2nd International Conference on Ship Manoeuvering in Shallow and Confined Water: Ship to Ship Interactions 2011

Trondheim, Norway
18-20 May 2011

Editors:

Bjornar Pettersen  Tor Einar Berg
Katrien Eloot     Marc Vantorre

ISBN: 978-1-62276-119-7
### TABLE OF CONTENTS

All papers, except the keynote papers, are in alphabetic order according to the family name of first author.

- **Modelling of manoeuvring with attention to ship-ship interaction and wind waves**
  - O M Faltinsen, Keynote speaker
  - 1

- **Ship to Ship Transfer - A Global Perspective**
  - C Hayden, Keynote speaker
  - 13

- **A comparative study of PIV experiments and numerical simulations of flow fields around two interacting ships**
  - T Arslan, B Pettersen, J Visscher, C Muthanna and H I Andersson
  - 31

- **Improved simulation model and methods for determination of the required passing distance between ships in restricted fairways**
  - K Benedict, W Köpnick, M Baldauf, A Gronarz, B Friedhoff and F de Mello Petey
  - 39

- **Optimisation of trim with respect to squat and under-keel-clearance**
  - T Berndt, J Reinking, A Laupichler and A Härting
  - 51

- **Ship squat comparison and validation using PIANC, ANKUDINOV and BNT predictions**
  - M J Briggs, P J Kopp, V Ankudinov and A L Silver
  - 59

- **Simulation of the launch/recovery of a submersible from a host ship**
  - D Cassidy, P Carrica and M Hyman
  - 71

- **Numerical investigation of bank influence on a ship motion**
  - A M Chetvertakov, M P Lebedeva and D V Nikushchenko
  - 83

- **Post widening ship/ship interaction and operational decisions in the Panama Canal**
  - L L Daggett, J C Hewlett and R S Gray
  - 89

- **Squat of ships sailing in a non centered track in a canal**
  - H J de Koning Gans
  - 97

- **The importance of the form of time domain forces and moments on berthed ship interaction**
  - J T Duffy and M R Renilson
  - 107

- **Squat during ship-to-ship interactions in shallow water**
  - K Eloot, M Vantorre, J Verwilligen, H Prins, T W F Hasselaar and M Mesuere
  - 117

- **Slack towline on tow-towed ships interaction during maneuvering**
  - A Fitriadhy, H Yasukawa and Y Masaki
  - 127

- **Numerical study of ship-to-ship interaction forces on the basis of various flow models**
  - J M A Fonfach, S Sutulo and C Guedes Soares
  - 137
Prediction of linear hydrodynamic derivatives in shallow water  
Y Furukawa, Y Nakiri and K Kijima

Interaction forces in tug operations  
S Geerts, M Vantorre, K Eloot, R Huijsmans and N Fierens

A new approach in modelling the interaction forces  
A Gronarz

Critical elements of a lightering operation  
G Gudmundseth

Integration and testing of an STS decision support system in a full-mission ship maneuvering simulator  
D Husjord, T A Øritsland and E Pedersen

A study on estimation of hydrodynamic forces acting on a ship hull in shallow water by CFD  
Y Kimura, E Kobayashi, Y Tahara and S Koshimura

Decision-support system for STS training on ship handling simulator by means of visualization of danger zone due to hydrodynamic interaction  
K Kirimoto and E Pedersen

Ship to ship interaction forces during lightering operations  
E Lataire, M Vantorre, J Vandenbroucke and K Eloot

An experimental research on the hydrodynamic forces acting on a twin-screw ferry during unberthing  
S Lee, J Park, K P Rhee, W Yoo and S Kim

Interaction—a practical viewpoint  
G R Maxwell

New thinking in ship generated hydrodynamic fields: introducing concepts for predicting bank suction and rejection  
P J McArthur

Urans studies of ship-ship interactions in calm water and waves for replenishment and overtaking conditions  
S M Mousaviraad, S H Sadat-Hosseini, P M Carrica and F Stern

Dynamic interaction between tow and towed ships in head seas  
Y Nakayama, H Yasukawa and J Watanabe

Decision support system in ship-to-ship operations using high accuracy DGPS  
E Okuyama, H Oda, E Shimizu, S Sakakibara and S Yamada
Prediction of hydrodynamic interaction effects of vessels in ports
J A Pinkster

Using dynamic positioning for side-by-side cargo transfer operations
F H H A Quadvlieg and R Hallmann, G Hughes and D H Harris

Urans studies of ship-ship interactions in shallow-water
H Sadat-Hosseini, P C Wu, Y Toda, P Carrica and F Stern

Advanced ship manoeuvring and mooring support system at ship-to-ship transfer operations by fender monitoring system of pneumatic fenders
S Sakakibara, S Yamada, E. Shimizu, E Okuyama and H Oda

Relative distances and speeds measurement system for STS lightering operations using stereo-cameras
E Shimizu and E Pedersen

Seabase model tests and surface effect ship code evaluation for t-craft
A L Silver, M J Hughes, R C Bishop, S S Lee, D W Wundrow and J F O’Dea

CFD based prediction of ship-ship interaction forces on a tug beside a tanker
C D Simonsen, C K Nielsen, J F Otzen and K Agdrup

Investigating ship maneuvers around a floating structure under the influence of a uniform current in deep and calm water
R Skejic, M Breivik and T E Berg

The influence of different vessel speeds of navigation on meeting in navigable channels of hydro system DANUBE-TISA-DANUBE
V Škiljaica and I Škiljaica and M Živković

The use of a boussinesq-type wave model to determine ship-induced waves over non-uniform bathymetries
A J van der Hout, O M Weiler and M Borsboom

Calculation of forces on moored ships due to passing ships
W van der Molen, J Moes, P B Swiegers and M Vantorre

Squat computations for container ships in restricted waterways
A von Graefe, O El Moctar, V Shigunov, H Söding and T Zorn

Hydrodynamic interaction loads between two ships during lightering operation in calm water
X Xiang, R Skejic, O M Faltinsen and T E Berg

Study on the effects of unsteady ship to ship interaction by CFD method
H Yang, B S Wu, Q M Miao, X Xiang, T E Berg and X F Kuang
Hydrodynamic interaction of two thin ships with rudder in close proximity
H Yasukawa and S Yoshida

Numerical investigation on ship-ship hydrodynamic interaction in restricted waters
ZHANG Chen-xi and ZOU Zao-jian

CFD prediction and validation of ship-bank interaction in a canal
L Zou, L Larsson, G Delefortrie and E Lataire
