2012 IEEE 13th International Workshop on Signal Processing Advances in Wireless Communications

(SPAWC 2012)

Cesme, Turkey
17 – 20 June 2012
Program

S1: Robust Optimization

Efficient Computation of the Pareto Boundary for the Two-User Single-Stream MIMO Interference Channel
Pan Cao (Dresden University of Technology, Germany); Shuying Shi (TU Dresden, Germany); Eduard Jorswieck (Dresden University of Technology, Germany)
pp. 1-5

Does Non-Orthogonal Spectrum Sharing in the same Cell Improve the Sum-Rate of Wireless Operators?
Johannes Lindblom (Linköping University, Sweden); Erik G. Larsson (Linköping University, Sweden)
pp. 6-10

Feedback-Efficient Agile Scheduling-Beamforming for Network MIMO OFDMA Systems With Realistic Channel Models
Behrouz Khoshnevis (University of Toronto, Canada); Wei Yu (University of Toronto, Canada); Yves Lostanlen (SIRADEL & University of Toronto, Canada)
pp. 11-15

Multi-cell Coordination: A Stochastic Geometry Approach
Salam Akoum (The University of Texas at Austin, USA); Robert Heath (The University of Texas at Austin, USA)
pp. 16-20

Robust Detection and Optimization With Decentralized Parallel Sensor Networks
Gökhan Gül (Darmstadt University of Technology, Germany); Abdelhak M Zoubir (Darmstadt University of Technology, Germany)
pp. 21-24

Mapping optimization for the MAP turbo-detector with channel estimation
Sihem Chaabouni (High School of Communication in Tunis, Tunisia); Noura Sellami (Ecole Nationale d'Ingénieurs de Sfax, Tunisia); Mohamed Siala (Sup'Com, Tunisia)
pp. 25-29

Rate Prediction and Receding Horizon Power Minimization in Block-Fading Broadcast Channels
Christoph Hellings (Technische Universität München, Germany); Paskal Kiefer (Technische Universität München, Germany); Wolfgang Utschick (Technische Universität München, Germany)
pp. 30-34

Supermodular game for energy efficient TOA-based positioning
Ana Moragrega (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain); Pau Closas (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain); Christian Ibars (Centre Tecnologic de Telecomunicacions de Catalunya - CTTC, Spain)
pp. 35-39
A Chernoff Convexification for Chance Constrained MIMO Training Sequence Design
Dimitrios Katselis (KTH Royal Institute of Technology, Sweden); Cristian Rojas (Royal Institute of Technology (KTH), Sweden); Håkan Hjalmarsson (KTH-Royal Institute of Technology, Sweden); Mats Bengtsson (KTH Royal Institute of Technology, Sweden) pp. 40-44

Narrow Band Interference Cancelation In OFDM: A Structured Maximum Likelihood Approach
Muhammad S. Sohail (King Fahd University of Petroleum & Minerals, Saudi Arabia); Tareq Al-Naffouri (King Fahd University of Petroleum and Minerals & King Abdullah University of Science and Technology, Saudi Arabia); Samir Al-Ghadhban (KFUPM, Saudi Arabia) pp. 45-49

Flexible codebook design for limited feedback downlink systems via smooth optimization on the Grassmannian manifold
Ahmed Medra (McMaster University, Canada); Timothy N. Davidson (McMaster University, Canada) pp. 50-54

Joint Power and Bandwidth Allocation for Multiuser Amplify and Forward Cooperative Communications Using Particle Swarm Optimization
Hanan Al-Tous (United Arab Emirates University, UAE); Imad Barhumi (United Arab Emirates University, UAE) pp. 55-59

Optimization with EXIT functions of GLDPC-Staircase codes for the BEC
Ferdaouss Mattoussi (INRIA, France); Valentin Savin (CEA LETI, France); Vincent Roca (INRIA Rhône-Alpes, France); Bessem Sayadi (Alcatel-Lucent Bell-Labs, France) pp. 60-64

S2: MIMO, Multicell & Multiuser Communications

Backhaul-Constrained Multi-Cell Cooperation Using Compressive Sensing and Spectral Clustering
Seung-Jun Kim (University of Minnesota, USA); Swayambhoo Jain (University of Minnesota, USA); Georgios B. Giannakis (University of Minnesota, USA) pp. 65-69

Multicast Beamforming with Antenna Selection
Omar Mehanna (University of Minnesota, USA); Nikolaos D Sidiropoulos (University of Minnesota, USA); Georgios B. Giannakis (University of Minnesota, USA) pp. 70-74

Stochastic signal design on the downlink of a multiuser communications system
Mehmet Tutay (Bilkent University, Turkey); Sinan Gezici (Bilkent University, Turkey); Orhan Arikan (Bilkent University, Turkey) pp. 75-79
Equilibrium Selection in MIMO Communication Games
Gesualdo Scutari (State University of New York at Buffalo, USA); Francisco Facchinei (University of Rome, "La Sapienza", Italy); Jong-Shi Pang (University of Illinois at Urbana-Champaign, USA)
pp. 80-84

Error Exponents for Nakagami-m Fading MIMO Channels
Jiang Xue (Queen's University, Belfast & ECIT, United Kingdom); Md. Zahurul Sarkar (Queen's University Belfast, United Kingdom); Tharmalingam Ratnarajah (Queen's University of Belfast, United Kingdom)
pp. 85-89

Interference Mitigation Enhancement of Switched-Based Scheme in Over-Loaded Femtocells
Fakhreddine Gaaloul (King Abdullah University of Science and Technology, Saudi Arabia); Redha M Radaydeh (KAUST, TAMUQ, Qatar); Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia)
pp. 90-94

Subspace Beamforming via Block SVD for MIMO Systems
Seyed Morteza Razavi (Queen's University Belfast, United Kingdom); Tharmalingam Ratnarajah (Queens University of Belfast, United Kingdom)
pp. 95-99

The Capacity Optimality of Beam Steering in Large Millimeter Wave MIMO Systems
Omar El Ayach (The University of Texas at Austin, USA); Robert Heath (The University of Texas at Austin, USA); Shadi Abu-Surra (Samsung Telecommunications America, USA); Sridhar Rajagopal (Samsung Telecommunications America, USA); Zhouyue Pi (Samsung Telecommunications America, USA)
pp. 100-104

Beam Coordination via Diffusion Adaptation over Array Networks
Xiaochuan Zhao (University of California, Los Angeles, USA); Jianshu Chen (University of California, Los Angeles, USA); Ali H. Sayed (University of California, Los Angeles, USA)
pp. 105-109

Dimension-Ordered MIMO List Sphere Decoding
Mostafa Medra (Alexandria University, Egypt); Mostafa El-Khamy (Alexandria University, Faculty of Engineering & Egypt-Japan University of Science and Technology, Egypt); Hassan M. ElKamchouchi (, Egypt)
pp. 110-114

Performance Improvement with Limited Feedback in PLNC Using OSTBC
Selami Şahin (TUBITAK-BILGEM-UEKAE, Turkey); Umit Aygölü (Istanbul Technical University, Turkey)
pp. 115-119

Power Signaling Based Cooperative Precoding for the MISO Interference Channel
Samer Bazzi (DoCoMo Communications Laboratories Europe GmbH, Germany); Guido K E Dietl (University of Applied Sciences Landshut & DOCOMO Euro-Labs, Germany); Wolfgang Utschick (Technische Universität München, Germany)
pp. 120-123
S3: Cognitive Radio

**Channel Sensing and Estimation in Cognitive Relay Networks**  
Gozde Ozcan (Syracuse University, USA); M. Cenk Gursoy (Syracuse University, USA)  
pp. 124-128

**Effects of Mobility on Uplink Interference for Short-Range Cognitive Radio Networks**  
Ali Riza Ekti (Texas A&M University, USA); Serhan Yarkan (Istanbul Commerce University, Turkey); Khalid A. Qaraqe (Texas A&M University at Qatar, USA); Erchin Serpedin (Texas A&M University, USA)  
pp. 129-133

**Interference Map Generation Based on Delaunay Triangulation in Cognitive Radio Networks**  
Suzan Üreten (University of Ottawa, Canada); Abbas Yongaçoğlu (University of Ottawa, Canada); Emil M. Petriu (University of Ottawa, Canada)  
pp. 134-138

**Spectrum Sensing and Spectrum Utilization Model For OFDM and FBMC Based Cognitive Radios**  
Sudharsan Srinivasan (Tampere University of Technology, Finland); Sener Dikmese (Tampere University of Technology, Finland); Markku K. Renfors (Tampere University of Technology, Finland)  
pp. 139-143

**System Throughput Versus SINR Constraint In Cognitive Radio Networks**  
Hakan Murat Karaca (Dokuz Eylul University, Turkey); Zafer Dicle (Dokuz Eylul University, Turkey); Tolga Kurt (PlusOneMinusOne, Turkey); Emin Anarim (Bogazici University, Turkey)  
pp. 144-148

**Joint admission control and resource allocation in cognitive code-division networks**  
Kanke Gao (State University of New York at Buffalo, USA); Onur Ozdemir (Andro Computational Solutions, USA); Dimitris A. Pados (State University of New York at Buffalo, USA); Stella N. Batalama (State University of New York at Buffalo, USA); Tommaso Melodia (State University of New York at Buffalo, USA); Andrew L. Drozd (ANDRO Computational Solutions, USA)  
pp. 149-153

**Interference-Free Spectrum Sharing using a Sequential Decoder at the Primary User**  
Behrooz Makki (Chalmers University of Technology, Sweden); Thomas Eriksson (Chalmers University of Technology, Sweden)  
pp. 154-158

Anton Blad (Linköping university, Sweden); Erik Axell (Linkoping University, Sweden); Erik G. Larsson (Linköping University, Sweden)  
pp. 159-163
Analysis of Optimal Weighted Cooperative Spectrum Sensing based on estimation of Primary User signal power
Kenta Umebayashi (Tokyo University of Agriculture and Technology, Japan); Yasuo Suzuki (Tokyo University of Agriculture and Technology, Japan)
pp. 164-168

Non-Cooperative State Tracking of a Cognitive Radio Network with Multiple Primary Users via Multiple Hypothesis Testing
Moustafa Seifeldin (The University of Texas at Austin, USA); Ahmed Tewfik (University of Texas, Austin, USA)
pp. 169-173

Opportunistic Interference Cancelation and User Selection in Cognitive Multiple Access Network
Behrouz Maham (University of Tehran, Iran); Petar Popovski (Aalborg University, Denmark); Xiangyun Zhou (The Australian National University, Australia)
pp. 174-178

S4: Resource Allocation

Resource Allocation for OFDMA Systems with Multi-Cell Joint Transmission
Jingya Li (Chalmers University of Technology, Sweden); Chen Xin (Beijing University of Posts and Telecommunications, P.R. China); Carmen Botella (University of Valencia, Spain); Tommy Svensson (Chalmers University of Technology, Sweden); Thomas Eriksson (Chalmers University of Technology, Sweden)
pp. 179-183

A Heavy Traffic Approach for Queue-Aware Power Control in Interfering Wireless Links
Apostolos Destounis (Alcatel-Lucent Bell Labs France, France); Mohamad Assaad (Supelec, France); Mérouane Debbah (Supelec, France); Bessem Sayadi (Alcatel-Lucent Bell-Labs, France); Afef Feki (Bell Labs - Alcatel Lucent - France, France)
pp. 184-188

A Suboptimal Power Allocation Algorithm for FBMC/OQAM
Màrius Caus (Universitat Politecnica de Catalunya (UPC), Spain); Ana Perez-Neira (UPC, Spain)
pp. 189-193

Optimal Power Control between Two Opportunistic Cooperative Base Stations
Naveed Ul Hassan (Department of Electrical Engineering, LUMS School of Science and Engineering, Lahore, Pakistan); Chau Yuen (Singapore University of Technology and Design, Singapore); Zhaoyang Zhang (Zhejiang University, P.R. China)
pp. 194-198

Distributed Stochastic Learning for Continuous Power Control in Wireless Networks
Ahmed Farhan Hanif (Institut Mines-Telecom, Telecom SudParis, France); Hamidou Tembine (Supelec, France); Mohamad Assaad (Supelec, France); Djamal Zeghlache (Institut Mines-Telecom, Telecom SudParis & UMR 5157 CNRS - Samovar, France)
pp. 199-203
**Overlay Spectrum Reuse in a Multicarrier Broadcast Network: Coverage Analysis**
Alberto Rico-Alvariño (University of Vigo, Spain); Carlos Mosquera (Universidad de Vigo, Spain); Fernando Pérez-González (University of Vigo, Spain)
pp. 204-208

**Overlay Spectrum Reuse in a Multicarrier Broadcast Network: Single Receiver Analysis**
Alberto Rico-Alvariño (University of Vigo, Spain); Carlos Mosquera (Universidad de Vigo, Spain); Fernando Pérez-González (University of Vigo, Spain)
pp. 209-213

**Power allocation for the multi-carrier two-user Gaussian Interference Channel**
Mylene Pischella (CNAM, France); Didier Le Ruyet (CNAM, France)
pp. 214-218

**Base station selection for energy efficient network operation with the majorization-minimization algorithm**
Emmanuel Pollakis (Fraunhofer Institute for Telecommunications, Heinrich Hertz Institute, Germany); Renato Luís Garrido Cavalcante (Fraunhofer Heinrich Hertz Institute, Germany); Slawomir Stańczak (Fraunhofer Heinrich Hertz Institute, Germany)
pp. 219-223

**A Sufficient Convergence Condition For The Quantized Iterative Water-Filling Algorithm**
Ramy Gohary (Carleton University, Canada); Halim Yanikomeroglu (Carleton University, Canada)
pp. 224-228

**S5: Interference Alignment**

**Special Session**

**Interference Robustness for Cellular MIMO Networks**
Andreas Dotzler (Technische Universität München, Germany); Maximilian Riemensberger (Technische Universität München, Germany); Wolfgang Utschick (Technische Universität München, Germany)
pp. 229-233

**Optimal joint base station assignment and power allocation in a cellular network**
Ruoyu Sun (University of Minnesota, USA); Mingyi Hong (University of Minnesota, USA); Zhi-Quan Luo (University of Minnesota, USA)
pp. 234-238

**Interference Alignment Performance on MIMO X Channels with Imperfect Channel Knowledge**
Abdulrahman Mohamed Mahmoud (Alexandria University, Egypt); Mostafa El-Khamy (Alexandria University, Faculty of Engineering & Egypt-Japan University of Science and Technology, Egypt); Khaled Elsayed (Cairo University, Egypt)
pp. 239-243
Cognitive Interference Alignment for OFDM two-tiered Networks
Marco Maso (Supelec & University of Padova, France); Leonardo S. Cardoso (INSA - Lyon, France); Mérouane Debbah (Supelec, France); Lorenzo Vangelista (University of Padova, Italy)
pp. 244-248

Enhanced Linear Precoding in Coordinated Multicell Broadcast Systems
Seyed Morteza Razavi (Queen’s University Belfast, United Kingdom); Tharmalingam Ratnarajah (Queens University of Belfast, United Kingdom)
pp. 249-253

Relays Can Provide Alignment for the K-user Interference Channel without Channel State Information at the Transmitters
Ye Tian (Pennsylvania State University, USA); Aylin Yener (Pennsylvania State University, USA)
pp. 254-258

Sum-Rate Optimization for the MIMO IC under Imperfect CSI: a Deterministic Equivalent Approach
Mohsen Rezaee (Vienna University of Technology, Austria); Romain Couillet (Supelec, France); Maxime Guillaud (Vienna University of Technology, Austria); Gerald Matz (Vienna University of Technology, Austria)
pp. 259-263

Relaying Strategies for the Interference Relay Channel
Ánas Chaaban (RUB, Germany); Aydin Sezgin (RUB & Digital Communication Systems, Germany)
pp. 264-268

Recursive Stream Selection for Sum-Rate Maximization on the Interference Channel
Mustapha Amara (CNAM, France); Didier Le Ruyet (CNAM, France); Mylene Pischella (CNAM, France)
pp. 269-273

Interference Alignment via Minimizing Projector Distances of Interfering Subspaces
Samer Bazzi (DoCoMo Communications Laboratories Europe GmbH, Germany); Guido K E Dietl (University of Applied Sciences Landshut & DOCOMO Euro-Labs, Germany); Wolfgang Utschick (Technische Universität München, Germany)
pp. 274-278

Interference Alignment: Precoding Subspaces Design
Yasser Fadlallah (Telecom Bretagne Institut & Telecom Institut, France); Abdeldjalil Aïssa-Eli-Bey (TELECOM Bretagne, France); Karine Amis (Institut TELECOM ; TELECOM Bretagne & Université européenne de Bretagne, France); Ramesh Mahendra Pyndiah (Institut Telecom/TELECOM Bretagne, France)
pp. 279-283

A Reduced Complexity Clustering Algorithm For the K-User MIMO Interference channel
Slim Ben Halima (Orange Labs, France); Ahmed Saadani (Orange Labs, France)
pp. 284-288
S6: Scheduling

Adaptive reduced feedback for fair user scheduling in MISO-OFDMA systems
Berna Özbek (CNAM, France); Didier Le Ruyet (CNAM, France)
pp. 289-293

Bounds on the expected optimal channel assignment in Rayleigh channels
Oshri Naparstek (Bar-Ilan University, Israel); Amir Leshem (Bar-Ilan University, Israel)
pp. 294-298

Channel Selection with Rayleigh Fading: A Multi-Armed Bandit Framework
Wassim Jouini (Supélec & Supélec, France); Christophe Moy (SUPELEC/IETR, France)
pp. 299-303

Cross-layer Energy Minimization in Correlated Data Gathering Wireless Sensor Networks
Volkan Dedeoglu (University of South Australia, Australia); Sylvie Perreau (University of South Australia, Australia); Alex Grant (University of South Australia, Australia)
pp. 304-308

Deadline Delay Constrained Multiuser Multicell Systems: Energy Efficient Scheduling
Muhammad Majid Butt (University of Luxembourg, Luxemburg)
pp. 309-313

Concurrent Transmission versus Time Sharing in Gaussian Interference Channels
Meng Zheng (Shenyang Institute of Automation, P.R. China); Jafar Mohammadi (Technical University of Berlin & Fraunhofer Heinrich-Hertz-Institute, Germany); Slawomir Stańczak (Fraunhofer Heinrich Hertz Institute, Germany); Haibin Yu (Shenyang Institute of Automation China Academy of Sciences, P.R. China)
pp. 314-318

Link scheduling in Sensor Networks for asymmetric average consensus
César Asensio-Marco (Universidad de Valencia, Spain); Baltasar Beferull-Lozano (Universidad de Valencia, Spain)
pp. 319-323

Long-Term Window Scheduling in Multiuser OFDM Systems based on Large Scale Fading Maps
Huijun Li (RWTH Aachen University, Germany); Gerd H. Ascheid (RWTH Aachen University, Germany)
pp. 324-328

Opportunistic Splitting for Scheduling Using a Score-Based Approach
Faraan Rashid (King Abdullah University of Science and Technology, Saudi Arabia); Haewoon Nam (Hanyang University, Korea); Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia)
pp. 329-333

Quality-Aware Fair Downlink Scheduling for Scalable Video Transmission over LTE Systems
Nabeel Khan (Kingston University, United Kingdom); Maria G. Martini (Kingston University, United Kingdom); Zubin Bharucha (DOCOMO Euro-Labs, Germany)
pp. 334-338
A confidence ellipsoid approach for measurement cost minimization under Gaussian noise
Berkan Dulek (Bilkent University, Turkey); Sinan Gezici (Bilkent University, Turkey)
pp. 339-343

Complexity comparison of the use of Vandermonde versus Hankel matrices to build systematic MDS Reed-Solomon codes
Ferdaouss Mattoussi (INRIA, France); Vincent Roca (INRIA Rhône-Alpes, France); Bessem Sayadi (Alcatel-Lucent Bell-Labs, France)
pp. 344-348

Confidential Communication in Downlink Beamforming
Miguel Ángel Vázquez (CTTC, Spain); Ana Pérez-Neira (CTTC, Spain); Miguel Angel Lagunas (Telecommunications Technological Center of Catalonia, Spain)
pp. 349-353

Distributed Nuclear Norm Minimization for Matrix Completion
Morteza Mardani (University of Minnesota, USA); Gonzalo Mateos (University of Minnesota, USA); Georgios B. Giannakis (University of Minnesota, USA)
pp. 354-358

Filter Design With Secrecy Constraints: Zero-Forcing Constraint at the Legitimate Receiver
Hugo Reboredo (University of Porto & IT - Instituto de Telecomunicações, Portugal); Miguel Rodrigues (University College London, United Kingdom); João Xavier (I.S.T. - Technical U. Lisbon / I.S.R. Lisbon, Portugal)
pp. 359-363

Finite-length polarization measures for polar coded systems
Berksan Serbetci (Bogazici University, Turkey); Ali E. Pusane (Bogazici University, Turkey)
pp. 364-368

Lifetime Maximization in Cluster-based Outage-restricted Wireless Sensor Networks
Vahid Naghshin (University of Tehran, Iran); Behrouz Maham (University of Tehran, Iran); Walid Saad (University of Miami, USA); Mohsen Nickray (University Of Tehran, Iran)
pp. 369-373

Mean-Square Optimal Weight Design for Average Consensus
Valentin Schwarz (Vienna University of Technology, Austria); Gerald Matz (Vienna University of Technology, Austria)
pp. 374-378

Near ML treatment of n Interferers with Linear Complexity
Rizwan Ghaffar (University of Waterloo, Canada); Umer Salim (Intel Mobile Communications, France); Pin-Han Ho (University of Waterloo, Canada)
pp. 379-383

Nonlinear Channel Equalization by Multi-kernel Adaptive Filter
You Nakajima (Niigata University, Japan); Masahiro Yukawa (Niigata University, Japan)
Novel Asymptotic Results on the High-Order Statistics of the Channel Capacity over Generalized Fading Channels
Ferkan Yilmaz (King Abdullah University of Science and Technology, Saudi Arabia); Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia)
pp. 389-393

On the Sum of Gamma Random Variates With Application to the Performance of Maximal Ratio Combining over Nakagami-m Fading Channels
Imran Shafique Ansari (King Abdullah University of Science and Technology & Michigan State University, Carleton University, Saudi Arabia); Ferkan Yilmaz (King Abdullah University of Science and Technology, Saudi Arabia); Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia); Oguz Kucur (Gebze Institute of Technology, Turkey)
pp. 394-398

New Perspectives, Extensions and Applications of De Bruijn Identity
Sangwoo Park (Texas A&M University, USA); Erchin Serpedin (Texas A&M University, USA); Khalid A. Qaraqe (Texas A&M University at Qatar, USA)
pp. 399-403

S8: Cooperative Communications

Cooperative Decoding in Femtocell Networks: Performance-Complexity Tradeoff
Fatma Benkhelifa (King Abdullah University of Science and Technology, Tunisia); Zouheir Rezki (King Abdullah University of Science and Technology (KAUST), Saudi Arabia); Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia)
pp. 404-408

Selective Water-Filling for Decode-and-Forward Cooperative Systems
Shenghui Song (The Hong Kong University of Science and Technology, Hong Kong); Keith Q. T. Zhang (City University of Hong Kong, Hong Kong); Khaled Letaief (The Hong Kong University of Science and Technology, Hong Kong)
pp. 409-413

Novel Half-Coherent Receivers for Amplify-and-Forward Relaying
Fahd Ahmed Khan (King Abdullah University of Science and Technology, Saudi Arabia); Yunfei Chen (University of Warwick, United Kingdom); Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia)
pp. 414-418

Performance of Turbo Product Codes on the Multiple-Access Relay Channel with Relatively Poor Source-Relay Links
Yizhi Yin (Telecom Bretagne, France); Ramesh Mahendra Pyndiah (Institut Telecom/TELECOM Bretagne, France); Karine Amis (Institut TELECOM ; TELECOM Bretagne & Université européenne de Bretagne, France)
pp. 419-423
Iterative joint MMSE design of relaying MIMO downlink schemes with non-linearly precoded transmission
Idoia Jimenez (University of Mondragon, Spain); Maitane Barrenechea (Mondragon Unibertsitatea, Spain); Mikel Mendicute (University of Mondragon, Spain); Egoitz Arruti (University of Mondragon, Spain)
pp. 424-428

Cooperative Relaying in Spectrum-Sharing Systems with Beamforming and Interference Constraints
Ali Afana (Concordia University, Canada); Vahid Asghari (University of Quebec, INRS-EMT, Canada); Ali Ghrayeb (Concordia University, Canada); Sofiene Affes (INRS-EMT, Canada)
pp. 429-433

Zero-Forcing Throughput Maximization for Regenerative Multi-User Relaying
Jarkko Kaleva (University of Oulu, Finland); Antti Tölli (University of Oulu, Finland); Markku Juntti (University of Oulu, Finland)
pp. 434-438

Decode-and-Forward Relay Beamforming for Secrecy with Imperfect CSI and Multiple Eavesdroppers
Sanjay Vishwakarma (Indian Institute of Science, Bangalore, India); A. Chockalingam (Indian Institute of Science, India)
pp. 439-443

Minimizing Power Sum in Two-Way Amplify-and-Forward Relay Channel
Ebru Sinem Çetin (ITU, Turkey); Mehmet E. Çelebi (Istanbul Technical University, Turkey)
pp. 444-448

Power Allocation and Outage Probability Analysis for Secondary Users in Cognitive Full Duplex Relay Systems
Hyungjong Kim (University of Yonsei, Korea); Sungmook Lim (Yonsei University, Korea); Hano Wang (Yonsei University, Korea); Daesik Hong (Yonsei University, Korea)
pp. 449-453

Adaptive self-interference suppression for full-duplex relays with multiple receive antennas
Emilio Antonio-Rodríguez (Gradiant, Spain); Roberto López-Valcarce (Universidad de Vigo, Spain)
pp. 454-458

Outage Performance of Cooperative Amplify-and-Forward OFDM Systems with Nonlinear Power Amplifiers
Alexandre Fernandes (Federal University of Ceará, Brazil)
pp. 459-463

S9: Emerging Topics in SP: Smart Grids, Financial Signal Processing

Special Session
**Signal Processing, Communication, and Networking Requirements for Synchrophasor Systems**  
Mladen Kezunovic (Texas A&M University, USA); Alex Sprintson (Texas A&M University, USA); Jinfeng Ren (Alstom, USA); Yufan Guan (Texas A&M University, USA) 
pp. 464-468

**A New Method to Locate Faults in Power Networks Based on Electromagnetic Time Reversal**  
Mario Paolone (Swiss Federal Institute of Technology of Lausanne (EPFL), Switzerland); Farhad Rachidi (Swiss Federal Institute of Technology, Switzerland) 
pp. 469-474

**The Impact of Renewable Energy Resources on Demand Response Management in a Smart Grid**  
Junwei Zhang (Qualcomm CDMA Technologies, USA); M. Cenk Gursoy (Syracuse University, USA) 
pp. 475-479

**Optimal Order Execution for Algorithmic Trading: A CVaR Approach**  
Yiyong Feng (Hong Kong University of Science and Technology, Hong Kong); Francisco Rubio (HKUST, Hong Kong); Daniel P Palomar (Hong Kong University of Science and Technology, Hong Kong) 
pp. 480-484

**Throughput Maximization for Energy Harvesting Nodes with Generalized Circuit Power Modelling**  
Qing Bai (Technische Universität München, Germany); Josef A. Nossek (TU Munich, Germany) 
pp. 485-489

**A Novel GPU Implementation of Eigenanalysis for Risk Management**  
Mustafa Torun (New Jersey Institute of Technology, USA); Ali Akansu (NJIT, USA) 
pp. 490-494

**Subband Prediction of Energy Commodity Prices**  
Massimo Panella (University of Rome "La Sapienza", Italy); Francesco Barcellona (University of Rome "La Sapienza", Italy); Rita D'Ecclesia (University of Rome "La Sapienza", Italy) 
pp. 495-499

**Growth Optimal Portfolios in Discrete-time Markets Under Transaction Costs**  
Mehmet A Donmez (Koc University, Turkey); Sait Tunc (Koc University, Turkey); Serdar Kozat (Koc University, Turkey) 
pp. 500-504

**Top-k Selective Gossip**  
Deniz Üstebay (McGill University, Canada); Michael Rabbat (McGill University, Canada) 
pp. 505-509

**Estimating hedge fund risk factor exposures**  
Douglas Johnston (Stony Brook University, USA); Petar M. Djurić (Stony Brook University, USA) 
pp. 510-514

Suat Bayram (The Ohio State University, USA); San Gultekin (Bilkent University, Turkey); Sinan Gezici (Bilkent University, Turkey)
pp. 575-579

Pilotless Recovery of Clipped OFDM Signals by Compressive Sensing over Reliable Data Carriers
Ebrahim B. Al-Safadi (King Fahd University of Petroleum & Minerals, Saudi Arabia); Tareq Al-Naffouri (King Fahd University of Petroleum and Minerals & King Abdullah University of Science and Technology, Saudi Arabia)
pp. 580-584

Low-Complexity Detection for Large MIMO Systems Using Partial ML Detection and Genetic Programming
Pavol Svac (Vienna University of Technology, Austria); Florian Meyer (Vienna University of Technology, Austria); Erwin Riegler (Vienna University of Technology (VUT), Austria); Franz Hlawatsch (Vienna University of Technology, Austria)
pp. 585-589

Multiple hypothesis testing for compressive wideband sensing
Sundeep Prabhakar Chepuri (Delft University of Technology, The Netherlands); Geert Leus (Delft University of Technology, The Netherlands); Ruben de Francisco (IMEC / Holst Centre, The Netherlands)
pp. 590-594
