# TABLE OF CONTENTS

**Volume 1**

## COMPREHENSIVE TRANSPORTATION PLANNING

### Self-Organizing Relation between Resident Trip Mode Choice and Transit Priority Policy—Case Study in Changchun, China
Beizhao, Shuchang Zhao, Yunpeng Wang ................................. 1

### Location Configuration Design of New Park-and-Ride Facilities in Beijing, China
Xin Yue Chen, Xiao Kuan Yang, Zhi Xu ................................. 11

### Research of Parking Demand Forecast Model Based on Regional Development
Kun Chen, Jian-Jun Wang, Fei Han ........................................... 23

### Synthetic Evaluation for Transportation Modes Based on Fuzzy Matter-Element Model with Discrete Catastrophe Theory
Mengmeng Zhou, Jianguo Yang ............................................. 30

### The Degree of Complexity for a Separate Intersection and a Road Network
Jiajun Shen, Wei Wang ....................................................... 40

### A Review of Activity-Based Travel Demand Modeling
Zhaoming Chu, Lin Cheng, Hui Chen ................................... 48

### Ordered Logistics Model for Gender Difference in Activity Frequency
Min Yang, Xinyu Zhao, Feifei Yu, Jingxian Wu ...................... 60

### Modeling Activity-Travel Behavior of Urban Low-Income Residents
Hai Chen, Xuewen Chen, Zhaoming Chu, Min Yang .......... 71

### Traffic Planning of Winter Olympics for Cold Regions in China: A Case Study of Harbin
Xu Yao, Yaping Zhang ....................................................... 83

### Bi-Criteria System Optimum with Fixed Demand and Continuously Distributed Value of Time
Xin Wang, Hai-Jun Huang, Li-Jun Tian .................................. 90

### The Relationship between Highways and Urban Roads in Urbanization
Yinghong Jiang, Qingyan Peng ........................................... 99

### The Shortest Distance Method of Total Intensive Mode Transfer in Passenger Terminal Layout: A Case Study of Beijing-Shanghai High-Speed Railway Station in Zhenjiang City
Yinghong Jiang, Qingyan Peng ........................................... 105

### Travel Behavior of New Town Residents: A Case Study of Fangshan in Beijing
Chunyan Li, Xiao Li, Desin Zhang, Changqing Liu ................. 111

### The Private Car License Plate Auction in Shanghai: Macro-Effectiveness and Micro-Mechanisms
Suwei Feng, Guang Li, Dan Xu ............................................. 118

### The Relationship between Resident Trip Characteristics and Spatial Evolution of the Ribbon Group City—A Case Study in Lanzhou
Qing Li ................................................................. 130

### Research on Impact of Parking Behavior Based on Floating Parking Charges
Jingzheng Zhang, Jun Chen, Xiaofei Ye, Chunyan Li ............... 142

### Research on the Method of How to Design HOV Lanes Based on the Basic Section of an Urban Arterial Road in China
Shejun Deng, Jun Chen, Chunyan Li, Xin Bi, Hui Lin ............. 151

### LOGIT-Based Road Network Optimization Model
Han Bai, Fengrui Sun, Yuan Zhang, Yangdong Zhao .............. 161

### A Method to Estimate Limits to Highway Network Scale
Han Bai, Ling-Xiang Wei, Yuan Zhang, Yangdong Zhao .......... 171

### Research of Adaptive Fuzzy Comprehensive Evaluation for Highway and Economic Development
Xiaolin Gong, Xuecheng Guo, Xiaoqiong Jiang ...................... 180

### Access Road Planning and Traffic Operation for High-Speed Railway Hub
Xiaolin Gong, Xuecheng Guo, Xiaoqiong Jiang ...................... 191

### Xiamen's Middle School Students' Trip Characteristics Research
Yueer Gao, Ming Ding ...................................................... 200

### Analysis of Urban Transportation System Effect: Evaluating the Difference between Mobility and Accessibility in Orientation
Yueer Gao, Ming Ding ...................................................... 207

### Regional O-D Survey Method by Vehicle License Plate Recognition Technology
Ji-Biao Zhou, Hong Chen, Jing Zhao, Han Zeng, Xiao-Wei Li .. 218

### An Effective Approach to Bicycle Improvement in a Historic Urban Area by Separating Bicycles from Motorized Traffic: Case Study of Zhenjiang, China
Fengyun Yin, Xuecheng Guo, Mao Ye ................................. 229

### Research on the Characteristics of Non-Motorized Traffic in China's Medium-Sized Cities: The Case of Changsha
Xiaoni Shi, Hangfei Lin .................................................... 241

### Parking Price Planning for Shanghai World Expo PR Travel
Wen-Hui Li, Neng-Chao Lv, Xin-Ping Yan ............................ 252

Research on Theoretical Model of En Route Sector Capacity ..................................................................................................... 805
Xin Liu, Lijian Ma
Can Highway Capacity Manual Model Be Used to Estimate the Capacity of Modern Roundabouts in China? A Case Study in Nanjing ................................................................. 812
Qiuyu Liang, Pan Liu, Hao Wang, Hao Yu
Estimation of Intersection Turning Movement Proportions Using MATLAB ...................................................................................... 822
Xiao Zhang, Xiaoru Cai, Lijun Sun
Comfortable Speed and Car-Following Distance on Urban Flat and Straight Road ................................................................. 829
Jing-Shuai Yang, Jing-Min Li, Juan Wang, Shao-Hui Pi

TRAVELER AND TRAFFIC INFORMATION AND CONTROL

Research on Architecture of Intelligent Transportation Application System ................................................................................. 837
Yongkai Hu, Wei Wang, Haiyan Gu, Fengying Zhan, Lili Qiao
Study on the Intelligent Transport System and Social Economic Development .................................................................................. 845
Haiyan Gu, Wei Wang, Yongkai Hu, Lili Qiao, Fengying Zhan
Volume 2

Video-Based Traffic Parameter Extraction with an Improved Vehicle Tracking Algorithm.......................................................... 856
Song-Hao Wang, Zhi-Heng Li, Zuo Zhang, Ji-Yuan Tan

Effects of Count-Down Signal Lights on Pedestrian Behaviors at Signalized Intersections.......................................................... 867
Jian-Jun Shi, Jing Chen, Qing Zhao

Study on Route Choice Behavior Control Based on the Internet of Things .................................................................................. 876
Jian-Jun Shi, Mingyang Qin, Shengqiang Shi

Analyzing Commuting Characteristics in Beijing through License Plate Recognition System Data .................................................. 883
Jian-Jun Shi, Jing Chen, Qing Zhao

A Traffic State Assessment Based on Grey Clustering Analysis .................................................................................................. 894
Min Guo, Jinhui Lan, Jianjun Li, Zongshu Ling, Min Liu

Active Traffic Control for Oversaturated Intersection Group in Emergency Evacuation........................................................... 903
Zhengfeng Huang, Gang Ren, Chao Fan

Examples of Validating an Adaptive Kalman Filter Model for Short-Term Traffic Flow Prediction .............................................. 912
Liyan Zhang, Jian Ma, Jian Sun

Research on Wireless Access in Vehicular Environment Based on IEEE 802.11p ..................................................................... 923
Shuai Chen, Decun Dong, Wei Nat, Wenyi Zheng, Weiping Jiao

Multi-Aircraft Inertial Navigation Data Fusion Method Aided by One Pseudolite ................................................................. 932
Jing-Cheng Liu, Jing-Juan Zhang, Li-Fen Tan

Study on Start-Up Lost Time of Traffic Signals with Count-Down Display and the Driving Behavior at the End of Green Signal ...... 941
Cong Zhang, Yongfeng Ma, Jian Lu

Study on the Relationship between Urban Road Network Service Level and Capacity ................................................................. 953
Zhaowei Qu, Yan Xing, Hongyu Hu, Xianmin Song, Yanzhou Duan

Research on Road Network Model Considering Road Toll ........................................................................................................ 960
Lin Gai, Feng Tan

Simulation-Based Comprehensive Evaluation of Left-Turn-Waiting Zone at Signalized Intersection with Separated Left Turn Phases .................................................................................................................. 970
Yan Lu, Wanqing Ma, Xiaoming You

Study of Real-Time Traffic Processing Models for Inter-City Highways Based on FCD Data Sources ........................................... 981
Zhiquan Zhang, Hangjie Lin

Static OD Estimation and Evaluation Based on DynaCHINA ......................................................................................................... 993
Changjia Chen, Zhaosheng He, Xiuqin Dai

Wencheng Yang, Lun Zhang, Zhaosheng He, Qian Rao

Model of the Ionospheric Delay Correction Based on CORS for Vehicle Navigation and Positioning ...................................... 1016
Lei Wang, Wu-Sheng Hu

Research on Intersection Signal Timing Model Considering Emissions Effects ................................................................. 1024
Hong Chen, Bo Bai, Juan Ma, Dongyu Wang

New Controlling Methods for Alleviating Recurrent Congestion on Freeway Merge Area ....................................................... 1035
Liang Wang, Xiaoguang Yang

Traffic State Identification Considering Differences between Road Segments and Intersections ........................................... 1044
Bai Dou, Meiqing Yan, Xiaoguang Yang

Design and Implementation of Traffic Signal Controller with GPS Timing Function .............................................................. 1055
Chao Cai, Hang Yan, Hao Chen, Hongke Xu

Study on the Early Warning System of Road Passenger Transport ............................................................................................. 1065
Ying Li, Bai Zhang, Yuan-Jian Zhang, Yu-Fan Pan, Jian He

Real-Time Accuracy Degree Forecast of Estimated Link Average Travel Time Based on Data Fusion Method ......................... 1077
Hui-Bing Li, Xiao-Guang Yang

Research of In-Service Regulatory Signs Sheeting, Retro-Reflectivity, and Deterioration Characteristics ............................... 1087
Ming Jiang, Rui Zhou

A Regional Pilot Weather Information System for Surface Transportation and Incident Management: Concept of Operations .......................................................... 1096
Zhirui Ye, Xiaojun Shi, Shaoxi Wang, Lisa Ballard, Zhichen Huang

Study on the Adaptability of On-Board Navigation Equipment for Older People ................................................................. 1107
Lin Zhang, Bin Wang, Hongmei Jia, Bo Dong

Highway Network Intelligent Coordinated Information Dissemination Model Based on VMS ................................................ 1115
Nale Zhao, Tianran Zhou, Changcheng Li, Xiaolong Zhi, Han Hu

Traffic Flow Prediction Based on Wavelet Analysis, Improved Genetic Algorithm, and BP Neural Network ................................ 1126
Chunxia Liu, Baichuan Lu, Jianfeng Wang

Responsive Signal Control Design for Urban Traffic Network ................................................................................................ 1134
Lin Li, Andy H. F. Chiu

Analysis of Weather Impact on Travel Speed and Travel Time Reliability ................................................................. 1145
Liuwei Zhao, Steven I-Jy Chien
