2012 First International Conference on Agro-Geoinformatics

(Agro-Geoinformatics 2012)

Shanghai, China
2 – 4 August 2012
Table of Content

Design and Implementation of Beijing Suburban Natural Resources and Socio-Economic Information Management Platform........................................... S. Dong, J. Yu, W. Zhang, H. Li, L. Zhou, and D. Sun 1

Discrimination of yellow rust and powdery mildew in wheat at leaf level using spectral signatures…….. ..........................................................L.Yuan, J. Zhang, J. Zhao, S. Du, W. Huang, and J. Wang 5

Study on Urban Green Space Extracting and Dynamic Monitoring Method.............................................................X. Wang, E. Chen, Z. Li, W. Yao, and L. Wang 14

Cultivated Area Estimation Combining Moderate Spatial Resolution Remote Sensing Data and MODIS Time Series Data ........................................................... Y. Li and Y. Li 18

The True Orthophoto Generation Method ....................... X. Wang, X. Zhang, and J. Wang 22

Investigating the capability of multi-temporal Landsat images for crop identification in high farmland fragmentation regions ................................................................. M. Zhang, Q. Li, and B. Wu 26

A Robust Autonomous Star identification Algorithm for ZY3 satellite...............J. Xie and X. Wang 30

Estimate Faction of Photosynthetically Active Radiation with three-band vegetation indices based on HJ-CDD satellite in wheat................................................................. T. Dong and B. Wu 34

The Analysis and Prediction of the Changes of the Cultivated Land in Guangan.................................................................Y. Zeng, J. Hu, S. Liu, and T. Tang 39

Estimation of cropland net primary production using remote sensing methods… H. Chen and D. Zhuan 44

Strategy to extract winter wheat and summer maize distribution based on time-series MODIS NDVI data.................................................................H. Chen and D. Zhuan 49

Agricultural Drought Monitoring in Dongting Lake Basin by MODIS Data.................................................................B. Yang, S. Ma, J. Li, Y. Liao, B. Zhou, and C. Kuenzer 54

Comprehensive Evaluation of Ecosystem Health of East Dongting Lake Wetland Based on Remotely Sensed Images.................................................................J. Li, D. Liao, B. Yang, B. Zhou, and C. Kuenzer 61

Comparison and Analysis of Data Up scaling Schemes for Predicting Crop Leaf Area Index......................... Y. Dong, H. Feng, J. Wang, C. Li, G. Yang, and W. Huang 67

Assessing the Sustainability of Agriculture in Beijing based on the Biological Capacity Theory................. G. Sun, Y Li, and J. Gu 73
Accuracy Assessment based on the Distribution of the Classified Errors on Classified Map: Simulation Analysis

Design of Remote Sensing System for Rice Information Extraction: R. Guo, J. Huang, and X. Wang

An Online System of Winter Wheat Drought Monitoring Based on Satellite Data: Design Concepts and Initial Testing

Yield estimation of winter wheat in North China Plain by using crop growth monitoring system (CGMS)

Neural Network Model to Predict Deoxynivalenol (DON) in Barley using Historic and Forecasted Weather Conditions

Understanding the enhanced backscatter of coastal forest plantation in L-band synthetic aperture radar images

Potential of Fully Polarimetric SAR Data for Crops Biophysical Parameters Retrieval

Impacts of topography for forest height estimation

Based on HJ-CCD image to monitoring degree of corn tasseling

Assess the Accuracy of the Globcover Cultivated Land Data in Northeast China

Estimation of Crop Ground Cover and Leaf Area Index (LAI) of Wheat Using RapidEye Satellite Data: Preliminary Study

Rural Land Management Right Spatial Survey Based On Land Parcel Field Acquisition System PDA... 

“Hu-Xi Fault” Is Found By Remote Sensing

Hyperspectral characteristics of winter wheat under freezing injury stress and LWC inversion model

Growth monitoring of winter wheat in Beijing area using HJ-1A hyperspectral imagery

Crop Condition Assessment Using High Temporal Resolution Satellite Images

Integrating MODIS satellite imagery and proximal vegetation sensors to enable precision livestock management

J. Gu, G. Sun, Y. Pan, and D. Fan

Q. Guan, J. Jia, X. Yang, Y. Dong, and J. Luo

F. Teng, Z. Chen, W. Wu, Q. Huang, D. Li, and T. Xia

K. D. Bondalapati, J. M. Stein, and K. M. Baker

F. Ling and Y. Dai

H. Yang, X. Yang, X. Xu, Z. Gao, C. Li, J. Wang, and C. Zhao

W. Li, E. Chen, Z. Li, H. Sun, T. Zeng, and L. Zhao

H. Wang, J. Wang, X. Gu, W Guo, and W Huang

L. Zhang, W. Wu, Q. Zhou, Z. Chen, and Z. Li

J. Shang, H. McNairn, U. Schulthess, R. Fernandes, and J. Storie

W. Zhang, H. Li, S. Dong, D. Sun, and L. Zhou

X. Li, J. Yi, X. Liu, P. Gu, and H. Lin

H. Wang, J. Wang, Q. Wang, N. Miao, W. Huang, H. Feng, and Y. Dong

H. Feng, G. Yang, W. Huang, and W. Guo

G. Yu, L. Di, Z. Yang, Z. Chen, and B. Zhang

G. Donald, W. Ahmad, E. Hulm, M. Trotter, and D. Lamb

Using Time-Series MODIS Data for Agricultural Drought Analysis in Texas..............................................C. Peng, L. Di, M. Deng, and A. Yagci

Baseline estimates of interferometric SAR based on Newton iteration method........F. Yang and H. Feng

Using new hyperspectral index to estimate leaf chlorophyll content in winter wheat.................................................................X. Xu, X. Song, C. Li, J. Wang

The cloud computing for a dynamic agrogeoinformation processing.........................................................C. Yang, Y. Shao, N. Chen, and L. Di

Aggregating Distributed Geo-processing Workflows and Web Services as Processing Model Web.................................................................C. Yang, Y. Shao, N. Chen, and L. Di

Mathematical study of the effects of temperature and humidity on the mycelium growth of Pleurotus eryngii.........................................................................................................................J. Yang, J. Zhao, H. Yu, L. Tang, and R. Wang

Design of Fertilization Recommendation Knowledge Base and Application.................................................Z. Ren and X. Lu

The Impact of Climate Change on China’s Crop Production: a CMIP5 Ensemble Assessment.................................C. Gao

An Adaptive Spatiotemporal Agricultural Cropland Temperature Prediction System Based on Ground and Satellite Measurements.................................................................S. Bagis, B. Ustundag, and E. Ozelkan

Image Based Automated Phenological Stage Detection of Cereal Plants....................................................S. Bagis and B. Ustundag

Reconstruction of Missing Meteorological Data Using Wavelet Transform..................................................N. Altan and B. Ustundag

Extracting proper remote sensing vegetation indices obtainable from in-situ spectral measurements for evaluation of erect-type corn (Zea mays L.) leaf area index.................................................................................C. Tan, L. Tong, C. Ma, W. Guo, and X. Yang

Betterment of Soil Database, Integration with Natural and Artificial Environment and Agricultural Land Use Planning.................................................................G. Kusek and H. Erden

Monitoring quality of winter wheat based on the HJ satellite images...........................................................
Drought monitoring with VHI computed from the improved MODIS LST...J. Fan and Z. Zheng

Change detection for mapping paddy using support vector data description...............................S. Zhu, G. Shuai, G. Sun, and J. Zhang

Optimization of sampling basic unit size on spatial sampling for estimating winter wheat sown acreage..........................................................D. Wang, Q. Zhou, Z. Chen, and J. Liu

Geostatistical analysis of the horizontal distribution of soil zinc in Guangdong, China........................................................C. Yang, R. Guo, R. Liu, Q. Yue, X. Ren and Z. Wu

Geographically Weighted Regression Using a Non-Euclidean Distance Metric with Simulation Data..............................................................................B. Lu, M. Charlton, and P. Harris

Geoprocessing in Google Cloud Computing: case studies.........................L. Hu, P. Yue, and H. Zhou

WebGIS-based Farmland Ecosystem Spatial Decision Support System.............................................................Y. Chen, J. Zhang, and M. Men

Geoprocessing on the Amazon cloud computing platform - AWS..............................................................Y. Shao, L. Di, Y. Bai, B. Guo, and J. Gong

Estimation of soil moisture from multi-polarized SAR data over wheat coverage areas..........................................................G. Yang, Y. Shi, C. Zhao, and J. Wang

Retrieving and Assessing Land Surface Temperature from ASTER Data..........................................................G. Yang, Y. Shi, and J. Wang

Analysis of arable land change and its impact on rural sustainability in coastal region of Jiangsu Province, China.................................................................Z. Chao, Y. Ji, and Y. Yang

Evaluation of interpolation models for rainfall erosivity on a large scale......L. Ma, X. Chi, and C. Zuo

Agricultural irrigation impacts on land surface parameters detected from satellite data products in Northern China.................................................................X. Zhu, P. Shi, and Y. Pan

A New Method for Burnt Scar Mapping Using Spectral Indices Combined with Support Vector Machines.................................................................F. Ding, X. Zhang, P. Fan, and L. Chen

Investigating Temperature Variability in the Trinidad Island Due to Urban Growth.................................................................R. Shrestha and L. Di

Assessing Temperature Variability in Trinidad Island Using Granger’s Casualty Test.
A study on the noise impacts of island wind plant based on GIS spatial analysis.................Y. Mou
Study on the Landscape Pattern Characteristics of the Qinghai-Tibet Plateau Based on GIS.................R. Zhao, J. Liu, and X. Qian
Development of a gridded dataset of annual irrigation water withdrawal in China.................X. Zhu, P. Shi, and Y. Pan
Detecting Floodplain Inundation Frequency Using MODIS Time-series Imagery.........................C. Huang, J. Wu, Y. Chen and J. Yu
Winter Wheat Acreage Estimation and Assessment in China Based on FY-3A/MERSI Vegetation Index Time Series Data........................................Y. Qian, Y. Cao, L. Han, C. Wang, W. Wang, and L. Cheng
A comparative study on wheat leaf area index by different measurement methods..........................................................R. Zhang, J. Ba, Y. Ma, S. Wang, J. Zhang, and W. Li
Monitoring biomass of water hyacinth by using hyperspectral remote sensing......................................................J. Wang, L. Sun, and H Liu
Study on farmers' selection of farmland ecological compensation mode and its relevant factors—a case of 383 households in Wuhan City..........................................................X. Yang and Y. Cai
An experimental study on paddy soil moisture inversion based on emissive hyperspectra........................Q. Huang, J. Luo, and Z. Shi
Evaluation of External Benefits in Rural-Urban Land Conversion in HongShan Distract of Wuhan City..........................................................X. Yang and Y. Cai
Climate Variability and the Daily Agroecosystem Forecasting Accuracy Plateau..........................................................K. Baker and R. Nogueira
A Review of Crop Identification and Area Monitoring based on SAR Image ...... Y. Ding and Z. Chen
A RS/GIS-Based System for Monitoring Weed Disasters ........................................... L. Sun and Z. Zhu
An RS Image-Fusion Method of Farmland Fertility Remote Sensing ................. L. Sun and Z. Zhu
Estimation of Cotton Yield Based on Net Primary Production Model in Xinjiang, China .............................................................. X. Jin and X. Xu 420

Study of Migration Model Based on the Massive Marine Data Hybrid Cloud Storage ............................................................... Y. Du, Z. Wang, D. Huang, and Jiang Yu 424

Design a Multi-scale Fuzzy Sampling Model for the Quality Inspection of Massive Ocean Data.................................................. Z. Wang, D. Huang, J. Wang, and Y. Du 437

Application of Microwave Vegetation Index (MVI) to Monitoring Drought in Sichuan Province of China........................................................... Y. Wang, J. Shi, Z. Liu, and W. Liu 462

Ant Colony Optimisation based Land Use Suitability Classification ................................................................................................. J. Yu, Y. Chen, J. Wu, and C. Huang 468

Recognition of Corn Acreage in Jilin Province Based on Mixed Pixels Decomposition ................................................................. J. Liu, L. Wang, Y. Huang, F. Yang, D. Li, and X. Wang 474

Image Change Detection Based on Cross-correlation Coefficient by Using Genetic Algorithm ................................................................. Y. Pu, Q. Xu, and W. Wang 479

Spatial Distribution of Groundwater Nitrate Nitrogen IN the Agricultural Area of Shandong Province .................................................................. L. Wang, J. Liu, D. Li, H. Deng, and X. Wang 484

Optimal design of spatial sampling schemes for winter wheat sown area estimation ........................................................................ D. Wang, Z. Chen, Q. Zhou, and J. Liu 496

Mapping the rain use efficiency of maize under three management practices on the Chinese Loess Plateau ............................................................................ J. Ye, F. Zhang, and G. Sun 502

The Application of China-CGMS in the Main Crop Growth Monitoring in Northeast China ................................................................. Q. Huang, W. Wu, F. Teng, D. Li, J. Ren, and H. Deng 507

Influence of Scale Variation on Regional precision of Rape acreage Remote Sensing Monitoring

D. Li, J. Liu, Q. Zhou, L. Wang, and Q. Huang 592

Comparison of Area Estimators for Land Cover Using Simulated Data

Y. Li, G. Sun, J. Gu, and J. Zhang 597

Decision System for Recommended Fertilization and Nutrient Management in Farmland

Y. Liu, and L. Jiang 602

Wheat acreage detection by extended support vector analysis with multi-temporal remote sensing images

Zhu, W. Zhou, J. Zhang, and G. Shuai 607

Automatic Division for Pure/mixed Pixels based on Probabilities Entropy and Spatial Heterogeneity

S. Cao, Q. Yu, and J. Zhang 611

An Automatic Registration Method for Multitemporal Remote Sensing Images using Land Cover Patches in Rural Regions

S. Cao, Q. Yu, and J. Zhang 615

A new method of spatialization of crop area statistical data supported by remote sensing technology

J. Ren, Z Chen, X. Liu, and H. Tang 619

Mapping farmland organic matter using HSI image and its effects of land-use types

X. Gu, Y. Dong, and K. Wang 624

Detection of the Pomegranate Fruits On Tree Using Image Processing

C. Akin, M. Kirci, E. Gunes, and Y. Cakir 628

Multispectral Remote Sensing Image Change Detection Based on Markovian Fusion

Q. Xu, Y. Pu, W. Wang, and H. Zhong 632

Hidden Markov Models for Corn Progress Percents Estimation in Multivariate Time Series

A new land cover classification based stratification method for area sampling frame construction

C. Boryan, and Z. Yang 643

Discovery of Agriculture Data using Federated Catalogue Service

H. Wang, Y. Shao, L. Di, and L. Kang 649

Bioenergy production potential on marginal land in Canada

T. Liu, S. Kulshreshtha, T. Huffman, B. McConkey, M. Green, Z. Ma, J. Liu, Y. Du, and J. Shang 654

Research on Flood Submergence Analysis System Based on ArcEngine Component Library

D. Ma, N. Ding, J. Wang, and J. Cui 660

Comparing Two Measuring Methods of Soil Microtopography

Zongnan Li, Zhongxin Chen 664
