2012 IEEE Conference on Computational Intelligence for Financial Engineering & Economics

(CIFEr 2012)

New York City, New York, USA
29 – 30 March 2012
Table of contents

TUTORIALS

Financial and Economic Data management using Semantic Web technologies .................................................. 1
Xian Li

Stressed Value-at-Risk .......................................................................................................................................... 2
Jan Dash

1A: FUZZY DECISION MODELS IN FINANCIAL ENGINEERING – I

A Multi-Covariate Semi-Parametric Conditional Volatility Model Using Probabilistic Fuzzy Systems ....... 3
Rui Jorge Almeida, Nalan Basturk, Uzay Kaymak and Viorel Milea

A Mean-Reverting Strategy based on Fuzzy Transform Residuals ................................................................. 11
Luigi Troiano and Pravesh Kriplani

Modeling principles in fuzzy time series forecasting ...................................................................................... 18
Okan Duru and Shigeru Yoshida

Linguistic Decision Making with Probabilistic Information and Induced Aggregation Operators .......... 25
José M. Merigó and Montserrat Casanovas

1B: ADVANCED ALGORITHMIC TRADING – I

The Use of Neural Networks for Modeling Nonlinear Mean Reversion: Measuring Efficiency and
Integration in ADR Markets .......................................................................................................................... 32
Eugenio Suarez, Farzan Aminian and Mehran Aminian

A Learning Adaptive Bollinger Band System ................................................................................................. 40
Matthew Butler and Dimitar Kazakov

Complex Stock Trading Strategy Based on Particle Swarm Optimization ................................................. 48
Fei Wang, Philip L.H. Yu and David W. Cheung

Limit Order Placement Across Multiple Exchanges ....................................................................................... 54
Raymond Yim and Andrew Brzezinski

2A: ASSET PRICING / PRICING OF STRUCTURED SECURITIES

A New Approach to Asset Pricing with Rational Agents Behaving Strategically ...................................... 62
Alain Bretto and Joël Priolon

Bio-Inspired Optimization of Fuzzy Cognitive Maps for their Use as a Means in the Pricing of Complex
Assets .............................................................................................................................................................. 69
Lars Krueger, Ralf Salomon and Peter Heydebreck
A Multi-Phase, Flexible, and Accurate Lattice for Pricing Complex Derivatives with Multiple Market Variables................................................................. 77
Chuan-Ju Wang, Tian-Shyr Dai and Yuh-Dauh Lyuu

Pricing Discrete Asian Barrier Options on Lattices.................................................. 85
William W.Y. Hsu, Cheng-Yu Lu, Ming-Yang Kao, Jan-Ming Ho and Yuh-Dauh Lyuu

Improving Non-parametric Option Pricing during the Financial Crisis .................. 93
Dragan Kukolj, Nikola Gradojevic and Camillo Lento

Closed-Form Mortgage Pricing Formula with Outstanding Principal as Prepayment Value .......... 100
Yi-Cheng Tsai, Zheng-Hui Chen, Jan-Ming Ho, Ming-Yang Kao, Szu-Lang Liao and Chin-Laung Lei

2B: FUZZY DECISION MODELS IN FINANCIAL ENGINEERING – II

Exponential Length of Intervals for Fuzzy Time Series Forecasting ......................... 107
Emrah Bulut, Okan Duru and Shigeru Yoshida

Decision Making in Complex Environments with Generalized Aggregation Operators ............. 113
José M. Merigó

MIMO Evolving Functional Fuzzy Models for Interest Rate Forecasting ...................... 120
Leandro Maciel, Fernando Gomide and Rosangela Ballini

Group Decision Making in fuzzy environment ......................................................... 128
Mahima Gupta

3A: ADVANCED ALGORITHMIC TRADING- II

Behavior Based Learning in Identifying High Frequency Trading Strategies .................. 133
Steve Yang, Mark Paddrik, Roy Hayes, Andrew Todd, Andrei Kirilenko, Peter Beling and William Scherer

Hierarchical Temporal Memory-Based Algorithmic Trading of Financial Markets ............. 141
Patrick Gabrielsson, Rikard König and Ulf Johansson

Robust Stock Trading Using Fuzzy Decision Trees .................................................. 149
Carlo Noel Ochotorena, Cecille Adrianne Yap and Elmer Dadios

3B: RISK MANAGEMENT

Optimal Selection of Simulated Years of Catastrophe Activity for Improved Efficiency in Insurance Risk Management .............................................................. 157
Guillermo Franco

Event-Based Historical Value-at-Risk ........................................................................ 164
Frederik Hogenboom, Michael De Winter, Milan Jansen, Alexander Hogenboom, Flavius Frasincar and Uzay Kaymak

Online Estimation of Stochastic Volatility for Asset Returns ...................................... 171
Ivette Luna and Rosangela Ballini

Liquidity Risk Spillover: Evidence from cross-country analysis ................................... 178
William Cheung and Siu Lo
3C: BEHAVIORAL ANALYSIS AND DECISION SUPPORT – I

Intermarket Divergence, a method for generating robust signals for a wide range of markets ............... 185
Murray Ruggiero Jr

A Study on the Reversal Mechanism for Large Stock Price Declines Using Artificial Markets............... 192
Isao Yagi, Takanobu Mizuta and Kiyoshi Izumi

A New Approach to Risk Management Using Soft Information.............................................................. 199
Ronald Yager and Rachel Yager

A Comparison of Feed-forward and Recurrent Neural Networks in Time Series Forecasting............... 206
Danko Brezak, Tomislav Bacek, Dubravko Majetic, Josip Kasac and Branko Novakovic

4X: BEHAVIORAL ANALYSIS AND DECISION SUPPORT – II

Modeling the Term Structure of Government Bond Yields with a Differential Evolution Algorithm....... 212
Leandro Maciel, Fernando Gomide and Rosangela Ballini

Three decision making levels in portfolio management ............................................................................. 220
Sarunas Raudys and Aistis Raudys

The Development of a Reliable Real-time Valuation Service for Financial Derivatives....................... 228
Hsin-Tsung Peng, Chi-Fang Chang, Szu-Lang Liao, Ming-Yang Kao, Feipei Lai and Jan-Ming Ho

A New Solution Method for Customer Grading Problem With Multi-factor Constraint ..................... 236
Jie Yang and Yimin Chen

4Y: AGENT BASED COMPUTATIONAL ECONOMICS

An Agent-based Modeling Approach to Study Price Impact ............................................................... 241
Wei Cui and Anthony Brabazon

Testing Implications of the Adaptive Market Hypothesis via Computational Intelligence .................. 249
Matthew Butler and Dimitar Kazakov

An Agent Based Model of the E-Mini S&P 500: Applied to Flash Crash Analysis................................. 257
Mark Paddrik, Roy Hayes, Andrew Todd, Steve Yang, Peter Beling and William Scherer

Continuous Variable Based Bayesian Network Structure Learning from Financial Factors ............... 265
Jianjun Yang, Zitian Wang, Bingwu Liu and Shaohua Tan

4Z: ENERGY MARKETS

A Self-Organizing Neural Fuzzy System to Forecast the Price of Ecopetrol Shares............................. 271
Jose Alejandro Avellaneda Gonzalez, Cynthia María Ochoa Rey and Juan Carlos Figueroa García

Financing for Rural Electrification............................................................................................................. 277
Najib Altawell
5X: PORTFOLIO OPTIMIZATION

Rebalancing A Two-Asset Markowitz Portfolio: A Fundamental Analysis .................................................. 285
Sujit Das and Mukul Goyal

Risk-adjusted portfolio optimisation using a parallel multi-objective optimization algorithm ................. 293
Phil Maguire, Donal O’Sullivan and Philippe Moser

Discrete-Time Log-Optimal Portfolio Rebalancing: A Scalable Efficient Algorithm ............................... 301
Sujit Das and Mukul Goyal

Comparative Results of Heuristics for Portfolio Selection Problem ...................................................... 308
Aderemi Adewumi and Annalisa Moodley

Analytical Factor Stochastic Volatility Modeling for Portfolio Allocation ............................................. 314
Nikolay Nikolaev and Evgueni Smirnov

5Y: BUSINESS INTELLIGENCE AND KNOWLEDGE MANAGEMENT

On behavior of Malaysian equities through Fractal analysis ...................................................................... 322
Farhad Pourkalbassi, Alireza Bahriraie and Aishah Hamzah

Fuzzy linguistic summaries: where are we, where can we go? ............................................................... 329
Bernadette Bouchon-Meunier and Gilles Moyse

Parallelization of Artificial Neural Network Training Algorithms: A Financial Forecasting Application. 337
Augusto Casas

A Pattern Recognition Approach to Automated XBRL Extraction ............................................................ 343
Hassan Alam, Aman Kumar, Cheryl Lee and Yuliya Tarnikova

Volatility Forecast in FX Markets using Evolutionary Computing and Heuristic Technique ...................... 351
V L Raju Chinthalapati

Knowledge-guided Genetic Algorithm for Financial Forecasting ........................................................... 359
Jie Du and Roy Rada

5Z: ADVANCED ALGORITHMIC TRADING- III

A Semi-Naive Bayes Model to Forecast the Probability Distribution of Excess Returns in the U.S. Stock Market .................................................................................................................. 367
Reza Khosravani

Stock Trading System Based on Portfolio Beta and Evolutionary Algorithms ......................................... 372
Yan Chen

Order Aggressiveness of Option Market: Evidence from the 2008 Credit Crisis .................................... 380
William Cheung and Conrad Cheng

POSTER SESSION

An analytic environment for systemic risk- Risk modeling support for financial policy makers ............ 385
Charles Worrell
Input Output Table Updating based on Agent-Responses Equilibrium Model........................................ 390
Wei Duan, Zhaoguang Hu, Yuhui Zhou and Xiao Xiao

Incorporating Statistical Distribution in Loss and Gain Functions in CVaR Robust Mean-variance
Portfolios .................................................................................................................................................. 394
Mahnaz Manteqipour

Common Data and Controlling General Ledger Paradigm of Banking Data Services ......................... 399
Josef Langmayer and Pavel Pešout

Solving the Winner Determination Problem by a Distributed Genetic Algorithm Approach ............... 405
Terje Kristensen and Mauricio Rojas

Comparison of data classification methods for predictive ranking of banks exposed to risk of failure..... 413
Charles Worrell

Forecasting of Return of Stocks Portfolio Based in Fuzzy c-Means Algorithm and Fuzzy Transform ...... 419
Renato Aguia

FX trading: an empirical study .............................................................................................................. 424
Gerda Cabej, Manfred Gilli, Jonela Lula and Enrico Schumann

An Integrated System Approach For Cash Management System Internal Control ............................. 431
Kuan Chen and Carin Chuang
