2012 10th IEEE/ACM International Conference on Formal Methods and Models for Codesign

(MEMOCODE 2012)

Arlington, Virginia, USA
16 – 17 July 2012
Table of Contents

Session 1: Performance Analysis

Compositional Performance Verification of NoC Designs
Daniel E. Holcomb, Alexander Gotmanov, Michael Kishinevsky, Sanjit A. Seshia

A Correlation Preserving Performance Analysis for Stream Processing Systems
Gideon Smeding, Gregor Gössler

Invited Talk 1

Clearing the Clutter: Unified Modeling and Verification Methodology for System Level Hardware Design
Yosinori Watanabe, Stuart Swan

Session 2: Test Coverage and Fault Localization

Improving Design Verifiability by Early RTL Coverability Analysis
Kai-Hui Chang, Chia-Wei Chang, Jie-Hong Roland Jiang, Chien-Nan Jimmy Liu

FAST: Formal Specification Driven Test Harness Generation
Jiong Gong, Yun Wan, Haihao Shen, Xu Deng, Wei Wang, Xiangning Ma

Model-Based Diagnosis versus Error Explanation
Heinz Rieiner, Goerschwin Fey

Session 3: High-Level Validation I

Preservation of LTL Properties in Desynchronized Systems
Yu Bai, Jens Brandt, Klaus Schneider

Polynomial Datapath Synthesis and Optimization Based on Vanishing Polynomial over Z2m and Algebraic Techniques
Samaneh Ghandali, Bijan Alizadeh, Zainalabedin Navabi, Masahiro Fujita

Interactive Verification of Synchronous Systems
Manuel Gesell, Klaus Schneider

Design Contest

MEMOCODE 2012 Hardware/Software Codesign Contest: DNA Sequence Aligner
Stephen A. Edwards

Shepard: A Fast Exact Match Short Read Aligner
Chad Nelson, Kevin Townsend, Bhavani Satyanarayana Rao, Phillip Jones, Joseph Zambreno

Fast CPU-Based DNA Sequence Aligner Models
Aryan Arbabi, Milad Gholami, Mojtaba Varmazyar, Shervin Daneshpajouh
Session 4: High-Level Validation II

Interdependent Cache Analyses for better Precision and Safety ................................................................. 99
Kartik Nagar, Y.N. Srikant

A General Technique for Deterministic Model-Cycle-Level Debugging...................................................... 109
Asif Khan, Muralidaran Vijayaraghavan, Arvind

Direct Generation of Invariants for Reactive Models ...................................................................................... 119
Elizabeth I. Leonard, Myla M. Archer, Constance L. Heitmeyer, Ralph D. Jeffords
