37th International Technical Conference on Clean Coal & Fuel Systems 2012

The Clearwater Clean Coal Conference

Clearwater, Florida, USA
3-7 June 2012

Editors:
Barbara A. Sakkestad

ISBN: 978-1-62276-167-8
TABLE OF CONTENTS

CHEMICAL LOOPING I
Ronald Breault

Chemical Looping for Methane Conversion with Simultaneous CO₂ Capture for Industrial Applications.......................................................... 1
Ronald W. Breault, Douglas Strau, Justin Weber, George Richards, Stephen Carpenter, Yong Liu, Shelley Rommelmann

Techno-Economic Evaluation of a Coal Direct Chemical Looping Power Plant with Carbon Dioxide Capture........................................... 11
Daniel P. Connell, Mark L. Dunkerley, David A. Lewandowski, Liang Zeng, Dawei Wang, L.-S. Fan

Chemical Looping Gasification for the Co-Generation of Electricity and Hydrogen.......................................................... 23
Andrew Tong, Deepak Sridhar, Zhenchao Sun, Ray Kim, Mandar Kathe, Liang Zeng, L.-S. Fan

ALSTOM’s Chemical Looping Prototypes, Program Update ........................................... 25
Iqbal F. Abdulally, Herbert E. Andrus, Bruce Lani, Corinne Beal, Bernd Epple, Anders Lyngfelt

Leveraging CLOU Experimental Studies to Envision Design Configurations for Coal-Fired Power Plants ........................................... 37
Jo Ann S. Lighty, Asad H. Sahir, Nicholas Tongey

ALSTOM’s Chemical Looping Prototypes, Program Update – Calcium Based Technologies ........................................... 44
Iqbal F. Abdulally, Herbert E. Andrus, Bruce Lani, Corinne Beal, Bernd Epple, Anders Lyngfelt

CHEMICAL LOOPING II
Ronald Breault

Thermodynamic Analyses of Mn-, Co- and Cu- Oxides as Oxygen Carriers for Chemical Looping Air Separation .......................................................... 56
Kalpit Shah, Behdad Moghtaderi, Terry Wall

Degradation of Oxygen Carriers in Fixed Bed Chemical Looping Combustion .................................................................................. 65
Erin Kimball, Patricia van den Bos, Cristina Sanchez-Sanchez, Anita Fossdal, Richard Blom, Elodie Comte, Arnold Lambert

Coal Direct Chemical Looping Combustion Process Development .................................................................................. 66
Liang Zeng, Ray Kim, Sam Bayham, Andrew Tong, L.-S. Fan

Evaluation of Chemical Looping Process with Simulated Synthesis Gas from Steam Gasification of Coal over Bimetallic Fe-Cu Oxides .................................................................................. 67
Ewelina Ksepko, Marek Sciazko, Ranjana V. Siriwardane, Hanjing Tian, Thomas Simonyi

Oxy-Combustion Application to Lignite Coals – 15 MWth and 30 MWth Pilot Testing .......................................................... 68
Frank Kluger, Patrick Moenchert, Thomas Wild, Armand Levassor, David Turek, James Kenney

Development of a Pilot-Scale CLOU-Based Chemical Looping System for Processing Coal .......................................................... 79
Kevin Whitty

POST COMBUSTION CO₂ CAPTURE I
Lisa Rimpf

Pilot-Scale Evaluations of Advanced Solvents and a Novel Solvent–Gas Contactor for Lower-Cost CO₂ Capture .......................................................... 90
Brandon Pavlish, Nathan Fiala, John Kay, Joel Downs, Suzanne Klauder

Enzymatic Technology for Low-Cost Carbon Dioxide Capture .................................................................................. 92
Jonathan A. Carley

The Cansolv SO₂ and CO₂ Capture Technology Deployed in the Coal-Fired Power Sector .......................................................... 93
Karl Stéphenne, Ajay Singh, Devin Shaw

Thermal Integration of Waste Heat in Coal-Fired Units with Post-Combustion Carbon Capture .................................................................................. 105
Edward Levy, Gordon Jonas, Erony Martin

The Development of Precipitating Carbonate Systems as New Generation Capture Solvents– UNO Mk 3 .................................................................................. 117
Clare Anderson, Trent Harkin, Kathryn Mumford, Geoff Stevens, Barry Hooper

Hybrid Membrane Absorption Process for Post Combustion CO₂ Capture .................................................................................. 129
S. James Zhou, Shiguang Li, Howard Meyer, Ben Bikson, Yong Ding
POST COMBUSTION CO₂ CAPTURE II
Lisa Rimpf
The Impact of Ash on a CO₂ Capture Pilot-Scrubber System Applied for Coal-Fired Power Plant ........................................... 140
Ye Zhou, James K. Neathery, Kunlei Liu
An Integrated Vacuum Carbonate Absorption Process Enabled with an Enzyme Biocatalyst for CO₂ Absorption .................................................................................................................................................. 141
Yongqi Lu, Xinhua Ye, Shihan Zhang, Massoud Rostam-Abadi, Joseph Hirschi, Andrew Jones
A Comparative Characterization Study of Ca-Looping Natural Sorbents .................................................................................. 153
Grigorios Itskos, Panagiotis Grammelis, Emmanuel Kakaras, Fabrizio Scala, Antonio Coppola, Piero Salatino, Halina Kruczek
Effect of Air and CO₂ Supply on Growth of Microalgae Chlorella Vulgaris ........................................................................ 165
Magdalena Zabochnicka-Swiatek
Process Performance of Non-Aqueous Amine-Based CO₂ Capture Solvents ........................................................................ 172
Trevor K. Carlisle, Jerrod Hohman, Greg Staab, Michael C. Hufman, Jason E. Bara, Nathan Brown, Alfred E. Brown

BIOMASS CO-UTILIZATION
Les Marshall
Combustion Characteristics of Blended Coal and Hydrothermally Treated Municipal Solid Waste .................. 181
Kunio Yoshikawa, Liang Lu
High Portion Biomass Co-Firing and NO₂ Reduction in a Coal-Fired Boiler ................................................................. 192
Guisu Liu, Li Yan, Edward Pozzobon, Brian Higgins, Miroslav Milewicz, Arkadiusz Repeński
Characteristics of Biomass Fuels and Their Impact on Volatile Flame Length during Biomass Cofiring Combustion ........................................................................................................................................... 206
Melissa L. Holmeyer, Benjamin M. Kunfer, Richard L. Axelbaum, Gengda Li, Shuiqing Li
Comparison of Pinion Pine/Juniper Wood Co-Firing in Raw, Torrefied and Pyrolyzed Forms ........................................ 218
Eric Eddings, Dallas Hanks, Ralph Coates, Scott Bell
Performance Characterization of Commercial Upgraded Biomass under Pulverized Fuel Boiler Conditions .................................................................................................................................................. 219
Mariusz K. Cieplik
Zone Modeling Approach for the Assessment of the Effects of Biomass Co-Firing on PF Boiler Performance .................................................................................................................................................. 228
Piotr Plaza, Wiebren de Jong, Mark Mulder, Tony Griffiths

DISCUSSION ON ADVANCES IN SENSORS AND MONITORING
This was a Forum Discussion Group with no Manuscripts ( Sensors and Monitoring) ........................................... 229
Steve Seachman, Kenneth M. Bryden, Ashwani Gupta, Rajeeva Kumar, Hai Xiao, Kevin Whitty

GASIFICATION TECHNOLOGIES I
Massood Ramezan
Dry Solids Pump Development and Commercial-Scale Testing ................................................................................................. 230
Timothy W. Saunders
Co-Firing Low Cost Fuels Using Indirect Gasification ............................................................................................................. 231
B.J. Vreugdenhil, A. van der Drift, C.M. van der Meijden
Impact of Finite-Rate Kinetics on Carbon Conversion in a Single-Stage Entrained Flow Gasifier with Coal CO₂ Slurry Feed ........................................................................................................................................... 236
Cristina Botero, Randall P. Field, Howard J. Herzog, Ahmed F. Ghoniem
Advanced Gasification Process Demonstration: Fuel Upgrading, Warm-Gas Cleanup, and Hydrogen Separation Membranes .................................................................................................................................................. 250
Joshua J. Stanislawski, Michael L. Swanson, Tyler J. Curran, Scott G. Tolbert, Al Bland, Kumar Sellakumar
Reduction of Energy Requirement in CO₂ Capture Process ............................................................................................................. 261
Eiki Suzuki
Preparation of Various Fuels for the Non-Thermal Plasmatron Reactor-Gasifier Using the Szego Mill .......................... 268
Olev Trass, Mike McLaren
GASIFICATION TECHNOLOGIES II
Massood Ramezan

Fischer Tropsch Synthesis in Supercritical CO₂ ................................................................. 280
  David Carron, Jitendra Gautam, Derek Perry, Adam Sims, Jeremiah Benoit, Kanchan Mondal

Substitute Natural Gas (SNG) from Coal and Lignite – Methanation of Synthesis Gas from
Allothermal Gasification ........................................................................................................ 285
  Christoph Baunilha, Juergen Karl, T. Kienberger

Technology and Economy Analysis of a Novel Polygeneration System Based on Coal Pyrolysis and
Char Gasification ..................................................................................................................... 294
  Rui Zhang, Qinhui Wang, Zhongyang Luo, Mengxiang Fang, Kefa Cen

A Regenerative MgO-Based Process for CO₂ Capture in IGCC .............................................. 302
  J. Abbasian, E. Abbasi, S. Zarghami, H. Arastoopour

Coal Ash Behavior in Reducing Environments (CABRE) III .................................................. 303
  Joshua J. Stanislawski, Donald P. McCollor, Alexander Azenkeng, Robert R. Jensen, Daniel Schvitalla

Development of Gas, Power, Tar Co-Generation System Integrating Circulating Fluidized Bed
Combustion with Coal Pyrolysis ................................................................................................. 304
  Zhongyang Luo, Qinhui Wang, Mengxiang Fang, Zhihang Guo, Mingjiang Ni, Kefa Cen

USE OF MODELING TOOLS FOR TECHNOLOGY ASSESSMENT
Bradley Adams

Model Research of Coal and Biomass Co-Combustion in a Large Scale Circulating Fluidized Bed
Boiler .......................................................................................................................................... 312
  J. Krzywanski, R. Rajczyk, M. Komorowski, W. Nowak

Three Dimensional CFD-Based Numerical Study of Chemical Reacting Char Particles in a Fixed Bed
Coal Gasifier ................................................................................................................................ 324
  Sebastian Schüle, Petr Nkiruhyak

Ash Deposition Modeling Incorporating Mineral Matter Transformation and Pseudo-Study Deposit
Build-Up Applied to Coal & Biomass Co-Firing ........................................................................ 336
  Kevin Davis, Huafeng Wang, James Valentine, Shrinivas Lokare, Brian Smith, Liming Shi, Edward Pozzobon

SteamGenExpert Process Modeling for Boiler Combustion Modifications ................................. 346
  Bradley Adams, Andrew Fry, Brydger Van Otten, Marc Cremer

Investigation of Mercury Control Strategies Using REI MerSim™ Model .................................. 353
  Andrew Fry, Brydger Van Otten, Bradley Adams

Modeling Acid Gas Control with Sorbents .................................................................................. 357
  Marc Cremer, Kevin Davis, Dave Wang

OXY-FUEL TECHNOLOGY I – OVERVIEW & DEMONSTRATIONS
Ligang Zheng

FutureGen 2.0: Where Are We Now? ......................................................................................... 369
  Dennis McDonald, Mark Estopinal, Hengky Maulim

Testing in the CIUDEN Oxy-CFB Boiler Demonstration Project .............................................. 381
  Horst Hack, Monica Lapion, Pedro Otero, Iñaki Álvarez, Francisco Muñoz, Javier Álvarez, Arto Hotta, Jouni
  Lantto, Reijo Kuivalainen

ALSTOM’s Development and Commercialization of Oxy-Combustion for Steam Power Plants 393
  John Marion, Armand Levasseur, Frank Kluger, Andreas Brautsch, Acciarini Massimo, Thierry Pourchot

Laboratory Experiments Simulating NO-NO₂ Conversion During Wet and Dry Compression of Oxy-
Fuel Flue Gas ............................................................................................................................... 404
  Rohan Stanger, Timothy Ting, Terry Wall

Influence of Ash Particles on Radiative Heat Transfer in Air- and Oxy-Fired Conditions ............... 414
  Robert Johansson, Klas Andersson, Filip Johnsson

Effect of Yttrium Addition on ZrO₂-CuO Oxygen Sorptive/Desorptive Properties ....................... 426
  Mehdi Alipour, John Nychka, Rajender Gupta

OXY-FUEL TECHNOLOGY II – FUNDAMENTAL STUDIES
Ligang Zheng

Gas Temperature and Radiative Heat Transfer in Oxy-Fuel Flames ............................................. 427
  Daniel Bäckström, Robert Johansson, Klas Andersson, Filip Johnsson, Sonnik Clausen, Alexander Fateev
