2012 International Conference on Information and Automation

(ICIA 2012)

Shenyang, China
6 – 8 June 2012
ICIA2012 SESSION INDEX

Session: WA1 Advanced Robots

Bio-geography Based Differential Evolution For Robot Path Planning.................................................................1

Hongwei Mo and Zhenzhen Li

Design Of Aerial Dispersal Miniature Detection Robotic System.............................................................................7

Liancun Zhang, Qiang Huang, Liying Wu, Junyao Gao, Yue Li and Weimin Zhang

The Slam Algorithm Of Mobile Robot With Omnidirectional Vision Based On EKF.......................................................13

Kaiyu Wang, Guihua Xia, Qidan Zhu, Yongtao Yu, Yebin Wu and Yan Wang

Autonomous Robot Exploration Based On Hybrid Environment Model......................................................................19

Songmin Jia, Hongmin Shen, Xiu zhi Li, Wei Cui and Ke Wang

Robust Human Detecting And Tracking Using Varying Scale Template Matching.......................................................25

Songmin Jia, Shuang Wang, Lijia Wang and Xiu zhi Li

Session: WA2 Automation

Method Of Modeling Wideband Signals Received By An Array Antenna Based On Power Spectral Density.........................31

Hongqi Yu, Jing Guo, Xin Xu, Zaolin Sun, Haijun Liu and Jietao Diao

An Effective Soft Iteration Channel Estimator For Hf Channel................................................................................35

Benshu Miao and Mingsheng Zhao

Step-response Simulation Of Energy Regulation Based Electrohydraulic Variable-speed Drive........................................40

Ming Xu and Bo Jin

Distributed Component-based Framework For Unmanned Air Vehicle Systems..........................................................45

Agwad El-sayed and Mohamed Elhelw

3d Flight Path Planning Based On RrtS For Rnp Requirements................................................................................51

Baofeng Shi, Peng Cheng and Nong Cheng

Session: WA3 Advanced Management System

Fuzzy Synchronization Of Chaotic Systems Based On Genetic Algorithm.......................................................................57

Xiaohua Wang, Songcheng Peng, Dun Ao and Zhongqiang Wu

Model Of Balanced Distribution And Optimal Scheduling Of The Oxygen System In Iron And Steel Industry........................61

Xiaolei Zhang, Yanyan Zhang and Lixin Tang

Analysis And Configuration Of Docking Adjusting Mechanism For
Replenishment At Sea......................................................................................................................................66
Ying Yu, Baolin Yin, Guizhen Liu and Xianzhi Li

A Prediction Model For Steering Tasks With User Operational Biases...............................................................72
Xiaolei Zhou

Research About Based-soa Agriculture Management Information System.........................................................78
Yane Duan

Session: WA4  Biomedical Application

Adaptive R-wave Detection Method In Dynamic Ecg With Heavy Emg Artifact......................................................83
Yue Zhong, Lisheng Xu, Li Yan, Yanhua Shen and Shuhong Wang

A Tip-over And Slippage Stability Criterion For Stair-climbing Of A Wheelchair Robot With Variable Geometry Single Tracked Mechanism.........................................................................................88
Suyang Yu, Ting Wang, Zhideong Wang, Yuechao Wang, Di Zhi, Chen Yao, Xiaofan Li, Zhong Wang and Yu Luo

On The Singular Problem In Linear Algorithm For The Magnetic Dipole Positioning........................................94
Chao Hu, Houxiang Miao, Shuang Song, Jianke Chen and Xiaoxiao Li

Refined Analysis Of Heart Sound Based On Hilbert - Huang Transform................................................................100
Li Lin, Dejun Guan, Dongrui Zhang, Jinhan Feng and Lisheng Xu

An Integrated Detection Method Of Clustered Microcalcifications In Mammography Based On Multiscale Hessian Matrix.......................................................................................................................106
Ying Wang, Hong Li, Xiaoguang Pan, Yan Kang and Hong Zhao

Session: WP1  Networks and Communications

Improvement Of Leach In Wireless Sensor Networks Based On Balanced Energy Strategy........................................111
Yingqi Lu, Du Zhang, Ya Chen, Xiao Liu and Ping Zong

Data Reduction And Bandwidth Allocation For Video-based Network System......................................................116
Yi-chun Lin and Feng-li Lian

Improving Intrusion Detection Through Merging Heterogeneous Ip Data............................................................122
Wenjie Zhu and Qiang Wang

Analysis On Iot Communication Protocol...........................................................................................................126
Zhiyan Liu, Bao Xi and Yongfeng Yuan

The Research On Real-time Simulation Using An Ethernet Based Embedded Parallel System....................................131
Ying Li and Yancheng Jia

A New Weighted Centroid Localization Algorithm Based On Rssi........................................................................137
Hongyu Shi
Session: WP2  Robotics and Manipulation

Point-to-point Planning For Free-floating Space Manipulator With Zero-disturbance Spacecraft Attitude ................................................................. 142
   Fuhai Zhang, Yili Fu, Lei Hua, Hongwei Chen, Shuguo Wang and Bin Guo

Adaptive Fuzzy Control Of Trilateral Tele-operation With Communication Random Delays ................................................................. 148
   Zhijun Li, Liang Ding and Haibo Gao

Research On Map Merging For Multi-robotic System Based On Rtm ............................................................................................................ 156
   Ke Wang, Songmin Jia, Yuchen Li, Xiuzhi Li and Bing Guo

Human-like Indorr Navigation For Autonomous Industrial Mobile Manipulator ................................................................. 162
   Hongtai Cheng, Heping Chen, Yong Liu and Weihua Sheng

A Novel Battery Charger For Plug-in Hybrid Electric Vehicles ............................................................................................................ 168
   Liangrong Wang, Jianing Liang, Guoqing Xu, Kun Xu and Zhibin Song

Modeling Of Rate-dependent Asymmetric Hysteresis Nonlinearity For Magnetostrictive Actuators ................................................................. 174
   Zhi Li, Tianyou Chai, Ying Feng and Chun-yi Su

Session: WP3 Intelligent Control and System

Design Of Hovering Altitude Holding Control System For Helicopter ............................................................................................................ 180
   Xiaoyan Wang, Xinmin Wang and Congchao Yao

Second-level Sliding Mode Tracking Control Of Unmanned Surface Vessels With Parameter Uncertainties ................................................................. 184
   Qidan Zhu, Zhengqiao Jiang, Zhilin Liu and Ruiting Yu

Adaptive Integral Backstepping Control For A 3-dof Helicopter ............................................................................................................ 190
   Weinan Gao and Zheng Fang

Uncertain Chua System Chaos Synchronization Using Single Variable Feedback Based On Adaptive Technique ................................................................. 196
   Fengxiang Chen, Guangji Ji, Shuang Zhai, Shijia Wang, Su Zhou and Tong Zhang

Combined Power And Rotating Speed Control Of Ship Electrical Propulsion System In Waves ............................................................................................................ 200
   Yaohua Luo, Shijia Lv, Shaobo Kang and Xiaoli Duan

The Process Control System Based On Labview In A Hardening Die Steel Production Line ............................................................................................................ 206
   Jiayun Li, Jinhui Zhang, Nan Zheng and Xiaoli Li

Session: WP4  Biomedical Imaging

Medical Image Encryption Based On A Composition Of Logistic Maps And Chebyshev Maps ............................................................................................................ 210
Yin Dai and Xin Wang

Breast Mass Segmentation In Mammography Using Improved Dynamic Programming ........................................215
Buer Qi, Xiaoguang Pan, Hong Li and Yan Kang

An Efficient Interval Query Algorithm Based On Inverted List In Cloud Environment ........................................221
Zhiqiong Wang, Ke Gong, Shikai Jin, Wenjun Li and Zixi Liu

A Fast Subtraction Algorithm Of Brain Ct Angiography Images Based On Mmbe ............................................226
Fangfang Han, Jinzhu Yang, Dazhe Zhao and Hong Zhao

A Three Dimensional Ray Casting Method For Juxta-pleural Nodule Segmentation In Thoracic Ct Images ........230
Guanglei Si, Yan Kang and Jinfeng Cai

Vocal Tract Spectrum Transformation Based On Clustering In Voice Conversion System ................................236
Weichao Xie and Linghua Zhang

Session: WE1 Automation II

Linear Quadratic Optimal Control Of Continuous-time Lti Systems With Random Input Gains..............................241
Wei Chen, Jianying Zheng and Li Qiu

Networked Feedback Control Over Fading Channels And The Relation To H2 Control .......................................247
Guoxiang Gu and Li Qiu

Minimum Sensor Duty Cycle With Guaranteed Estimator Performance ............................................................253
Ye Yuan and Ling Shi

Minimum Capacity In Stabilizing An Lti System With Quantized Control Inputs Via Output Feedback ................259
Weizhou Su and Jie Chen

Linear Output Regulation Of Heterogeneous Networked Systems Based On Distributed Adaptive Dynamic State Feedback .................................................................265
Shaobao Li, Gang Feng, Juan Wang, Xiaoyuan Luo and Xinpeng Guan

Session: WE2 Advanced Robots II

Improvement Flexibility Of Slam In Unknown Environment Based On Robot Technology Middleware ................271
Songmin Jia, Bing Guo, Xiuze Li, Ke Wang and Yuchen Li

Design Of A Novel Frog-inspired Hopping Leg ...................................................................................................277
Wei Zhang, Jizhuang Fan and Hegao Cai

A Domain Specific Architecture Description Language For Autonomous Mobile Robots ................................283
Lei Zhang, Huaxi (yulin) Zhang, Fang Zheng, René Zapata and Marianne Huchard

</table>
Vibration Energy Harvesting In Automobiles To Power Wireless Sensors.............................................349
  Qingyuan Zhu, Mingjie Guan and Yuanqin He

Multiple Aerial Vehicles Cooperative Mission Planning With Rhp.....................................................355
  Xiang Dai, Shidong Qiao, Zhong Liu, Jincai Huang and Guangying Zhu

A Novel Verifiable Threshold Signature Scheme Based On Bilinear Pairing In Mobile Ad Hoc Network..................................................................................................................361
  Xianyong Meng and Yangmin Li

Traction Control For Electric Vehicles: A Novel Control Scheme..........................................................367
  Jialong Chen, Guoqing Xu, Kun Xu and Weimin Li

Modeling And Simulation Of Magnetic Induction Wireless Communication For A Deepwater Mooring System..........................................................................................................................373
  Zhen Zhao, Shuzhi Ge, Wei He and Yoo Sang Choo

Session: TA2 Image/Video Processing

A New Stereo Matching Method With Combination Of Cross-based Aggregation And Hierarchical Belief Propagation.................................................................379
  Tianyu Yang, Qing He, Ning Wei, Baopu Li, Chao Hu and Max Q.-h Meng

3d Reconstruction Based On Digital Speckle Correlation In Virtual Sport...........................................384
  Chuanyang Ruan, Jun Jiang, Feiqi Deng, Jun Cheng and Huaxing Qian

A Monocular Distance Estimate Method Used In Video Sequence........................................................390
  Xiaolei Li and Lu Wang

Detection Of Geometric Shape For Traffic Lane And Mark..................................................................395
  Xian Liu, Gang Wang, Jingsheng Liao, Baopu Li, Qing He and Max Q.-h. Meng

A New Hybrid Metric Map Representation By Using Voronoi Diagram And Its Application To Slam...............................................................................................................................400
  Shuai Guo, Shugen Ma, Bin Li, Minghui Wang and Yuechao Wang

Session: TA3 Intelligent Control and System II

Ros-based Object Localization Using Rfid And Laser Scan...................................................................406
  Shujun Gong, Huifen Liu, Ying Hu and Jianwei Zhang

Memory-based Hierarchical Task And Motion Planning........................................................................412
  Yi Zeng, Jun Zhang, Weiwei Lu, Ying Hu and Jianwei Zhang

Design Of A Wheeled Inverted Pendulum As Platform For Learning Based Control.........................418
  Liping Ouyang, Bianjing Du, Ansi Peng and Yongsheng Ou

Workspace Analysis Of The Underwater Dexterous Hand....................................................................422
  Dezhang Xu, Ran Wei, Wan Zhang, Zhihong Wang and Buyun Wang
Multi-objective Optimization Of Rolling Schedules For Tandem Cold Rolling Based On Adaptive Weight Differential Evolution Algorithm

Yong Li, Yu Wang and Qun Gai

Session: TA4  Biomedical Imaging III

Analysis Of Influencing Factors Using Grappa Algorithm For Image Reconstruction

Hong Shao and Yao Wang

Automatic Skull Stripping In Brain MRI Based On Local Moment Of Inertia Structure Tensor

Yi Zhong, Wei Feng, Shouliang Qi, E.mark Haacke and Yan Kang

Tractography Of The Optic Radiation For Vision Sparing Epilepsy Surgery

Chantal Tax, Remco Duits, Bart Ter Haar Romeny, Pauly Ossenblok and Anna Vilanova

Three Dimensional MREIT For Breast Cancer Detection On Open MRI Scanners

Gang Li, Ruijuan Chen, Liling Hao and Ling Lin

Algorithmic Development Of Myelin Water Imaging Based On Multi-component T2 Analysis

Shouliang Qi, Weijie Ji, Jingshu Zhang and Yan Kang

Session: TP1  Automation III

Research of dental arch curve extraction and application

Hao Zou and Qiang Tan

Horizontal Tracking Control For AUV Based On Nonlinear Sliding Mode

Lu Wang, He-ming Jia, Li-jun Zhang and Hong-bin Wang

Study On Design And Simulation Analysis Of Electronic Hydraulic Brake System For Vehicles

Shoutao Li, Lihua Tao, Xinglong Pel, Yongxue Ma and Wenbo Zhang

Helicopter Blades Pyramid Angle Measurement Based On Panoramic Vision Technology

Mai Jiang, Wei Liang and Xiaoling Zhang

Adaptive And Reliable Transmission Scheduling With Low-cost Estimation Of Channel States

Xiaoling Zhang, Wei Liang, Haibin Yu and Xisheng Feng

Global Asymptotic Stabilization Of An Underactuated Surface Vessel

Bowen Zeng, Qidan Zhu and Ruiting Yu

Session: TP2  Image/Video Processing II

Improved Tensor Based Registration: An Heterogeneous Approach

Ying Wang, E.mark Haacke, Yan Kang and Hong Zhao

Adaptive Unscented Kalman Filters Applied To Visual Tracking
Qichuan Ding, Xingang Zhao and Jianda Han

Orthonormal Finite Ridgelet Transform Coding Using An Ebcot-like Algorithm..............................................497
Zhenghua Shu, Guodong Liu, Qing Xie, Zhong Ren, Lvming Zeng and Lixin Gan

A Portable Wireless Image Receiving System For The Capsule Endoscope........................................................501
Yu Hu, Baopu Li, Dewen Zeng, Chao Hu and Max Q.-h Meng

Watermark Performance Contrast Between Contourlet And Non-subsampled Contourlet Transform................................................507
Guangyong Gao, Baoqin Cai, Shaowen Xu and Tao Yan

Fuzzy Direct Torque Control Of Ipmsm To Improve Both Efficiency And Speed Response.............................................512
Hojat Mostafavi, Mojtaba Sadeghi, Payam Ghaebi Panah and Sahand Azizkhani

Session: TP3 Control and Systems

A New Disturbance Observation Based Internal Model Controller.................................................................518
Zhiqiang Zhu, Yuqing He, Juntong Qi and Jianda Han

Fast And Robust Pose Estimation Using Coplanar Feature Points...........................................................................524
Junying Xia, Xiaoquan Xu and Jiulong Xiong

On Correlation Analysis Of Bivariate Alarm Signals.................................................................................................530
Zijiang Yang, Jiandong Wang and Tongwen Chen

Parvin Abedi, Ali Leylavi Shoushtari and Meysam Bistooni

Discrete Wavelet Transform Based Steam Detection With Adaboost......................................................................542
Zhijie Wang, Mohamed Ben Salah and Hong Zhang

Biped Robot Push Detection and Recovery.................................................................................................................593
Awais Yasin, Qiang Huang, Qian Xu and Weimin Zhang

Session: TP4 Biomedical Instrumentation

The Average Cerebral Perfusion In Patients With Multiple Sclerosis (ms) Using Mri...........................................................548
Yi Zhong, David Utriainen, Wei Feng, Shouliang Qi, E. Mark Haacke and Yan Kang

Implementation Of Cuff-less Continuous Blood Pressure Measurement System Based On Android..........................552
Lisheng Xu, Xu Guo, Feifei Yang, Sainan Yin, Xibin Zhang and Max Q.-h Meng

The Implementation Of Single Channel Ecg And Dual Channel Pulse Signals Synchronous Acquisition System.........................557
Lisheng Xu, Xibin Zhang, Feifei Yang, Yanhua Shen and Max Q.-h. Meng

Flexible Tactile Sensor System For Robot Skin Based On Labview..........................................................................563
Drug Incompatibility Checking System On Mobile Platform

Jianhua Li, Mingjie Xu, Huiming Dong, Zheng Zhang and Yan Kang

A Balance Control Strategy Of A Walking Biped Robot In An Externally Applied Force

Yeoun-jae Kim, Joon-yong Lee and Ju-jang Lee

Session: TE1  Vehicle dynamics control

A Gpu Accelerated Real-time Self-contained Visual Navigation System For Uavs

Xueyuan Guan and Hongyang Bai

Multimodal Intelligent Wheelchair Control Based On Fuzzy Algorithm

Songmin Jia, Jun Yan, Jinhui Fan, Xizhi Li and Liwen Gao

Fuzzy Logic Control In Regenerative Braking System For Electric Vehicle

Hao Zhang, Guoqing Xu, Weimin Li and Meilan Zhou

Fuzzy Logic Control Approach To The Energy Management Of Parallel Hybrid Electric Vehicles

Dengke Lu, Weimin Li, Guoqing Xu and Meilan Zhou

Multiple Crane Scheduling In Batch Annealing Process With No-delay Constraints For Machine Unloading

Xie Xie, Yanping Li and Yongyue Zheng

Session: TE2  Image/Video Processing III

An Method Of Feature Line Extraction Of Triangle Mesh Surface Model

Jibin Zhao, Weijun Liu and Renbo Xia

A Partial Differential Equation Algorithm For Image Enhancement

Yanan Fu, Tingfang Yan, David W Zhang and Max Q.-h. Meng

Analysis Of Dxf File With An Application To 3d Graphic Display

Wen Shang, Jun Zhong and Qin Yan

Image Segmentation By Improved Level Set Evolution Algorithm

Haiying Liu, Tingfang Yan, Yu Cheng, David W. Zhang and Max Q.-h. Meng

An Automatic Method For Detecting Objects Of Interest In Videos Using Surprise Theory

Jason Gu, Yuanlong Yu and David W. Zhang

Session: TE3  Networks and Communications II

Automated Network Analysis By Projected Power Method

Zi Wang, Wenye Li and Yan Sun
Probabilistic Inference Over Sensor Networks For Clusters: Extension To Multiple States

Wenye Li

A Location-aware Parallel Mac Protocol For Multihop Wireless Networks

Guoyan Yang, Xin Guan and Yanhong Guo

Anatomy Of Compromising Email Accounts

Seema Khanna and Harish Chaudhry

Cloud Security: Analysis And Risk Management Of Vm Images

Gundeep Singh Bindra, Prashant Kumar Singh, Krishen Kant Kandwal and Seema Khanna

Session: TE4  Biomedical Instrumentation II

Time-frequency Analysis Of Heart Sounds In Telemedicine Consulting System For Auscultation

Yue Zhao, Jihong Liang and Yanli Shen

Study On The Variability Of Pulse Wave And Ecg Of Graduate Students With Different Body Positions

Li Yan, Sainan Yin, Shuhong Wang, Jia Liu, Lisheng Xu and Yong Zhao

A Family Medical Monitoring System Base On Embedded uC/os-II And Gprs

Weili Zhou, Jingsheng Liao, Baopu Li and Jingrong Li

An Extensible Embedded Terminal Platform For Wireless Telemonitoring

Xiang Fang, Jingsheng Liao, Ruyi Zhang, Pingqiang Ni, Baopu Li and Max Q.-h. Meng

The Implementation Of Pulse Wave Signal Generator Based On Piecewise Gaussian-cosine Fitting

Lisheng Xu, Dan Song, Jueli Chen, Quanhai Fu, Hao Wang and Max Q.-h Meng

Session: FA1  Pattern Recognition

A Novel Object Recognition System For Cognitive Robot

Yang Luo, Yongqiang Gao, Li Liu and Xinyang Huang

A Novel Paddy Field Algorithm Based On Pattern Search Method

Xin Kong, Yan-lun Chen, Wei Xie and Xinyu Wu

Revisiting Principal-axes Aligned Conics: A Unified Algebraic Constraint And Geometric Interpretation For Camera Calibration

Shen Cai, Longxiang Huang and Yuncai Liu

Carotid Artery Segmentation In 3d Ultrasound Images Using A Hybrid Framework

Xiaotong Wang and Yaonan Zhang

Design And Implementation Of A High-performance Client/server Voiceprint Recognition System

Guanyu Gao, Kai Kang, Shengxiao Guan and Guanhua Gao
Session: FA2 Advanced Robots III

Design And Implementation Of A Finger Haptic Device For Large-scale Force-tactile Hybrid Haptic Rendering ............................709
Zhongqing Liu, Yanhe Zhu and Jie Zhao

A Method To Reduce The Sliding Force On Adhering Points Of Caterpillar Climbing Robot .................................................................715
Wei Wang and Longchao Zhao

Experimental Validation Of Optimal Load-allocation Control In Pace Gait Ladder Decent Motion For Multi-locomotion Robot (mlr) .................................................................721
Zhiguo Lu, Kosuke Sekiyama, Tadayoshi Aoyama, Yasuhisa Hasegawa and Toshio Fukuda

Experiments Of Obstacles And Collision Avoidance With A Distributed Multi-robot System ........................................................................727
Filippo Arrichiello, Stefano Chiaverini and Vaibhav Kumar Mehta

Study On Intelligent Visual Servoing Of Space Robot For Cooperative Target Capturing .................................................................733
Ye Shi, Bin Lian, Xueqian Wang, Wenfu Xu and Houde Liu

Session: FA3 Signal Processing

A Closed-form Approach To Acoustic Source Localization .........................................................................................................................739
Guogang Xiong, Xiaoyun Li, Xinyu Wu and Yongsheng Ou

Analysis Of Large Scale Ionospheric Tilts Effects On The Error Of Single Site Location ........................................................................745
Xiao-hua Yuan, Gangguo Zhang and Hui Zheng

A Method Of Close-range Calibration Of Fisheye Lens Camera ......................................................................................................................749
Xiangji Chen and Guoqiang Han

Humanoid Walking Pattern Generation Based On The Ground Reaction Force Features Of Human Walking ..................................................753
Zhangguo Yu, Xuechao Chen, Qiang Huang, Huaping Wang, Si Zhang, Wei Xu, Jing Li, Gan Ma, Weimin Zhang and Ningjun Fan

Epileptic Seizure Detection Using Wavelet Transform Based Sample Entropy And Support Vector Machine ........................................759
Ling Han, Hong Wang, Cong Liu and Chunsheng Li

Session: FA4 Biomedical Instrumentation III

Bluetooth Low Energy (ble) Based Mobile Electrocardiogram Monitoring System ....................................................................................763
Bin Yu, Yongxu Li and Lisheng Xu

Design Of Dynamic Synchronous Multi-channel Data Acquisition System For Lung Sound Based On Fpga ................................................768
Benjin Wang, Lei Miao, Huiying Dong, Jiangtao Li, Zeguang Zheng and Hongyi Li

The Design And Implementation Of A Mechanical Quick Connector For Medical Equipment..........................................................772

Jie Yan, Hao Liu, Guixiang Li and Yanmin Li

An Improved Method For Risk Assessment Of Carrier-based Aircraft.........................................................................................777

Qidan Zhu, Hui Li, Zhi Zhang and Lipeng Wang

Construction of 3D Vessel Model of the VR Robotic Catheter System..........................................................................................783

Baofeng Gao, Shuxiang Guo, Nan Xiao, Jin Guo, Xufeng Xiao, Shu Yang and Mohan Qu

Session: FP1  Pattern Recognition II

Mining The Functional Relations In The Neighborhood Of Splice Sites.........................................................................................789

Ying Wang, Qinke Peng, Tao Xu and Jia Lv

An Improved Random Forest Classifier For Image Classification..................................................................................795

Baoxun Xu, Yunming Ye and Lei Nie

A Robust Local Census-based Stereo Matching Insensitive To Illumination Changes.............................................................801

Xin Luan, Hong-hong Zhou, Da-lei Song, Fang-jie Yu, Xiu-fang Li and Bing Xue

A New Affine Registration Algorithm Applied To Off-line Signature Verification..................................................................................806

Wei Tian and Jingyuan Lv

Iterative Method For Two Line Elements Conversion........................................................................................................811

Weiping Li, Hongxing Qiu and Qi Dang

Session: FP2  Control Applications

Experiments Of Bilateral Teleoperation Of Nonholonomic Mobile Robots In Formation, Through Constant Delay Communications........................................................................................................814

Oscar Martinez Palafox and Mark William Spong

Design Of Approach Power Compensation System For Carrier-based Aircraft Using Conditional Integral Sliding Surface................................................................................................................821

Qidan Zhu, Yongtao Yu, Zhi Zhang, Wen Zhang and Zixia Wen

Switching Lpv Control For Aircraft Lateral-directional Axis During Powered Approach..................................................................................827

Qidan Zhu, Zixia Wen, Zhi Zhang, Yongtao Yu and Wen Zhang

Modeling And Simulation Of Gas Scheduling System In Iron And Steel Enterprises..................................................................................832

Bingzhi Gao, Zhilei Wang, Xiaoli Li and Yixin Yin

The Multi-pulse Control Algorithm Of High Pressure Common Rail Diesel Engine Based On Structure Array..................................................................................837

Shuman Guo and Tong Zhang

Session: FP3  Signal Processing II
Fractal Dimension Applied In Texture Feature Extraction In X-ray Chest Image Retrieval
Hong Shao and Huidong Duan

Design Of A Real-time Ecg Filter For Resource Constraint Computer
Ruyi Zhang, Xiang Fang, Yuanqi Liu, Jingsheng Liao, Baopu Li and Max Q.-h. Meng

Constructing Chinese Domain Lexicon With Improved Entropy Formula For Sentiment Analysis
Jing Zhang and Qinke Peng

An Improved Lower Bound For A General Case Of The Master-plate Design Problem
Xie Xie, Yanping Li and Yongyue Zheng

A New Stereo Matching Algorithm Based On Image Segmentation
Zi-wei Zhou, Ge Li, Ji-zhuang Fan, Jie Zhao and Xinyu Oyang

Session: FP4  Computer Aided Diagnosis

The Carotid Intimal-media Thickness Measurement Of Ultrasound Images Based On An Improved Chan-vece Model
Yang Gao and Yaonan Zhang

A Computer-aided Lesion Diagnose Method Based On Gastroscopeimage
Liang Pan, Cong Yang and Guan Mo

Detection Of The Period Of Voice Based On Wavelet
Dejun Guan, Yue Zhong, Jinhan Feng, Lisheng Xu and Liping Wang

A Review Of Surgery Navigation System Based On Ultrasound Guidance
Xiaozhao Chen, Nan Bao, Jianhua Li and Yan Kang

Infiltrative Breast Cancer Initial Detection Based On Double-scale Sech Template Matching
Li Ke, Yingying Chen, Nan Li and Yan Kang

Session: FE1  Pattern Recognition III

Derivative Code And Its Pattern For Object Recognition
Yao Cao, Baochang Zhang, Zhenhua Guo and Jianzhuang Liu

Fault Pattern Recognition Of Power-shift Steering Transmission Based On Support Vector Clustering
Ying-feng Zhang, Tao Huang, Yan Yu, Jian-guo Bu and Biao Ma

Soft-sensing Method Based On Modified Ann Inversion And Its Application In Erythromycin Fermentation
Yuhan Ding, Xianzhong Dai and Guohai Liu

Improved Approximation Algorithm Of Rna Structure Prediction With Pseudoknots
Zhendong Liu and Daming Zhu

Ebdt: a Method For Detecting Ldos Attack
Kai Chen, Huiyu Liu and Xiaosu Chen

Session: FE2  Sensors

Study On Material Removal Rate Of Electrolysis And Plasma Polishing
Ji Wang, Laichun Suo, Yili Fu and Lili Guan

Analysis Of Cloacal-septum-related Gene Evolution In Vertebrate Development
Jingshu Zhang, Yijin Wang, Jesse Li-ling and Zhufei Wang

Radical Basis Function Neural Network For A Novel Tactile Sensor Design
Xuekun Zhuang, Xin Sun, Hongqing Pan, Yubing Wang, Yunjian Ge and Feng Shuang

Using Least Square Support Vector Machine For Reducing The Cross-sensitivity Of Sensors
Jing-ling Chen, Wen-bin Zhang, Chenguang Suo, Wen-sheng Gui and Qing-peng Wang

Compressed Infrared Bearing-sensor For Human Localization: Design And Implementation
Yuebin Yang, Guodong Feng, Xuemei Guo and Guoli Wang

Session: FE3  Signal Processing III

Rolling Force Prediction Based On Wavelet Multiple-rbf Neural Network
Yan Liu, Chaonan Tong and Fengqin Lin

An Efficient Parallel Numerical Method For Large-scale Computational Models Of Cardiac Electrophysiology
Lianqing Wang, Yongfeng Yuan, Kuanquan Wang and Mo Li

Research on Indexing in Medical Image Database Retrieval Using Self-Organizing Maps
Hao Zou and Jian Sun

A Novel Instantaneous Frequency-based Voice Activity Detection For Strong Noisy Speech
Wei Shi and Yuexian Zou

Pca And Lda For Emg-based Control Of Bionic Mechanical Hand
Daohui Zhang, Anbin Xiong, Xingang Zhao and Jianda Han

Session: FE4  Computer Application

Computer-assisted Monte Carlo Simulation Of Optimum Cut-off Grade In Surface Mining Metal Ore Deposits
Shouguo Li and Chang Yang

Cad/cam Fabrication And Clinical Application Of Mucosa-supported Template For The Edentulous Maxilla
Zhichao Huang, Bingwei He, Jiang Chen and Yanqin Li

Visualization Using Histogram Based Transfer Functions For 3d Cardiac Volume Data Set.................................................................977

Fangzhou Shen, Kuanquan Wang, Yongfeng Yuan and Lianqing Wang

An Improved Trajectory Prediction Algorithm Based On Trajectory Data Mining For Air Traffic Management................................................981

Yue Song, Peng Cheng and Chundi Mu

Improved Periodic Output Feedback Control Method For Creep Characteristic Of Thick Ipmc Plate..............................................................987

Zhiyong Sun, Lina Hao, Liqun Liu and Jianchao Gao
