INTERNATIONAL SYMPOSIUM ON POWER ELECTRONICS, ELECTRICAL DRIVES, AUTOMATION AND MOTION
SORRENTO (Italy), 20th – 22nd June, 2012

Proceedings Index

WB2 - Power Electronics for Photovoltaic Applications

87 Halimov A. S., Gandara V., Agüera A. L., Akhatov J. S. - (Spain, Uzbekistan)
A study the influence of absorbing layer on the efficiency of solar drying chamber

93 Poliseno M. C., Mastromauro R. A., Liserre M., Dell'Aquila A. - (Italy)
High efficiency transformerless PV power converters

A nonlinear control microcontroller implementation for a maximum power point tracking algorithm for a small photovoltaic facility

103 Ozdemir S., Altin N., Sefa I. - (Turkey)
Single stage three-level MPPT inverter for solar supplied systems

109 Pisano M., Bizzarri F., Brambilla A., Gruosso G., Gajani G. S. - (Italy)
Micro-inverter for solar power generation

114 Testa A., De Caro S., Scimone T. - (Italy)
A buck-boost based DC/AC converter for residential PV applications

WA3 - Modelling of Electrical Machines and Drives

120 Gholizad H., Binder A. - (Germany)
Design and modeling of a variable impedance induction motor

126 Bacher J. P., Waldhart F. J. - (Austria)
Effects of an insulated and a non-insulated damper winding in a turbo generators with a massive rotor by non-steady state operations

131 Pavlovic F. - (Slovenia)
Discharging arcs in commutation motors

135 Magdon O., Binder A. - (Germany)
An iron core impedance model for calculating high frequency common mode currents and shaft voltages in inverter-fed AC machines

141 Ponomarev P., Poliakpova M., Pyrhonen J. - (Finland)
Conjugated fluid-solid heat transfer modeling of a directly-oil-cooled PMSM using CFD

146 Mitterhofer H., Andessner D., Amrhein W. - (Austria)
Analytical and experimental loss examination of a high speed bearingless drive

WB3 - Design, Analisys and Control of Microgrids

152 Hassan M. A., Abido M. A., Rahim A. H. M. A. - (Saudi Arabia)
Optimal design of autonomous microgrid using particle swarm optimization

158 Wilson D. G., Robinett III R. D., Goldsmith S. Y. - (United States)
Renewable energy microgrid control with energy storage integration

164 Cheng Y. - (Belgium)
Smart micro-grids enable seamless interconnection and disconnection for high reliability and flexibility in distributed power generation

170 Heath M., Vosters G., Parker G., Weaver W., Wilson D. G., Robinett III R. D. - (United States)
DC microgrid optimal storage distribution using a conductance and energy state modeling approach

175 Neely J. C., Pekarek S., Glover S., Finn J., Wasyczuk O., Loop B. - (United States)
An economical diesel engine emulator for micro-grid research
Proceedings Index

N/A Kabalci E., Kabalci Y., Bayindir R. - (Turkey)
Modelling of an advanced metering infrastructure to observe the renewable microgrids

WP1.1 - Controlled Electrical Drives

185 Jagiello A. St., Dudzik M. D. - (Poland)
Properties brushless DC machine induced permanent magnets applied to traction drive

190 Weinger A., Beliaev D., Dokakin A., Shatokhin A., Ponomaryov C. - (Russia)
Controlled drive with a DC brushless synchronous motor

194 Bahri I., Amine Benkhelifa M. E., Monmasson E. - (France)
HW-SW real-time operating system for AC drive applications

200 Ejiali A., Taravat S., Soleimani J. - (Iran)
Comparative study on control strategy of DTFC based on active flux concept and DTC for IPMSM applied to traction motor

207 Dieng A., Benkhoris M. F., Ait-Ahmed M. - (France)
Torque control strategy of non-sinusoidal brushless DC motor based on fractional regulator

213 Tsuji M., Xu F., Tsuruda J., Shin-Ichi Hamasaki, Yamada E. - (Japan)
A current-observer-based induction motor speed sensorless control and use of DC link current

219 Fei M., Zanasi R. - (Italy)
Multi-phase synchronous motors: minimum dissipation fault-tolerant controls

225 Fajkus P., Klima B., Hutak P. - (Czech Republic)
High speed range field oriented control for permanent magnet synchronous motor

231 Housseini B., Beguenane R., Okou A. F., Tankari M. A. - (Canada, France)
Advanced multilevel control strategy for induction motor driving : using of PV-battery standalone system and total harmonic distortion analysis

237 Brazhnikov A. V., Brazhnikova E. S., Belozerov I. R. - (Russia)
PPM-based development-and-control strategy of fault tolerant inverter-fed multiphase electromechanical AC systems

243 Pantea A. M., Aroquiadassou G., Mabwe A. M., Martis C. S. - (France, Romania)
Real-time sensorless vector control for induction machines using an FPGA board

249 Sikora A., Zielonka A., Kulesz B. - (Poland)
Impact of hall sensors positioning on symmetry of BLDC control signals

253 Bassi C., Filippo M., Giulio D., Tessarolo A. - (Italy)
Experimental assessment of medium-voltage induction motor performance under multilevel PWM inverter supply

259 Artal J. S., Caraballo J. - (Spain)
Staircase modulation applied in a speed controller for smalls single/two-phase induction motors

265 Ibrahim R. A., Hamad M. S., Dessouky Y. G., Williams B. W. - (Egypt)
A review on recent low voltage ride-through solutions of wind farm for permanent magnet synchronous generator

271 Oh W. S., Sol K., Cho K. M., Yoo K., Kim Y. T. - (South Korea)
Self-tuning speed controller for induction motor drives

934  Bonanno F., Capizzi G., Gagliano A., Napoli C. - (Italy)
     Optimal management of various renewable energy sources by a new forecasting method

941  Bonanno F., Capizzi G., Napoli C. - (Italy)
     Some remarks on the application of rnm and prnm for the charge-discharge simulation of advanced lithium-ions battery energy storage

946  Porcarelli D., Brunelli D., Magno M., Benini L. - (Italy)
     A multi-harvester architecture with hybrid storage devices and smart capabilities for low power systems
Proceedings Index

952  Martinez C., Jalakas T., Vinnikov D., Lazaro A., Barrado A. - (Spain, Estonia)
Qzsi DC/DC converters in input-series output-parallell connection for distributed generation

958  Brando G., Capaldi P., Rizzo R. - (Italy)
Design and experimental testing of a low-cost high-efficiency micro cogeneration unit for distributed energy conversion

962  Damiano A., Gatto G., Marongiu I., Serpi A. - (Italy)
A multi-phase PM synchronous generator torque control for direct-drive wind turbines

969  Sánchez H., Cano A., Jurado F., Castañeda M., Fernández L. M. - (Spain)
Sizing and energy management of a stand-alone PV/hydrogen/battery-based hybrid system

974  Capaldi P., Rizzo R. - (Italy)
An efficient small-power cogeneration-unit suitable for residential off-grid applications

978  Riva Sanseverino E., Di Silvestre M. L., Zizzo G., Graditi G. - (Italy)
Energy efficient operation in smart grids: optimal management of shiftable loads and storage systems

TP1.3 - Measurements, Identification and Diagnostics

983  Patocka M., Cipin R., Procházka P. - (Czech Republic)
Mathematical tool for RMS value calculation of impulse signals

988  Nedeljkovic D. - (Slovenia)
Forecasts and results of written exams at courses of control engineering for students of power engineering

993  Lisowiec A., Nowakowski A., Ksiazek L. - (Poland)
Signal processing in switchgear e-diagnosis network

997  Varadi A. Sz., Szirmay L., Szarka T. - (Hungary)
Internet-based measurement technology, electrical drives and automation

1003  Mach M., Grmela P., Hajek V. - (Czech Republic)
Shunt-wound motor parameters estimation by a genetic algorithm

1007  Pasetti G., Saponara S., Tiniena F., Serventi R., D'Abbaco P., Fanucci L. - (Italy)
An integrated smart driver for inductive loads with self-monitoring/diagnostic capability

1012  Becirovic V., Nikolic B., Turkovic I., Pavic I. - (Bosnia and Herzegovina, Croatia)
Development of flickermeter according to IEC 61000-4-15 standard and modeling consumers which produce flickers in the power network

1017  Nussbaumer P., Mitteregger A., Wolbank T. M. - (Austria)
Detecting changes of the insulation state of variable speed drive systems based on inverter-built-in current sensors

1023  Media M., Martin F., Craciunescu A., Rodriguez A. - (Romania)
Induction motor's broken bars detection by using Stockwell transform

1027  Puche-Panadero R., Sarkimaki V., Rodriguez P. - (Spain, Sweden)
Detection of broken rotor bar fault in induction machine fed by frequency converter

1033  Denies J. - (Belgium, France)
Genetic algorithm-based topology optimization: performance improvement through dynamic evolution of the population size

1039  Formentini A., Maragliano G., Marchesoni M., Vaccaro L. - (Italy)
A sensorless PMSM drive with inductance estimation based on FPGA
# Proceedings Index

**SPEEDAM 2012 – Proceedings**  
**INTERNATIONAL SYMPOSIUM ON POWER ELECTRONICS, ELECTRICAL DRIVES, AUTOMATION AND MOTION**  
**SORRENTO (Italy), 20th – 22nd June, 2012**

## TA4 - Sensorless Control

**1045**  
*Di Pasquale A., Fiorucci E., Ometto A., Rotondale N.* - (Italy)  
Frequency characterization of cast-resin transformers

**1051**  
*Olivieri C., Tursini M.* - (Italy)  
A novel PLL scheme for a sensorless PMSM drive overcoming common speed reversal problems

**1057**  
*Colak I., Sahin M.* - (Turkey)  
Sensorless control of a brushless DC motor using a self-tuning PID

**1063**  
*Darba A., De Belie F., Vyncke T., Melkebeek J.* - (Belgium)  
FPGA-based real-time simulation of sensorless control of PMSM drive at standstill

**1069**  
*Wang F., Stolze P., Kennel R., Alireza S., Khaburi D. A.* - (Germany)  
Inherent FCS-model predictive torque control for induction machine without encoder

## TB4 - Analysis and Control of Wind Generating Systems

**1073**  
*Nishikata S.* - (Japan)  
Dynamic performance analysis of a hybrid wind turbine generating system with series connected wind generators using a current source thyristor inverter

**1079**  
*Giaourakis D. G., Safacas A. N., Tsotoulidis S.* - (Greece)  
Dynamic behaviour of 1.5 MW doubly-fed induction generator based wind energy conversion system

**1085**  
*Barrera-Cardenas R., Molina M.* - (Norway)  
Comparative study of the converter efficiency and power density in offshore wind energy conversion systems with single-phase transformer

**1091**  
*Broy A., Sourkounis C.* - (Germany)  
Using the drive train for active damping of oscillations in rotor blades in gearless wind-energy-converter with PMSM

**1095**  
*Thongam J. S., Beguenane R., Okou A. F., Tarbouchi M., Merabet A., Bouchard A. P.* - (Canada)  
A method of tracking maximum power points in variable speed wind energy conversion systems

**1101**  
*Piegari L., D'Arco S., Tricoli P.* - (Italy, Norway, United Kingdom)  
A novel thyristor rectifier for series connection of wind turbines

## TP2.1 - Photovoltaic Plants

**1107**  
*Romito D. Z., Mazzanti G., Santini E.* - (Italy)  
Investigation about the payback time of photovoltaic plants in italy

**1113**  
*Graditi G., Adinolfi G.* - (Italy)  
Temperature influence on photovoltaic power optimizer components reliability

**1119**  
*Tadjer S. A.* - (Algeria)  
Harmonics compensation system based on photovoltaic generator

**1123**  
*Cancro C., Graditi G., Mongibello L., Pontecorvo A., Privato C., Valenti M.* - (Italy)  
Elisolab project: design and realization of a 30 kW optical power peak solar furnace

**1130**  
*Quaia S., Leghi V., Giacalone M., Vinzi G.* - (Italy)  
Technical-economic evaluation of a combined heat and power solar (chaps) generator based on concentrated photovoltaics

**1136**  
*Chiodo E., Lauria D., Pagano M.* - (Italy)  
Probabilistic characterization of uncertainty in the photovoltaic cell modeling
