2012 Sixth International Symposium on Theoretical Aspects of Software Engineering

(TASE 2012)

Beijing, China
4 – 6 July 2012
Invited Talks
Overview of TASE 2012 Talk on Search Based Software Engineering .......................................................... 3
  Mark Harman
From Verification to Specification Inference ..................................................................................................... 5
  Wei-Ngan Chin and Cristina David

Model Checking
Symbolic Model Checking for Propositional Projection Temporal Logic .......................................................... 9
  Tao Pang, Zhenhua Duan, and Cong Tian
Formal Specification and Probabilistic Verification of SysML Activity Diagrams ............................................. 17
  Yosr Jarraya and Mourad Debbabi
Modelling and Analysis of Smart Grid: A Stochastic Model Checking Case Study .......................................... 25
  Ender Yüksel, Huibiao Zhu, Hanne Riis Nielson, Heqing Huang, and Flemming Nielson
Strong Preservation by Model Deformation ........................................................................................................ 33
  Roberto Giacobazzi, Isabella Mastroeni, and Đurica Nikolić

Verification
Formal Verification of Netlog Protocols ........................................................................................................... 43
  Meixian Chen and Jean-François Monin
Automated Verification of the FreeRTOS Scheduler in HIP/SLEEK ................................................................. 51
  João F. Ferreira, Guanhua He, and Shengchao Qin
Formal Specification of Hybrid MARTE Statecharts .................................................................59
Ziwei Liu, Jing Liu, Jifeng He, Frédéric Mallet, and Miaomiao Zhang

Incorporating Constraints to Software System Survivability Specification and Proof .................................................67
Yanjun Zuo

Logic and Semantics
A Logic for Accumulated-Weight Reasoning on Multiweighted Modal Automata ....................................................77
Sebastian Bauer, Line Juul, Kim G. Larsen, Jiří Srba, and Axel Legay

Frequency Linear-time Temporal Logic ......................................................................................................................85
Benedikt Bollig, Normann Decker, and Martin Leucker

A Calculus of Higher Order Safe Ambients and Its Bisimulations ............................................................93
Zining Cao

An Improved Full Abstraction Approach to Analyzing Locality Semantics ........................................................101
Jianxin Xue, Huan Long, and Guoqiang Li

Program Analysis and Testing
Model-Based Test Generation Using Evolutional Symbolic Grammar ..........................................................111
Hai-Feng Guo and Mahadevan Subramaniam

Integrating Model-Based Testing and Analysis Tools via Test Case Exchange ....................................................119
Bernhard K. Aichernig, Florian Lorber, and Stefan Tiran

Regression Test Cases Generation Based on Automatic Model Revision ....................................................127
Nan Ye, Xin Chen, Wenxu Ding, Peng Jiang, Lei Bu, and Xuan dong Li

File Parsing Vulnerability Detection with Symbolic Execution ......................................................................135
Chaoqian Hu, Zhoujun Li, Jinxin Ma, Tao Guo, and Zhiwei Shi

Modeling and Application
Formal Verification and Simulation: Co-verification for Subway Control Systems ..............................................145
Huixing Fang, Jian Guo, Huibiao Zhu, and Jianqi Shi

Agile Services Oriented Virtualization of Web Services ..................................................................................153
Wanghu Chen and Jing Li

Modeling and Validation of PLC-Controlled Systems: A Case Study ....................................................161
Rui Wang, Min Zhou, Liangze Yin, Lianyi Zhang, Jiaguang Sun, Gu Ming, and Marius Bozg a

A Formal Diagrammatic Approach to Timed Workflow Modelling ..........................................................167
Hao Wang, Adrian Rutle, and Wendy MacCaul l
# Concurrency and Real Time

Recognising the Capacities of Dynamic Reconfiguration for the QoS Assurance of Running Systems in Concurrent and Parallel Environments .......................................................... 177  
*Wei Li and Maolin Tang*

Moverness for Locks and Transactions ..................................................................................... 185  
*Granville Barnett and Shengchao Qin*

The Observer Pattern Applied to Actor Systems: A TLA/TLC-based Implementation Analysis ........................................................................................................................................ 193  
*Rodger Burmeister and Steffen Helke*

Connectors as Designs: The Time Dimension ........................................................................... 201  
*Sun Meng*

A Type System for SPARDL ......................................................................................................... 209  
*Zheng Wang, Geguang Pu, Jianwen Li, and Bin Gu*

# Verification

Verifying OO Programs by Linking Algebraic and Abstract Specifications ........................................ 219  
*Qin Shu, Shuling Wang, and Yijing Liu*

Binary Code Level Verification for Interrupt Safety Properties of Real-Time Operating System ............................................................................................................................. 223  
*Jianqi Shi, Longfei Zhu, Yanhong Huang, Jian Guo, Huibiao Zhu, Huixing Fang, and Xin Ye*

Dataflow Weaknesses Analysis of Scientific Workflow Based on Fault Tree ........................................ 227  
*Xiaodong Fu, Feng Wang, Xiaoyan Liu, Kaifan Ji, and Ping Zou*

An Approach for Process Variability Control in Business Process Management ................................. 231  
*Qing Yao and Yuqing Sun*

LBI Cut Elimination Proof with BI-MultiCut ................................................................................. 235  
*Ryuta Arisaka and Shengchao Qin*

# Process and Model Checking

A Succinct and Efficient Implementation of a $2^{32}$ BDD Package .................................................. 241  
*Guanfeng Lv, Yao Chen, Yachao Feng, Qingliang Chen, and Kaile Su*

Executing Model Checking Counterexamples in Simulink ............................................................ 245  
*Jiří Barnat, Luboš Brim, Jan Beran, Tomáš Kratochvíla, and Ítalo R. Oliveira*

Comparative Analysis of Clustering Protocols with Probabilistic Model Checking ............................ 249  
*Qian Li, Péter Schaffer, Jun Pang, and Sjouke Mauw*

A Native Approach to Modeling Timed Behavior in the Pi-Calculus ................................................. 253  
*Kamal Barakat, Stefan Kowalewski, and Thomas Noll*
On model construction for modal mu-calculus .................................................................257
  Nan Qu

Program Analysis and Testing

Statement-Coverage Testing for Nondeterministic Concurrent Programs ..................................................263
  Gwan-Hwan Hwang, Heng-Yi Lin, Shao-Yan Lin, and Che-Sheng Lin

A Path-oriented Approach to Generating Executable Test Sequences for Extended
Finite State Machines .....................................................................................................................267
  Tianyong Wu, Jun Yan, and Jian Zhang

Dynamic Solution of Linear Constraints for Test Case Generation ..........................................................271
  Marko Ernsting, Tim A. Majchrzak, and Herbert Kuchen

Categorical Reasoning about Meta-models ...............................................................................................275
  Laurent Thiry, Frédéric Fondement, and Pierre-Alain Muller

Bisimulation for Lattice-valued Transition Systems .................................................................................279
  Haiyu Pan, Min Zhang, and Yixiang Chen

Author Index ..............................................................................................................................................283
