2012 IEEE 20th International Conference on Program Comprehension

(ICPC 2012)

Passau, Germany
11 – 13 June 2012
## Preface

Message from the Chairs
Committees

## Invited Papers

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agile Software Assessment (Invited Paper)</td>
<td>Oscar Nierstrasz and Mircea Lungu — <em>University of Bern, Switzerland</em></td>
<td>3</td>
</tr>
<tr>
<td>Studying Developers for Fun and Profit (Keynote Abstract)</td>
<td>Robert DeLine — <em>Microsoft Research, USA</em></td>
<td>11</td>
</tr>
<tr>
<td>A Retrospective View on: The Role of Concepts in Program Comprehension (MIP Award)</td>
<td>Václav Rajlich and Norman Wilde — <em>Wayne State University, USA; University of West Florida, USA</em></td>
<td>12</td>
</tr>
</tbody>
</table>

## Main Research Track

### Cognitive Processes

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program Complexity Metrics and Programmer Opinions</td>
<td>Bernhard Katzmarski and Rainer Koschke — <em>University of Bremen, Germany</em></td>
<td>17</td>
</tr>
<tr>
<td>Women and Men- Different but Equal: On the Impact of Identifier Style on Source Code Reading</td>
<td>Zohreh Sharafi, Zéphyrin Soh, Yann-Gaël Guéhéneuc, and Giuliano Antoniol — <em>École Polytechnique de Montréal, Canada; University of Ngaoundéré, Cameroon</em></td>
<td>27</td>
</tr>
<tr>
<td>A Lightweight Visualization of Interprocedural Data-Flow Paths for Source Code Reading</td>
<td>Takashi Ishio, Shogo Etsuda, and Katsuro Inoue — <em>Osaka University, Japan</em></td>
<td>37</td>
</tr>
<tr>
<td>Is the Derivation of a Model Easier to Understand Than the Model Itself?</td>
<td>Janet Feigenspan, Don Batory, and Taylor Riché — <em>University of Magdeburg, Germany; University of Texas, USA; National Instruments, USA</em></td>
<td>47</td>
</tr>
</tbody>
</table>

### The Role of the Developer

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Evaluating Forum Discussions to Inform the Design of an API Critic</td>
<td>Chandan R. Rupakheti and Daqing Hou — <em>Clarkson University, USA</em></td>
<td>53</td>
</tr>
<tr>
<td>Mining Source Code Descriptions from Developer Communications</td>
<td>Sebastiano Panichella, Jairo Aponte, Massimiliano Di Penta, Andrian Marcus, and Gerardo Canfora — <em>University of Sannio, Italy; Universidad Nacional de Colombia, Colombia; Wayne State University, USA</em></td>
<td>63</td>
</tr>
<tr>
<td>Measuring Programming Experience</td>
<td>Janet Feigenspan, Christian Kästner, Jörg Liebig, Sven Apel, and Stefan Hanenberg — <em>University of Magdeburg, Germany; Philipps University of Marburg, Germany; University of Passau, Germany; University of Duisburg-Essen, Germany</em></td>
<td>73</td>
</tr>
</tbody>
</table>

### Measurement

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>High-MCC Functions in the Linux Kernel</td>
<td>Ahmad Jbara, Adam Matan, and Dror G. Feitelson — <em>Hebrew University of Jerusalem, Israel</em></td>
<td>83</td>
</tr>
</tbody>
</table>
Understanding Registration-Based Abstractions: A Quantitative User Study
John-Jose Nuñez and Gregor Kiczales — University of British Columbia, Canada ................................. 93

Concern-Based Cohesion: Unveiling a Hidden Dimension of Cohesion Measurement
Bruno Silva, Claudio Sant’ Anna, Christina Chavez, and Alessandro Garcia — Federal University of Bahia, Brazil; PUC-Rio, Brazil ................................................................. 103

Understanding Reuse in the Android Market
Israel J. Mojica Ruiz, Meiyappan Nagappan, Bram Adams, and Ahmed E. Hassan — Queen’s University, Canada; École Polytechnique de Montréal, Canada ................................................................................... 113

Understanding and Architecture
Programmer Information Needs after Memory Failure
Chris Parnin and Spencer Rugaber — Georgia Tech, USA ................................................................. 123

Identifying Computational Phases from Inter-process Communication Traces of HPC Applications
Luay Alawneh and Abdelwahab Hamou-Lhadj — Concordia University, Canada ......................... 133

Tracking and Visualizing Information Flow in Component-Based Systems
Amir Reza Yazdanshenas and Leon Moonen — Simula Research Laboratory, Norway ............... 143

Empirical Studies
Do Static Type Systems Improve the Maintainability of Software Systems? An Empirical Study
Sebastian Kleinschmager, Stefan Hanenberg, Romain Robbes, Éric Tanter, and Andreas Stefik — University of Duisburg-Essen, Germany; University of Chile, Chile; Southern Illinois University at Edwardsville, USA .................................................................................. 153

Professional Status and Expertise for UML Class Diagram Comprehension: An Empirical Study
Zéphyrin Soh, Zohreh Sharafi, Bertrand Van den Plas, Gerardo Cepeda Porras, Yann-Gaël Guéhéneuc, and Giuliano Antoniol — École Polytechnique de Montréal, Canada; University of Ngaoundéré, Cameroon; University of Namur, Belgium; Université de Montréal, Canada .................................................................................. 163

Semantics and Traceability
Modeling the Ownership of Source Code Topics
Christopher S. Corley, Elizabeth A. Kammer, and Nicholas A. Kraft — University of Alabama, USA .................................................................................................................. 173

A Semantic Relatedness Approach for Traceability Link Recovery
Anas Mahmoud, Nan Niu, and Songhua Xu — Mississippi State University, USA; Oak Ridge National Laboratory, USA .................................................................................. 183

Using IR Methods for Labeling Source Code Artifacts: Is It Worthwhile?
Andrea De Lucia, Massimiliano Di Penta, Rocco Oliveto, Annibale Panicella, and Sebastiano Panichella — University of Salerno, Italy; University of Sannio, Italy; University of Molise, Italy .................................................................................. 193

A TraceLab-Based Solution for Creating, Conducting, and Sharing Feature Location Experiments
Bogdan Dit, Evan Moritz, and Denys Poshyvanyk — College of William and Mary, USA .................. 203

Source-Code Analysis
Can Clone Detection Support Test Comprehension?
Benedikt Hauptmann, Maximilian Junker, Sebastian Eder, Elmar Jürgens, and Rudolf Vaas — TU Munich, Germany; CQSE, Germany; Munich Re, Germany .................................................................................. 209

A Controlled Experiment on Software Clones
Jan Harder and Rebecca Tiarks — University of Bremen, Germany .................................................................. 219

Code Querying by UML
Carlos Noguera, Coen De Roover, Andy Kellens, and Viviane Jonckers — Vrije Universiteit Brussel, Belgium .................................................................................. 229

Tool Demonstrations
CriticAL: A Critic for APIs and Libraries
Chandan R. Rupakheti and Daqing Hou — Clarkson University, USA .................................................. 241

Supporting Comprehension Experiments with Human Subjects
Janet Feigenspan and Norbert Siegmund — University of Magdeburg, Germany .................................. 244
SeByte: A Semantic Clone Detection Tool for Intermediate Languages
Iman Keivanloo, Chanchal K. Roy, and Juergen Rilling — Concordia University, Canada; University of Saskatchewan, Canada 247

CRat: A Refactoring Support Tool for Form Template Method
Keisuke Hotta, Yoshiki Higo, Hiroshi Igaki, and Shinji Kusumoto — Osaka University, Japan 250

Poster Presentations

Toward Structured Location of Features
Hiroshi Kazato, Shinpei Hayashi, Satoshi Okada, Shunsuke Miyata, Takashi Hoshino, and Motoshi Saeki — NTT, Japan; Tokyo Institute of Technology, Japan 255

Extraction and Improvement of Conditionally Compiled Product Line Code
Bo Zhang — University of Kaiserslautern, Germany 257

Applying Bioinformatics in the Analysis of Software Variants
Vasil L. Tenev and Slawomir Duszynski — Fraunhofer IESE, Germany 259

Parallel Code Clone Detection Using MapReduce
Hitesh Sajnani, Joel Ossher, and Cristina Lopes — UC Irvine, USA 261

Student Research Symposium

Automatic Software Architecture Recovery: A Machine Learning Approach
Hitesh Sajnani — UC Irvine, USA 265

Toward an Effective Automated Tracing Process
Anas Mahmoud — Mississippi State University, USA 269

Characterization of the Linux Configuration System
Ahmad Jbara — Hebrew University of Jerusalem, Israel 273

Leveraging Clone Detection for Internet-Scale Source Code Search
Iman Keivanloo — Concordia University, Canada 277
