2012 Asia-Pacific Power and Energy Engineering Conference

(APPEEC 2012)

Shanghai, China
27 - 29 March 2012

Pages 1-921
TABLE OF CONTENTS

Output Characteristics of PV Array under Different Insolation and Temperature ............................................. 1
Xueting Wang, Hui Liang

A New Optimal Space-Vector Modulation Technique for Three-Phase Voltage Source Inverters ...................... 5
Shao-Liang An, Jian-Yuan Wang, Xiang-Dong Sun, Yan-Ru Zhong

A Fuzzy Self-Tuning Speed Control System of Diesel Generator ................................................................. 10
Yufeng Zhang, Shengjin Li, Gang Liu, Yong Zhou, Yufeng Zhang, Qixun Zhou

A Novel Compact Printed Rectenna for Communication Systems ................................................................. 14
Xue-xia Yang, Chao Jiang, Atef Z. Elsherbeni, Fan Yang, Ye-Qing Wang

Design and Numerical Simulation of Leaf Spring Rotary Engine ...................................................................... 18
Dongjie Wang, Zhengxing Zuo

Key Techniques for Designing Free Piston Stirling Engine .................................................................................. 23
Hongshu Jia, Guotong Hong, Ning Cheng, Wei Li

Study of Heat Transfer for CO₂ Flow Boiling in Horizontal Small Diameter Tubes ........................................ 27
Liang Zhang, Jianhua Liu, Jianchao Yang, Qin Lin Ge

Utilization of Solar Energy on Exploitation of Salt Lake Resources in Tibetan Plateau .................................... 31
Qian Wu, Malin Liu, Weisong Huang, Mianping Zheng

Experimental Research of Performance on Dual Source Heat Pump Water Heater Using Air and Water ............ 36
Xingwang Zhu, Xueli Nie, Zhi-min Guo, Yugui Su

Simulation on Temperature Variation of Underground Water in Water Source Heat Pump ............................. 40
Tao Huang, Dongli Yuan

Comparison of the Thermodynamic Performance of Direct Expansion Ground Source Heat Pump ................. 44
Yuefen Gao, Tony Roskilly, Graham Baker, Hongfei Zhao, Yingxin Peng

Using Hydrofluorolefins (HFOs) Based on Theoretical Analysis ..................................................................... 49
Yongbing He, Shijing Wu, Yongbing He, Jixuan Wang

Study on Thermodynamic System of Thermal Power Plant Based on Absorption Heat Pump ......................... 49

Experimental Research of Performance on Dual Source Heat Pump Water Heater Using Air and Water ............ 36
Xingwang Zhu, Xueli Nie, Zhi-min Guo, Yugui Su

Simulation on Temperature Variation of Underground Water in Water Source Heat Pump ............................. 40
Tao Huang, Dongli Yuan

Comparison of the Thermodynamic Performance of Direct Expansion Ground Source Heat Pump ................. 44
Yuefen Gao, Tony Roskilly, Graham Baker, Hongfei Zhao, Yingxin Peng

Using Hydrofluorolefins (HFOs) Based on Theoretical Analysis ..................................................................... 49
Yongbing He, Shijing Wu, Yongbing He, Jixuan Wang

Study on Thermodynamic System of Thermal Power Plant Based on Absorption Heat Pump ......................... 49

Coal Ignition ....................................................................................................................................................... 53
Guowei Liu, Daozhi Qu, Peng Dong, Rushan Bie

Comparative Analysis and Application on Mobile-Heating Technology of Regenerative Energy ..................... 57
Wenhuang Wang, Weiguo Pan, Yue Zhou, Weiting Jiang, Shenyu Hu, Guoxin Hu

A Modified Factor Decomposition Method and Its Applications in Analysis of Electric Energy .......................... 61
Sen Ouyang, Yili Shi, Runhong Huang

Numerical Simulation and Optimization on Air-Cooled Unit with Swirl Flow ................................................ 66
You-liang Cheng, Fei Guo, Wei-peng Xue

The Predictive Control of Microturbine Generation System ........................................................................... 70
Xu Cao, Jian-hua Ye

A Numerical Study on Fluid Flow and Heat Transfer Characteristics for External Longitudinal Finned Tube ......... 74
Dashu Li, Xingqi Qiu, Fenglei Qi

Analysis of Stator Temperature Field on Synchronous Generator Loss of Field Asynchronous Operating ............ 79
Liyao Li, Yan-ling Li

Reliable Impedance Islanding Detection for Power Distribution Systems with High Motor Penetration ............. 83
Nguyen Duc Tuyen, Goro Fujita, Toshihisa Funahashi, Masakatsu Nomura

Performance Analysis of CO₂ Heat Pump Water Heater with an Ejector ......................................................... 87
Cheng-cheng Ju, Jun-san Yang, Hong-wei Qu

Effective Controller Design for the Cascaded H-Bridge Multilevel Active Power Filter (APF) for Power Quality Compensation in Distribution Utilities .............................................................. 92
Lin Xu, Yang Han

Research on Renewable Energy Power Based Microgrid Technology ............................................................ 96
Yan Zhang, Mengmao Ma, Jie Zhan, Yishu Zhao

Coordinated Control for Independent Wind-Solar Hybrid Power System ....................................................... 100
Zhiyuan Qi

Application of Negative Sequence Voltage Contribution Factor to Detect Islanding ....................................... 104
Jing Ma, Chao Mi, Zengping Wang

</table>
Optimal Control Study for Fractional Frequency Wind Power System ................................................................. 218
Zhuoyan Song, Xifan Wang, Yifei Teng, Lianhui Ning, Yongqiang Meng

Multi-Objective Optimal Design of Wind/PV/Pumped-Storage System Based on GA ........................................... 223
Xiaoyu Hu, Qiuye Sun, huangfang Zhuang, Zhan Wang

Application of Parallel Active Filter for the Electric Vehicle AC Charge Spots ................................................. 227
Jia-zheng Lu, Yun Zhang, Bo Li

Design and Simulation of Digital PV Simulator Based on Push-Pull Forward Converter .................................. 231
Jike Zhang, Shengjie Wang

Combustion Stability of Low Calorific Gas in Porous Media without Pre-Mixer .......................................... 236
Jiantao Li, Guanqiang Wang, Hua Huang, Bingjie Xu, Yitian Huang

Application of Single-Stage Boost Inverter for Electric Vehicles ................................................................. 240
Juanwu Zhao, Wuxi Huang, Yafei Zhou

Research of Loss-Reducing Technology Based on Electromagnetic Balancing Applying in Three-Phase Four-Wire Power Distribution System ................................................................. 244
Zhentao Xin, Baodong Chai, Hongyan Jiang, Jie Cheng

The Topology Analysis and Compare of High-Frequency Power Electronic Transformer .................................. 247
Li Cheng, Yinxian Xie, Xiang Lu, Zhiping Wang

Reactive Power Optimization for Wind Farms Group Integrated System ......................................................... 253
Shipeng Liu, Liping Guo, Lijun Kang, Leiqiong Zhang, Han Guo

Electrical Models of SOFC for Power Generation ............................................................................................... 257
Y. H. Liu, N. P. Brandon, Minhua Liu

Analysis of Primary Air Fan Run-Back in 1000MW Ultra Supercritical Coal Fired Generation Unit ................ 261
Libao Yin, Qisheng Xu, Zhiyong Wen, Jinghui Song, Ruqing Xia, Liming Zhou

Numerical Simulation on the Performance of New Rapid Premixed and Pre-Evaporation Nozzle .................... 265
Lijian Wang, Dongdong Qi, Jinyou Su, Jiawei Wang

Multi-Channel Optical Fiber Methane Monitoring System Based on Laser Absorption Spectroscopy .......... 269
Yanjie Zhao, Yubin Wei, Yanfang Li, Tingting Zhang, Qing Yu, Ying Shang, Chang Wang, Tongyu Liu

Evaluation Study of an Isolated Power System Operation with PV and Electric Vehicle Integration ............... 273
Shinichiro Noda, Yasunori Mitani, Masayuki Watanabe, Katsuhiko Harada, Yasujirou Qudaih

Design and Numerical Simulation of a Multi-Stage Self-Preheating Burner for a Recuperative Furnace .......... 277
Shan Cheng, Donglin Chen, Ying Yun, Tao Deng

Design and Control of Smart Hybrid Renewable Energy Systems Using Modified Genetic Algorithms and Direct Design Control .................................................................................................................................... 281
Dan Gota, Claudia Domata, Liviu Miclea

Research on Solar Supported Coal-Fired Power Generation of Practical Operation Conditions ..................... 285
Xiaoyan Wang, Mengjiao Wang, Zhifeng Du

Removing Silicon from Feed Water by Electrocoagulation for Power Plant Boiler ........................................ 289
Sidi Zhi, Xiaoyan Yu, Xuebin Lu, Shuang Zhang

Development of Online Monitoring and Controlling System for the 630 kVA Three-Phase High Temperature Superconducting Transformer ................................................................. 293
Zhiquan Zhu, Shutao Dai, Yaping Tong, Zhifeng Zhang, Qingquan Qiu, Naixiao Song, Jingye Zhang, Liye Xiao, Liangchen Lin

A Reduced Switch Multilevel Inverter for Harmonic Reduction ........................................................................ 298
Valsan K. Nikhil, K. D. Joseph

Automatic Temperature and Humidity Control System Using Air-Conditioning in Transformer Substation ................................................................. 302
Li Feng, Zhou Hui, Tao Yan

Improved Detection Method of Current Component Based on Instantaneous Reactive Power Theory ................ 306
Wenchuan Ma, Shao Zhang, Shuwen Wang, Yuzhu Song, Dongmei Zhang, Gang Han

New Design for a Solar Concentrator with Rotating Slats .............................................................................. 310
Jean-Louis Canaletti, Christian Cristofari

Detection Methods of Unbalance Factor and Phase Angle Difference of Positive and Negative Sequence Component of Three-Phase Voltage ................................................................. 314
Wenchuan Ma, Shao Zhang, Nan Shi, Shuwen Wang, Yu Bai, Shumin Li

Small-Signal Stability Analysis of Microgrid Based on Perturbation Theory .................................................. 318
Jing Ma, Xue Wang, Xinbin Lan

Coal Gasification Based Solid Oxide Fuel Cell Power Generation with CO2 Capture .................................. 322
Fei He, Pei Liu, Zheng Li, Weidou Ni

The Feasibility Analysis of Power Generation with Waste Heat of 2x16500KVA Calcium Carbide Furnace .......... 327
Dong Yang, Guihua Deng, Jianping Wei, Zaiqiang Lou, Huahua Yang

Sheng Chen, Dong Dai, Xiaotin Huang, Massa San

Study on Dielectric Properties of Polymer Material in Mineral Oil under Electro-Thermal Aging ................................................................. 3329
Caipeng Yue, Wei Wang, Guanghui Chen, Yankun Wu, Dongxin He

Location Algorithm for Partial Discharge Based on Radio Frequency (RF) Antenna Array ................................................................. 3333
Peiqing Miao, Xiuewei Li, Huijuan Hou, Gehao Sheng, Yue Hu, Xiaoqin Jiang

An Improved Thermal Model for Power Transformers with Dynamic Loading ................................................................. 3337
Li Tan, Hualong Li, Xiaohai Yan, Jun Tian, Jiangtao Li

Investigation on Real Time Test Technique for Distributed Control Systems ................................................................. 3341
Jia Luo, Jian Li, Qi Wang, Yaqing Zhu

Improvement of Transformer Gas-in-Oil Diagnosis Based on Evidence Theory ................................................................. 3345
Liwei Zhang, Jinsha Yuan, Cuiran Zhao

Study on the Intermittent Arc-Grounding Fault Feeder Selection ................................................................. 3349
Zhixia Zhang, Ying Xie, Fengli Jiang, Dan Guo

Fault Detection Method in Micro-Grid Multi-Pulse Thyristor Rectifier Circuit ................................................................. 3353
Jing-yong Han, Hong-da Liu, Wen-jie Yue, Nai-jun Shen

Phase Location Method for Single-Phase Earth Fault Based on Ad Hoc ................................................................. 3357
Feng Li, Yulin Qi, Huibin Jia

Power Grid Fault Diagnosis Based on Smart Substation ........................................................................................................... 3361
Xu Zhang, Yanhua Liu, Dongmei Zhao, Yongqiao An, Nan Zhang

Fault Diagnosis Based on Process Matching in Smart Distribution Grid ................................................................. 3365
Zhang Xu, Yanhua Liu, Dongmei Zhao, Xieting Cheng, Nan Zhang

Corrosion On-Line Monitoring Technology of Circulation Cooling Water System ................................................................. 3369
Hong Liang Zhang, Li Min Wang, Wei Li
Rectifier Thyristor Failure in Real-Time Detection Methods .......................................................... 3372
Hong-da Liu, Jing-yong Han, Nai-jun Shen, Hai Lan

OPNET Simulation Model for Small Scale Wind Power Farm Monitoring Based on IEC 61400-25 ............. 3376
Mohamed A. Ahmed, Won-Hyuk Yang, Young-Chon Kim

Intelligent Fault Diagnosis Method in Controlled Rectifier Based on Support Vector Machines .................. 3381
Hai Lan, Hong-da Liu, Wen-jie Yue, Nai-jun Shen

Application of Distributed Optical Fiber Temperature System in Online Monitoring and Fault Diagnosis of Smart Grid .................................................................................................................. 3385
Yu-yuan Liu, Tao Lei, Zhi-hui Sun, Chang Wang, Tong-yu Liu

Research on Integrated Method to Detect Internal Resistance of Substation Battery ................................... 3389
Zheng-hua Feng, Zhi Li, Wang Bin

Catastrophe Performance Analysis of Aerodynamic Excitation for Steam Turbine ........................................ 3393
Jian-lan Li, Huafeng Liu, Chen Yu, Shuhong Huang

A Multi-Fault Location Algorithm Based on Wide Area Information in Complex Large Power Grid ........... 3397
Jing Ma, Dong Xu, Zhuo Wang

Research on Multiple Signals Monitor Control Circuit by One Power Quality Analyzer .............................. 3401
Wende Cao, Shiqing Li, Nan Xiong, Jiu-fu Li

Modeling Analysis for High Power Load with Voltage Source Harmonics .................................................. 3405
Qun Xu, Shiyang Tian, Pengfei Zhang, Guanglei Li

Study on a New Loss-of-Field Protection Strategy ...................................................................................... 3409
Jian-kun Zhang, Wei Hu, Fei Xu, Miao Li, Dahu Li, Xiao-Ping Li

The Harmonic Assessment Method Based on the Generalized Ridge Regression ........................................ 3415
Shu-jun Yao, Jing Yang, Yan Wang, Long-hui Liu, Lu-yao Ma

An Integrated Method for under Frequency Load Sheding Based on Hybrid Intelligent System-Part I: Dynamic Simulation ................................................................. 3419

Innovative Location Research of Multiple Harmonic Sources Based on Statistical Data Correlation ............. 3425
Hong-zhi Zhang, Xue Qian, Xiao-dong Yu

A Method for Interharmonic Measurement Based on DQ Transform and MUSIC Algorithm ....................... 3429
Ou-yang Hua, Zheng-guo Wu

Based on Fuzzy Rough Sets and GA-BP Neural Network Method of Distribution Network Fault Line ........ 3433
Jing Hao, Feng Zhu, Jian-hiao Yang, Zhi-an Zheng

Study and Application of Data Aggregation Based on FAST Protocol in Power Quality Monitoring System .......................................................... 3437
Yan-yu Fan, Dian Lei, Peng Chen

Study on the Coordinated Multi-View Technology of EMS ...................................................................... 3441
Xiao-dong Zhang, Quan-sheng Zhu, Zhen-nan Zhang, Zuo-xin Zhu

A Realization of Measurement Unit for Phasor Measurement Unit Based on DSP ........................................ 3445
Li-ang Du, Jin-lai Huang, Quan-ying Liu

Design of Transformer Substation Fault Prediction Algorithm Based on Modified ESN ............................ 3448
Gang-quan Si, Hong-ying Zhang, Lu-na Hu

Insulator Surface Dirt Image Detection Technology Based on Improved Watershed Algorithm ................. 3452
Xin Mei, Tie-cheng Lu, Xiao-yun Wu, Bo Zhang

An Integrated Method for under Frequency Load Sheding Based on Hybrid Intelligent System-Part II: UFLS Design ............................................................................... 3457

Construction and Matching Analysis of the Power Block Contact Model of Distribution Network ............ 3466
Jun Han, Shao-yun Ge, Hong Liu, Fang-di Shi, Chun Cao, Guixin Zhou, Dong-xing Xu, Yang Liu

A Black-Start Field Test in Shandong Power Grid of China ....................................................................... 3471
Chunyi Wang, Xueliang Li, Tianguang Lv, Ming Lei, Lei Fu, Xinsheng Niu

A Novel Transmission Planning Method for Integrating Large-Scale Wind Power ...................................... 3475
Ruou Wang, Jian-xue Wang, Shutan-gou You, Si Wu

Short-Term Transmission Maintenance Scheduling Based on the Benders Decomposition .......................... 3479
Chang-lin Lv, Jian-xue Wang, Pei Sun

Probabilistic Power System Production Simulation Including Large-Scale Wind Farms Based on Available Generation Capacities ................................................................. 3484
Dong Li, Bin Zou

Effects of Large Induction Motors on Voltage Sag ..................................................................................... 3490
Pichai Aree

Analysis of Operation of Synchronous Generator under the Distortion of Harmonic Current ....................... 3494
Jin-quan Wang, Peng-chao Song, Chen-hua Cui, Jian-ke Li, Tao Yang
The Dispatch Model of Interruptible Load Considering Microgrids ............................................................................................................................... 3498
Yu-jing Zhai, Xin Ai, Xiao Liu

Study and Application of Integrated Power Network Planning Information System ................................................................. 3502
Fengchang Luo, Wei Wei, Yue Zhang, Feng Li, Zhengchao Liu, Yaohua Xu, Jinhai Qu, Tong Wang

Optimal Allocation of Distributed Generation in Distributed Network .................................................................................................................. 3507
Hong Cui

Multi-Region Distribution System Reconfiguration Based on an Improved Ant Colony Algorithm ............................................................. 3511
Yanfeng Li, Yuanbo Sun, Xiaobo Li, Chenguang Zhang, Jun Li, Zhijian Hu

Collaborative Transmission Network Expansion Planning for Congestion Alleviation Using Lagrangian Multipliers ........................................ 3516
Zongyu Liu, Georgios Papaefthymiou, Lou van der Sluis

Mega-Solar Power Modification by Using Controllable Distributed Generation .................................................................................................. 3520
Atsushi Kano, Yohei Shinohara, Yasunori Mitani, Yaser Qudaih

Assessment of Reliability and Quality Levels in Power Systems .......................................................................................................................... 3524
Mohamed A. El-Kady, Badr M. Alshammari

An Auto-Generated Method of Day-Ahead Forecast Powerflow for Security Correction of Power Grid Maintenance Scheduling ............................................................................................................................... 3528
Chang Xie, Wenying Liu, Jie Wen, Jiaming Wang

The Probabilistic Production Simulation for Mixed Wind-Hydro-Thermal Power System and the Sensitivity Analysis for the Indices of Abandoned Wind ............................................................................................................................... 3532
Hongyu Zhang, Huojian Zhu, Hong Sheng, Bihui Li, Xin Fang

Analysis and Compare for Voltage Levels of the Mid-Voltage Distribution Network .......................................................................................... 3536
Bo Tang, Peng Hu, Yang Fu, Wang-shu Cao

Community Mining Voltage Control Partition Based on Energy Information Weighted Complex Networks ............................................................................................................................... 3540
Yan Bai, Hua-qiang Li

Ice Flashover Trips Vulnerability Curve of Power Grid ............................................................................................................................... 3544
Yu Sun, Xiuli Wang, Zhaohong Bie

Assessment of Substation’s Distribution Design Based on LCC ............................................................................................................................... 3548
Wen-yan Sun, Jian-gang Yao, Wei Wang, Cheng-zhao Xu, Wan-jing Song

Study on Risk Evaluation of Henan grid’s Transfer Capability Based on Uncertainty of Synthetic Load Model ............................................................................................................................... 3552
Xiaodong Zhang, Jun Yang

Study on Risk Assessment Applied in Power Grid Planning ............................................................................................................................... 3556
Yuan Zeng, Tong Zhang, Hongmei Wang, Shuangyi Yang

Evaluation of Transmission Expansion Scheme Based on Physical Programming ............................................................................................................................... 3560
Yang Shao, Jialai Yu

Load Forecasting in Demand Response ............................................................................................................................................................................................... 3565
Haibo Jiang, Zhenyu Tan

The Analysis Method of Line Loss for Planning Grid ............................................................................................................................... 3569
Xiaowei Wang, Hui Fan, Tao Wang, Xiao Yang, Kuanjun Zhang

A Chance-Constrained Programming Based Renewable Resources Included Generation Expansion Planning Method and Its Application ............................................................................................................................... 3574
Yingyun Sun, Tao Han, Ahsan Ashfaq

Advanced Fault Location Solution for Distribution Systems Using IED Information and the Detailed Feeder Model ............................................................................................................................................................................................... 3579
Yanfeng Gong, Armando Guzmán

Control Strategy for PWM Converter Based on Suppressing the DC-Side Harmonics ............................................................................................................................... 3584
Zou Jin

Analysis and Design for 5KW Power Factor Corrected Converter ............................................................................................................................... 3589
Xiang Lu, Yun-xiang Xie, Guang-jiao Li, Li Cheng, Zhi-ping Wang

Development of Portable Digital HVDC Generator Based on MCU and CPLD ............................................................................................................................... 3593
Qingfeng Xu, Xi Zhang, Wenhua Zhou, Shiyuan Zhao

Study of the Two-Phase Flow Pressure Drop in Inner Evaporative Cooling Generator ............................................................................................................................... 3598
Haihong Dong, Lin Ruan

Study of the Methods Building the Voltage of DC Side with Enable Logical for UPQC ............................................................................................................................... 3602
Zhilin Tan, Dongjiao Zhu

The Empirical Research of Power Energy Efficiency in Regional Industrial Sectors ............................................................................................................................... 3606
Ming-xiang Lu, Guang-wen Ma, Yan Ye

Influence on Static Voltage Stability of System Connected with Wind Power ............................................................................................................................... 3610
Jie Zeng, Qisheng Liu, Xiaojiao Zhong, Shaopeng Jin, Wancheng Fan
Research on Algorithm for Single-Phase-to-Earth Fault Section Location in Medium Voltage Distribution
Zheng Qi, Sichang Xiao, Bingyu Wang

Optimal Flux Selection of Induction Machine in the Field-Weakening Region
Wang Qingyi, Liu Yang, Luo Hui

The Capacity of Gaussian Signaling in Non-Coherent Rayleigh Fading Channels
Juan Yao, Jinfeng Zhi

Experimental Study on Transmission Efficiency of Hybrid Electric Bus Transmission with Synthetic Box Assembly
Jinjun Zheng, Chuanxue Song, Huang Peng, Zhen Wang

Research of Over-Voltage of Electric Locomotive Passing the Articulated Phase Insulator
Li Xiong, Trillion Q. Zheng, Ran Wang, Lin Fei

Performance Research of Two Topologies of Power Converter for SRM
Lin He, Hexu Sun, Jie Gao, Jie Bai

Topology Block Based Distribution Network Fault Location
Jian-mei Zhang

On-Line Synchronous Generator’s Parameters Identification with Dynamic PMU Data
Junli Zhang, Achen Xue, Tianshu Bi, Zhengfeng Wang, Wei Tang

The Design of Communication System on the Real-Time Relay Protection Based on GOOSE
Liang Du, Qun-ying Liu

Application of IRIG-B Code in Phase Measurement Unit
Jin-kai Huang, Liang Du, Qun-ying Liu

OPNet Simulation of IEEE 1588 in Power System Sensor Network
Liang Du, Jin-kai Huang, Qun-ying Liu

Single-Stage Electrolytic-Capacitors-Free AC-to-DC LED Driving Circuit with High-Power-Factor
Yan-Cun Li, Chern-Lin Chen

Review of Exact Linearization Method Applied to Power Electronics System
Jiang Zhou, Xiang Lu

Thyristor Photoelectric Firing System Applied in Auto-Passing Neutral Section System
Li Xiong, Lin Fei, Ran Wang, Trillion Q. Zheng

The Research and Development of the On-Line Monitoring System for Grounding Current of High-Voltage Cable
Xilin Zhang, Zhenhao Wang, Guoqing Li, Yechun Xin

Analysis of LCC Model of High-Voltage Transmission Line
Han-Sheng Liu, Jian Liu, Han-Guang Wang, Xuan Qi, Xiao-zhen Sang

Effect of Physical Parameters on Thermal Performance of Glazed Transpired Collector with Slit-Like Perforation
Chao Li, Xianli Li, Shijun You, Min Ji

Research on Electric Field Strength Distortion Near the Insulators When There Is Any Guano-Caused Flashover of Insulators of Power Transmission Lines
Jingwen Zheng, Yuchao Li

The Status Quo of Research on High-Voltage AC Transmission Llines in High-Altitude Areas
Yuchao Li, Jingwen Zheng
