2012 Proceedings of the Tenth Workshop on Intelligent Solutions in Embedded Systems

(WISES 2012)

Klagenfurt, Carinthia, Austria
5 – 6 July 2012
# Contents

**Welcome from the Chairman**  
ii

**Organization**  
iii

## Keynote

In-network Adaptation of Scalable Video (H.264/SVC) Content  
Hermann Hellwagner  
2

## Oral Session 1

A New Driving System towards Energy Efficient and Safe Driving Behaviour  
Emre Yay and Natividad Martínez Madrid  
3

Computational Cost Estimation of a RTL JPEG Architecture with Powersim  
Cristiano Scavongelli, Marco Giammarini, Massimo Conti and Simone Orcioni  
9

Rapid Prototyping of Image Processing Workflows on Massively Parallel Architectures  
Bo Li, János Sallai, Péter Völgyesi and Akos Ledeczi  
15

Toward the design of a low cost reconfigurable real time Augmented reality system  
Fatma Abbes, Sonda Chtourou and Emna Baklouti  
21

## Oral Session 2

Fail-Safe Over-The-Air Programming and Error Recovery in Wireless Networks  
Stefan Unterschütz and Volker Turau  
27

Android Based Body Area Network for the Evaluation of Medical Parameters  
Matthias Wagner, Benjamin Kuch, Carlos Cabrera, Peter Enoksson and Arne Sieber  
33

Using Ethernet over Powerline Communication in Automotive Networks  
Marius Strobl, Thomas Waas, Stefan Moehne, Markus Kucera, Andreas Rath, Norbert Balbierer and Angelika Schingale  
39

## Oral Session 3

A Wireless Sensor Network Protocol for the OMG Data Distribution Service  
Kai Beckmann and Marcus Thoss  
45

Using a Leaky Bucket Counter as an Advanced Threshold Mechanism for Event Detection in Wireless Sensor Networks  
Karima Hein, Leander Hörmann and Reinhold Weiß  
51
Oral Session 4

EqMutDetect - A Tool for Equivalent Mutant Detection in Embedded Systems
Simona Nica and Franz Wotawa

Optimizing Software Integration by Considering Integration Test Complexity and Test Effort
Michael Steindl and Juergen Mottok

Efficient test methods for the system test of highly networked safety systems
Kathrin Sattler, Andreas Raith and Thomas Brandmeier

Design Guidelines for Smart Appliances
Wilfried Elmenreich and Dominik Egarter

PhD Forum

Towards the Light - Comparing Evolved Neural Network Controllers and Finite State Machine Controllers
Ágnes Pintér-Bartha, Anita Sobe and Wilfried Elmenreich

Evaluation of MANET Routing Protocols in a Realistic Emergency Response Scenario
Christian Raffelsberger and Hermann Hellwagner

Imprint
