, Michael L. Free, David A. Cullen, Lawrence F. Allard

VOLUME 5

Corrosion of Mild Steel in High CO2 Environment: Effect of the FeCO3 Layer ................................................................. 3447
M. F. Suhor, M. F. Mohamed, A. Muhammad Nor, M. Singer, S. Nesic

Kinetic Study of the Effect of a Mixture of Two Corrosion Inhibitors in Reducing the Corrosion Rate of 1018 Carbon Steel Petroleum Pipelines in Sea Water ................................................................. 3457
Rihan Omar Rihan, Reayad Shawabkeh, Nawaf Al-Bakr

DG-ICDA: How Confident Are You in Your Inspection Locations ................................ 3472
Lynsay A. Bereman

Controlling The Formation Of A Non-Sulfur Based Black Powder Within A New Natural Gas Processing Plant’s Waste Heat Recovery Unit And Minimizing Any Threats Of A Possible Metal Dusting Corrosion Mechanism Within Process Tubing ........................................................................ 3481
Daniel Powell, Larry Stapley, Jason Hughes, Elliot Brown

A High Chromium Alloy for Weld Overlay of Superheaters in Coal Fired Power Plants .................................................................................................................. 3496
Larry Paul

Evaluation Of Bristle Blasting Process For Surface Preparation Of Ship-Construction Steel ............................................................................................................. 3505
Robert J. Stango, Ellen Kargol

Summary of Some Nickel Alloys Used in Chemical Production Involving Hydrochloric and Sulfuric Acids ............................................................................................ 3520
Larry Paul

Organofunctional Silane Inhibitor Surface Treatment for Mitigating Corrosion of Steel in Concrete ........................................................................................................... 3533
Neal S. Berke, Matthew A. Millenberger, Brooks E. Bucher, Peter K. Denicola
Effect of Chloride and Sulfate on Probability Based Corrosion Control for Waste Tanks ................................................................. 4370
N. Hofsmans, B. L. Garcia-Diaz, B. J. Wiersma, T. Edwards

Mechanisms of Ion Transport in Cement-Based Materials During the Application of Corrosion Mitigating Techniques ................................................................. 4378
Kallioopi K. Aligizaki

Through-Tank Ionic Conductivity Measurement Feasibility Study ................................................................. 4393
Dong Liang, Gerald Frankel, Jesse Rhodes

Cathodic Protection of a Land Pipeline with Fjord Crossings ................................................................................. 4409
M. Ziomek-Moroz, S. Bullard, W. O'Connor

Material Behavior in Extreme Conditions: L450Q (X65Q) Corrosion Resistance, Strength and Toughness Variation Following Exposure to Environments with Elevated H2S Partial Pressure ................................................................. 4415
Andreas Bremus, Marco Ormellone, Luciano Lazzari

Seizing of Ti6Al7Nb Orthopedic Constructs in vitro ......................................................................................... 4425
Douglas C. Hansen, H. Brent Bamberger, Vivien F. Fongue, Kevin C. Janek, Peter Spjolom

Laboratory Tests On A Potential Source With Zinc Reference Electrode For Monitoring Of Cathodic Protection ......................................................................................... 4437

Effect of Microalloying Elements on Sour Service Grades with Higher Strength ................................................................................. 4447
L.Moderer, G. Mori, Sabine Schwarz

Corrosion Of Carbon Steel In CO2 Capture Plant Using MDEA And Amino Acid Based Solvents ................................................................. 4459
P. Wilson

Stress Corrosion Cracking of Rare-Earth Containing Magnesium Alloy EV31A Compared With AZ91E Using Slow Strain Rate Test ......................................................................................... 4470
Ramgopal Thodla, Feng Gui, Martin Mueller, Robin Gordon, David Cole

An Explanation of Accelerated Crevice Corrosion of Stainless Steels in Wet Limestone FGD Environments ......................................................................................... 4479
Debajyoti Majumdar, Jim Crum, Lewis Shoemaker

Aspects of Localized Corrosion in an H2S / CO2 Environment ......................................................................................... 4499
Bruce Brown, Srdjan Nesic

Effect of Corrosion Growth Rate Estimated from Consecutive Assessments on Response to In-Line Inspection Anomaly Predictions ......................................................................................... 4520
Kevin E. Janak, Michael Ludensky

Technical Justification of Table A.23 in NACE MR0175/ISO15156-3: The Use of Martensitic Stainless Steels in Wellhead and Valve Components in Sour Oilfield Service ......................................................................................... 4527
Roy Wolters, Brian Chambers

Evaluation of Laboratory Screening Techniques for Liquid Air Interface Corrosion in Hanford Waste Simulants ......................................................................................... 4538
G. S. Frankel, Kayle Boomer, G. L. Edgemon, Bruce Wiersma, Leon Stock

An Experimental Method for Evaluation of Crude Corrosivity – Naphthenic Acid and Sulfidic Corrosion of Oil Fractions ......................................................................................... 4553
Richard Mc Neal, Steven Osgood, Lucinda Smart

Biofilm Prevention and MIC Control via the Use of a Novel Film-Forming Quaternary Amine ......................................................................................... 4567
Kevin E. Janak, Michael Ludensky

Corrosion Inhibitor Testing in Dense Phase Hydrocarbon Systems ......................................................................................... 4582
Rolf Nyborg, Gaute Svenningsen, Jussara De Mello Silva

Corrosion Behavior of AI Based Multilayer Sacrificial Coatings ......................................................................................... 4591
Juan Creus, Andres Perez, Cyril Bertone, Egle Conforto, Xavier Feaugas, Christelle Rebere, Stephane Cundehouz, Sebastien Touzain, Frederic Sanchette, Alain Billard

Research on Corrosion Inhibitors for Acid Stimulation ......................................................................................... 4604
Evgeny Barmatov, Jill Geddes, Trevor Hughes, Michaela Nagl

Inspection and In Situ Impedance Measurements For Ballast Water Tanks ......................................................................................... 4624
Xiaolong Zhang, Gabriel Ferrari, Silo Buter, Corina Pretz

Interactive Effects of H2S and Elemental Sulfur on Corrosion of Steel ......................................................................................... 4635
Lei Zhang, Zhibin Wen, Xiayang Li, Xingya Wang, Zhide Liu, Minxu Lu

Study of the Inhibitor Selection at Low Water Cut in Closed to Deep Offshore Wellhead Flow Lines ......................................................................................... 4642
Cheolho Kang, Jussara De Mello Silva, Alvaro Augusto Oliveira Magalhaes

Critical Factors Affecting The Fatigue Crack Growth Rate Behavior Of X65 Steels In Sour Environments ......................................................................................... 4652
Ramgopal Thodla, Feng Gui, Martin Mueller, Robin Gordon, David Cole

Rust Preventatives: Influence Of Novel Engineered Desiccant On Corrosion Levels Seen In Transcontinental Packaging Systems ......................................................................................... 4672
Ray Wolf, John Fenwick, Sean Fenwick, Jakab Hajek

Design Of A Cathodic Protection System To Overcome A Galvanic Dissimilarity On Iconic Monument For Mexico’s 200 Year Independence Celebration ......................................................................................... 4689
Jorge Canto, Luis Enrique Arias, Lorenzo M. Martinez-Dela-Excalera, Angel C. Sanchez Alamina, Maritza Paola Jimenez, Jose Alberto Padilla, Leonardo De Silva-Munoz, Lorenzo Martinez Gomez, Edgar Maya

Problems and Mitigation Experiences with Black Powder inside of the Long-distance Natural Gas Pipelines ......................................................................................... 4698
Peng Zhang, Changyuan Ye, Zhongxin Han, Lin Zhu

Flow Assisted Corrosion Effects On Nitinol For Biomedical Applications ......................................................................................... 4706
Elizabeth Trillo, James Dante, Carl Popelar

Low Stress Connection Design versus Environmental Cracking in Corrosive Well Service Conditions ......................................................................................... 4717
Russell D. Kane, Jack Burman

Investigations of Localized Corrosion of Stainless Steel after Exposure to Supercritical CO2 ......................................................................................... 4738
M. Ziomek-Moroz, S. Bullard, W. O'Conner
