Spring Flight Simulation Conference 2009

Flight Simulation: Towards the Edge of the Envelope

London, United Kingdom
3-4 June 2009

ISBN: 978-1-62276-280-4
# TABLE OF CONTENTS

## KEYNOTE ADDRESS

**Simulation and Training for the Final Frontier**

David Mackay

---

## SESSION 1: AVIATION SAFETY – MIND YOUR ATTITUDE

**Upset Recovery & Pilot Training: The Quest For Safety**

Jim Priest

---

**Upset Recovery Training: A Call for a Higher Standard of Training**

Bryan Burks

---

**Using Accident Data To Show Limitations of Simulation In Upset Recovery Training**

John Cox

---

**Upset Recovery Training: Lessons from Accidents and Incidents**

Dennis Crider

---

**Simulator Upset Recovery Training**

David Carbaugh, Robert Curnutt, William Roberson, David Shikany

---

## SESSION 2: RESEARCH AND DEVELOPMENT – THE NEEDS AND CHALLENGES AHEAD

**The Use of Pilot Models to Support Flight Simulation: The Sky is the Envelope**

Ruud Hosman

---

**Enhancing Pilot Performance to Mitigate Aircraft Upsets**

Angus Rupert

---

**A Multi Group Experiment to Evaluate Simulator Based Upset Recovery Training Transfer**

Rodney Rogers

---

**Aerodynamics Modeling for Training on the Edge**

David Gingras, John Ralston

---

## SESSION 3: PILOT TRAINING FOR EXTREME MANOEUVRES AND UNUSUAL ENCOUNTERS

**Training Ab Initio Pilots for High Angle of Attack Flight: An Application of Flight Training Devices**

Nickolas Macchiarella, Tim Brady, Megan Szymanski

---

**Wake Vortex Encounters in a Flight Simulator**

D. Allerton, G. Spence

---

**Avoidance of Spatial Disorientation Through Training in Flight Simulators**

Tracy Grimshaw, Rollin Stott

---

## SESSION 4: ADVANCED FLIGHT TRAINING AT THE EDGE OF THE ENVELOPE

**Advanced Flight Training in the Swedish Dynamic Flight Simulator**

Britta Levin

---

**Visualisation of the Brownout Phenomenon, Integration and Test on a Helicopter Flight Simulator**

Torsten Gerlach

---

**Lessons Learned from the AIRBUS Wake Vortex Flight Test Campaign Some Resulting Operational Recommendations**

Matthieu Rouzeval

---

**Peculiarities of Simulation and Coincidence with Real Flight: Stall, Spin & Supermaneuverability**

Valery Sukhanov, Vladimir Shibaev

---

**Unusual Attitude Training**

Paul Ranshury
SESSION 5: INNOVATIVE SOLUTIONS – EXTREME ENGINEERING FOR TRAINING NEEDS

Close-to-Reality Motion in Flight Simulation: Cost Effective ab initio Hover Training ............................................. 409
  Rolf Huhne, Carsten Braun-Seith, Douglas Vine, Richard Schlüsselberger, Wolfgang Kallus

Upset Recovery & Spatial Disorientation Training ............................................................. 431
  Keith George

Outline of Research Project “SUPRA” on the Simulation of Upset Recovery ........................................... 453
  E. Groen, M. Wentink, M. Mayrhofer, H. Smaïli, B. Soemarwoto, M. Goman, H. Bülthoff, M. Grigorev

The NASA Ames Vertical Motion Simulator – A Facility Engineered for Realism ............................................. 473
  Bimal Aponso, Steven Beard, Jeffery Schroeder

Immersion: What Does it Mean? ............................................................................................................................... 496
  Roger Flynn
