TABLE OF CONTENTS

VOLUME 1

Combined VUV Absorption and Laser Absorption Spectroscopy for Atomic Oxygen Detection .................................................. 1
Makoto Matsui, Akira Kawahara, Yoshiki Yamaguchi

High-Repetition-Rate H2O Absorption Spectroscopy Measurements in Bluff Body Stabilized Flames ........................................ 8
Andrew Caswell, Stanislav Kostka, Sukes Roy, Jean Whitney, Scott Sanders, Amy Lynch, James Gort

Laser Induced Fluorescence Combined with Laser Absorption Spectroscopy for Optically Thick
Plasma Diagnostics ........................................................................................................................................................................... 13
Tsuyoshi Kaneko, Satoshi Nomura, Kiniya Komurasaki, Hirohiko Koizumi

TDL Absorption Sensor for In Situ Determination of Combustion Progress in Scramjet Ground
Testing ................................................................................................................................................................................................. 20
Ian Schultz, Christopher Goldenstein, Jay Jeffries, Ronald Hanson, Robert Rockwell, Christopher Guyne

Applications of Statistically Defensible Test and Evaluation Methods to Aircraft Performance Flight
Testing ................................................................................................................................................................................................. 26
Reagan Woolf

A Method of Standardizing Takeoff Performance Data Using Modeling and Simulation ......................................................... 41
Reagan Woolf, Kenneth Orleans

Design of Experiments Using Response Surface Methods to Optimize Simulated Reentry Trajectories ................................... 53
Timothy Jorris, Kenneth Bull, Ryan Carr, Jacob Downey

Using Statistical Power to Improve Turbine Engine Test Planning .............................................................................................. 67
Rylan Cox, Stephen Arnold

Hypersonic Ground Testing Combustion Air Heater Ignition Optimization via Design of Experiments ............................ 74
Dusty Vaughan, Glenn Garrard, Drew Landman

Experimental Study of an Optical Fibre-based Pressure Sensor for Boundary Layer Transition Detection ................................................. 82
Maxime Forte, Alain Serandieu, Daniel Arnal, Stephanie Molin, Olivier Vaudel, Pascale Nouchi

Deployment of a Pressure Sensitive Paint System for Measuring Global Surface Pressures on
Rotorcraft Blades in Simulated Forward Flight ............................................................................................................................. 87
Neal Watkins, Bradley Leighty, William Liford, Oliver Wong, Kyle Goodman, Jim Crafton, Robert Forlines,
Larry Goss, James Gregory, Thomas Julian

Unsteady Pressure-Sensitive Paint Measurements on an Articulated Model Helicopter in Forward
Flight .............................................................................................................................................................................................................. 101
Kevin Disotell, Thomas Juliano, Di Peng, James Gregory, Jim Crafton, Narayanan Komerath

Unsteady PSP Measurement of Transonic Unsteady Flow Field around a Rocket Fairing Model ............................................ 120
Kazuyuki Nakakita, Yoshiki Takama, Kentaro Imagawa, Hirohiko Kato

Reduction of Temperature Effect in Pressure-Sensitive Paint Measurements by Model Materials and
Coatings ................................................................................................................................................................................................. 133
Yasuhiro Egami, Kouki Fuji, Toshiki Takagi, Yu Matsuda, Hiroki Yamaguchi, Tomohide Nii

Development of Temperature-Cancelled Motion-Capturing PSP System and Its Application to a
Hypersonic Wind Tunnel ........................................................................................................................................................................ 143
Taika Okabe, Takeshi Miyazaki, Hirotaka Sakurai

Flight Test Results of Efficient Maneuver Development for a GPS-Based Pitot-Static Calibration
Method Using Output-Error Optimization ........................................................................................................................................ 154
Garrett Millie, Boyia Marts

Static VMSA Demonstrations: Safety and Data Implications ........................................................................................................ 172
Darren McDonald, Kyle Gardner

In-Flight Drag Measurements on Manikins ........................................................................................................................................ 178
Uwe Soltes, Rodney Allison, Michael Leigh

Airfield Performance Evaluation of an Advanced Propeller on the C-130H .............................................................................. 189
Kevin Halpin, Lance Bays, James Armor, Kevin Wagahoff

Response Surface Modeling Tolerance and Inference Error Risk Specifications: Proposed Industry
Standards ............................................................................................................................................................................................... 203
Richard Deloach

Wind Tunnel Testing of a Counter Rotating Open Fan Powered Aircraft ................................................................................. 213
Peter Aschwanden, Juerg Mueller, Brian Smith, Richard Northall, Robert Grifffiths

Force and Moment Measurements on a Free-Flying Capsule Model in a High-Enthalpy Shock Tunnel ............................. 225
Stuart Launceree, Jon Martinez Schramm, Klaus Hannemann

Acoustic Forcing and Control of Reflected Waves in the Klebanoff-Saric Wind Tunnel ......................................................... 234
Matthew Kuester, Edward White

Computational Modeling of a Slotted Wall Test Section ................................................................................................................ 249
Alexander Krynytsky, Meredith Fleming, David Sommerfield, Pei Li
Using CFD to Calculate Support Interference Effects .......................................................... 263
Aurelia Cartieri, Sylvain Mouton

Fiber-Coupled High-Speed OH-PLIF Imaging in Turbulent Flames .................................. 277
Paul Hsu, Waruna Kalatilaka, Naibo Jiang, Stanislav Kostka, Sakesh Roy, Anil Patnaik, James Gord

Multi-Photon Fluorescence Imaging of Flame Species Using Femtosecond Excitation ........ 282
Waruna Kalatilaka, Sakesh Roy, James Gord, Viswanath Katta

High-Data-Rate One-Dimensional Thermometry Using Femtosecond CARS .................. 288
James Gord, Waruna Kalatilaka, Hans Staufer, Sakesh Roy

Application of Optical Measurement Techniques in Combustion Test-Cell Environments .... 292
Amy Lynch, Stanislav Kostka, Andrew Caswell, Craig Neuroth, Dale Shouse, James Gord

Quantitative Radar REMPI Measurement of Methyl Radical in 1-D McKenna Flame .......... 299
Yue Wu, Zhili Zhang, Timothy Ombrello, Viswanath Katta

Hyponeric Boundary Layer Measurements with Variable Blowing Rates Using Molecular Tagging

Velocimetry .......................................................................................................................... 315
Brett Barthel, Paul Danehy, Craig Johansen, Stephen Jones, Christopher Goyne

OH PLIF Visualization of the UVa Supersonic Combustion Experiment: Configuration A .......... 334
Craig Johansen, Colin McRae, Paul Danehy, Emanuela Gallo, Luca Cantu, Robert Rockwell, Christopher Goyne, J. McDani

Improvement of the Measurement Range of the Micro-pillar Shear-stress Sensor MPS³ ........ 349
Bernardo Nottebrock, Michael Klaas, Wolfgang Schröder

Real-Time Measurement of Skin Friction Using Calibrated Multi-Element Hotfilm Arrays .......... 360
Robert Long, Edward White

Convective Heat Flux Measurement Validation and Qualification .................................... 368
Brian Earp, Joseph Schetz, Reece Nool

Development of Digital Image Projection Techniques to Quantify Surface Film/Rivulet Flows .... 379
Bin Wang, Song Zhang, Hui Hu, William Lohry

Issues and Solutions to Midwave Staring FLIR Performance Measurement over Background ...... 397
Sergio Fontanez, Ryan Buatatala, Dean Hatfield

Trajectory Analysis Program for Determining Range Safety Considerations for a Reusable Launch
Vehicle Using Multiple-Phase Pseudospectral Optimization ............................................. 412
Ryan Carr, Timothy Jorris, Jacob Downey

Initial Testing and Development of an Organic Remote Pilot Aircraft Capability at the USAF Test
Pilot School ........................................................................................................................... 432
Timothy Bronder, Jason Lee, David Heinz, Nicholas Helms, Marco Mangini, Mark Keeble

Digital Video Laboratory in a T&E World ............................................................................. 452
Otto Martinez, Alexander Paxton

Novel Use of On-Board Data Recorder System on Existing Weapon Systems .................. 467
Rocky Haynes, Danny Carrillo

Characterizing Routing with CoTS Radio-to-Router Information in an Airborne Network ........ 474
Bow-Nan Cheng, Randy Charland, Paul Christensen, Andrea Coyle, Leonid Veytser, James Wheeler

Measurement Techniques for Shock Movement Capture on a NACA 0012 in Unsteady Compressible
Flow ....................................................................................................................................... 486
Christopher Jensen, Kyle Gompertz, Di Peng, James Gregory, Jeffrey Bons

VOLUME 2

An Approach for Estimating LDA Spatial Filtering Effects on Velocity Measurements .......... 508
Sara Toutiaei, Harish Gopalan, Jonathan Naughton, Philippe Lavrie

An Experimental Investigation on the Spray Flows Exhausted from a Counter-swirling Air-blast
Nozzle ..................................................................................................................................... 517
Daniel Dvorak, Spencer Peck, Hui Hu

Ultra-high-speed Digital In-line Holography System Applied to Particle-laden Supersonic
Undenerpanded Jet Flows ....................................................................................................... 539
Kristian Ingvorsen, Nicolas Buchmann, Julio Soria

Lessons Learned in Combined Developmental and Operational Test: Ten Years of F-15 Testing by
the OFP CTF ............................................................................................................................ 549
David Wright, Richard Sumner

Overview of the C-12J External Stores Flight Test Program ................................................. 557
Joshua Schneider, Reid Larson, Thomas Hill

Un-tethered Test Capability: Improving Airborne Test Efficiency ....................................... 563
Bethany Ward

A Family of Low Cost Personal Computer Based Data Acquisition Systems for Flight Test .... 570
John Maratore
Subminiature Flight Safety System (SFSS), Application of Total Systems Engineering Approach to
Reduce Product Development Cost and Risk .......................................................... 582
   Steve Musteric, Joshua Langston
Joint Mission Environment Test Capability (JMETC), the solution for Air Force Distributed Test and
Evaluation Infrastructure Requirements ................................................................. 597
   Chip Ferguson, David Brown
DDS-Suite - A Dynamic Data Acquisition, Processing, and Analysis System for Wind Tunnel Testing ............ 607
   Nathan Burnside
Adapting Egress Tests to the Modern Test and Evaluation Process ........................................ 615
   George Ayers, Michelle Zeisset, James Daniel, Timothy Gros
Multidisciplinary Design Optimization with Vdot Using MEARS ........................................... 622
   Joseph Herdy, Damian Yanez
Status of AEDC Transonic, Supersonic, and Hypersonic Wind Tunnel Improvement Programs .................. 632
   Edward Mickle, Christopher Abbott, Richard Mead, Frank Wonder, William Brooks
The Redstone Responsive Systems Solutions Initiative ................................................拥有 655
   Roger Herdy, Marty Kress
Check-Standard Testing Across Multiple Transonic Wind Tunnels with the Modern Design of
Experiments .............................................................................................................. 665
   Richard Deloach
Hyersonic PIV in a Ludwieg Tube Wind Tunnel at Mach 5.9 ................................................... 690
   Marcus Casper, Peter Scholz, Jan Windte, Rolf Radespiel, Sven Scharnowski, Christian Kähler, Soren Stephan
Experimental Investigation of the Flow Field Topology for Several Cargo Drop Configurations ................ 703
   Eric W. M. Roosenboom, Andreas Schroeder, Reinhard Geisler, Janos Agocs
Measurement of Vibrational Nonequilibrium in a Supersonic Freestream Using Dual-Pump CARS ............ 715
   Andrew Cutler, Gaetano Magnotti, Luca Cantu, Emanuela Gallo, Paul Danely, Robert Baurle, Robert Rockwell,
   Christopher Goyne, James McDaniel
Time Resolved Filtered Rayleigh Scattering for Temperature and Density Measurements ...................... 728
   Isaac Yeaton, Pietro Maisto, Kevin Lowe
Curved Boundary Layer Rake Measurement in the Trisonic Gasdynamic Facility ................................. 744
   Ryan Schmit
Transition Detection and Skin Friction Measurements on Rotating Propeller Blades ............................. 760
   Henning Schuelen, Henning Rosemann, Sven Schaber
Supercritical Cold Flow Facility, Experiment Design and Modeling for the Study of Fluidic Mixing ............ 785
   Robert Bernstein, Nils Sedano, Raymond Walsh, Patrick Sgarlata
A 2-D Inertial Particle Separator Research Facility ..................................................................... 807
   Dominic Barone, Eric Loh, Philip Snyder
Experimental and Numerical Evaluation of Hydrogen Fueled Dual Mode Ramjet Engine ......................... 819
   William Engblom, Gaurav Bellamkonda, Jonathan Osborne
A General Simulation of an Air Ejector Diffuser System .................................................................... 834
   Derick Daniel
Space Shuttle Solid Rocket Motor Plume Pressure and Heat Rate Measurements ................................. 853
   Wulf Von Eckroth, Leah Struchen, Thomas Trevillion, Rafael Perez, Shaun Nerolich, Chris Parlier
Investigation on the Performance of Second Throat Supersonic Exhaust Diffuser for Starting Higher
Area Ratio Nozzles ....................................................................................................... 876
   R. Ashokkumar, S. Sankaran, T. Sundararajan, K. Srinivasan
Probe Capture for Quantitative Flow Visualization in Large Scale Wind Tunnels ................................. 888
   Andreas Mueller, Andrin Landolt, T. K. Rögen
High-Reynolds Number Active Blowing Semi-Span Force Measurement System Development .............. 896
   Keith Lynn, Ray Rhew, Gregory Jones, William Milholen, Michael Acheson, Scott Goodliff
Jet Exit Rig Six Component Force Balance .................................................................................. 927
   Raymond Castner, John Wolter, Mark Wokle, Dennis Booth, David King
Detection of Bi-Directionality in Strain-Gage Balance Calibration Data ................................................ 936
   Norbert Ulbrich
Determination of Aerodynamic Coefficients from Shock Tunnel Free Flight Trajectories ....................... 949
   Pierre Wey, Julio Srauljes, Myriam Bastide, Bastien Martinez, Patrick Gnemmi
Performance Evaluation of Pressure Transducers for Water Impacts ................................................. 958
   Gregory Vassilakos, David Siegall, Sean Treadway
Evaluation of Regression Models of Balance Calibration Data Using an Empirical Criterion ................... 975
   Norbert Ulbrich, Thomas Volden
Characterizing the Aerodynamic Influence of F-16 Stores on Limit Cycle Oscillations Using Aero-
Structure Simulation .................................................................................................. 994
   Jason Lechniak, Keerti Bhamidipati, Crystal Pasiliao
