2012 IEEE 12th International Conference on Advanced Learning Technologies

(ICALT 2012)

Rome, Italy
4 – 6 July 2012
Preface .................................................................................................................................................. xxii
Conference Committees .................................................................................................................... xxiii
Reviewers ............................................................................................................................................. xxviii

Invited

Principles for Collaborative Work ........................................................................................................ 1
Harold Jarche

Main Track

A Case Study on Using Data Mining for University Curricula .............................................................. 3
Yoshitaka Sakurai, Kouhei Takada, Setsuo Tsuruta, and Rainer Knauf

A Conceptual Framework for the Analysis of the Use of Advanced Communication Technologies in Higher Education: The Institutional Perspective ......................................................... 5
João Batista and Fernando Ramos

Addressing the Challenges of Survey Fatigue for Lifelong User Modelling: Initialising Baseline Models Using Community Psychometric Values .......................................................... 8
Victoria Macarthur and Owen Conlan

A Format of Serious Games for Higher Technology Education Topics:
A Case Study in a Digital Electronic System Course ........................................................................ 13
Danu Pranantha, Francesco Bellotti, Riccardo Berta, and Alessandro De Gloria

A Framework for Learning Activities’ Guides .................................................................................... 18
Lluís Ribas-Xirgo

A Group Oriented Intelligent Tutoring System For Rocket Engineers and Researchers ...................... 20
Yonghuang Zheng, Feng Tian, Renhou Li, and Longzhuang Li

A Hybrid Tag-Based Recommendation Mechanism to Support Prior Knowledge Construction .......... 23
Jun Ming Chen, Yeali S. Sun, and Meng Chang Chen

A Long-Term Evaluation of Educational Animations of Functional Programs ..................................... 26
Jaime Urquiza-Fuentes and J. Ángel Velázquez-Iturbide

Analysis of the Validity of E-assessment and Self-Assessment in Formal Assessment in Electrical and Electronics Engineering Studies through a Case Study ............................................. 31
Juan Carlos G. de Sande, Juan Ignacio Godino-Llorente, Victor Osma-Ruiz, and Nicolás Saenz-Lechón

An Approach of Building an Engaging Virtual Authentic Environment for Classroom Learning ........ 36
Po-Hsiang Huang, Chia-Jung Wu, and Gwo-Dong Chen
Complex Learning: A Way for Rethinking Pedagogies and Processes in Technology-Enhanced Learning and Education
Laura Vettraino, Eleonora Guglielman, Marco Guspini, and Valentina Castello

Complex Learning Resources Integrated with Emerging Forms of E-assessment: An Empirical Study
Mohammad AL-Smadi, Margit Hoefler, Gudrun Wesiak, and Christian Guetl

Computer Support for Reflective Learning in the Workplace: A Model
Birgit R. Krogstie, Michael Prilla, Daniel Wessel, Kristin Knipfer, and Viktoria Pammer

Considerations for the Design of Mini-games Integrating Hints for Puzzle Solving ICT-Related Concepts
Javier Melero, Davinia Hernandez-Leo, and Josep Blat

Considering the Space in the Design of Learning Activities: The ISIS and 4SPPIces Models Applied to Science Inquiries
Mar Perez Sanagustín, Valérie Emin, and Davinia Hernández-Leo

Constructing a Novel Chinese Readability Classification Model Using Principal Component Analysis and Genetic Programming
Yi-Shian Lee, Hou-Chiang Tseng, Ju-Ling Chen, Chun-Yi Peng, Tao-Hsing Chang, and Yao-Ting Sung

Constructing the Relationship between Individual Differences of Faculty Members and the Continuance Intension of Using LMS Systems
Ghada M. Alnifie

Construction of Reading Guidance Mechanism on E-book Reader Applications for Improving Learners’ English Comprehension Capabilities
Chun-Wang Wei, Zong-Han Hsieh, Nian-Shing Chen, and Kinshuk

Context Aware Electronic Updates for Virtual Learning Environments
Laura Crane, Ayodele Awe, Phillip Benachour, and Paul Coulton

Contribution of Learning Technology in the Implementation of the First Year of Medical Studies in France: Example of What Was Done at Bordeaux Medical School
Jean-Marc Dubois, Jérôme Gabet, Olivier Hauchecorne, Christophe Michenaud, Sandrine Michenaud, Nadège Pré, Hélène Vaissié, and Pierre Dubus

Conversational Learning Design in Future Classrooms
Yacine Atif

Correlation Mining and Discovery for Learning Resources
Martin M. Weng, Bruce C. Kau, and Neil Y. Yen

Counting Sounds: An ICT Musical Approach for Teaching the Concept of the Angle in Kindergarten
Tharrenos Bratitsis, Konstantinos Tatsis, and Anna Amanatidou

Curating Digital Content in Teaching and Learning Using Wiki Technology
Michael Verhaart

Data Collection Framework to the Learning Monitoring Using Logical Sensor Network
Gislaine Cristina Micheloti, Regina Borges de Araújo, Joice Lee Otsuka, and Delano Berder
Delivering Adaptive and Context-Aware Educational Scenarios via Mobile Devices ........................................... 197
Sergio Gómez, Panagiotis Zervas, Demetrios G. Sampson, and Ramón Fabregat

Design and Evaluation of a Pervasive Workplace Learning System for Retail Stores ........................................ 202
Yvan Peter, Benjamin Barbry, Thomas Vantroys, Philippe Laporte, and Sylvie Lerouge

Design and Evaluation of Support Functions of Course Management Systems for Assessing Learning Conditions in Programming Practicums ................................................................. 205
Toshiyasu Kato and Takashi Ishikawa

Design and Implementation of Remotely Supervised Video-Based Distance Examinations ................................ 208
Rastislaiv Datsenka, Ivo Stankov, and Karl Kurbel

Designing a Technology Enhanced Collaborative Space for Learning Entity-Relationship Modeling.................. 213
Anthony K.L. Wong, Michael Morgan, and Matthew Butler

Designing Educational Games by Combining Other Game Designs ................................................................. 218
Telmo Zarraonandia, Paloma Díaz, Mario Rafael Ruiz, and Ignacio Aedo

Developing a Mobile Game Environment to Support Disadvantaged Learners ............................................. 223
Birgit Schmitz, Roland Klemke, Marcus Specht, Marvin Hoffmann, and Ralf Klamma

Developing Cognitive Diagnostic Assessments System for Mathematics Learning ....................................... 228
Lin-Jung Wu, Hsin-Hao Chen, Yao-Ting Sung, and Ko-En Chang

Developing Virtual Learning Environment 2.0 Using Web Services Approach ............................................... 230
Fang-Fang Chua and Eng-Soon Tay

Development and Evaluation of Peer Feedback in the English Quiz Game Design in Social Network ............ 235
Jan-Pan Hwang, Ting-Ting Wu, Yong-Ming Huang, and Yueh-Min Huang

Development of an Application for Mobile Devices to Record Learner Interactions with Web-Based Learning Objects ................................................................................................................................. 240
Eva Garcia, Angel Garcia, Antonio Garcia-Cabot, Luis de-Marcos, and Jose-Ramon Hilera

Devising ICT in Engineering Education Based on the University Academia Expectations ........................... 242
Diana Andone and Radu Vasiu

Digital Culture of Educational Administrators in French National Education: What Uses for What Practices? ................................................................. 244
Marta Toribio Fontenla, Hassina El-Kechai, and Jean-François Cerisier

Digital Educational Objects for an Inclusive Learning: Survey and Guidelines for the Experience in Eskola 2.0 .......................................................................................................................... 246
Mari Luz Guenaga, Iratxe Mentxaka, Susana Romero, and Andoni Eguíluz

Digital Storytelling at School: Engagement and Educational Benefits .......................................................... 248
Nicoletta Di Blas and Paolo Paolini

Discussion Models in Seamless Online Learning Integrated Discussion (SOLID) Environment: Selection vs. Performance .......................................................................................................................... 251
Sheng-Yi Wu, Huei-Tse Hou, Sherry Y. Chen, Eric Zhi Feng Liu, and Wu-Yuin Hwang

DIY GIS: A Constructionist, Educational Toolkit for Architecture Students ................................................. 253
Luca Simeone, Giorgia Lupi, Paolo Patelli, Salvatore Iaconesi, and Oriana Persico
Effects of Computerized Collaborative Concept Map Approach on Students’ Learning Achievements and Cognitive Loads .......................................................... 258
Gwo-Jen Hwang, Hui-Chun Chu, and Yi-Rong Liang

Effects of Video-Based Reflection Prompts on Learners’ Reflection Levels in a Context-Aware U-Learning Environment .............................................. 263
Xiu-Jun Yang, I-Chun Hung, Gwo-Jen Hwang, Nian-Shing Chen, and Wei-Chieh Fang

E-learning Course Educational Linux for High School Students in Brazil ........................................................................................................ 268
Rafaela Lunardi Comarella, Ricardo Azambuja Silveira, Ronaldo Lima Rocha Campos, and Araci Hack Catapan

E-learning of English Phrasal Verbs via Pictorial Elucidation and L1 Glosses .......................................................... 270
Yukiko Sasaki Alam and Yumiko Oe

Embedding Observation Means into the Learning Scenario: Authoring Approach and Environment for Simulations-Based Learning ................. 273
Anne Lejeune and Viviane Guéraud

Engineering Social Networks Using the Controllability Approach Applied to E-learning .......................................................... 276
Seid Maglajlic

Enhancing Collaborative Filtering of Learning Resources with Semantically-Enhanced Social Tags ..... 281
Simon Boung-Yew Lau and Chien-Sing Lee

Enhancing Learning Analytics in Distributed Personal Learning Environments .......................................................... 286
Vladimir Tomberg, Mart Laanpere, David Lamas, Kai Pata, and Dragan Gašević

Enriching Children’s Experiences During and After a Museum Visit .................................................................................................................. 288
Andreas Lingnau, Betsy van Dijk, Hub Kockelkorn, Jeldrik Schmuch, and Ian Ruthven

Enriching Ontologies from Folksonomies for eLearning: DBpedia Case .......................................................... 293
Sana Hamdi, Alda Lopes Gancarski, Amel Bouzeghoub, and Sadok Ben Yahia

Evaluating the Role of Collaboration Scripts as Group Guiding Tools in Activities of Educational Robotics: Conclusions from Three Case Studies .................................................................................................................. 298
Soumela Atmatzidou and Stavros N. Demetriadis

Evaluating Usability and Efficaciousness of an E-learning System: A Quantitative, Model-Driven Approach .......................................................................................... 303
Yin-Leng Theng and Joanna Sin

Evaluation of Student Perceptions and Interests Using Spoken Tutorials in Online Courses .......................................................... 308
Kiran L.N. Eranki and Kannan M. Moudgalya

Expertise Network Discovery via Topic and Link Analysis in Online Communities .......................................................... 311
Yanyan Li, Shaoqian Ma, Yonghe Zhang, and Ronghuai Huang

Exploring Children Preferences regarding Tangible and Graphical Tools for Introductory Programming: Evaluating the PROTEAS Kit .................................................................................................................. 316
Theodosios Sapounidis and Stavros N. Demetriadis

Exploring the Impact of a Conversational Agent When Triggering Students’ Discourse in Online Collaboration .................................................................................................................. 321
Stergios Tegos, Stavros N. Demetriadis, and Anastasios Karakostas
Extreme Apprenticeship Goes Blended: An Experience

Gabriella Dodero and Francesco Di Cerbo

Facebook for CSCL, Latin-American Experience for Professors

Rocael Hernández, Hector R. Amado-Salvatierra, Christian Guetl, and Mohammad Smadi

Face-to-Face vs. Computer-Mediated: Analysis of Collaborative Programming Activities and Outcomes

Delfina Malandrino, Ilaria Manno, Giuseppina Palmieri, and Vittorio Scarano

Feedback in the Motor Skill Domain

Yulita Hanum P. Iskandar, Lester Gilbert, and Gary B. Wills

Fermat: Merging Affective Tutoring Systems with Learning Social Networks

Ramón Zatarain Cabada, María Lucía Barrón Estrada, J.A. Beltrán V., F.L. Cibrian R., Carlos Alberto Reyes García, and Yasmin Hernández Pérez

Fostering Students’ Creativity through Video Game Development

Ximena López and Carlo Fabricatore

Framework for Intervention and Assistance in University Students with Dyslexia

Carolina Mejía Corredor and Ramon Fabregat Gesa

Harnessing Collective Intelligence in Personal Learning Environments

Mohamed Amine Chatti, Ulrik Schroeder, Hendrik Thüs, and Simona Dakova

Helping Novice Programmers to Bootstrap in the Cloud: Incorporating Support for Computational Thinking into the Game Design Process

Navid Ahmadi, Mehdi Jazayeri, and Monica Landoni

High-Interactive Gaming Learning: Bring Different Learning Benefits to Team Players and Individual Players

Chi-Wen Huang, Cheng-Yu Fan, Yu-Ling Chi, Chia-Jung Wu, and Gwo-Dong Chen

High-Level Model for Educational Collaborative Virtual Environments Development

Rosa Reis, Paula Escudeiro, and Benjamin Fonseca

How Cognitive Styles Affect the E-learning Process

Valeria de Palo, Maria Sinatra, Giancarlo Tanucci, Lucia Monacis, Pierpaolo Di Bitonto, Teresa Roselli, and Veronica Rossano

How to Implement a Technology Supported Free-Selection Peer Review Protocol: Design Implications from Two Studies on Computer Network Education

Pantelis M. Papadopoulos, Thomas D. Lagkas, and Stavros N. Demetriadis

Identification of LMSs Instructional Languages: An Analysis Process

Aymen Abedmouleh, Lahcen Oubahssi, Pierre Laforcade, and Christophe Choquet

Instinctive Game Environment: Exploring the Application of Natural Interfaces for Supporting Game-Based Learning

Carlos González, David Díez, Paloma Díaz, and Ignacio Aedo

Instructor Support for Monitoring and Visualizing Students’ Activity in a Social Learning Environment

Elvira Popescu and Dan Cioiu
Integrated Environment for Scenario Development, Exercise Implements and Evaluation for Role-Play Training ................................................................. 374
   Hiroshi Maruyama, Shuhei Harada, Akio Takashima, and Taichi Nakamura

Integrating Cognitive Tasks in Game Activities.......................................................................................................................... 376
   Dennis Maciuszek and Alke Martens

Integrating Navigational and Structural Information in SCORM Content Aggregation Modeling .......... 379
   Antonio Maratea, Alfredo Petrosino, and Mario Manzo

Integrating Web Services with Gadgets to Support an i-Google PLE .................................................. 381
   Martin Llamas-Nistal, Manuel Caiero-Rodriguez, Juan González-Tato, and Javier Álvarez-Osuna

Interactions for Learning as Expressed in an IMS LD Runtime Environment................................. 383
   Michael Derntl, Susanne Neumann, and Petra Oberhuemer

Is It Adequate to Model the Socio-cultural Dimension of E-learners by Informing a Fixed Set of Personal Criteria? ........................................... 388
   Emmanuel G. Blanchard

Learner Ontology for the Active Semantic Learning System........................................................................ 393
   Ioan Szilagyi and Ioan Roxin

Learning about Art History by Exploratory Search, Contextual View and Social Tags........................ 395
   Max Arends, Martin Weingartner, Josef Froshauer, Doron Goldfarb, and Dieter Merkl

Learning Task-Related Strategies from User Data through Clustering .................................................... 400
   Mihaela Cocea and George D. Magoulas

Literature Driven Method for Modeling Frustration in an ITS................................................................. 405
   Ramkumar Rajendran, Sridhar Iyer, and Sahana Murthy

Logical and Physical Sensors-Based Online Assessment Security Support........................................ 410
   Juliana Augusto Stocco, Joice Lee Otsuka, Delano Medeiros Beder, Gislaine Cristina Micheloti, and Regina Borges de Araújo

LPCEL Editor: A Web-Based Visual Authoring Tool for Learning Design .............................................. 413
   Jorge Torres, Jesús Reséndiz, Juan Manuel Dodero, and Ignacio Aedo

Math Is Not Only for Science Geeks: Design and Assessment of a Storytelling Serious Video Game ... 418
   Michail Giannakos, Konstantinos Chorianopoulos, and Letizia Jaccheri

Message-Based Motivation Modeling ....................................................................................................... 420
   Neil Rubens, Toshio Okamoto, and Dain Kaplan

Modeling Critical Factors of Quality in E-learning: A Structural Equations Model Test ....................... 422
   Rosário Cação and Carlos Lucas de Freitas

Multimedia Educational Pills (MEPs) for Corporate Training: Methodology and Cases...................... 427
   Paolo Giordani, Elisa Cipriani, Sara Fabiano, Chiara Moroni, Silvia Ravazzani, Maria Rosaria Di Renzo, and Sara Mormino

Multiplayer 3D Game in Supporting Team-Building Activities in a Work Organization....................... 430
   Päivi Häkkinen, Johanna Bluemink, Merja Juntunen, and Ilona Laakkonen

</table>
Sharing Experiences between Learners with Different Profiles: Adaptation of Interaction Traces .......... 488
Karim Sehaba

Sharing Laboratories across Different Remote Laboratory Systems ....................................................... 493
Pablo Orduña, Javier García-Zubia, Diego López-de-Ipiña, Philip H. Bailey, James L. Hardison, Kimberly DeLong, and V. Judson Harward

Software Engineering Aids to Accelerate Educational Technologies ....................................................... 495
Sridhar Chimalakonda and Kesav V. Nori

Stop Word in Readability Assessment of Thai Text .................................................................................. 497
Patcharanut Daowadung and Yaw-Huei Chen

Students’ and Instructors’ Perceptions on Use of Information and Communication Technologies during Instruction in a Kyrgyzstan University .......................................................... 500
Gulshat Muhametjanova and Kürsat Çağiltay

Supervising Knowledge Sharing in the Classroom: Supporting Teachers’ Individual Diagnosis and Instruction in a Peer Education Scenario ................................................................................ 503
Kristina Richter, Regina Bruder, Johannes Konert, Stefan Göbel, and Ralf Steinmetz

Supporting Adaptive Learning Sequences with Agent Negotiation .......................................................... 506
K. Robert Lai, Chih-Yueh Chou, and Chung Hsien Lan

Supporting Engineering Students Learning Wireless Network Planning Using Mobile, Positioning and Web Technologies .......................................................... 509
Nelson Baloian, Gustavo Zurita, Jonathan Frez, and Marcelo Milrad

Supporting Teachers to Enhance Teachers’ and Students’ Performance: Implementation of an Indicator-Based Approach and Experimentations with HOP3X .......................................................... 515
Aina Lekira, Christophe Després, Pierre Jacoboni, and Dominique Py

Supporting Teachers to Retrieve and Select Learning Objects for Personalized Courses in the Moodle_LS Environment ................................................................................ 518
Carla Limongelli, Alfonso Miola, Filippo Sciarrone, and Marco Temperini

Synote: Important Enhancements to Learning with Recorded Lectures .................................................. 521
Mike Wald and Yunjia Li

SWift - A SignWriting Editor to Bridge between Deaf World and E-learning ............................................ 526
Claudia Savina Bianchini, Fabrizio Borgia, and Maria De Marsico

Technological Factors, User Characteristics and Didactic Strategies in Educational Virtual Environments ................................................................................ 531
Antonis Natsis, Ioannis Vrellis, Nikiforos M. Papachristos, and Tassos A. Mikropoulos

Technology Enhanced Informal Science Learning and Engagements: A Typology of Activity .......................................................... 536
Eileen Scanlon

The Design of English Article Recommender Mechanism for Senior High School Students .................. 541
Chen-Chung Chi and Chin-Hwa Kuo
The Effect of Utilizing the Learning Skill of Highlighting and Constructing a Map in a Networked Hyperlink Condition on Learning Performance

The Effects of Cognitive-Affective Interaction Strategy on Novices’ Creative Performance in Game Design Project
Li-Chun Wang and Ming-Puu Chen

The Effects of Integrating Information Literacy into Science Instruction on Seventh-Grade Students’ Problem-Solving and Academic Achievement
Lin Ching Chen and Wen-I Ma

The Effects of Using Embodied Interactions to Improve Learning Performance
Wan-Ju Lee, Chi-Wen Huang, Chia-Jung Wu, Shing-Tsaan Huang, and Gwo-Dong Chen

Pantelis M. Papadopoulos and Stavros N. Demetriadis

The Impact of Social Performance Visualization on Students
Mohammad Hassan Falakmasir, I-Han Hsiao, Luca Mazzola, Nancy Grant, and Peter Brusilovsky

The Impact of the Reality Television Camera on Undergraduate Engineering Students: A Qualitative Case Study
N. Clarke, W.A. Clarke, and A.L. Nel

The Learners’ User Classes in the TERENCE Adaptive Learning System
T. Di Mascio, P. Vittorini, R. Gennari, A. Melonio, F. De La Prieta, and M. Alrifai

The Need for Technological Innovations for Indigenous Knowledge Transfer in Culturally Inclusive Education
John Loewen and Kinshuk

The Physicality of Technological Devices in Education: Building a Digital Experience for Learning
Sharon Lynn Chu Yew Yee, Francis Quek, Alex Endert, Haeyong Chung, and Blake Sawyer

The Role of Fading and Peer-Monitoring in Systems for Online Argumentation: Results from Two Studies
Yannis N. Bouyias and Stavros N. Demetriadis

The Study of Self-Assessment with Prompts, Learning Journal and Referencing through Sharing for Regulation of Cognition and Their Effect on Web-Based Programming Learning
Rustam Shadiev, Wu-Yuin Hwang, Jung-Lung Hsu, Chia-Ling Chang, and Ray Yueh-Min Huang

Toward a Complete E-learning System Framework for Semantic Analysis, Concept Clustering and Learning Path Optimization
Vincent Tam, Edmund Y. Lam, and S.T. Fung

Towards a High-Level Integration of Interactive Tools with E-assessments
Christian Saul and Heinz-Dietrich Wuttke
Evaluating the Learning Effect of Adaptive Digital Educational Games with Eye-Tracking .......................... 656
Effie Lai-Chong Law

Visualization of Wiki-Based Collaboration through Two-Mode Network Patterns .............................. 658
Felix Môdritscher and Wolfgang Taferner

Visualizing Learner Activities with a Virtual Learning Environment:
Experiences from an In Situ Test with Primary School Children .......................................................... 660
Søren Eskildsen, Kasper Rodil, and Matthias Rehm

DULP & SPEL @ ICALT 2012: Exploring the Future of Technology Enhanced Learning

Beyond the “Orff Schulwerk”, Toward a New Approach to the Technology Enhanced Musical Education.............................................................. 662
Luca De Ioris, Fabrizia Moggio, and Carlo Giovannella

“Museal Fields” as Embedded Learning Places .................................................................................... 664
Andrea Iosue, Fabrizia Moggio, and Carlo Giovannella

Personalisation of Programming Tutoring System Using Tag-Based Recommender Systems................. 666
Aleksandra Klaśnja-Milicevic, Boban Vesin, Mirjana Ivanovic, and Zoran Budimac

Personalized, Adaptive and Intelligent Support for Online Assignments Based on Proactive Computing .................................................................................................................. 668
Sergio Marques Dias, Sandro Reis, and Denis Zampunieris

Personalized Mobile Learning via an Adaptive Engine ............................................................................. 670
Richard A.W. Tortorella and Sabine Graf

Pervasive Learning Activities for the LMS .LRN through Android Mobile Devices with NFC Support ..... 672
Gustavo Ramirez-Gonzalez, Catalina Cordoba-Paladinez, Omar Sotelo-Torres, Camilo Palacios, Mario Munoz-Organero, and Carlos Delgado-Kloos

Proactive Computing Based Implementation of Personalized and Adaptive Technology Enhanced Learning over Moodle(TM) .............................................................................................................................. 674
Sergio Marques Dias, Sandro Reis, and Denis Zampunieris

Semantic Integration of Social Information in Learning Systems ........................................................................... 676
Juan C. Vidal, Manuel Lama, Miguel Rosales Sueiro, and Alberto Bugarin

Supporting Assessment of Open Answers in a Didactic Setting .................................................................... 678
Andrea Sterbini and Marco Temperini
Game Based Learning for the 21st Century: Challenges and Opportunities

A Domain Model for Smart 21st Century Skills Training in Game-Based Virtual Worlds ............................................. 680
Michael D. Kickmeier-Rust and Dietrich Albert

Co-designing Social Games with Children to Support Non Formal Learning ................................................................. 682
Paloma Díaz, Pedro Paredes, Diego Alvarado, and Elisa Giaccardi

Developing a Meta-Model for Serious Games in Higher Education .................................................................................. 684
C. Shaun Longstreet and Kendra M.L. Cooper

Embodied Conversational Human-Machine Interface with Wearable Body Sensors for Improving Geography Teaching ................................................................................................................................. 686
Y. Ling, Francesco Bellotti, Riccardo Berta, and Alessandro De Gloria

Exploiting Real-Time EEG Analysis for Assessing Flow in Games .................................................................................. 688
A. Plotnikov, N. Stakheika, Alessandro De Gloria, C. Schatten, Francesco Bellotti, Riccardo Berta, C. Fiorini, and F. Ansovini

Reasoning on Reasoning through Serious Games ........................................................................................................... 690
Rosa Maria Bottino, Michela Ott, and M. Tavella

User Modelling and Adaptive, Natural Interaction for Conflict Resolution ....................................................................... 692
Kostas Karpouzis, George Yannakakis, Ana Paiva, Jeppe Herlev Nielsen, Asimina Vasilou, and Arnav Jhala

Using a Pleasure Framework to Critique Tangible Learning Games .................................................................................. 694
Imran A. Zualkernan

Enabling Successful Self-Regulation in Open Learning Environments

A Survey into the Teacher’s Perception of Self-Regulated Learning ............................................................................ 696
Alexander Mikroyannidis, Teresa Connolly, and Effie Lai-Chong Law

Exploring the Personal and Self-Directed Use of Weblogs ............................................................................................. 698
Terje Väljataga and Sebastian H.D. Fiedler

How to Augment Simulated Environments by Services Supporting Self-Regulated Learning?
A Baseline Study ................................................................................................................................................................. 700
Marcel Berthold, Christina M. Steiner, and Dietrich Albert

Introducing Learning Performance in Personal Learning Environments ........................................................................ 702
Laurent Moccozet

Recommending Learning Activities as Strategy for Enabling Self-Regulated Learning ................................................ 704
Pablo Lachmann and Andreas Kiefel

Self-Regulated Learning in a Mobile Health Initiative for Diabetic Patients ........................................................................ 706
Salya Sultan and Permanand Mohan
SRL Tasks and Activities as a Model of Cognitive Behaviour within ETTHOS ........................................ 708
Adam Moore, Owen Conlan, and Victoria Macarthur

Supporting Self-Regulation by Personal Learning Environments ............................................................. 710
Milos Kravcik and Ralf Klamma

Remote and Virtual Laboratories in Science, Technology, Engineering and Mathematics (STEM) Education

Designing Virtual Experiments in the Context of Marine Sciences .............................................................. 712
Martina Weicht, Dennis Maciuszek, and Alke Martens

State of Art, Initiatives and New Challenges for Virtual and Remote Labs ...................................................... 714

Using Problem Posing, Problem Solving for Game-Based Learning in Remote Labs ................................ 716
Imran A. Zualkernan, Ghaleb G. Al Husaini, Kevin F. Loughlin, Jamshaid G. Mohebzada, and Moataz El Gaml

Virtual VLSI Laboratory for Computer Science Students: Erudite and Illusive ....................................... 718
Shubhajit Roy Chowdhury and Sandhya Kode

Doctoral Consortium

Adaptive Competence-Based System in an E-learning Platform:
Adapting Support Tasks to Students ............................................................................................................... 720
Juan Manuel Vaca, J. Enrique Agudo, and Mercedes Rico

Classroom 3.0: The Real World Meets the Virtuality through Ambient Sensing in Education ..................... 722
Roberto Vergallo

Metrics Development for Measuring Virtual University Social Responsibility .............................................. 724
Azam Esfijani and Elizabeth Chang

Modelling Global Pattern Formations for Collaborative Learning Environments ....................................... 726
Corrado Grappiolo, Yun-Gyung Cheong, Rilla Khaled, and Georgios N. Yannakakis

School of the Future: Using Augmented Reality for Contextual Information and Navigation in Academic Buildings ................................................................. 728
Silviu Vert and Radu Vasiu

Stimulating the Development of a Disposition through Games-Based Learning ........................................ 730
Sylke Vandercruysse, Jan Elen, and Geraldine Clarebout

Towards a Synthesis of Learning Methodologies, Learning Technologies and Software Product Lines ......................................................... 732
Sridhar Chimalakonda and Kesav V. Nori

Using Social Networking and Virtual Reality to Harness Creativity in Students in E-learning Situations ......................................................... 734
Diana Ragbir and Permanand Mohan
Utilizing Social Media for Goal Setting Based on Observational Learning ................................................................. 736
  Sébastien Louvigné, Neil Rubens, Fumihiko Anma, and Toshio Okamoto

Visualisation and Analysis of Multiuser Gaze Data: Eye Tracking Usability Studies in the Special Context of E-learning .................................................................................................................... 738
  Gergely Rakoczi and Margit Pohl

European Projects Track

Games and Learning Alliance (GaLA) Supporting Education and Training through Hi-Tech Gaming..... 740
  Francesco Bellotti, Riccardo Berta, and Alessandro De Gloria

Global Trends and Forecasts for TEL - Some Results from the TEL-Map Project................................. 742
  Tore Hoel

MAGICAL: Collaborative Game Building as a Means to Foster Reasoning Abilities and Creativity .... 744
  Rosa Maria Bottino, Jeff Earp, and Michela Ott

Social Network Analysis of European Project Consortia to Reveal Impact of Technology-Enhanced Learning Projects ................................................................................................................................. 746
  Michael Derntl and Ralf Klamma

Panel

The Open Educational Resources (OER) Movement: Free Learning for All Students ......................... 748
  Rory McGreal, Demetrios G. Sampson, Nian-Shing Chen, Kinshuk, Mangala S. Krishnan, and Ronghuai Huang

Tutorial

Accessibility and Usability of Educational Gaming Environments for Disabled Students .................. 752
  Marion Hersh and Barbara Leporini

A Software Engineering Perspective for Accelerating Educational Technologies ................................. 754
  Sridhar Chimalakonda and Kesav V. Nori

Stand Alone Application and On-Line Open-Service to Measure Emotions Conveyed by Different Media Channels .......................................................................................................................... 756
  Simone Carcone and Carlo Giovannella
