2012 Information Security for South Africa

(ISSA 2012)

Johannesburg, Gauteng, South Africa
15 – 17 August 2012
# TABLE OF CONTENTS

A Sample of Digital Forensic Quality Assurance in the South African Criminal Justice System ................................................. 1  
  J. Jordaan  

Android Botnets on the Rise: Trends and Characteristics ........................................................................................................ 8  
  H. Pieterse, M. Olivier  

Geo-Spatial Autocorrelation as a Metric for the Detection of Fast-Flux Botnet Domains .......................................................... 13  
  E. Stalmans, S. Hunter, B. Irwin  

Strategies for Security Measurement Objective Decomposition .................................................................................................. 20  
  R. Savola  

A Model for Partially Asynchronous Observation of Malicious Behavior .................................................................................... 28  
  M. Seeger, S. Wolthusen  

Social Media Security Culture: The Human Dimension in Social Media Management ................................................................. 35  
  C. Oehri, S. Teufel  

The Enemy Within: A Behavioural Intention Model and an Information Security Awareness Process ........................................... 40  
  T. Gundu, S. Flowerday  

Information Confidentiality and the Chinese Wall Model in Government Tender Fraud .............................................................. 48  
  S. Rama, S. Flowerday, D. Boucher  

Gamifying Authentication ........................................................................................................................................................................ 56  
  C. Kroeze, M. Olivier  

Towards Achieving Scalability And Interoperability In A Triple-Domain Grid-Based Environment (3DGBE) ........................................... 64  
  N. Azeez, I. Venter  

Harmonised Digital Forensic Investigation Process Model .......................................................................................................... 74  
  A. Valjarevic, H. Venter  

Assessing Information Security Culture: A Critical Analysis of Current Approaches ................................................................. 84  
  I. Okere, M. Carroll, J. Niekerk  

Claimed vs Observed Information Disclosure on Social Networking Sites ............................................................................. 92  
  P. Ntlatywa, R. Botha, B. Haskins  

ATE: Anti-malware Technique Evaluator .......................................................................................................................................... 98  
  M. Corregedor, S. Solms  

Properties of a Similarity Preserving Hash Function and their Realization in sdhash ........................................................................ 106  
  F. Breitinger, H. Baier  

Filtering Spam E-Mail with Generalized Additive Neural Networks ............................................................................................ 114  
  T. Toit, H. Kruger  

Tag Group Authentication Using Bit-Collisions ............................................................................................................................. 122  
  X. Leng, G. Hancke, K. Mayes, K. Markantonakis  

Measuring Semantic Similarity Between Digital Forensics Terminologies Using Web Search Engines ......................................... 130  
  N. Karie, H. Venter  

Remote Fingerprinting and Multisensor Data Fusion ...................................................................................................................... 139  
  S. Hunter, B. Irwin, E. Stalmans, J. Richter  

The Use Of Computer Vision Technologies To Augment Human Monitoring Of Secure Computing Facilities ............................................ 147  
  M. Potgieter, J. Niekerk  

Guidelines for Procedures of a Harmonised Digital Forensic Process in Network Forensics .................................................. 153  
  G. Sibiya, H. Venter, S. Ngobeni, T. Fogwill  

A Conceptual Model For Digital Forensic Readiness ................................................................................................................... 160  
  A. Pooe, L. Labuschagne  

On Privacy Calculus and Underlying Consumer Concerns influencing Mobile Banking Subscriptions ........................................ 168  
  K. Njengia, S. Ndlovu  

On Forensics: A Silent SMS Attack ........................................................................................................................................... 177  
  N. Craft  

A Network Telescope Perspective Of The Conficker Outbreak ..................................................................................................... 181  
  B. Irwin  

On Anonymizing Social Network Graphs ...................................................................................................................................... 189  
  A. Kayem, A. Deshai, S. Hammer
